| COLLECTING REVENUE FROM SALES OF PUBLIC LANDS.                                                                                                                                                                     |                                                                                  |                                                                   |                                                                       |
| Salaries and commissions of register and receivers. (See detail herewith. See note 1.)                                                                                                                             |                                                                                  | \$397,200 00                                                      | \$391,200 00                                                          |
| Incidental expenses of the several land offices. (See detail herewith. See note 2.)                                                                                                                                |                                                                                  | 40,175 00                                                         | 39,275 00                                                             |
| Expense of depositing public moneys.                                                                                                                                                                               | \$10,000 00                                                                      | 10,000 00                                                         | 10,000 00                                                             |
| NOTE 1.—This estimate is for a larger amount than that appropriated for the fiscal year ending June 30, 1872, owing to the opening of an additional land office.                                                   |                                                                                  |                                                                   |                                                                       |
| NOTE 2.—This estimate is for a larger amount than that appropriated for the fiscal year ending June 30, 1872, owing to the opening of an additional office, and the great amount of business transacted at others. |                                                                                  |                                                                   |                                                                       |

WILLIS DRUMMOND, *Commissioner.*

DEPARTMENT OF THE INTERIOR,  
General Land Office, October 2, 1871.

*Detailed estimate of amount required for salaries and commissions of registers and receivers, and incidental expenses of the several land offices during the fiscal year ending June 30, 1873.*

| State.           | Land office.         | Salaries and commissions. | Incidental expenses. | Total.   |
|------------------|----------------------|---------------------------|----------------------|----------|
| Alabama.....     | Huntsville.....      | \$6,000                   | \$400                | \$18,700 |
|                  | Montgomery.....      | 6,000                     | 900                  |          |
|                  | Mobile.....          | 5,000                     | 400                  |          |
| Arizona.....     | Prescott.....        | 3,000                     | 400                  | 3,400    |
| Arkansas.....    | Dardanelle.....      | 6,000                     | 500                  | 26,120   |
|                  | Harrison.....        | 6,000                     | 500                  |          |
|                  | Little Rock.....     | 6,000                     | 600                  |          |
|                  | Camden.....          | 6,000                     | 500                  |          |
| California.....  | San Francisco.....   | 6,000                     | 900                  | 50,200   |
|                  | Sacramento.....      | 5,000                     | 500                  |          |
|                  | Marysville.....      | 6,000                     | 900                  |          |
|                  | Humboldt.....        | 6,000                     | 900                  |          |
|                  | Susanville.....      | 6,000                     | 900                  |          |
|                  | Stockton.....        | 6,000                     | 500                  |          |
|                  | Los Angeles.....     | 5,000                     | 500                  |          |
|                  | Visalia.....         | 6,000                     | 900                  |          |
| Ohio.....        | Shasta.....          | 6,000                     | 900                  | 2,350    |
|                  | Chillicothe.....     | 2,000                     | 350                  |          |
| Indiana.....     | Indianapolis.....    | 1,500                     | 300                  | 1,800    |
| Missouri.....    | Boonville.....       | 6,000                     | 500                  | 19,500   |
|                  | Ironton.....         | 6,000                     | 500                  |          |
|                  | Springfield.....     | 6,000                     | 500                  |          |
| Mississippi..... | Jackson.....         | 6,000                     | 600                  | 6,600    |

| <b>Total.</b>                                                                                                                                                                                                                                            |                                 |                                                                                  | 209, 400                                                          |                                                                       |

## EXPLANATION OF THE FOREGOING ESTIMATES.

\* The organic act of this surveying district provides \$2,500 for clerk hire and \$1,000 for contingent expenses. These amounts being inadequate, the present estimates are submitted as absolutely required for the service, involving restoration of surveying archives destroyed during the late war.

† The organic act of this surveying district provides \$3,500 for clerk hire and \$1,000 for contingent expenses. These amounts being inadequate, the present estimates are submitted as absolutely required for the service.

‡ The organic act of this surveying district provides \$6,300 for clerk hire and \$1,000 for contingent expenses. These amounts being inadequate, the present estimate is submitted as absolutely required for the service, consequent on rapid progress of the Northern Pacific Railroad calling for more extensive surveying operations in the field and office.

§ The organic act of this surveying district provides \$1,000 for contingent expenses. This amount being inadequate, the present estimate is submitted as absolutely required for the service.

|| The organic act of this surveying district provides \$6,300 for clerk hire and \$1,000 for contingent expenses. These amounts being inadequate, the present estimates are submitted as being absolutely required for the service.

¶ The organic act of this surveying district provides \$4,000 for clerk hire and \$1,000 for contingent expenses. These amounts are inadequate and the present estimates are submitted as absolutely required for the service.

\*\* The organic act of this surveying district provides \$11,000 per annum for clerk hire, and for incidental expenses not exceeding \$10,000. The intricate business under numerous laws of Congress requiring much greater amount of appropriation for clerks in the surveyor general's office than several past appropriations within the maximum of \$11,000 afforded, arrears in the preparation of the description notes of surveys for the local land offices took place to an extent calling for increased appropriation, and to bring up such arrears accumulated during eight years past, this estimate of \$20,000 is actually necessary.

†† The organic act of this surveying district provides \$1,000 for contingent expenses. This amount being inadequate, the present estimate is submitted as absolutely required for the service.

‡‡ The organic act of this surveying district provides \$4,000 for clerk hire and \$1,000 for contingent expenses. These amounts being inadequate, the present estimates are submitted as absolutely required for the service.

§§ The organic act of these surveying districts provides \$4,000 for clerk hire and \$1,000 for contingent expenses. These amounts being inadequate, the present estimates are submitted as absolutely required for the service.

||| The organic act of this surveying district provides \$6,300 for clerk hire, and \$1,000 for contingent

expenses. These amounts being inadequate, the present estimates are submitted as absolutely required for the service.

¶¶ The organic act of this surveying district provides \$4,000 for clerk-hire and \$1,000 for incidental expenses. These amounts being inadequate, the present estimates are submitted as absolutely required for the service.

\*\*\* The organic act of this surveying district provides \$1,000 for contingent expenses. This amount being inadequate, the present estimate is submitted as absolutely required for the service.

¶¶¶ The map prepared in 1862, and the engraved plates thereof, authorized by joint resolution of January 6, 1863, having proved by subsequent actual surveys during nine years to be imperfect, and not susceptible of being corrected, and, besides, the map not embracing the Territory of Alaska, acquired by subsequent treaty, this estimate is submitted in order to secure a correct map of the public domain, greatly needed for Government purposes.

¶¶¶ No appropriation having been made for the recorder's compensation for the year ending June 30, 1872, a deficiency estimate will be submitted for that purpose.

WILLIS DRUMMOND,  
*Commissioner.*

DEPARTMENT OF THE INTERIOR,  
*General Land Office, October 2, 1871.*

No. 16.—*Estimates of appropriations required for the service of the fiscal year ending June 30, 1873, by the General Land Office.*

| 24. At a rate not exceeding \$40 per lineal mile, for an estimated distance of 35 miles.                                                                     |                                 |                                                                                  | 1,400                                                             |                                                                       |

## EXPLANATION OF THE FOREGOING ESTIMATES.

- \$21,240 is estimated for the sub-divisional surveys in the southeastern, southwestern, and north-western districts, the township lines having been heretofore extended over those parts of the State.
- \$21,000 is estimated for the survey of section lines; also township and standard lines in the southern peninsula, surrounding the Okeechobee Lake, and adjoining the Caloosahatchee River.
- \$75,000 is estimated for the surveys along several railroad routes already in a state of completion, and others to be in operation by the time the appropriation will be available; also for the survey of pine lands, for which there exists considerable demand.
- \$60,000 is estimated for the extension of the lines of public surveys between the Red River of the North and the Missouri River, along the Northern Pacific Railroad route; also in the valley of the Red River of the North, in order to enable the company to avail themselves of the sections granted by Congress, and falling within the limits granted.
- \$50,000 is estimated for the extension of public surveys over the region to be traversed by the Northern Pacific Railroad, and such other portions of the Territory as are or will be settled at the time the appropriation will become available; also in mineral localities, in order to enable mining claimants to have their claims connected with the nearest corners of public surveys.
- \$60,000 is estimated for the survey of public lands within the limits of the Union Pacific Railroad already built, and for several years in operation, so that the company may select the sections granted in aid of the construction of the road; also for the subdivision of such townships as have been settled, in order to accommodate the demands of settlers.
- \$70,000 is estimated for the continuation of the public surveys in Kansas, situated in the southwestern and western parts of the State, and along the several railroad routes, some already completed.

and others in progress of completion; also in localities where actual settlements have been made requiring the subdivisional surveys.

8. \$50,000 is estimated for the extension of the lines of public surveys in the eastern part of the Territory, along the railroad grants of land made by Congress in aid of the construction of the Union Pacific, Kansas Pacific, and Denver Pacific Railroads, and in the mineral districts of the Territory; also in such other localities as are requiring surveyed lands for the accommodation of actual settlers.

9. \$40,000 is estimated for the surveys of the public lands in the northern and southeastern portions of the Territory, where actual settlements or mining operations are carried on; also along the proposed Northern Pacific Railroad route.

10. \$40,000 is estimated for the extension of the lines of public surveys east of the Rio Grande del Norte, along the projected railroad route near the thirty-second parallel of north latitude; also for the surveys in mineral regions of the Territory, to enable miners to have their claims connected with the nearest corners of the public surveys.

11. \$70,000 is estimated for the survey of public lands over finally confirmed claims, where no survey is requested to be made within ten months from July 23, 1866; also for the extension of the lines of the public surveys over mineral portions of the State and within the limits of the several railroad grants traversing the State, some of which have already been completed and are awaiting surveys in order to enable the companies to select the quarter sections.

12. \$70,000 is estimated for the extension of the public surveys on the Columbia River, along the Northern Pacific Railroad, and on the belt of country falling within the grants to other railroads and wagon roads; also in the regions already settled by pre-emptors awaiting the surveys to enable them to file proofs of their settlement and cultivation.

13. \$70,000 is estimated for the survey of the public lands in the eastern part of the Territory, along the Northern Pacific Railroad, and in other localities where settlements have been made; also in the regions lying west of the Cascade, covered by dense forests, in order to protect the timber from spoliation.

14. \$16,000 is estimated for continuing the surveys of the public lands within the limits of the Union Pacific Railroad, already completed, and for the extension of the lines of public surveys to the mineral localities and other parts of the Territory where settlements exist.

15. \$50,000 is estimated for the extension of the lines of public surveys along the Union Pacific Railroad, to enable the company to select the granted sections, and in the southern and western portions of the State particularly adapted for stock-raising; also in the mineral regions of the State, and such other parts thereof already settled by enterprising communities awaiting the surveys.

16. \$50,000 is estimated for the extension of the lines of public surveys over the agricultural, grazing, and mineral lands, and within the land grant to the Union Pacific Railroad Company, whose road has already been completed, and who are awaiting the surveys so that granted sections can be made available; also for the survey of localities where actual settlements exist.

17. \$25,000 is estimated for the continuation of the surveys of public lands in the Territory south of Gila River, in the vicinity of Arizona City; along Colorado River, near Fort Mohave, where several hundreds of farmers are reported to have made settlements; in the eastern part of the Territory, where the line of the Atlantic and Pacific Railroads will intersect the eastern boundary.

18. A portion of this boundary was surveyed in 1863, under the joint action of California and Nevada. The progress of public surveys north of Lake Bigler has developed data which leads this office to suppose that there are serious inaccuracies in the survey of this line. As to the portion southeast of Lake Bigler, which was surveyed to the 103d mile from the lake, it was not considered by the astronomer himself as definitely established. (For a more detailed statement see Annual Report, under head "Eastern Boundary of California.")

24. These surveys are necessary in order that the inhabitants of the respective jurisdictions, of which the boundaries enumerated are the legal limits, may know to which their rights of citizenship pertain; that the public surveys may be closed upon an established line, thus securing the stability of titles subsequently acquired through the sale of public lands, and for various purposes connected with the economy and convenience in the public surveys.

WILLIS DRUMMOND,  
*Commissioner.*

DEPARTMENT OF THE INTERIOR,  
*General Land Office, October 2, 1871.*

No. 17.—*Statement of confirmed Indian pueblo grants and private land claims in New Mexico.*

\* The claim of Casa Colorado is numbered 29 in the act of confirmation, but in the corrected list of private claims (see letter of surveyor general of January 12, 1858) is numbered as above.

† The claim of E. W. Eaton is numbered 16 in the act of confirmation, but should have been numbered 19. It seems to have been accidentally omitted in the corrected list.

; The heirs of Luis Maria Cabeza de Baca, by the act of June 21, 1860, were granted, in lieu of "Las Vegas Grandes," which they claimed, the same amount of land contained in the Las Vegas town grant, to be located by them in square bodies, not exceeding five in number. The heirs of Baca have located said grant in five square bodies, viz: Nos. 1 and 2 in New Mexico, Nos. 3 and 5 in Arizona, and No. 4 in Colorado.

WILLIS DRUMMOND,  
Commissioner.

DEPARTMENT OF THE INTERIOR, *General Land Office*, 1871.

No. 18.—Statement showing the area of the several States and Territories containing public the quantity of land which remained unsold and unswamp

# REPORT OF THE COMMISSIONER OF PENSIONS.

DEPARTMENT OF THE INTERIOR,  
*Pension Office, Washington, D. C., November 15, 1871.*

SIR: I have the honor to submit the following report of the transactions of this Bureau, for the year ending June 30, 1871:

## ARMY AND NAVY PENSIONS.

The number of original invalid pensioners added to the rolls the past year was 7,934; widows and dependents, 8,399; making, with the number previously upon the rolls, a grand total of 207,495 pensioners of all classes on the 30th of June, 1871.

The total number for the year 1870 was 198,686, being an increase of 8,769 pensioners for the present over the previous fiscal year.

The whole number dropped from the rolls during the past year, of all classes and for all causes, was 8,251. The aggregate expenditure for this roll, for the fiscal year ending June 30, 1871, was \$33,077,383 63, (which, however, represents five quarterly payments, as hereafter explained,) as compared with \$27,780,811 81 for the year 1870.

An analysis of the gain and loss of the pension roll for the past year, together with a financial exhibit for the same period, is herewith presented.

For the benefit of comparison, the condition of the pension roll and the expenditures for 1870 are first given:

| Number of pensioners. |              | Annual amount. | Expended during the year ending June 30, 1870. |                |
|-----------------------|--------------|----------------|------------------------------------------------|----------------|
| Invalid.              | { Army ..... | 86,187         | \$7,655,749 52                                 | \$9,003,913 93 |
|                       | { Navy ..... | 1,334          | 118,726 25                                     | 133,448 50     |
| Widow.                | { Army ..... | 109,552        | 14,224,664 33                                  | 18,328,306 97  |
|                       | { Navy ..... | 1,613          | 261,060 00                                     | 315,142 41     |
| Total.....            |              | 198,686        | 22,260,200 10                                  | 27,780,811 81  |

The invalid pension roll has increased and lost, during the year ending June 30, 1871, as follows:

## BY THE INVALID DIVISION.

|                                                                  | Number. | Number. | Annual amount. |
|------------------------------------------------------------------|---------|---------|----------------|
| Original army invalid claims allowed.....                        | 7,807   |         | \$491,905 80   |
| Increase army invalid claims allowed.....                        |         | 3,379   | 170,522 80     |
| Original navy invalid claims allowed.....                        | 127     |         | 11,804 00      |
| Increase navy invalid claims allowed.....                        |         | 67      | 2,995 00       |
| Total.....                                                       | 7,934   | 3,446   | 677,227 60     |
| Losses by death, re-enlistment and recovery from disability..... | 2,788   |         | 191,241 27     |
| Actual gain of invalid roll.....                                 | 5,146   |         | 485,986 33     |

The roll of widows and dependents has increased and lost for the year as follows :

## BY THE WIDOWS' DIVISION.

|                                                                   | Number. | Number. | Annual amount. |
|-------------------------------------------------------------------|---------|---------|----------------|
| Army, allowed.....                                                | 8,282   |         | \$1,116,156 00 |
| Army, increase allowed.....                                       |         | 1,816   | 58,212 14      |
| Navy, allowed.....                                                | 117     |         | 17,394 00      |
| Navy, increase allowed.....                                       |         | 7       | 288 00         |
|                                                                   | 8,399   | 1,823   | 1,194,044 14   |
| Losses by death, remarriage, and expiration of minors' pensions.. | 5,463   |         | 1,209,535 28   |
| Actual gain to widows' roll.....                                  | 2,936   |         | *15,491 14     |

## BY THE DIVISION OF 1812.

|                                                                         |     |  |           |
|-------------------------------------------------------------------------|-----|--|-----------|
| Soldiers of the war of 1812 pensioned, under the act of Feb. 14, 1871.. | 727 |  | 69,792 00 |
|-------------------------------------------------------------------------|-----|--|-----------|

\* Loss.

There were upon the roll, with the increase given above, June 30, 1871, 207,495 pensioners of all classes, the aggregate amount of whose pensions was \$22,804,994 29, and to whom was paid, during the fiscal year, \$33,077,383 63, as exhibited below :

| Pensioners of all classes.       | Number of pensioners. | Annual amount. | Paid during the year to pensioners of each class. |
|----------------------------------|-----------------------|----------------|---------------------------------------------------|
| Invalid. { Army.....             | 91,290                | \$8,141,735 85 | \$12,304,590 37                                   |

| Soldiers and widows of 1812..... | 727                   | 67,792 00      | 3,066 85                                          |
| Total.....                       | 207,495               | 22,804,994 29  | 33,077,383 63                                     |

The great increase of the amount paid for pensions during the past fiscal year (\$33,077,383 63) over that paid during the year preceding, (\$27,780,811 81), is owing chiefly to the operations of the law of July 8, 1870, making pensions payable quarterly, under which the whole amount of pension accruing between March 4, 1870, and June 4, 1871, a period of fifteen months, became due and payable within the fiscal year just closed. To meet these payments, requisitions to the amount of \$34,805,175 15, estimated sufficient to cover the pension expenditures for five quarters, were made upon the Treasury within the year. The unexpended balance of these remittances to pension agents, together with all other funds in their hands, June 30, 1871, (see C and G, appendix,) were, by decision of the Secretary of the Treasury, under the act of July 12, 1870, required to be covered into the Treasury.

The year 1871-'72 commences, therefore, with only the net amount of the appropriations for the year, \$34,500,000, available for all pension purposes. It is probable that the \$4,500,000 of this sum, appropriated for pensions to soldiers of the war of 1812, will be insufficient to meet in the payments of this class for the fiscal year.

A more specific analysis of the pension rolls made October 1, 1871, exhibits the following facts. There were then 93,941 Army and Navy invalids, and their average age will not exceed thirty-five years. This invalid roll, classified by rank and by degree of disability, shows the following result :

|                          |     |
|--------------------------|-----|
| Major generals.....      | 2   |
| Brigadier generals.....  | 12  |
| Colonels.....            | 136 |
| Lieutenant colonels..... | 204 |
| Majors.....              | 291 |

|                                             |        |
|---------------------------------------------|--------|
| Captains.....                               | 1,823  |
| First lieutenants.....                      | 1,848  |
| Second lieutenants.....                     | 1,289  |
| Non-commissioned officers and privates..... | 88,336 |

Total ..... 93,941

*Degree of disability.*

|                                           |        |
|-------------------------------------------|--------|
| Total first grade, \$25 per month.....    | 596    |
| Total second grade, \$20 per month.....   | 661    |
| Total third grade, \$15 per month.....    | 15,060 |
| Total, \$8 per month, (for privates)..... | 18,682 |
| Three-fourths, \$6 per month.....         | 18,224 |
| One-half, \$4 per month.....              | 28,997 |
| One-fourth, \$2 per month.....            | 11,592 |
| Pensioned for service; no disability..... | 129    |

Total ..... 93,941

The following table shows the number on the invalid roll who have lost limbs in the service:

|                              |       |
|------------------------------|-------|
| Both arms and both legs..... | 1     |
| One arm.....                 | 5,006 |
| Both arms.....               | 30    |
| One leg.....                 | 4,627 |
| Both legs.....               | 42    |
| One arm and one leg.....     | 21    |

Total ..... 9,727

The number who have availed themselves of the benefits of the act of June 30, 1870, providing for the issue of artificial limbs or commutation therefor, are 8,918, to whom were issued as follows: Arms in kind 104, commutation 4,067; legs in kind 1,117, commutation 3,114; feet 5, commutation 51; apparatus for resection 22, commutation 538; total, 9,018.

The growth of the pension rolls during the last decade is exhibited below.

| Fiscal year ending June 30. | INVALID.                            |                                      |                                             | WIDOWS AND DEPENDENT RELATIVES.     |                                         |                                                         |
|-----------------------------|-------------------------------------|--------------------------------------|---------------------------------------------|-------------------------------------|-----------------------------------------|---------------------------------------------------------|
|                             | Added to the roll during each year. | On the roll at the end of each year. | Deaths, disability ceased, and re-enlisted. | Added to the roll each fiscal year. | On the roll at end of each fiscal year. | Deaths, remarriage, and expiration of minors' pensions. |
| 1861.....                   |                                     | 4,337                                |                                             |                                     | 4,399                                   |                                                         |
| 1862.....                   | 419                                 | 4,341                                | 415                                         | 178                                 | 3,818                                   | 659                                                     |
| 1863.....                   | 4,122                               | 7,821                                | 642                                         | 3,776                               | 6,970                                   | 624                                                     |
| 1864.....                   | 17,053                              | 23,479                               | 1,395                                       | 22,456                              | 27,656                                  | 1,770                                                   |
| 1865.....                   | 15,316                              | 35,890                               | 2,815                                       | 24,959                              | 50,106                                  | 2,509                                                   |

\*Includes soldiers war of 1812, (737.)

The invalid roll has not yet reached its maximum, for the losses by death and ceasing of disability do not yet equal the gain from original cases.

The total number of original invalid claims received during the year is 9,553. The total number admitted during the year is 7,934, making an excess of receipts over disposals of 1,619.

The total number of original invalid cases now on file, in which no conclusion has yet been reached, is 33,182. The biennial epoch of 1871 has been marked by an extraordinary number of applications for increase of invalid pension.

The total number of applications for increase for the past year was 7,574. The character of many of these applications, and that also of many of the old pending claims, is such as to impose on this office a vast amount of labor and requires the greatest caution in their consideration.

As we recede from the war of the rebellion, many disabilities, in their nature temporary, are disappearing by recuperative energies, and the pensioner, reluctant to lose his gratuity, oftentimes tries to fortify himself by evidence, which only consumes the time and labor of the office to no purpose. In many of the later applications for original pension, it is often a matter of extreme doubt whether the disability at this distant period from the war actually had its origin in the service, so that the line of demarkation between duty to the Government and justice to the soldier is difficult to find.

#### WOUNDS AND INJURIES—DISEASES.

Herewith, (appendix, marked A,) I present a tabulated list of disabilities or diseases covering the whole number of invalid pensioners paid by the United States. They afford studies of interest to the statistician, and from them might be deduced much that is valuable to the Government in determining the diseases and wounds incident to war, and the law of the lapse of pensions. This is the first extended attempt in this direction, and though imperfect, it will afford a basis and a guide for more thorough effort and substantial results in the future.

The disabilities are presented in two great classes, injuries and diseases, the former of which is presented in Table A, and the latter in B. In the injuries are included all the forms incident to the life of a soldier, but so largely preponderant are gun-shot wounds, that practically they might have been so classed.

To have separated and presented them in groups, would have involved a greater expenditure of time and labor than would have been warranted by the object sought; and since a gun-shot wound is an "injury," while an injury may not be a gun-shot wound, it was thought best to class them all under the head of injuries, and to group them, not by the nature of the injury, but by the region of the body injured. In many instances it was difficult to determine the group to which a particular injury belonged, as often, for instance, a gun-shot wound involved both a limb and the body, and so absolute precision cannot be claimed. In the main, however, what is set forth is fact, and is as precise as such matter will permit.

The whole number of cases shown in Table A is 76,469, and in Table B 15,816, the aggregate being 92,285. The injuries are to the diseases 43 to 1. Generally, to say that the number of persons paid by the United States for disabilities resulting from gun-shot wounds is as 5 to 1 of those paid for disabilities caused by diseases, would be true.

Further analysis of Table A shows that there are on the rolls—

|                                                                        |            |
|------------------------------------------------------------------------|------------|

| Chest.....                                                             | 1 to 18.17 |
| Abdomen.....                                                           | 1 to 11.81 |
| Spine.....                                                             | 1 to 77.77 |
| Shoulder.....                                                          | 1 to 20.02 |
| Arm.....                                                               | 1 to 5.67  |
| Hand.....                                                              | 1 to 8.29  |
| Thigh.....                                                             | 1 to 8.35  |
| Leg.....                                                               | 1 to 6.21  |
| Foot.....                                                              | 1 to 34.53 |

The whole number of amputations is to the number of injuries as 1 to 10.16, or approximately (again) as 1 to 10.

|                                                      |              |
|------------------------------------------------------|--------------|
| The proportion of amputations of one hand is as..... | 1 to 58.17   |
| both hands.....                                      | 1 to 1745.20 |
| one arm.....                                         | 1 to 2.05    |
| both arms.....                                       | 1 to 272.69  |
| one leg.....                                         | 1 to 2.13    |
| both legs.....                                       | 1 to 242.39  |
| one foot.....                                        | 1 to 73.94   |
| both feet.....                                       | 1 to 793.28  |
| leg and arm.....                                     | 1 to 545.37  |

The disabilities shown in Table B are classified and named by the system of classification and nomenclature of diseases now in ordinary use. In them, as in grouping the injuries, some difficulty is incurred in particular cases to determine the class to which they belonged; but in the diseases, as in the injuries, it is believed the facts are presented in the main as they exist.

|                                                                                   |            |
|-----------------------------------------------------------------------------------|------------|
| The proportion of diseases of the brain and nerves to the whole number is as..... | 1 to 10.32 |
| Digestive system.....                                                             | 1 to 4.44  |
| Respiratory system.....                                                           | 1 to 6.75  |
| Genito-urinary system.....                                                        | 1 to 33.37 |
| Circulatory system.....                                                           | 1 to 11.20 |
| Fibrous bony, and, muscular system.....                                           | 1 to 7.04  |
| Absorbent and excretory system.....                                               | 1 to 6.25  |
| From miscellaneous causes.....                                                    | 1 to 21.40 |

The marked feature of the table is seen in the exceedingly large ratio of the cases of chronic diarrhœa, which are more than 75 per cent. of all

the diseases of the digestive system, and more than 20 per cent. of all the disabilities resulting from disease.

The next disability in numerical order, as shown by the table, results from disease of the eye, and constitutes about 11 per cent. of all. Under this heading are included all the ordinary diseased conditions to which the eye is subject, amaurosis, iritis, cataract, &c.

Under the head of chronic rheumatism 1,385 cases are shown. These constitute about 9 per cent. of all the disabilities. The number of cases of phthisis is 1,045, or about 6 per cent. of all.

These four disabilities, chronic diarrhœa, disease of eye, chronic rheumatism, and phthisis, aggregate 7,457 cases, or about 50 per cent. of the entire number of disabilities.

The whole number of pensioners paid on account of hernia is 3,183. This is to the whole number paid for injuries as 1 to 23.29, or 4.29 per cent.

It is not improbable that a considerable proportion of these cases are fraudulent, despite the extraordinary care exercised to prevent their enrollment. Still it must be remembered that this is an injury to which a soldier is peculiarly liable.

There are many other points of view from which both these tables might be profitably analyzed, but as in this attempt at analysis no effort has been made at any scientific or professional deductions, it is respectfully submitted in the hope that it may serve the purpose for which it was intended, viz: to give a general view of the disabilities on account of which the Government of the United States pays its thousands of pensioners.

#### WIDOWS AND DEPENDENTS.

The whole number of unadjudicated claims of widows, children, and dependent relatives on file at the close of the fiscal year 1870, was:

|                                    |                |
|------------------------------------|----------------|
| Under the late war, Army acts..... | 32, 580        |
| Under the old war, Army acts ..... | 2, 179         |
| Under all Navy acts.....           | 819            |
| Total .....                        | <u>35, 578</u> |

To the above claims there were added during the last year:

|                                |               |
|--------------------------------|---------------|
| Under late war, Army acts..... | 9, 462        |
| Under old war, Army acts.....  | 134           |
| Under all Navy acts.....       | 186           |
| Total .....                    | <u>9, 781</u> |

Of all claims filed there were finally adjudicated during the year:

|                                               |               |
|-----------------------------------------------|---------------|
| Under the late war, Army acts, admitted ..... | 8, 150        |
| Under the late war, Army acts, rejected ..... | 1, 169        |
| Under the old war, Army acts, admitted.....   | 132           |
| Under the old war, Army acts, rejected .....  | 37            |
| Under all Navy acts, admitted .....           | 117           |
| Under all Navy acts, rejected .....           | 25            |
| Total admitted.....                           | 8, 399        |
| Total rejected.....                           | 1, 231        |
| Total disposed of.....                        | <u>9, 630</u> |

The whole number of claims on file at the close of the last fiscal year was:

|                                |               |
|--------------------------------|---------------|
| Under late war, Army acts..... | 32,591        |
| Under old war, Army acts ..... | 2,144         |
| Under all Navy acts.....       | 862           |
| <b>Total .....</b>             | <b>35,597</b> |

With regard to the old war claims, it should be stated that many of them will never be further prosecuted, and few admitted; steps have been taken to eliminate them from the regular files.

There are 114,690 Army and Navy widows and dependents on the rolls, divided as follows:

Minors, pensioned in their own right, 31,654, all of whose pensions will expire by limitation by 1880-'81. Minors of officers, 1,056.

Dependent mothers, 22,654; fathers, 1,913, whose average age appears to be forty-eight years; and dependent brothers and sisters, 80.

Widows, 34,088, with 71,734 children, and 23,245 without any children, and whose average age appears to be thirty-three years.

The roll of widows and dependents, as far as annual rates are concerned, has reached its maximum. There are active causes operating to reduce this roll, such as the remarriage of widows, and minors reaching the age of sixteen years.

For the first time since the pension act of 1862 was passed, more claims have been disposed of by this division of the office than were received during the year. And unless new legislation should materially change the ratio of new claims, the reduction will now proceed with increasing rapidity.

#### THE AVERAGE PENSION.

An examination of the rolls develops the following facts as to the average pensions:

The invalid army roll averages \$8 92 per month; widows and dependents, \$12 65.

Navy invalids, \$9 10; Navy widows, \$15 40. The average pension for all classes, \$10 99.

As a total pension for a private is but \$8 per month, this rating appears extraordinary, and the result was unexpected.

The solution of this problem, so far as the invalid Army and Navy pensions are concerned, lies in the act of June 6, 1866, which establishes the most liberal rates for serious disabilities; and those entitled have not been slow to avail themselves of this generous beneficence.

As provided by this act there are no less than 15,060 of the third grade (\$15 per month) already on the rolls.

The high average of widows' pensions is explained by the liberal provisions of the act of July 25, 1866, which grants \$2 per month additional for each child under sixteen years of age.

#### NAVY FUND—THE RIGHT OF CERTAIN NAVY OFFICERS TO PENSIONS UNRECOGNIZED.

Navy invalid pensioners have heretofore been paid under the act of July 17, 1862, (United States Statutes, vol. 12, page 607,) out of the Navy pension fund, without any appropriation. The passage of the act of July 11, 1870, (United States Statutes, vol. 16, page 222,) requires the Secretary of the Navy to submit to Congress annually, an estimate of

the claims and demands chargeable to this fund, and that no further payments shall be made therefrom, except upon appropriations made by Congress. There will, therefore, be no further reference to the condition of the Navy pension fund in the annual reports of this Bureau.

The act of July 14, 1862, and the acts supplementary thereto make no provision for the following officers of the naval service, their widows, &c., these ranks having been created by acts passed subsequently to that of July 14, 1862, viz: Admiral, vice-admiral, rear-admiral, commodore, ensign, and secretary to admiral and vice-admiral. I would, therefore, recommend that the right of these officers to pension be recognized by statutory provision.

#### PENSIONS OF THE WAR OF 1812.

Prior to the passage of the act of February 14, 1871, there were comparatively few of the survivors of the war of 1812 upon the pension rolls. Congress, by the very liberal terms of the act mentioned, has materially changed the requirements necessary to secure pension; and a consequent very large increase of this roll has followed. Under this act the survivors of the war of 1812 are treated as a distinct class in this office, and not merged in the general roll. That you may have a correct understanding of the magnitude of this work now being performed in this Bureau, and be able to reach some definite conclusion as to its cost to the Treasury, I have subjoined tabular statements, exhibiting such facts as are deemed of importance, and have extended them to a period (October 15, 1871) beyond the closing of the fiscal year. These exhibits present the number of applications received, the number admitted, the rejections and the cause of rejection, the estimated number of survivors and the approximate estimate, founded upon the best attainable data, of the total cost of this special branch of the pension service.

*Statement showing the admissions and rejections of claims under the act of February 14, 1871, from the organization of the division of 1812 to October 13, 1871.*

| SURVIVORS. |            |           |        |           |           |        | WIDOWS.   |            |           |        |                               |

| Total.....                                                       | 534        | 202     | 736    |

*Statement showing the probable amount required to pay all pensions granted under the provisions of the act of February 14, 1871.*

|                                                                                  |                 |
|----------------------------------------------------------------------------------|-----------------|
| Total number of enlistments of all kinds.....                                    | 527,654         |
| Total number who served 60 days and longer.....                                  | 296,916         |
| Number now surviving, (by comparison with results under revolutionary acts)..... | 40,133          |
| Less rejections, 16½ per cent, (estimated).....                                  | 6,689           |
| Total number of pensioners, (estimated).....                                     | 32,444          |
| Their average age at passage of act .....                                        | 79 years.       |
| Expectation of life, (Carlisle, Encyclopædia Britannica, page 560)...            | 5.81            |
| Average amount paid each pensioner.....                                          | \$557 76        |
| Amount required.....                                                             | \$18,095,855 44 |

The percentage of rejections is enlarged over that shown in Table First, to include the increased number rejected by reason of the death of claimants, which, as time elapses, will more rapidly occur.

By the result of the labor of this division to this date, (October 14th,) it is believed that the whole work can be completed in eighteen months, requiring, in all, twenty-four months, from the organization of the division in May, 1871, when it is probable that the remnant of the work, can, without detriment to other interests, be merged in that of the regular force of the Bureau.

#### REVOLUTIONARY PENSIONS.

There are no longer any surviving revolutionary soldiers borne upon the pension-rolls.

Of widows of revolutionary soldiers, who were married prior to January 1, 1800, there were on the pension-rolls June 30, 1871, 49; of those married subsequent to January 1, 1800, 585, making a total of 634.

The number in 1868 was 888; in 1869, 887; in 1870, 727; and there now remain but 634 relicts of revolutionary soldiers receiving pensions.

Widows of soldiers who served in wars subsequent to the revolution and prior to the rebellion, 1,214.

#### BIENNIAL EXAMINATIONS.

Under the act of Congress, approved March 3, 1859, invalid pensioners, with specified exceptions, are required to be examined every two years as to the continuance and degree of the disability.

This period, as fixed by law, again returned on the 4th day of September last. The results of this examination are not apparent, as the returns have not yet been received at this office. But the sound policy of biennial examinations is fully established by the experience of the Bureau, and it is believed that the aggregate results of the recent examination will exhibit a fair reduction in the invalid rolls by reason of the decrease or discontinuance of disability.

#### EXAMINING SURGEONS—MEDICAL DIVISION.

There are now upon the roster 1,354 examining surgeons. The convenience of the pensioners and professional qualifications are the requisites to be considered in making these appointments. Liberal views have prevailed in selections from the different schools of physicians, which are believed to be in nowise detrimental to the interests of the service.

The functions of such medical men as we employ pertain only to pathology, anatomy, physiology, and general surgery, and as the paths of the different schools do not diverge until they reach the consideration of remedial means and agents, so far as the purposes of this office are concerned, there need be no cause for collision.

While by far the greater number of our examining surgeons seem disposed to act with personal and professional fidelity, yet, in the appointment of so large a number, scattered over so great an extent of territory as is necessary for the convenience of pensioners, incompetent and sometimes unscrupulous men obtain the position; others are indisposed to act with zeal and thoroughness, because of the alleged insufficiency of the fee allowed by law. These causes combine to operate adversely to the character of great numbers of medical certificates returned to this office. The interests involved are the ratings of the pensioners, and the pension expenditures of the Government.

In order, therefore, to multiply the safeguards against error, ignorance, and dishonesty, which affect both the right of the pensioner and the interest of the Government, there has been established in this Bureau a Medical Division, composed of competent surgeons, whose duty it is rigidly to inspect all returned certificates and to correct and adjust all medical questions, under the supervision of the Commissioner. The system is of the utmost importance and practical utility, and deserves, and I trust will receive, legislative recognition.

The meagerness of the fees of examining surgeons has become the subject of common and well-grounded complaint. Experience is teaching this office that, if Congress does not provide a more just and adequate compensation for the professional services rendered, there is danger that this important work will fall into the hands of those who are either incompetent or seek the position from unworthy motives. The tendency is now in that direction, and some of the best surgeons of the country are only retained in the service by the personal solicitation of the Commissioner, and others, in the hope that Congress would apply the appropriate remedy.

If the high order of professional ability and personal qualification absolutely essential to a faithful performance of the duties involved are to be had, they must be paid for. The fee now fixed by law is \$1 50 for an examination of each applicant or pensioner. This, divided among three surgeons generally constituting a board, is but 50 cents each. The interests involved to the Government is a pension to the applicant for life, and sometimes, large arrears. The surgeons must leave their daily practice, go to a specified place, strip and thoroughly examine the applicant, make a written diagnosis of the case, report it to the pension agent and to this Bureau, and enter the same upon the journal they are required to keep. All this is to be done for the pittance of 50 cents to each surgeon. Experienced and competent surgeons cannot be secured for such remuneration. It is absurd to suppose it. In no other branch of the service, civil or military, is so small an allowance meted out for professional labor. The evils of the present system are indicated with the earnest hope that Congress will grant such compensation as will prevent the necessary medical examinations from passing into the hands of those utterly incompetent or unworthy.

I would recommend that for each examination by one examining surgeon there be allowed the sum of \$2. For each single examination by a board of three or less, \$1 for each member of the board present and participating in such examination. The law should expressly prohibit more than three surgeons in the organization of a board, as more than that number are cumbersome and unnecessary. For special examinations, such as may be found requisite from time to time, \$3, with reasonable mileage, should be allowed. These fees are more than 100 per cent. less than those charged by the profession for equal or similar services in their daily practice.

#### BOUNTY-LAND.

The whole number of bounty-land warrants issued during the past year was 2,598, representing 406,160 acres of land. A detailed statement of the same is here given.

| MEXICAN WAR.                  | Warrants. | Denomination. | Acres.   |
|-------------------------------|-----------|---------------|----------|
| Act of February 11, 1847..... | 2         | 160           | 320      |
| Act of 1850.....              | 2         | 80            | 160      |
| Act of March 3, 1855.....     | 2, 412    | 160           | 355, 920 |
| Act of March 3, 1855.....     | 131       | 120           | 15, 720  |
| Act of March 3, 1855.....     | 50        | 80            | 4, 000   |
| Act of March 3, 1855.....     | 1         | 40            | 40       |
| Total.....                    | 2, 598    | .....         | 406, 160 |

There have been 3,078 applications for bounty-land received during the year, and of these, 711 have been rejected upon the ground that warrants had already issued to the proper parties to the full amount to which service entitled them.

The following statement shows the number of warrants issued through a decennial period: In 1861, 5,341; 1862, 1,636; 1863, 602; 1864, 1,812; 1865, 1,161; 1866, 406; 1867, 954; 1868, 1,077; 1869, 1,650; 1870, 1,758; 1871, 2,598.

It exhibits a comparative suspension of applications during the late war, with gradually increasing activity since. Of old suspended claims unadjusted by reason of insufficient testimony, there are 63,088. It is scarcely to be expected that any considerable proportion of these can ever

be sustained by essential proof, as the evidence itself, if it ever existed, generally disappears with the death of the party interested. I regret to say that experience daily teaches us to look upon many cases, now presented, with grave suspicion. Unjust and incomplete claims are bought by unscrupulous agents, for trifling sums, and are completed by an abuse of a privilege granted by authority of the third section of the act of May 17, 1856, admitting parol evidence to establish a claim when no record evidence exists. By stringent rules and regulations this Bureau has sought to prevent these wrongs. But the only complete protection will be found in the repeal of the section to which reference has been made.

The total amount for which bounty-land warrants have been issued since the organization of the Government is 73,932,451 acres, which, estimated at \$1 25 per acre, amounts to \$92,415,563 75, as exhibited below:

|                                                                  | Number of acres.         |
|------------------------------------------------------------------|--------------------------|
| Act of September 16, 1776, Revolutionary .....                   | 2, 095, 120              |
| Act of February —, 1801, Canadian refugees .....                 | 57, 860                  |
| Scrip acts of 1830, 1832, 1833, 1835, and 1852 .....             | 2, 459, 511              |
| Act of August 10, 1790, Virginia military district, (Ohio) ..... | 3, 669, 848              |
| Act of May 6, 1812, war of 1812 .....                            | 4, 846, 240              |
| Act of March 5, 1816, Canadian volunteers .....                  | 75, 792                  |
| Act of February 11, 1847, Mexican war .....                      | 13, 207, 160             |
| Act of January 26, 1849, special .....                           | 1, 280                   |
| Act of September 28, 1850 .....                                  | 13, 165, 720             |
| Act of March 22, 1852 .....                                      | 693, 920                 |
| Act of March 3, 1855 .....                                       | 33, 660, 000             |
|                                                                  | <hr/> 73, 932, 451 <hr/> |

In addition to this amount, under the act of February 11, 1847, 2,729 certificates were issued in lieu of land-warrants, amounting to \$238,400, which makes the total aggregate value of grants \$92,653,963 75.

The aggregate amount of pensions paid by the Government from its organization (see Table I, appendix) to June 30, 1871, is \$252,670,412 77. Total amount of pensions and bounty-land, \$345,324,376 52.

#### SPECIAL INVESTIGATIONS.

There is no infallible test as to the right or justice of a pension, that can be applied in this office pending its consideration. Every compliance with law, every requirement of evidence, every condition essential to the completion of a case under the best rules and regulations that have yet been devised, may be had, and yet the claim admitted be fraudulent. The fraud must be looked for behind the papers themselves. and on the ground where they were prepared.

As suggestions leading to the detection of fraudulent pensions most generally reach this office from the vicinity of the pensioner's residence, where he is well known, it would appear that if the Commissioner was authorized to publish a list of the pensioners in the several congressional districts, or at the different agencies, each pensioner would have to confront his neighbors and the public as to his right to pension. If it was without merit, the fact would soon be disclosed. Such a policy would serve to protect and honor the deserving, and assuredly lead to the exposure of those whose claims to the charity of the Government were ill-founded or fraudulent.

I would, therefore, respectfully ask that Congress authorize the Commissioner to publish the roll of pensioners, in such manner and in such

places as shall appear to be most advantageous. If this plan be adopted, the present system, as authorized by the fourth and eighth sections of the act of July 4, 1864, should be continued as correlative thereto.

By virtue of the authority of the act above cited, systematic and determined effort has been made to prevent the consummation of intended frauds, to remedy abuses prejudicial to pensioners, and to bring to justice the guilty. A fair measure of success has been attained, and the rolls relieved of many undeserving pensioners. By means of this service three hundred and one persons have been dropped from the rolls during the year, while a still greater number are now under examination; thirty-two indictments have been found against unscrupulous attorneys and agents, nine of whom have been prosecuted to conviction; five are fugitives from justice, while other cases are still pending in the various district courts.

As a simple matter of economy the pecuniary saving to the Government very far exceeds the cost of the service, while it acts preventively by keeping the evil in check. The work of the office in this direction is growing into a definite system, with constantly increasing advantage to the Government. I earnestly recommend that at least \$50,000 be appropriated to this special service.

#### PENSION AGENCIES.

There are now fifty-eight disbursing agencies. The invalid agency in New York City has been consolidated, by Executive order, with that of the widows and dependents. One new agency has been established at Vicksburg, Mississippi, and one abolished, that at Fort Gibson, Indian Territory. No further increase of the number of agencies now seems to be demanded for the convenience of pensioners. A list of United States pension agents, corrected to November 1, 1871, will be found in the appendix.

#### ABSTRACTS OF THE DECISIONS OF THE SECRETARIES OF THE INTERIOR.—CODIFICATION OF PENSION LAWS.

There are upon the statutes no less than forty-four acts and supplementary acts relating to pensions. In some there is contrariety of provision; not unfrequently there is ambiguity of expression; and in some cases a strict construction would defeat the obvious intention of the law. These embarrassments have resulted in the fact that opposite views of certain provisions have been taken by different heads of the Bureau, and sometimes by different heads of the Department.

In view of these facts, it seems desirable that all the needful provisions of past legislation, cleared of that which is doubtful, contrary or cumbersome, should be codified into one act.

The policy of the Government to its pensioners has now become clearly established; the rulings of the Department have placed the Bureau upon a uniform course of action, and it now only remains to consolidate the scattered and confused laws in accordance with such policy and rulings, and we shall exhibit a most liberal, consistent, and uniform pension system. No additional or more liberal legislation is recommended.

I have, with great care and labor, prepared an abstract of all the decisions of the Secretary of the Interior, touching pensions and bounty-land, covering the past decennial period. It was necessary, in order to produce uniformity of action in this office. This is being supplemented

by all rulings and orders of the Commissioner, in like form, which have been scattered among the various cases of which they formed a part. When the whole is completed and in the hands of the clerical force it is believed that harmony and unity of action in the work of this Bureau will be attained.

#### STATISTICAL TABLES.

With care and labor, various statistical tables have been prepared, believed to be of great usefulness, which will be found under appropriate headings, appended to this report.

A table exhibiting the amount of pensions paid by the Government each year, from 1791 to the present time, together with marginal notes, explanatory of the fluctuating amounts, will be found in the appendix, marked I. So elaborate a pension-table, exhibiting graphically the development and growth of the Government's liberality towards its brave defenders, has never before been prepared or published.

I have also prepared a table showing the entire number of soldiers who have served in the armies of the United States, during its several wars, which will prove of essential value, and is correlative to the one above mentioned. It will be found in the appendix, marked K. Also, a table stating the number of persons who have been pensioned under special acts. It is marked L.

#### GENERAL REMARKS.

The general policy of the Bureau in the administration of the pension laws has been to adopt that liberal construction which is the manifest letter and spirit of the statutes themselves; and while forbearing to impose upon the beneficiaries of the Government any unreasonable or unwarrantable requisitions, yet, on the other hand, relaxing nothing of what the law absolutely demands, and exacting a rigid compliance with such rules and regulations as are deemed essential to guard against the admission of fraudulent or improper claims. In estimating the amount of work accomplished during the year, due consideration must be given to the fact that the labor required in the adjudication of claims has been largely increased by new legislation, repeated modifications of old acts, necessary changes in the ruling resulting therefrom, and the additional fact that many of the claims now pending are old and difficult, requiring more time and care to establish or reject them. More exacting and rigorous demands have been made of clerks in sifting testimony, in the care and promptitude with which correspondence is conducted, and in the completeness with which briefs are prepared. Taking into consideration these facts, I feel justified in the belief that at no former period was the work of this Bureau greater in amount, or more perfect in character.

There has been an increase rather than a diminution in the general business of the office. There is, however, no demand for additional force; but it is highly desirable that it remain at its present standard.

The brief period during which I have been charged with the control of this Bureau is hardly sufficient for me to have matured just estimates of all those employed in its service. I feel assured, however, that the clerks, as a body, may be justly commended for faithfulness and efficiency in the discharge of their duties. The promotions, which from time to time I have recommended, have been solely upon the ground of merit. The daily discharge of official duty is in itself a competitive

examination. The record of each clerk is faithfully kept, with consolidated monthly statements of the same. From the highest upon the roll, all things considered, the recommendations for promotions have been invariably made. I shall not depart from this policy.

I take great pleasure in saying, that in the discharge of my official duties I have had the hearty co-operation of the chief clerk and of the chiefs of the respective divisions. Their promptitude, fidelity, and conscientious performance of duty are worthy of remark in this report.

Very respectfully, your obedient servant,

J. H. BAKER,  
*Commissioner.*

Hon. COLUMBUS DELANO,  
*Secretary of the Interior.*

## APPENDIX.

## PENSION NOTARIES.

Provision is made by the third section of the supplementary pension act of July 4, 1864, for the designation of officers before whom declarations may be made in localities more than twenty-five miles distant from any place at which a court of record is held. These officers, who are known as pension notaries, must have been previously qualified, under a State or other appointment, to administer oaths, and their authority to act under a designation from the Pension Office ceases with the expiration of the term of such previous appointment. The following list includes the names of those now qualified as pension notaries:

| Name.               | Post-office address. | County.      | State.    | Commissions expire. |
|---------------------|----------------------|--------------|-----------|---------------------|
| Allen, Franklin P.  | Moore's Forks        | Clinton      | N. Y.     | Dec. 31, 1871.      |
| Billings, Abijah M. | Clinton              | Kennebec     | Maine     | Dec. 31, 1876.      |
| Burke, Jno. A.      | Rangeley             | Franklin     | Maine     | March 22, 1877.     |
| Beach, Enoe         | Masena               | St. Lawrence | N. Y.     | March 31, 1872.     |
| Beach, C. W.        | Clymer               | Tioga        | Penn.     | June 4, 1872.       |
| Beard, Niley        | North Harpersfield   | Delaware     | N. Y.     | Dec. 31, 1872.      |
| Bliss, Hiram J.     | Washington           | Knox         | Maine     | June 3, 1872.       |
| Carr, J. D.         | Sauk Center          | Stearns      | Minn.     | April 11, 1872.     |
| Coburn, A. T.       | Patten               | Penobscot    | Maine     | Jan. 14, 1877.      |
| Constock, Geo.      | Lubec                | Washington   | Maine     | Oct. 15, 1874.      |
| Chadwick, Jno. C.   | Beaufort             | Beaufort     | S. C.     | Life.               |
| Campbell, Jno.      | Ontonville           | Oakland      | Michigan  | March 29, 1875.     |
| Cooper, P. E.       | Holland              | Erie         | N. Y.     | Dec. 31, 1872.      |
| Cass, Jno. A.       | East Aurora          | Erie         | N. Y.     | March 22, 1872.     |
| Correll, E. M.      | Hebron               | Jefferson    | Nebraska. | July 8, 1875.       |
| Dudley, E. G.       | Beaufort             | Beaufort     | S. C.     | Life.               |
| Dunlap, Jno. C.     | Scotville            | Macoupin     | Illinois  | April 12, 1873.     |
| Fitch, W. R.        | Brier Hill           | St. Lawrence | N. Y.     | Dec. 31, 1874.      |
| Fernald, A. C.      | Cranberry Isles      | Hancock      | Maine     | Dec. 22, 1875.      |
| Fulton, Wm. T.      | Oxford               | Chester      | Penn.     | April 14, 1874.     |
| Flint, H. B.        | Baldwin              | Cumberland   | Maine     | Oct. 7, 1870.       |
| French, Peter.      | Sag Harbor           | Suffolk      | N. Y.     | March 29, 1873.     |
| Faulk, S. P.        | Greensburgh          | Westmoreland | Penn.     | April 10, 1876.     |
| Gebhart, Samuel.    | Williamsburgh        | Noble        | Ohio      | Dec. 13, 1876.      |
| Gardiner, O. H.     | Northport            | Suffolk      | N. Y.     | March 30, 1872.     |
| Graves, S. V. R.    | East Hamburg         | Erie         | N. Y.     | Dec. 31, 1874.      |
| Haynes, A.          | Mattawamkeag         | Penobscot    | Maine     | Jan. 18, 1872.      |
| Hilbard, I.         | Mason City           | Mason        | Illinois  | April 28, 1874.     |
| Hiser, Jonathan.    | Bushy Run            | Pendleton    | W. V.     | Jan. 1, 1872.       |
| Huntton, A. P.      | Bethel               | Windor       | Vermont   | Life.               |
| Hull, A. W.         | Forestville          | Chautauqua   | N. Y.     | March 31, 1873.     |
| Hazelton, T. J.     | Fowler               | St. Lawrence | N. Y.     | March 31, 1874.     |
| Hatch, Geo. K.      | Pembroke             | Washington   | Maine     | Aug. 30, 1877.      |
| Hoyt, A. S.         | Pondridge            | West Chester | N. Y.     | Dec. 31, 1872.      |
| Jenks, L. S.        | Gowanda              | Cattaraugus  | N. Y.     | March 30, 1874.     |
| Knapp, J. H.        | Deposit              | Delaware     | N. Y.     | March 30, 1873.     |
| Kohler, Jno. H.     | Millersburgh         | Dauphin      | Penn.     | March 30, 1873.     |
| Livermore, O. S.    | Eastport             | Washington   | Maine     | April 17, 1874.     |
| Larrabee, Jno. A.   | Carroll              | Penobscot    | Maine     | Feb. 6, 1874.       |
| Merritt, J. W.      | Glenn Cove           | Queens       | N. Y.     | March 30, 1873.     |
| Mitchell, I. L.     | Limington            | York         | Maine     | Feb. 8, 1873.       |
| Meloin, A. O.       | Sullivan             | Franklin     | Missouri  | Feb. 12, 1875.      |
| Minor, Wm.          |                      | Monongalia   | W. Va.    | Jan. 1, 1872.       |
| Moses, W.           | Caneadea             | Allegany     | N. Y.     | Dec. 31, 1872.      |
| Northrup, M.        | East Worcester       | Otsego       | N. Y.     | Dec. 31, 1871.      |
| Parsons, J. A.      | Forestville          | Chautauqua   | N. Y.     | March 30, 1873.     |

Act of February 3, 1853 allowed pensions to widows of revolutionary soldiers married after January 1, 1800; also, renewed pensions for five years to widows of soldiers in Florida and Mexican wars, war of 1812, and in Indian wars.

In 1858 the pensions to widows of soldiers, in wars subsequent to the Revolution were continued during widowhood.

Pensioners in Southern States dropped from the rolls. Act of July 14, 1862, granted pensions to invalids of the war of 1861, their widows and dependent relatives.

The rates for certain total and permanent disabilities increased in 1866 from \$8 to \$15, \$20, and \$25 per month. Pensions to widows having minor children were increased \$2 for each child. The acts of July 23, 1866, and July 27, 1868, also provided that the rates of pensions (Army and Navy) of previous acts should conform to those prescribed for the same rank in the act of July 14, 1862, and amendments thereto.

**REPORT OF COMMISSIONER OF INDIAN AFFAIRS.**

---

---

# REPORT

OF

## THE COMMISSIONER OF INDIAN AFFAIRS.

---

DEPARTMENT OF THE INTERIOR,  
OFFICE INDIAN AFFAIRS,  
*November 15, 1871.*

SIR: The duty of making the usual annual report of this Bureau having devolved upon me as Acting Commissioner, by reason of the resignation of General E. S. Parker in July last, and of the continued vacancy in the position of Commissioner of Indian Affairs up to the present time, I have the honor to present herein a summary of the affairs of this branch of the public service since the date of the last annual report.

In accordance with what is so generally known as the Indian policy inaugurated by President Grant, it has been, during the past year, the aim of the Department to secure, in the administration of affairs under its charge, the greatest good and best results practicable. Much has been accomplished by intrusting to men of good standing and moral character the responsible offices of superintendents and agents; by earnest endeavors, through conciliatory measures, rather than by force or threatenings, to promote order and the interests of peace with the more intractable and hostile-disposed tribes; by seeking to inspire the confidence of the Indians in the Government, by dealing fairly and liberally with them, and observing faithfully and promptly the treaty stipulations and provisions made by law for their benefit; and by encouraging every disposition and effort on their part to better their condition, by whatever means would tend to that end. As a result may be adduced the prevalence generally of peace with tribes who have hitherto been in open hostility to the Government; the marked and gratifying change in the views and feelings of many of their members in regard to the necessity of abandoning their roving habits, and of establishing themselves upon reservations, where they can be properly cared for and civilized; the improved state of other tribes who have long been friendly; and the efficient and judicious management, except in a very few instances, by the officers of the Department of the trusts committed to them. This condition of affairs, it is submitted, will warrant the assertion that the conduct of the service the past year has been wise, prudent, and measurably successful, and affords sufficient reason for indulging the hope of the early accomplishment of the beneficent designs of the Government toward the Indian race.

While, however, good order and peace have been maintained among most of the tribes, disturbances and outrages have occasionally occurred, which will probably be the case until the parties who originate them are brought under proper restraint and influence. A spirit of lawlessness, disaffection, and even of hostile intent, still exists among some of the nomadic tribes, which, it is not unjustly apprehended, is engendered and fostered often by white persons or citizens from sinister motives.

The Indians most difficult of management, and who have caused the greatest trouble during the past year, are certain bands of Apaches in the Territories of Arizona and New Mexico, and the Kiowas and Comanches of the Indian Territory. Those in the first-named Territory, warlike in their disposition from time immemorial, have changed but little, and most of them are still under the surveillance of the military, at whose hands they have at times suffered severely, in consequence of their numerous murders of citizens and frequent depredations. Of late, indications of a better feeling on the part of quite a large number of these Indians have been manifested, and they have expressed a desire or willingness to settle upon reservations and peaceably yield themselves to the control of the Government. A considerable body of them, in the earlier part of the year, had gathered in the vicinity of one of the military posts in the Territory for that purpose; but, unfortunately, an occurrence shortly afterward took place which, in a measure, dissipated the prospects that were becoming so favorable—aroused apprehensions that they were to be wrongfully dealt with, and led to the manifestation of a determined hostile spirit on the part of some of their leaders. I refer to the massacre, at Camp Grant, of a large number of defenseless women and children, and a few men, by an armed party of citizens of Mexican origin, and some Papago Indians, an account of which is fully set forth in the accompanying documents to this report, marked A.

The Apaches of New Mexico, more particularly those known as the Southern or Gila bands, have been very troublesome, causing, by their frequent depredations and outrages, great loss and injury to citizens of that Territory. So exasperated had these citizens become, that they determined to wage a relentless warfare against the disturbers of their peace and depredators upon their property. For this purpose an organization was effected, and resolutions passed declarative of its intentions. Better counsels, however, prevailed, as the objects and intentions of the organization have not been carried into effect, nor has any effort been made to that end. Popular feeling in New Mexico appears to be set against the noted chief of the Apaches, named Cochise, who, with his followers, in his mountain recesses and haunts difficult of access by troops, seems to have set at defiance the power exerted for his capture and subjugation. Deeming it practicable to induce this chief and his people to be friendly, strenuous efforts have been made by this Department to get him to visit Washington, but, so far, without avail. However, recent advices represent favorably his disposition to comply with the wishes of the Government—he having come in, with his followers, to a point twelve miles from Canada Alamosa, where a number of Apaches have been, for a year or two past, under the charge of an agent of this Bureau, and pledged himself to keep the peace, and to use his influence and efforts to gather all roving Apaches upon a reservation. There is now a better prospect of peace with these Apaches than ever, and it is confidently expected that the steps which are being taken to insure this result will be eminently successful.

With a view to ascertain the condition of the Apache bands both in New Mexico and Arizona, and to provide for their future by establishing them in suitable homes, under proper regulations and restrictions, Hon. Vincent Colyer, secretary of the board of Indian commissioners, by directions from you, dated 21st July last, visited these Territories; and, after some time spent in communicating with some of the chief men of the Apaches, and in examining localities that might be desirable for Indian reservations, the following places were selected by him and reported to the Department, viz: Tularosa Valley, in New Mexico, for the Mimbres and Coyo-

tero Apaches of that Territory; Camp Apache, in the White Mountains, Arizona Territory, for Coyotero and Chilcow Apaches; Camp Grant, Arizona, for Arivaypa and Pinal Apaches; and Camp Verde, in the same Territory, for the Mohave Apaches. He also requests that temporary asylums be established at Camps McDowell, Beal Springs, and Date Creek, Arizona, where the Tontis, Hualapais and western band of Mohave Apaches may be protected and fed until such time as it shall be found practicable to remove them to one of the above-named reservations. Peaceably established on the reservations indicated; afforded the means of subsistence, and provided with aids for their instruction in agriculture and other industrial pursuits, it is believed that the citizens of New Mexico and Arizona will have but few occasions for complaint against these Indians hereafter. For more particular information regarding them, reference is made to Mr. Colyer's communications respecting his mission to New Mexico and Arizona, embraced in the report of the board of Indian commissioners herewith, marked A, and to the reports of Superintendents Pope and Bendell, and Agent Piper, numbered 32, 27, and 37.

In regard to the Kiowas and Comanches, referred to as among the most troublesome of the tribes, there is but little improvement in their behavior to report. A goodly number have remained upon their reservation, and conducted themselves in an orderly way; but many of them have proved, as hitherto, false to their promises, and have come far short of the expectations indulged that they would cease their raidings and crimes. The past year has marked their history with gross outrages, and there would doubtless have been a serious war inaugurated by them but for the watchfulness of the military and the agent in charge of their agency. Lenient measures and forbearance toward these restless and war-loving spirits appear apparently to have no effect in restraining their passion for plunder and war, and a severe treatment would seem to be the only wise and proper course to pursue to compel right conduct on their part. The arrest, lately, by the military, and the trial and conviction, with a sentence of death—but which has been commuted to imprisonment for life—in a State court of Texas, of two of their prominent chiefs, guilty of murder and robbery, will, it is believed, have a salutary effect upon the tribe; and action of this character, promptly taken, can but tend to lessen greatly the number of crimes for which these Indians are notorious, if not wholly prevent them. It is a question for consideration whether a like treatment would not have the effect to deter the vicious and unlawful of other wild tribes from similar conduct; and it is suggested that all Indian agents should be instructed, upon the commission of a crime by an Indian or party of Indians under their charge, coming to the knowledge of such agents, to arrest the offender or offenders, calling upon the military for assistance, if need be, and deliver them up for trial by the proper Federal or State court having jurisdiction in the case.

A large body of Apaches, numbering, it is reported, about one thousand, ranging in the Staked Plains, Texas, not attached to any agency, and who have never been on an Indian reservation, recently sent in word that they desire to cease raiding, and to come in and be established upon the reservation for the Kiowas and Comanches in the Indian Territory. With your approbation, directions have been given to the proper agent to make arrangements necessary to that end. When this band shall have been removed from Texas, there will be but comparatively few Indians residing within the limits of that State.

Of the tribes of late years hostile and difficult to manage, but now

quiet and disposed to be friendly, are the Arapahoes and Cheyennes. No serious difficulties have arisen with them during the past year, and their conduct has been quite commendable. It is believed the visit of several of their prominent chiefs to this city last spring had a great tendency to conciliate the disaffected of the tribes, and will doubtless be productive of a better understanding of their treaty obligations, and tend to convince them that a strict and faithful compliance therewith will be to their best interests. Also of the Sioux Nation, in Dakota Territory, comprising a number of powerful bands, heretofore formidable in their opposition to the Government, it may be observed that they are in a good degree peaceable. Those upon the reservation selected for the whole nation are quiet; many of them are friendly-disposed, and evince a willingness to abandon the hunter-life and become tillers of the soil. While the Government continues to provide for the wants of the Sioux, feeding and clothing them—means by which they are kept in a better humor than they otherwise would be—no outbreak or disorder of any extent need be apprehended. Some trouble is anticipated on account of the suspicion with which some of them look upon the projected Northern Pacific Railway being run through what they claim to be their country; but as yet no decided demonstration of opposition has been made by them. The Sioux of the band under the noted chief Red Cloud have for the time being a temporary location north of the Platte River, about thirty miles south of Fort Laramie, Wyoming Territory. It is intended, when it can prudently be done, to establish them at an agency somewhere within the limits of the reservation designated for the whole nation. Part of this band, dissatisfied with Red Cloud, and refusing to recognize him as their leader, have gone into Montana, having for their chief Sitting Bull. Unless carefully managed, these seceders, reported to have eight hundred lodges, may cause great trouble to the Government. Besides these Sioux roaming in Montana, without constraint, there is another large body of them in the same Territory, living in the neighborhood of their hereditary enemies, the Gros-Ventres and Assinaboines. They were, at the massacre in Minnesota of 1862, driven from that State, belong to no agency or reservation, and claim the right to follow the buffalo wherever they can find it. By the judicious management of the Department and its officers in Montana these Indians have been thus far kept quiet. They are apparently determined to remain upon the reservation provided for the Gros-Ventres and Assinaboines, and, so long as it is expedient to allow them to be there, must be supplied with the necessaries of life, or difficulties with them will inevitably follow. It is earnestly recommended that Congress should make the requisite appropriations for their proper care and subsistence by the Department. It may be well here to give the military view as to the disposition of the Sioux Nation, and especially the wandering portions of it, and as to the care to be exercised over them. One of the highest of the authorities in that branch of the service is of the opinion that, unless the civil Department can control the Sioux, hostilities will be again renewed, which the military may not be able for the time being to repress, with the limited power at its command; and it is suggested that a conciliatory course, under the circumstances, be pursued, and a liberal provision made for the wants of these Indians.

The Indians in Kansas, Nebraska, those in the Indian country, excepting the Kiowas and others before mentioned, and in New York, Michigan, Minnesota, and Wisconsin, who have been long in contact with the whites, and under influences favorable to their advancement and civilization, occasion but little trouble to the Government, or its

citizens, by whom they are surrounded. Many are well educated, and the possessors of good, cultivated farms, and others managers of a prosperous business. A large number of those residing in Michigan and Kansas, as also the Winnebagoes in Minnesota, have become citizens, and the probabilities are that most of those remaining in Kansas and Nebraska will, in a few years, if not removed to the Indian country and there brought under a territorial form of government, become merged into the citizen population and their tribal existence be extinguished.

Other Indians, as in Oregon, California, Nevada, and the several Territories, with the exception of the wilder and unfriendly part of them, hereinbefore noted, have been quiet and peaceable; but there is no very marked change in their condition to report. A few Seninoles yet remain in Florida, and quite a large number of Cherokees yet reside in North Carolina and several of the adjacent States. Measures are now being taken to remove the latter to the country of their brethren in the Indian country west of Arkansas.

The aggregate of the population of Indians within the boundaries of the United States, including Alaska, is estimated at 350,000. By the statistics furnished, regarding those under the care of agents, it is shown that with nearly all the tribes there is a decrease in number from year to year, arising from causes so well known, and often repeated. With those most advanced in civilization there is, however, a perceptible increase. The true policy of their preservation from utter extinction, before many years pass, it is generally admitted, is to prepare them as rapidly as possible to assume the relation of citizenship; by granting them increased facilities for the education of the young; by habituating them to industrial pursuits, and by the incentive to labor incited by a sense of ownership in property, which an allotment of their lands in severalty would afford, and by the benign and elevating influences of Christian teachings.

One of the most potent agencies for the civilization of the race is that of education. The means provided under treaty stipulations, and by special appropriations by Congress, are found to be entirely inadequate for the establishment and maintenance of any larger number of schools. Where, in many cases, buildings are required to be erected for school purposes, the funds applicable are barely sufficient for that object, so that when they are furnished and operations have commenced, other requirements for a successful carrying on of the schools cannot be met, and the undertakings either prove a failure or produce results scarcely appreciable. The \$100,000 appropriated by Congress July the 15th, 1870, for educational purposes among tribes *not provided* with means therefor, has not yet been available, to any considerable extent, it being found difficult to make a satisfactory distribution of the same. Under the act appropriating said sum the money is to be expended among the tribes having no educational fund. Many of these tribes are wild and roving, without any fixed habitation where schools could be permanently established; others are opposed to schools; and others again manifest no desire to have them. In order to utilize this gift of the Government to the best possible advantage it is respectfully recommended that legislation be had by Congress giving discretionary power to the Secretary of the Interior to distribute the fund at such times and among such tribes as he shall be satisfied will produce the most beneficial results, whether the tribes have any other provision of this character or not.

Since the date of the last annual report of this office, by direction of the President of the United States, the office of several superintendents has been discontinued and the agents subordinate thereto now report

direct to the Indian Bureau. No detriment to the service has been caused by this change. The offices so discontinued number six, and a considerable sum, which was expended on account of salaries and office, incidental and traveling expenses, is thereby saved to the Government. The number of agencies, including those denominated special and sub-agencies, is at the present time seventy-four, the incumbents of which receive a compensation of \$1,500 per annum, except three in California who receive \$1,800 each, and the sub-agents, who receive \$1,000 per year.

The existing laws regulating trade and intercourse with the Indian tribes, enacted many years ago, (1834,) and which were adapted to the time and to the condition of affairs among the Indians, are judged now to be inadequate to the purpose, or are so defective as to fail to secure the Indians against the encroachments of the whites, and the introduction of evils which have so much contributed to their demoralization and led to troubles and difficulties between them and the whites. A revision of these laws is very much to be desired to meet the changed circumstances now surrounding the Indians, arising out of the building of railroads through their lands, the rapid advance of white settlements, and the claims and rights of squatters, miners, and prospecting parties; also to provide some definite course to be pursued in cases of crimes committed by Indians against Indians; to express clearly the right of citizens to trade with Indians; and to define more specifically what is to be understood now as Indian country, especially as to the application of the term to the Territories of New Mexico, Utah, and other portions of country acquired by the United States from foreign powers subsequent to the law in question. Although the laws referred to, "or such provisions of the same as may be applicable," have been, by act of Congress approved February 27, 1851, extended over the Territories mentioned, it is a point at issue between certain parties and the Department whether trade by citizens who are inhabitants of these Territories, with Indians who may come to their places of business outside of an Indian reservation, is prohibited by law. A case is now being tested upon a suit brought against the superintendent of Indian affairs for Arizona, and the agent for the Pima and Maricopa Indians in that Territory, by a firm whose goods were seized by the agent for trading with the Indians without a license issued in accordance with law.

It is gratifying to report that in some portions of the country, more particularly in Montana Territory, by the vigorous and determined action of the superintendent of Indian affairs there the traffic in spirituous liquors with the Indians has been to a considerable extent suppressed. During the year a number of persons have been arrested, tried, and convicted, for the first time in the history of that Territory, for selling liquor to Indians. In Washington Territory, also, efforts made in the same direction have been quite successful. Much credit is due to the officers who have shown such activity and zeal in this matter, and it is hoped that others may be inspired, by their example and success, to seek to accomplish like results, so that this bane to the Indian race may be greatly abated if not altogether removed.

Under the legislation of Congress appropriating money for the removal of the Kickapoo Indians, who, many years ago, left the Indian country and went to Mexico, back to the United States, steps were taken early last spring to effect that object. An agent, with a delegation of Kickapoos from Kansas, proceeded to Santa Rosa, in Mexico, and there met these Indians and communicated to them the wishes and purposes of the United States Government. The mission was, however, unsuccessful, as the Indians were influenced against the measure pro-

posed by misrepresentations on the part of some Mexican officers and citizens as to what would be their condition in the United States, and by deceiving them with assurances that the Mexican government would take care of them and liberally supply their wants. As it is important to the welfare and peace of the citizens of Texas residing near the frontier, who have suffered severely by the depredations and outrages of these Kickapoos in the past, further efforts to effect what is so desirable, it is thought, should be made early next year. For the report of the agent of his proceedings I refer to document herewith, marked B.

During the past three months Indian lands have been disposed of by sale, or are being disposed of, by or under the direction of the Department, to the extent of 40,438.89 acres in the aggregate. These lands embrace a residue of 2,687.44 acres, held in trust by the United States for the Chippewas and Munsees, situated in Kansas; also, 6,360.24 acres in Nebraska, held in trust for the Sac and Fox of the Missouri Indians. These lands are sold and the money applied for the benefit of the Indians, in compliance with treaty stipulations. A small residue of the Cherokee neutral lands in Kansas, 3,231.21 acres, which were awarded to settlers in accordance with treaty provision, but forfeited by non-payment, have been sold on sealed bids. Congress, by special act, provided for the appraisement and sale of the Stockbridge and Munsee lands in Wisconsin, comprising 28,160 acres. The appraisement has been made under the supervision of this office, and the sale is being made by the General Land Office, in accordance with the act.

In compliance with the act of Congress of July 5, 1862, a commission was appointed to effect settlement with persons appointed by Indian councils to receive money due to incompetent and orphan Indians. This commission made an investigation of the action of persons appointed by Wyandotte and Shawnee councils, the only tribes coming properly within the proviso of the law; and their reports, which give the action taken in detail, are published herewith, marked C.

A commission was also appointed to ascertain the facts connected with the applications of mixed-bloods for land or scrip under the treaties with the various bands of Chippewas in Wisconsin and Minnesota.

The province of this commission was extended to the investigation of passed issues of scrip. Reference is made of the extended report of the majority, detailing many irregularities; also to the minority report, which dissents from the statements of the majority; both of which are published herewith, marked D.

It having been represented to the Department that a confused and unsettled state of affairs, appertaining to this branch of the service, existed in Colorado Territory, particularly at the Los Pinos, or lower agency, and it being deemed necessary, in order to ascertain the truth in the case, that an examination thereinto should be made on the spot, under your direction a special agent, G. F. Jocknick, esq., was instructed, in July last, to proceed to that point for the purpose indicated. The report of this agent is herewith, marked E, and shows that the management of Indian affairs in the Territory has not been as favorable to the prosperity and advancement of the Indians as could be desired, but which finds some explanation in the fact of frequent changes of agents in the past two or three years, the inexperience of the agents at present in charge, and the many obstacles to be overcome in establishing upon reservations, and in making the necessary provision for their support, Indians accustomed to a wild and wandering life. When the new agents referred to shall have become better informed in regard to their duties, and more clearly comprehend the situation and the purposes of the Government, it is hoped a more favorable condition of things will exist, and

complaints will cease on the part of the Indians. One source of much uneasiness to the Indians is the encroachment, as they charge, of miners and other persons upon their reservation. To what extent they have reason to be troubled in this regard it is impossible to determine, as the boundaries of their reservation have never been surveyed. Doubtless there are intruders upon their land, and, perhaps, in some cases, unwittingly so. The sooner the work of surveying the reservation provided for in the treaty of 1868 is completed, the better it will be for the interests of both Indians and whites. A special report will be made to you by this office, with such suggestions and recommendations as shall be considered necessary to fulfill the treaty stipulations with the Indians in Colorado, and to effect a satisfactory management of their agencies.

It was also deemed important that an investigation should be had into the condition of affairs at the several agencies for the Sioux, on the Upper Missouri River, and accordingly a special agent, N. J. Turney, esq., in June last, was instructed to perform that duty. His report, to which reference is respectfully made, for an account of his proceedings, views and recommendations, is herewith, marked F.

The commissioners appointed by the President, in accordance with the joint resolution of Congress approved July 1, 1870, to negotiate with the Indians upon the Umatilla reservation in Oregon, with a view of ascertaining on what terms they would relinquish to the United States all their claim or right to that reservation, and remove to some other in Oregon or Washington Territory, or take lands in severalty in quantities not exceeding one hundred and sixty acres each, on their present reservation, met at the Umatilla agency on the 7th of August last, and held a council with the Indians for the period of a week, Hon. Felix R. Brunot, chairman of the board of Indian commissioners, being present, whose report of the proceedings will be found following that of the board, marked as document A. This matter is also referred to in the report of Superintendent Meacham, herewith, numbered 12; and the United States agent in charge of the Umatilla reservation reports the fact; and remarks that the object of the resolution was fully explained to the Indians by the commissioners, who took great care to have them fully understand the proposition presented, and to see that no outside influence was allowed to interfere with their judgment; and that after the matter had been fully discussed, the Indians declared they would not part with their present reservation, and that none of them expressed a desire to take their land in severalty.

Special attention is respectfully called to the third annual report of the board of Indian commissioners, herewith, marked A.

The accompanying reports of the superintendents and Indian agents, numbered in regular order, are respectfully referred to for information, in detail, respecting the condition of the Indians in the several superintendencies and agencies. The disposition for improvement is evidently more manifest and general than has been the case heretofore, and it should be encouraged by a liberal policy on the part of the Government. By a judicious management of their affairs, with a sufficient supply of means requisite for the purpose, it may be confidently expected that their future advancement in civilization will be measurably rapid and gratifying. The reports will present, it is believed, such an array of facts as will confirm this general view.

Very respectfully, your obedient servant,

H. R. CLUM,  
*Acting Commissioner.*

Hon. C. DELANO,  
*Secretary of the Interior*

# PAPERS ACCOMPANYING THE REPORT OF THE ACTING COMMISSIONER OF INDIAN AFFAIRS FOR 1871.

- A.—Report of board of Indian commissioners, with accompanying documents.
- B.—Report of John D. Miles, United States Indian agent, relative to his mission to the Kickapoo Indians in Mexico, with the view to get them to remove back to the United States; also letter from Colonel J. J. Reynolds, United States Army, relative to said Indians, and their depredations upon citizens of Texas.
- C.—Report of commissioners to effect settlements with persons appointed by Wyandott and Shawnee councils to receive money due incompetent and orphan Indians of these tribes.
- D.—Report of commissioners relative to application of mixed-blood Chippewas, in Wisconsin and Minnesota, for land or scrip, under treaties with various bands of Chippewas.
- E.—Report of Special Agent Jocknick relative to condition of Indian affairs in Colorado Territory.
- F.—Report of Special Agent Turney relative to condition of affairs at the agencies for the Sioux upon the Missouri River.

## WASHINGTON SUPERINTENDENCY.

- No. 1.—Annual report of T. J. McKenny, superintendent of Indian affairs.
- No. 2.—Annual report of E. M. Gibson, agent Neeah Bay agency.
- No. 3.—Annual report of E. Eells, agent Skokomish agency.
- No. 4.—Annual report of J. H. Wilbur, agent Yakama agency.
- No. 5.—Annual report of E. C. Cherouse, sub-agent Tulalip agency.
- No. 6.—Annual report of G. A. Henry, sub-agent Quinalt agency.
- No. 7.—School report of G. W. Byrd, Quinalt agency.
- No. 8.—Annual report of B. Barlow, farmer in charge of Puyallup reservation.
- No. 9.—School report of L. F. Thompson, Puyallup reservation.
- No. 10.—Annual report of W. P. Winaus, farmer in charge of Fort Colville Indians.
- No. 11.—Annual report of J. Smith, farmer in charge of Chehalis reservation.

## OREGON SUPERINTENDENCY.

- No. 12.—Annual report of A. B. Meacham, superintendent of Indian affairs.
- No. 13.—Annual report of J. Smith, agent Warm Springs agency.
- No. 14.—School report of J. Thomas, Warm Springs agency.
- No. 15.—Annual report of N. A. Cornoyer, agent Umatilla agency.
- No. 16.—School report of G. A. Vermeesch, Umatilla agency.
- No. 17.—Annual report of B. Simpson, late agent Siletz agency.
- No. 18.—Annual report of J. Palmer, agent Siletz agency.

## CALIFORNIA SUPERINTENDENCY.

- No. 19.—Annual report of B. C. Whiting, superintendent of Indian affairs.
- No. 20.—Annual report of D. H. Lowry, agent Hoopa Valley agency.
- No. 21.—Annual report of S. G. Whipple, late agent Hoopa Valley agency.
- No. 22.—School report of A. M. Webb, Hoopa Valley agency.
- No. 23.—Annual report of H. Gibson, agent Round Valley agency.
- No. 24.—School report of M. A. Gibson, Round Valley agency.
- No. 25.—Annual report of C. Maltby, agent Tule River agency.
- No. 26.—School report of F. J. Saxe, Tule River agency.
- No. 27.—Annual report of A. P. Greene, special agent Mission Indian agency.
- No. 28.—Annual report of J. R. Tansey, special agent Mission Indian agency.

## ARIZONA SUPERINTENDENCY.

- No. 29.—Annual report of H. Bendell, superintendent of Indian affairs.
- No. 30.—Annual report of J. H. Stout, special agent Pima and Maricopa agency.
- No. 31.—Annual report of F. E. Grossman, late special agent Pima and Maricopa agency.

- No. 32.—Annual report of J. A. Towner, special agent Colorado River agency.  
 No. 33.—Annual report of R. A. Wilbur, special agent Papago agency.

## NEW MEXICO SUPERINTENDENCY.

- No. 34.—Annual report of N. Pope, superintendent of Indian affairs.  
 No. 35.—Annual report of J. H. Miller, agent Navajo agency.  
 No. 36.—School report of C. A. G. Menaul, Navajo agency.  
 No. 37.—Annual report of W. F. M. Army, agent Pueblo agency.  
 No. 38.—Annual report of C. F. Roedel, agent Cimarron agency.  
 No. 39.—Annual report of O. F. Piper, agent Southern Apache agency.  
 No. 40.—Annual report of A. J. Curtis, agent Mescalero Apache agency.  
 No. 41.—Annual report of J. B. Hanson, agent Abiquiu agency.

## MONTANA SUPERINTENDENCY.

- No. 42.—Annual report of J. A. Viall, superintendent of Indian affairs.  
 No. 43.—Annual report of F. D. Pease, agent Crow agency.  
 No. 44.—School report of J. H. Aylsworth, Crow agency.  
 No. 45.—Annual report of C. S. Jones, agent Flathead agency.  
 No. 46.—Annual report of J. Armitage, agent Blackfeet agency.  
 No. 47.—Annual report of A. J. Simmons, special agent Milk River agency.  
 No. 48.—Report of A. J. Smith, appointed to visit Bannacks, Shoshones, and Sheep Eaters.  
 No. 49.—Letter from War Department and accompanying papers relative to certain Sioux Indians in Montana Territory.

## NORTHERN SUPERINTENDENCY.

- No. 50.—Annual report of S. M. Janney, superintendent of Indian affairs.  
 No. 51.—Annual report of Asa M. Janney, agent Santee agency.  
 No. 52.—Annual report of J. Webster, agent Santee agency.  
 No. 53.—School report of A. A. Riggs, Santee agency.  
 No. 54.—Annual report of E. Painter, agent Omaha agency.  
 No. 55.—School report of E. H. Gillingham, Omaha agency.  
 No. 56.—School report of J. Warner, Omaha agency.  
 No. 57.—Annual report of H. White, agent Winnebago agency.  
 No. 58.—School report of J. S. White, Winnebago agency.  
 No. 59.—Annual report of J. M. Troth, agent Pawnee agency.  
 No. 60.—School report of E. G. Platt, Pawnee agency.  
 No. 61.—Annual report of A. L. Green, agent Otoe agency.  
 No. 62.—Annual report of T. Lightfoot, agent Great Nemaha agency.  
 No. 63.—School report of M. B. Lightfoot, Great Nemaha agency.

## CENTRAL SUPERINTENDENCY.

- No. 64.—Annual report of E. Hoag, superintendent of Indian affairs.  
 No. 65.—Annual report of B. Darlington, agent Cheyenne and Arapaho agency.  
 No. 66.—School report of A. J. Standing and J. A. Cattell, Cheyenne and Arapaho agency.  
 No. 67.—School report of J. Butler, Kiowa agency.  
 No. 68.—Annual report of J. Richards, special agent Wichita agency.  
 No. 69.—Annual report of J. D. Miles, agent Kickapoo agency.  
 No. 70.—School report of L. Miles, Kickapoo agency.  
 No. 71.—School report of E. King, Kickapoo agency.  
 No. 72.—Annual report of J. T. Gibson, agent Neosho agency.  
 No. 73.—Annual report of J. T. Gibson, agent relative to Osages.  
 No. 74.—Annual report of J. Hadley, agent Sac and Fox agency.  
 No. 75.—Annual report of M. Stubbs, agent Kaw agency.  
 No. 76.—Annual report of J. H. Morris, agent Pottawatomie agency.  
 No. 77.—Annual report of R. L. Roberts, agent Shawnee agency.  
 No. 78.—Annual report of George Mitchell, special agent Quapaw agency.  
 No. 79.—School report of J. C. Isaac, Quapaw agency.  
 No. 80.—School report of A. C. and E. H. Tuttle, Quapaw agency.  
 No. 80½.—Annual report of L. Tatum, agent Kiowa agency.

## INDEPENDENT AGENCIES AND SPECIAL AGENCIES.

- No. 81.—Annual report of D. Sherman, New York agency, New York.  
 No. 82.—School report of B. F. Hall, orphan asylum, New York agency, New York.  
 No. 83.—Annual report of R. M. Smith, agent Mackinac agency, Michigan.

- No. 84.—Annual report of W. T. Richardson, agent Green Bay agency, Wisconsin.  
 No. 85.—Annual report of L. Clark, special agent for Sacs and Foxes in Iowa.  
 No. 86.—Annual report of S. D. Webster, agent Yankton agency, Dakota.  
 No. 87.—Annual report of H. E. Gregory, agent Ponca agency, Dakota.  
 No. 88.—School report of J. Lawrence, Ponca agency, Dakota.  
 No. 89.—Annual report of H. F. Livingston, agent Upper Missouri agency, Dakota.  
 No. 90.—Annual report of John E. Tappan, agent Fort Berthold agency, Dakota.  
 No. 91.—School report of H. L. Clifford, Fort Berthold agency, Dakota.  
 No. 92.—Annual report of J. C. O'Connor, special agent Grand River agency, Dakota.

## THIRD ANNUAL REPORT OF THE BOARD OF INDIAN COMMISSIONERS.

---

WASHINGTON, D. C., *December 12, 1871.*

SIR: I have the honor to submit herewith the third annual report of the Board of Indian Commissioners to the President of the United States.

Very respectfully, your obedient servant,

VINCENT COLYER,  
*Secretary.*

Hon. COLUMBUS DELANO,  
*Secretary of the Interior, Washington, D. C.*

---

SIR: The Board of Indian Commissioners, in making their third annual report, find abundant cause for thankfulness and encouragement while reviewing the condition of the Indians in the United States during the past year.

## CONFIDENCE AND GOOD WILL BETWEEN WHITES AND INDIANS.

The remarkable spectacle seen this fall, on the plains of Western Nebraska and Kansas and Eastern Colorado, of the warlike tribes of the Sioux of Dakota, Montana, and Wyoming, hunting peacefully for buffalo without occasioning any serious alarm among the thousands of white settlers whose cabins skirt the borders on both sides of these plains, shows clearly that the efforts of the friends of peace in establishing confidence between the white people and the Indians, in this heretofore greatly disturbed section of the country, have been eminently successful. We contrast this picture with that presented by the same tribe, when, five years ago, in consequence of our Government's bad faith in violating its treaties with them, they were engaged in a war made memorable by the so-called Fort Kearney massacre, in which ninety-eight of our soldiers were killed in sight of the fort, and in the course of which many of the settlers on the frontier lost their lives, and so many hundreds of others were compelled to abandon their cabins and flee to the larger towns for safety.

## PEACEFUL RELATIONS WITH RED CLOUD AND THE SIOUX.

With the exception of some slight manifestations of ill-will against the progress of the Northern Pacific Railroad, caused by a misunderstanding, this numerous and powerful tribe has been perfectly friendly during the past year. The chairman of the board held a council at Fort Laramie with Red Cloud and his principal chiefs in June, and found them unchanged in their professions of a determination to maintain peaceable relations with the whites. He could hear of no complaints

against them since they abandoned the war-path in the spring of 1870. His report will be found herewith, marked A a.

When Red Cloud visited Washington, in July of last year, it was maintained by a portion of the Western press, and the people of the frontier, that his return would be marked by the renewal of outrages upon the settlers. Happily, the prediction was not realized, and peace still continues. The Sioux are extremely sensitive in regard to the slightest encroachment upon their reservation, or the hunting grounds allotted to them in the treaty of 1868, and have objected even to the establishment of an agency for their own benefit within its limits. They are impressed with the conviction that where one white man is allowed to enter their territory many will inevitably follow. In view of their past experience, we cannot think them unreasonable in this. The same wise consideration which led the Government to withdraw the garrisons of Forts Reno, C. F. Smith, and Phil. Kearney, in 1868, and to prevent the proposed Big Horn expedition in 1870, should induce a proper effort to gain their consent by negotiation, before permitting any breach of the treaty stipulations by the invasion of their hunting grounds by surveying or exploring parties. It is believed that the privilege which may be deemed necessary for the Northern Pacific Railroad Company may be had by negotiation at a moderate cost, whereas the attempt to seize it without will probably occasion a renewal of the war.

#### VISIT OF THE CHEYENNE, ARAPAHOE, AND WITCHITA CHIEFS TO THE EAST.

The wisdom of keeping faith, in honestly fulfilling our part of the treaties, and in making the chiefs acquainted with the character and resources of our people, by inviting them to visit the East, is thus practically demonstrated by our present relations with these Sioux. Some of the chiefs of the Cheyennes and Arapahoes of the southern plains, in acceptance of a similar invitation, visited Washington and the other principal cities of the East, during the past summer. The kind treatment they received from the President and executive officers of the Government at Washington, and from the citizens of Philadelphia, New York, and Boston, (see Appendix A, No. 1,) made so favorable an impression on their minds that, on their return to the Indian country, when their neighbors, the Kiowas, angry at the arrest of their chiefs, Satanta and Satauk, earnestly pressed them to go on the war-path, they promptly refused. If the Cheyennes and Arapahoes had joined their forces with the Kiowas, we should have had a bloody war. But the Kiowas, finding themselves unsupported, had the wisdom to abandon the project and remain at peace.

#### ARREST AND PUNISHMENT OF KIOWA CHIEFS.

The Kiowa chiefs had been invited to accompany the delegation of Cheyenne, Arapahoe, and Wichita chiefs on their visit to the East, but had been dissuaded from so doing by some evil-minded half-breeds who were in the habit of inciting them to raids on the Texas frontier, and who feared their vicious trade in the product of the robberies would be broken up. The consequence was, that while the other chiefs visited our principal cities, they went on one of those plundering tours into Texas, and, boasting of it on their return home, were arrested by General Sherman, and justly punished.

## PRESENT CONDITION OF CHEYENNES AND ARAPAHOS.

The Cheyennes and Arapahoes are generally contented upon their new reservation. The schools, under care of the Friends, are gaining their confidence, and their condition has sufficiently improved during the last year to warrant the expectation of a satisfactory advancement in the future.

## THE OSAGES.

The condition of the Osages is most unsatisfactory. On the representations of the committee of the board, that the Government would protect them in the proposed new reservation in the Indian Territory, they consented last year to remove. Nevertheless, there are many trespassers on the land to which they were removed. In addition to this trouble, a new survey, which assumes to change the ninety-sixth parallel as heretofore located, if correct, deprives them of the greater part of the tillable land upon which they have settled, and already made valuable improvements. The continuation of the trespasses on Indian lands, in spite of the oft-repeated warning of the Government, seems to be the result of past failures to enforce the laws for the protection of the reservations. The squatters still believe that there is no real intention to interfere, and nothing but forcible ejection will undeceive them. The justice of your determination to enforce the laws and maintain the honor of the Government, by keeping its pledges to the Indians, cannot fail to be sustained by the people of the country.

In the case of the Osages, the lands were bought with their own money, and the obligation to protect them has, if possible, additional force. If it be found that the new location of the ninety-sixth parallel is correct, it seems to us that the Government is bound in honor to compensate the Cherokees for the land and leave the Osages in possession.

## THE APACHES OF NEW MEXICO AND ARIZONA.

The only other Indians who have caused any serious trouble are the Apaches of New Mexico and Arizona.

In our last two annual reports we called attention to the situation of this tribe, their eager desire for peace, their starving condition, and the opinion of the Indian agents and Army officers, that, with means to feed and clothe them, they could be kept at peace. Unable to obtain an appropriation from Congress for the purpose, the Indian Department was powerless, and the Apaches were left to obtain food and raiment as they best could—usually by stealing from the settlers or travelers on the highway. As many of their valleys, where they previously cultivated corn, were occupied by settlers, and their mountains overrun by gold-prospectors, who hunted their game, and no attempt had ever been made by the Government, either by treaty or conference, to consider their rights or necessities, this conduct of the Apaches ought not to surprise us. At the urgent solicitation of the board, with the approval of the Secretary of the Interior, Congress, at its last session, made an appropriation of seventy thousand dollars for the special purpose of correcting this evil, and this money becoming available on the 1st of last July, the Board, at its meeting in May, directed its Secretary to proceed to New Mexico and Arizona, to make arrangements to bring these roving Apache Indians upon suitable reservations, and to feed, clothe, and otherwise care for them. The hearty approval of the President, the in-

structions of the Secretary of the Interior, and necessary orders from the Secretary of War having been obtained, the Secretary of the board visited Arizona and New Mexico. His offers of peace were received by the Apaches with great eagerness, several thousands of them immediately coming in upon the reservations selected for them, and latest advices show that the remainder will soon follow, if not deterred from doing so by improper influences. The action of the Secretary has met with your approval, and that of the Secretary of the Interior, and the orders issued from the Interior and War Departments, for the purpose of carrying fully into effect the proposed plan, are entirely in accord with the past and present views of the Board of Indian commissioners. Similar instructions were issued by the Interior and War Departments in 1869, soon after the organization of the board, which defined the policy of the Government in the treatment of the Indians. This policy was set forth in the report of the Commissioner of Indian Affairs in 1869, viz: "that they (the Indians) should be secured in their legal rights; located when practicable on reservations; assisted in agricultural pursuits and the arts of civilized life; and that Indians who should fail or refuse to come in and locate in permanent abodes provided for them would be subject wholly to the control and supervision of military authorities, to be treated as friendly or hostile as circumstances might justify."

The clearly defined allotment of their respective duties to the Indian agents and the military officers in the Indian country, can hardly fail to secure harmony of action, and it is hoped that capable Christian agents may soon be appointed to represent the Department of the Interior upon the reservation.

It is believed that the policy, if faithfully sustained and persisted in by the military and civil officers commanding in Arizona and New Mexico, will be successful, as it has been elsewhere.

The attempt to defeat it by the arrest of Indians upon the reservation who have made peace, for acts alleged to have been committed in time of war, should be resisted, otherwise the act of the Government upon whose faith their surrender is made becomes one of mere treachery. From the time of the Gadsden purchase, when we came into possession of their country, until about ten years ago, the Apaches were the friends of the Americans. Much of the time since then, the attempt to exterminate them has been carried on, at a cost of from three to four millions of dollars per annum, with no appreciable progress made in accomplishing their extermination.

But the activity of the military has accomplished its only legitimate and proper end, that of compelling in the Indians an earnest desire for peace. To persist in war under such circumstances would be not only barbarous in the extreme, but an inexcusable waste of the funds and resources of the Government. It has been asserted that the Apaches are more savage and less to be trusted than other Indians.

The agent of the Government who had charge of the Apaches in 1859, when they were at peace, said in his report of the White Mountain Coyoteros, numbering 2,500, and including Cochise's band, that "in all their intercourse with the Government, their deportment toward travelers and traders, they have shown themselves to be the most reliable of all the bands of the Apaches." And of all the Apaches in regard to whom the assertion alluded to is now made, he said, "They cultivate the soil extensively, raise wheat, corn, beans, and pumpkins in abundance." Detailed account will be found in Commissioner Colyer's report on Arizona, A b.

## PARTIALLY CIVILIZED TRIBES.

The condition of the partially civilized tribes on established reservations has materially improved. The covetous desire of white people, generally living near these reservations, to obtain possession of the lands, either for occupation or speculation, led to the introduction at the last session of Congress of several bills providing for the removal of the Indians, and the sales of the lands, without due regard to the rights of the Indians or the sacred obligations of treaties. When the attention of Congress was called to these several acts, however, and their manifest injustice pointed out, they were promptly abandoned.

## THE UMATILLA INDIAN RESERVATION.

One of these measures, fairer than some others, proposed to submit the question of removal and sale of the lands belonging to the Indians on the Umatilla reservation, in Northeastern Oregon, upon payment of certain annuities, and providing a new home for them, and commissioners were appointed by the Secretary of the Interior to ascertain the wishes of the Indians. By request of the Secretary of the Interior and the direction of the board, the chairman visited the reservation in August, to be present at the council, and, after a week's mature consideration of the proposal, during which the subject had been fully presented to them, the Indians rejected the proposal. (See report, A c.)

## INDIANS IN WASHINGTON TERRITORY AND OREGON.

The chairman of the board also visited the Warm Springs and Grand Ronde reservations in Oregon, and the Yakama, Tulalip, Swinomish, Lummi, and S'Kokomish reservations in Washington Territory.

The condition of the Indians in Oregon and Washington is vastly better than individual statements and common rumor have led us to anticipate. Many of them are industrious, and labor on their reservations, and others, as at Grand Ronde and along Puget Sound, labor for the farmers or at the saw-mills, and receive the commendation of their employers and the agents. They have adopted the costume and are rapidly acquiring the habits of the whites. Some of them are Christians, and exemplary for their consistent lives. There are also many who have learned more of the vices than the virtues of civilization. This class, attracted as they are to the vicinity of towns and railroads, is most frequently seen by the citizen and the traveler, and give a mistaken color to his opinions of the race. When it is remembered that the Indians of Oregon and Washington were only placed upon reservations from ten to fifteen years ago, but few of them more than twelve, it must be admitted that their progress toward civilization has been wonderfully rapid. (See report on reservations in Washington Territory and Oregon A d.)

## NEED OF CIVIL LAW OVER INDIANS.

A serious detriment to the progress of the partially civilized Indians is found in the fact that they are not brought under the domination of the law, so far as regards crimes committed against each other. The difference in the characteristics of the various tribes, together with the differences in the degree of civilization to which they have attained, seems to render it impossible to frame any general law equally applica-

ble to all. To attempt the enforcement of civil or statute law in a tribe of Indians when first brought into peaceful relations with the Government is not deemed expedient; nor would it be practicable, for the reason that the savages are unable yet to distinguish between such enforcement, and acts of war. But when they have adopted civilized costume, and civilized modes of subsistence, we owe it to them, and to ourselves, to teach them the majesty of civilized law, and to extend to them its protection against the lawless among themselves. Some amendment of the laws which prohibit the selling of spirituous liquors to the Indians is needed, to remedy the present difficulties which prevent the conviction of persons guilty of the crime. These subjects are more fully treated on in the report of the chairman of the board on Oregon and Washington Territory, to which you are respectfully referred. (Appendix A *d.*)

Many of the partially civilized Indians are ready for the allotment of their lands in severalty, and this should be done as rapidly as possible under some regulation which would prevent the alienation of such lands for a term of years. In many cases the outlines of the reservations are not defined by actual survey, and the uncertainty as to their exact limits has given color for the encroachment of whites. The lines should be distinctly established, and summary measures should be taken for the ejection of intruders.

#### OBJECTIONS TO FREQUENT REMOVAL OF INDIANS.

The frequent removal of Indians has led to a general distrust of the designs of the Government with regard to them, and the fear of such removal has deprived them of all incentive to improve their lands, or to labor more than is necessary for a merely comfortable subsistence. The members of the board, as opportunity has offered, have endeavored to quiet their distrust and induce them to labor on the lands with the belief that they should be protected in their rights.

The recommendation of the peace commission of 1868, "that the so-called Indian Territory should be strictly preserved for the future settlement of the nomadic tribes east of the Rocky Mountains, and such other Indians as may be induced to migrate to the proposed Indian commonwealth," commends itself to our judgment, and it is earnestly hoped that the territory will be preserved intact for that purpose. The records of military expeditions, and the personal examinations of the board west of the 96th parallel, show that a large proportion of the territory is unfit for cultivation, and it is believed that the remainder will not prove to be too much for the purpose indicated.

The removal of partially civilized tribes already making fair progress and attached to their homes on existing reservations, is earnestly deprecated. Where such reservations are thought to be unreasonably large, their owners, as in the case of the Ottos and Missourias, and the Omahas, will themselves soon see the propriety of selling off the surplus for educational purposes. The Government meanwhile owes them the protection of their rights to which it is solemnly pledged by treaty, and which it cannot fail to give without dishonor.

#### INVESTIGATION OF ALLEGED CLAIMS IN CALIFORNIA.

Commissioners Brunot and Farwell were requested by the Secretary of the Interior, during their visit to the Pacific States, to investigate certain claims of old date which had been presented to the Indian Department for payment, amounting to \$373,133 02.

On arriving at San Francisco, notice was given for over two weeks in the principal daily papers for the claimants to present and substantiate their claims before the committee. Only two claimants for small amounts were present in response to the notice. Subsequently, diligent inquiry was made by Commissioner Farwell in the localities where the principal claims were alleged to have originated. With the exception of some small claims, his convictions are very strong that nearly all of them are either fraudulent or have been already paid. (See report of Commissioner John V. Farwell, investigation of alleged claims in California, Appendix A e.)

Commissioner Farwell visited Hoopa Valley and Round Valley reservations. He found the Indians in Hoopa Valley using McCormick's reapers in harvesting on the agency farm, and giving abundant evidence of capacity for advancement, and, at the same time, showing in almost every other respect the most striking proofs of abuse and mismanagement on the part of those to whom their care has been heretofore intrusted. The too near vicinity of soldiers is deemed injurious both to themselves and the Indians, and, as in the case of the Washington and Oregon reservations, it is imperatively necessary that the lines of the reservations should be defined, and trespassers ejected. (See Appendix A e.)

#### MISSION INDIANS IN SOUTHERN CALIFORNIA.

The condition of the Mission Indians in Southern California demands the serious attention of the Government. In the year 1802, according to the records of the missions, they harvested 33,576 bushels of wheat, and owned 67,782 horned cattle, 107,172 sheep, 3,064 horses and mules, and 1,040 hogs. The choice spots from San Francisco on the north to San Diego on the south were owned and occupied by them. Thirty-eight years ago, by a Mexican law, their lands and stock, before held in common, were divided among them. Since they have come under the control of the United States those lands have been taken from them, and they are now poor. They are scattered through the counties of Los Angeles, San Bernardino, San Diego, and Santa Barbara, and number perhaps 3,000 souls. They have a good knowledge of the manual-labor occupations of the country, and perform the most of it themselves, as herders, farm-hands, grape-gatherers, &c., and are in fact in a state of vassalage to the whites, and their women furnish most of the domestic labor of the country. The meaner class of whites either cheat the Indians out of the pay for their labor, or pay them in that which increases their demoralization.

Many of them speak both Spanish and English. Many are industrious and well-behaved, while many others are drunkards and debased in the extreme. Their character is the natural result of the temptations and abuse to which they have been subjected, together with their deprivation of all incentives to manly exertion.

To the rich rancheros they are slaves in all but the name. A few of these are gentlemen, who seem to have a kindly feeling toward them, and a desire that "something should be done for them." The valley of San Pasquale was, by the order of the President, withdrawn from settlement with a view to create a reservation, upon which it was proposed to collect and care for them, but the remonstrances of the whites led to the revocation of the order, and the project is abandoned. It is believed that the opposition to the reservation plan really originated from an unwillingness to lose the labor of the Indians in the settled districts, and not, as was supposed, from the settlers in or about San

Pasquale. The difficulties of last summer, it is believed, had their origin, not with the Indians, but with the whites instigating them, and the contest was as to which of the districts should have the Chief resident with them, to attract and the better to control the labor which they are unwilling to dispense with. Taking the situation as it is, we believe the only just, and best solution of the difficult question of the Mission Indians, is for Congress to pass a law, giving to Indian families the same amount of land allowed to whites under the homestead law, securing to those who now occupy them the little homes and patches on which they or their forefathers have lived for so many years, and allowing those who have none to select them upon any unoccupied land. They should receive a title inalienable for twenty years, not subject to execution, &c., and *each Indian farm should be subject to the law which protects reservations from white intrusion*, and its occupants to the intercourse laws. They should be subject in all other respects to the existing laws, and each Indian settler upon land, and of proper age, should be entitled to all the rights of citizenship. An able and humane agent should be appointed to protect, advise, and instruct them, and see to the proper registration of their lands.

If these Indians, as has been reported, owned their lands under the Mexican rule, and the United States failed to have their rights represented before the claims commission, the measure proposed is but an insignificant reparation of a great wrong. It should not be delayed, and least of all should it be prevented by the objections of white men of adverse interests, should they be made.

#### CIVILIZED INDIANS IN INDIAN TERRITORY.

The civilized tribes in the Indian Territory have held the second session of their annual congress, and clearly demonstrated their ability to legislate wisely for their own welfare and that of their neighboring tribes. Delegates were present from the Cherokees, Creeks, Chickasaws and Choctaws, Seminoles, Cheyennes, Arapahoës, Wichitas, and affiliated bands; and though it was the first time that several members had ever attended such a meeting, yet their conduct was good, and the proceedings altogether animated and harmonious. The marked ability of some of the speakers, and the general talent displayed at this council will compare favorably with that found in older legislative bodies. A copy in brief of the report of their proceedings is appended, (Appendix A e.)

Commissioner John D. Lang assisted in the removal of a portion of the Cherokees from North Carolina to their new home in the Indian Territory; his report will be found herewith, marked A i.

#### THE ONEIDAS.

The Oneida Indian reservation in Northern Wisconsin remains as reported last year. The difference of opinion among the members of the tribe as to the wisdom of dividing the lands in severalty, and disposing of such as they do not need, not being reconciled, the board recommend that no action be taken until the Indians agree.

#### INDIANS BECOMING CITIZENS.

Lastly, we may refer to the Winnebagoes and Pottawatomies, who, having been for many years under the care of the missionaries and in

contact with civilized life, prefer to abandon their tribal relations altogether, and assume the duties of citizens. Of these, during the last year, there were about one hundred and fifty-four Winnebagoes, and two hundred and fifty Pottawatomies, making in all fifteen hundred and ninety-four of the latter who have become citizens; and Congress, at its last session, having made provision for the distribution of the principal of their trust fund among them, the moneys were duly paid, and they are no longer wards of the Government.

#### MISSIONARY SOCIETIES IN CARE OF RESERVATIONS.

The system of appointing Indian agents nominated by missionary societies commends itself to the judgment of the board, as having effected a manifest improvement in the agencies where it is fully operative. In several cases they have been deceived in the character of the persons appointed, and instant dismissal has followed. In one or two instances the society making a nomination has not yet acted on the implied obligation to take a missionary interest in behalf of the Indians thus committed to their care. It is impossible that so radical a change and improvement as is made and intended by the system should be perfected in the short time during which this has been inaugurated, but enough has transpired to warrant the most sanguine expectation of success. The religious societies which have assumed the responsibility offered them by the President, in his desire to administer wisely, justly, and humanely the affairs of the Government in its relations to the Indians, it is not supposed will in any case fail in their duty from lack of proper effort.

#### SCHOOLS.

The schools among the partly civilized Indians should in all cases be boarding-schools, where children of both sexes, while being taught necessary branches of a common education, may, at the same time, be instructed in manual labor appropriate to their respective sexes. The day-schools are a total or comparative failure in nearly every instance known to the members of the board. The reasons are stated in the report of Mr. Brunot, before referred to.

#### AUDITING ACCOUNTS OF INDIAN BUREAU.

In addition to the duties already devolving upon the board, Congress at its last session added that of auditing all the accounts of the Indian Department, (see act of Congress approved March 3, 1871.) This duty, though a very onerous one to the members, and, like all the powers conferred upon the board since its organization, wholly unsolicited, as it was believed to have been framed by Congress in the interests of economy and honest dealing, was cheerfully undertaken by the executive committee. It necessitated the employment of additional clerks, and consequent expense.

#### WORK OF THE EXECUTIVE COMMITTEE.

From March 23, 1871, to December 5, 1871, the executive committee examined 1,136 vouchers, including cash accounts of superintendents and agents, representing a cash disbursement of \$5,240,729 60, being

vouchers for Indian goods, annuities, services, &c., amounting to \$3,410,759 34, and cash accounts of superintendents and agents amounting to \$1,829,170 26.

Of these, there were rejected as follows :

|                                                                        |                   |
|------------------------------------------------------------------------|-------------------|
| 10 for exorbitant prices, amounting to .....                           | \$82,786 29       |
| 2 for being purchased without consulting the board, amounting to ..... | 2,292 82          |
| 7 "Erie and Pacific Dispatch," amounting to .....                      | 15,917 09         |
| 21 Northwest Transportation Company, amounting to .....                | 52,170 80         |
| Total rejected .....                                                   | <u>153,166 20</u> |

#### ECONOMY IN PURCHASING ANNUITY GOODS.

The same care which was taken in the purchase and inspection of the Indian annuity goods last year under the same committee, Messrs. George H. Stuart, Robert Campbell, William E. Dodge, and John V. Farwell, was continued this year, and, as will appear from their report, (Appendix A h.) with much advantage to the service. The confidence inspired in the minds of merchants, manufacturers, and dealers in subsistence, that the awards would be fairly made, largely increased the number of bids and lessened the prices.

In May nearly half a million of dollars' worth of annuity goods were purchased "at and below the lowest market prices," and in May and June beef, bacon, flour, and other subsistence stores, to the amount of \$1,783,729 29, were purchased "at prices averaging much below what had been paid before the board began to exercise its superintendence."

The price paid for beef on the hoof this year averaged  $2\frac{9}{100}$  cents per pound as against  $4\frac{3}{100}$  cents per pound last year. The amount purchased, 27,441,750 pounds of beef, cost \$714,996 85. The same amount at last year's prices would have cost \$1,204,692 82, a difference of \$489,695 97 in favor of the present year. While part of this difference may be fairly attributed to a decline in value, it is chiefly due to the competition induced by the reasons given above.

#### THE PEACE POLICY—ITS ADVANTAGES.

Increased experience in dealing with the Indians only tends to confirm the board more and more in the wisdom of the policy of peace so uniformly advocated by the President, and supported by the liberality of Congress and the humane sympathies of the people; and the board confidently look forward to the day when the bitterness which now assails this policy in some parts of the United States, where it is least understood, will fill a page in history as unnatural and curious as that which records the old hatred against freedom and the friends of the slave.

#### CONCLUSION.

For the uniform kindness and patience with which the President, the Secretary of the Interior, and the several committees of Congress having charge of Indian affairs have listened to the suggestions of the board, and the courtesy and good-will extended toward its members by all the officers of the Executive Departments, the General and all the officers of the Army, with whom they have had any intercourse, the board desire to return their most grateful acknowledgments.

Above all, we desire to return thanks to God for having permitted us to see so much good resulting from comparatively so humble efforts.

Respectfully submitted.

FELIX R. BRUNOT, Pittsburgh, Pa.,  
*Chairman.*

The PRESIDENT.

*A a.—Report of a visit to Red Cloud and chiefs of the Ogallala Sioux, by  
Commissioner Felix R. Brunot.*

FORT LARAMIE, WYOMING TERRITORY,  
June 14, 1871.

SIR: In further reply to the letter of the Secretary of the Interior of the 19th instant, requesting that some of our board should visit the Ogallala Sioux under Red Cloud for the purpose therein stated, I have the honor to report that I arrived at this post on the evening of the 9th instant, and met Red Cloud and a number of the principal chiefs and braves on Monday, 12th, in council. Red Cloud did not seem disposed to select a place in the reservation for the agency, but wanted time to consider the subject and consult with those of his people who were absent. He subsequently accepted the situation—said he was in favor of doing what we desire, but that he dared not to name a place for the agency without consultation with all the other chiefs, and especially some of the wilder ones who were not present. He said he would go and call them together and urge them to name a place in their own country for the agency—he thought he would succeed in convincing them that it was best to do so—and whatever decision was arrived at, he would return as soon as possible and communicate it to General Smith and Agent Wham. He could not be induced to name a specific time for his return, but will return as soon as they can come together and arrive at a decision in regard to the place. He was told that in fifteen days another council would be held, when he would be expected to be present and prepared to designate a place; that if he did not come, the other chiefs would be asked to name a place.

On the morning of the 14th the other chiefs present at the council called to tell me that Red Cloud had gone to consult those who were absent, and they would wait fifteen days, and then, if he did not name the place, they would fix it themselves and go there. They said they thought White River the best place. The principal men among them were "Man-afraid-of-his-horses," "Red Dog," "American Horse," and others. My impression is that Red Cloud will return and a proper place will be selected with consent of all, or nearly all, the Indians.

Red Cloud will undoubtedly prefer, and will no doubt propose, some point immediately upon the Platte River, and there are traders and half-breeds who are anxious to bring about consent to such a selection, but I do not think either the welfare of the Indians or the permanency of peace would be secured by yielding to the demand. It is impossible to keep whisky away from them if located anywhere upon the river, and unless its use, and the presence among them of the lawless class of men who provide it, can be prevented, no measures for the civilization of the Indians can be effectual. Even in the military reservation of Fort Laramie, and in spite of the efforts of General Smith and the agent to prevent the sale of whisky to them, Indians are frequently found to be intoxicated, and there is constant danger of affrays which may culminate in a serious outbreak as the result.

Accompanying this is a full report of the council and conversation of the Indians by Mr. T. K. Cree, to which you are respectfully referred.

You will observe that General Smith indicated to them the design to cease issuing rations at Fort Laramie. I think the experiment might be tried as an additional inducement for an early location for the agency in their own country.

I am also of the opinion that the annuity goods now on the way should be stored at Cheyenne until further developments result from the council about the 30th.

Very respectfully, your obedient servant,

FELIX R. BRUNOT,  
Chairman, &c.

Hon. C. DELANO.

*Report of a council held at Fort Laramie, Wyoming Territory, June 12, 1871.*

A grand council of all the Indian chiefs now about Fort Laramie, and within reach of messengers, was held in the building known as the Theater, this day at 12 m., that they might meet Mr. Brunot, of the Board of Indian Commissioners. There were present Mr. Brunot, General John E. Smith, commandant of the post, Mr. Wham, Indian agent, the officers and ladies of the post, and the following Indian chiefs: Red Cloud, Red Dog, Sword, Long Wolf, The son of Man-afraid-of-his-horses, Quick Bear, Cold Face, Bran Bear, High Wolf, Full Wolf, Setting Bear, Red Plume, Little Cloud, Spider, Fire Thunder, Big Crow, Pretty Crow, Big Foot, Little Wound, Pumpkin Seed, Yellow Beard, Rocky Bear, Bad Wound, Bear Robe, Quick Eagle, Two Buffaloes, Corn Man, White Eyes, Milk Spotted Horse, Red Leaf, Brave Grass, Buffalo Shed-his-hair, Red Buffalo, and many braves.

General Smith announced that Mr. Brunot would speak to the Great Spirit before the council began.

Mr. Brunot offered a prayer.

By request of Red Cloud, Great Bear then talked with the Great Spirit, after which Red Cloud said: I wish to speak first.

MR. BRUNOT. We will be glad to hear you.

RED CLOUD. I wish Louis Richard and Joseph Bissenet to interpret for me. [He then said:] I am Red Cloud. The Great Spirit raised both the white man and the Indian. I think He raised the Indian first. He raised me in this land and it belongs to me. The white man was raised over the great waters, and his land is over there. Since they crossed the sea, I have given them room. There are now white people all about me. I have but a small spot of land left. The Great Spirit told me to keep it. I went and told the Great Father so. Since I came back, I have nothing more to say. I told all to the Great Father. I was to tell all the Great Father said to my nation. I told them all of it. Whatever I do, my people will do the same. Whatever the Great Spirit tells me to do I will do. I have not yet done what the Great Father told me to do. God raised us Indians. We are two nations. Whatever we decide to do, we want to do together. I must ask you to wait. I am trying to live peaceably. I told the Great Father so. When I went to him I asked no annuity goods; all I asked was for my lands—the little spot I have left. If you have any goods to give, I want you to wait awhile. I will then tell you what to do with them. Between here and the railroad is much land. I have not been paid for it. I want to think of it.

General Smith. Much that Red Cloud has said is true. He and those who were with him East last summer saw a great many white people. They are, as he knows, like the leaves of the trees, or the blades of grass on the prairie, in number. Their game is increasing, while the game of the red man is decreasing. It is not worth while to talk of the past. The white man wants the red man to meet him in council and decide what can be done for their good. Those who went to Washington last summer know that the Great Father has many children to see. They come from the East, and the West, and the North, and the South, and even from over the great water to see him. The Great Father cannot see to everything himself; he must have many to assist him. The Great Father's heart is good toward the red man. The Great Father knew that the red man was abused and cheated, and so he selected good men, whose hearts are good, to come among them and see that their agents do right with them. These are good men, and do not receive any pay for coming among you. One of these men is here now. Mr. Brunot has come to see that all is good with you. You know that I have always been your friend. I told you that the Great Father, knowing that many bad white men would come in, selling whisky and getting the Indians' guns and ponies, and that the longer they remained here the worse it would be getting, wanted them to go farther away to the north, where bad men would not get to them. I told you that we could not give any rations here but for a short time longer, and that I wanted you to select a place for your agency, where the goods now being brought can be sent. You told me you would see your people in council and select a place for your agency. When I was East I told the Great Father that your hearts were good and that you were now in council here to decide where your agency should be located. The Great Father's heart was glad, and he sent his messenger here to hear your words. A large quantity of supplies has been bought, and will be sent to you as soon as you decide where they shall go to. There is now but a short time in which to erect the necessary buildings for your agency. You should select the place at once, so that your

squaws, and children, and people will not suffer, as I shall probably soon have orders to issue no more rations here. The messenger of the Great Father will now speak to you.

MR. BRUNOT. You have all seen me before, and you know that I come because my heart was good toward the Indian. You know that I come here now because I am your friend. I have come here now for one purpose, to talk about one thing. It is the beginning of what is right between the white man and the Indian. I want all to talk about one thing. With the Indian at Fort Laramie, and white men all along the river, we are afraid of trouble. When the Indian have anything that is good, some bad white men want to get it. They give the Indian whisky. It is bad for them. The white men have great towns in one place, far from the Indian; so we want you to have your great towns far away from the white man. I want it because the Great Father and all the friends of the Indian want it. We want you to think of this with both your hearts, and your heads. Suppose trouble should come between the white men and the Indians; I want to tell you what will happen; we hope it will never come; but when it was here before, the Great Father put war-houses all through the Indian country. If trouble comes again, they will be put there again. We do not want this done. It is better to have one agency there now, than war-houses after a while. That is why I want you to decide now, that I may tell your Great Father that you have selected the place for your agency in your own country, where bad white men can be kept away from you. Some men do not want you to go away from here; but all the friends of the Indian want you to go. If you select the place, we do not want to send any of our soldiers to your post, or into your country; but you must be the soldiers, and keep bad white men out of your country. If they get in, you must arrest them and take them to your agent, who will send them to General Smith, and he will punish them. The Indian has good sense, and knows what I say is good. I want you to let me take your words to the Great Father with a good heart, so that he can help you. Do not say for us to wait. Last fall you told Mr. Campbell and me that when winter came you would name the place. We told the Great Father what you said. You still wait, and we are ashamed, because you are our friends. The Great Father said, I want them to locate their agency in their own country now, so that houses may be built, and their goods and provisions given to them there. A message came over the wires saying, the goods for Red Cloud's hands are ready to send; and another message saying, where shall they be sent? The Great Father says they cannot come until the houses are ready for them in your own country. I want you to decide while I am here, and the houses will be built at once, and the goods sent there, and your friends can then send teachers, and good men who will help you.

RED CLOUD. I ate the provisions of the Great Father long before I was told to have an agency in my country. If the rations are stopped we will all go to the north and see our nation, and will then decide what we will do. All that I want is guns and ammunition, and pay for the railroad.

General SMITH. When you get to your agency, and the Great Father sees that your hearts are good, he will send you plenty of all that you wish.

RED CLOUD. I have consulted the Great Spirit, and do not want a strange man for agent. There are plenty of men who can read and write, who are married to my people, and they can take care of me and my agency, and I can put my own young men to work.

General SMITH. Your young men cannot shoe a horse, or build a house; they must have some one to teach them. Then, all the Great Father sends costs a great deal of money, and he would not have one he did not know take care of it.

MR. BRUNOT. If you select the place, I would like to know that it is a good one, and if you wish it, I will go with you and see it; I do not want any soldiers to go with me, but you will take care of me. I have one thing more to say. When you were in Washington, you saw that the Great Father had many great chiefs, and each chief had his own band, but they all followed the Great Father, and made him the great chief over all. You have one great chief who talks for you; so you have other chiefs; but if you quarrel and are jealous, all goes wrong. Your friends want you all to be friends.

RED CLOUD. General Harney came here, and said if white men came into my country I should punish them. I did so, and the trouble came from it. I am afraid it will come again. I do not punish my people as the soldiers do. I punish them very strong. I told you the place you wanted did not suit me for an agency, and I told the Great Father when I had selected a place I would send him word. Soon after I came back the Great Father forced the question on me, and I told him to wait until I had consulted my people. When the goods came before, there was no guns and ammunition, but I told my people to take them, and I told him when he sent me goods to give them to me here, as he had done before on the Platte, at the Old House. The Great Father said he would think of it. I am trying to do good since I came back from the Great Father. My people have done nothing wrong. I tell my people you (Mr. Brunot) are my friend. All I have told you is good.

MR. BRUNOT. I have heard what Red Cloud said. His people have done good, ex-

cept in one thing, for which I am sorry. He told me to tell the Great Father that before the winter was over they would select a place for the agency. I told the Great Father that Red Cloud wanted the agency by the Old House on the river, and the Great Father said it could not be placed there; all of you heard me tell Red Cloud so. The Great Father knows if you stay along the river bad white men will go among you with whisky, and trouble will come; but if you are in your own country, General Smith will stay here and keep any from going into your country except those who go for your good. You will protect the agency, and all of you will say this is our agency, and we must not let any but our friends go to it. I said Beaver Creek, because I saw it on the map and thought it a good place; but I do not care where it is, so that it is a good place, and one the bad white men dare not go to.

RED CLOUD. Did you tell the Great Father that he should not send soldiers over the river? and will he be mad if I punish white men if they come?

MR. BRUNOT. The Great Father wants them to be brought in and punished by the white man's laws.

General SMITH. Red Cloud will remember I told him when my soldiers did wrong to his people to point them out, and I would punish them, and when his people did wrong I would send them to him. When he locates his agency, some white men must go and take care of the provisions. It will take many wagons to carry them, and you must have your soldiers to protect them, and bring them back safely. You must have your soldiers take care of the agency and the farmer, teacher, carpenter, and blacksmith. We do not want our soldiers to do it. If anybody goes, except these the Great Father sends, you must drive them away, or bring them to me; and in the same way I will keep your young men on your side of the river, and keep bad men from going over.

RED CLOUD. Who told you I wanted to put my agency over the river?

MR. BRUNOT. You said you would select the place over the river before the winter was over.

RED CLOUD. I do not remember to have said it. If any of my people said so, I do not know anything about it. The other council was the same way; a paper was signed by my chiefs, and I did not know anything about it. When I was in Washington I asked to have a trader appointed. I selected Colonel Bullock for it. I told you to wait until I had seen the Cheyennes and the Arapahoes, that I wanted to divide the goods with them. I want to do so again.

MR. BRUNOT. The Great Father will not send the goods until you select a place for them. I bear the Great Father's message. I come with much trouble, because I am a friend, and wish to see that done which is for your good; and I say again, if trouble come, the war houses will go into your country.

RED CLOUD. The Great Father told me he would give me the country for thirty-five years.

MR. BRUNOT. When the paper was signed that gave the country to the white man, and your country to the Indian, there were two sides to it. If the Great Father does his part, the Indian must do his. Then all will go well, and the Indian will grow rich instead of poor. We cannot name the trader until the agency is located, but I think the Great Father will send the man the Indians want. You were allowed to come here and trade, and get food, because you were hungry; and General Smith and your friends, asked the Great Father to permit it; but now you must do your part, and select the place, and do what we think is for your good.

RED CLOUD. I have given my friends a good deal. I have only a little of my country left; and I gave the railroad to my friends, and I want to be paid for it.

MR. BRUNOT. It is true you have not much ground, but we want you to keep what you have.

RED CLOUD. I am afraid if I open an agency some of my friends will jump over me.

MR. BRUNOT. I know you have cause to fear it; but we will do right if you do what we wish.

RED CLOUD. When I went to the Great Father I spoke only good.

MR. BRUNOT. It is so now, as far as it goes. We want our hearts all one in this thing, and I would like to have something to send over the wires to the Great Father. It is three years since the treaty was made, and it is time you had decided where your agency should be.

General SMITH. I want all to know that I expect, before next moon, to have orders to give no more rations here, and but little time is left in which to put up your buildings. We will meet you again, if you wish, to-morrow or the next day, to hear your answer.

RED CLOUD. If you are going to stop the rations say so, and tell the truth.

General SMITH. I do tell the truth. I expect the order. There is plenty on the way to go to the place you select, but the Great Father will not send it here.

RED CLOUD. Before the houses are built the provisions will be spoiled.

General SMITH. We want you to decide now, and the houses will be built at once. I would like to know if you want another council, and when.

RED CLOUD. This is the last time I will come here. I am going to leave now, and will come back again in the fall.

General SMITH. Very well. I want you all to remember that what I say is the truth, and after next moon no more rations will be given here to anybody; and for this reason we want you to decide now where you will have your agency. If you don't, and your women and children are hungry, it is your own fault.

Mr. BRUNOT. I am sorry there should be any chance of the women and children being hungry, and the Great Father, who has plenty, not feeding them. But he knows it is bad for you to remain along the river, and he has promised you ammunition and guns, but will only give them to you in your own country. It is easy for you to say, we will put our agency over beyond the Rawhide Buttes, and the goods will come. The Indians you wish can come and trade there, and good men will come for teachers, blacksmiths, carpenters, and farmers; and if after a while you do not like it you can come and tell the Great Father. I will only stay a few days, but I want to go away with a good heart, and tell the Great Father what will make his heart glad. We have talked a great deal, and I will say no more to-day, except that our hearts are good, and we are friends. If any other chiefs wish to talk, and Red Cloud desires it, we will hear them.

The council here broke up and Red Cloud came forward, when the following conversation took place:

Mr. BRUNOT. Have you anything more to say?

RED CLOUD. I came a long way and cannot stay here. I have sent for the Black Twin and all the Ogallala, and we will go to our camp and hold a council. I am willing to go over the river, but want all the rest to agree to it.

Mr. BRUNOT. Why did you not say so in the council?

RED CLOUD. I was afraid to say so, but the rest will come to it.

Mr. BRUNOT. How soon will the others be here?

RED CLOUD. I cannot promise how soon.

Mr. BRUNOT. How soon can you see them?

RED CLOUD. I want all to go away with me, and it will be eight or ten days before all can get together.

Mr. BRUNOT. Would it not be better for all to come here?

RED CLOUD. We want to decide at our village and then come back here.

Mr. BRUNOT. Do all your chiefs agree to that, and will they all come back here?

RED CLOUD. We will come together and decide, and come here again.

Mr. BRUNOT. Won't you tell those that are here what you want to do?

RED CLOUD. I want to see the Black Twin first; he is now on his way here.

THOS. K. CREE,  
Clerk.

FORT LARAMIE, June 12, 1871.

The following conversation occurred at General Smith's headquarters after the council, none of the Indians being present except Red Cloud:

RED CLOUD. There are twenty-nine councilmen of the Unkapapa, and twenty-six of the Ogallalas. I am here alone to-day, away from my council-men; that is why I could not name a place for my agency. We are alone, and I want to talk straight. I cannot do it myself; I must consult my council-men, and what they decide we will do. I think they will listen to me, and what I say they will do. I am going to my camp now, and I will send for the Black Twin and the Charging Shield. I will get all together. I do not hide anything from you. I tell you straight.

General SMITH. Was not all the band in while I was away?

RED CLOUD. The Black Twin was not in. Red Dog came in with me, but traded as quickly as possible, and went away. These people are wild, like the antelope. We want them to come in and eat of the white man's food, and they will come back again. We will meet on the Cheyenne River. I will get the men of sense, and will try and decide where to put the post. My friend, take pity on me, if you would have me live long. If any goods are coming have them stop, and when I see these men we will decide yes or no. All you have told me to-day is good. I will tell it to my people; sometimes we talk three or four days. I let them talk; when they do not decide right, I tell them to talk on till they get right. The Unkapapas have nothing to do with this; they belong on the Mo River. This is for the Ogallala. The Cheyenne and Arapahoes are like lost children, they will agree with me at any time. Some of my people are very short-sighted; I look ahead.

Mr. BRUNOT. You want to go and select a place over the river yourself.

RED CLOUD. That is what I want. I want to go over on the other side myself, and want to tell the others so. When you asked me to cross the river last fall I told my

people to stop until we had the goods and the guns, and that then I would cross the river.

MR. BRUNOT. I told the Great Father last fall that after we gave you the goods you would go over the river, and now your goods are again brought and ready to give you as soon as you select your agency. I told the Great Father Red Cloud was the great chief and would do what he said, and would fix the place before the winter was over. If I go back now and say that Red Cloud says wait, the Great Father will think he is not the great chief, but that there is some other great chief. I would like to know how soon he will decide.

RED CLOUD. The white man counts the days. I do not want to tell a lie. I am going out and will have a council. The difficulty last winter was, that I said if we got the guns we would go over the river; if we had the guns to give them to-day, they would go. They have been cheated so often they will not believe.

MR. BRUNOT. This Great Father has not deceived them, and it will be bad if General Smith cannot give them any more provisions; they will blame it on Red Cloud. Mr. Campbell and myself came here because we are your friends, and we wish you to do what is for your good. Some people do not want you to go. They want to get your ponies and your robes. We do not want your lands, or anything. It makes us happy when we are trying to do you good. The Great Spirit has given us many things that he has not given to others, and we want you to select a place where good men can teach you that which makes us happy. The men are growing old, and after a while they will be gone. The game is getting scarce, and after a while it will be gone. There are bad white men, who care only to see the graves of the Indians. We are not the friends of that kind of people. We talk against them, and say the Indian will do right. I am telling you this to show you that I am your friend. Do you think you talked differently before your people this morning from what you have said to me now?

RED CLOUD. I want to go over the river; that is what I want.

MR. BRUNOT. Many of your people want to go, and you ought to talk before them that you want to go. They are afraid to say they want to go, because they think you do not wish to go.

RED CLOUD. I think I will succeed; I am almost alone here. I want to get all my people together, and I think I will get them to cross the river, but whether I do or not, I will bring General Smith word at once, whether it is yes or no. In every council we consult the Great Spirit. I do not want to be the only chief; at the treaty in 1851, we made one great chief, and the white men killed him. Would you want me to say I am the great chief?

MR. BRUNOT. Do you know what the chiefs who are here think of going over the river?

RED CLOUD. I think all that are here want to go. They have eaten of the white man's bread. But I want to see them that are not here. I know everything; all the bands are divided; half want to go, and half do not, and I fear trouble if I decide; trouble between my people and the whites.

MR. BRUNOT. Do you know of a good place for the agency?

RED CLOUD. I do not. White River is a good place, but the Brulés have taken it. Beaver Creek is running water, but it is like physis, it goes right through you, that is why we never camp there.

MR. BRUNOT. What kind of a country is it above the forks of the Cheyenne?

RED CLOUD. Most places you must dig for water. The river is shallow and sandy.

MR. BRUNOT. I hope you will find a good place. Are there any white men or half-breeds who do not wish you to go over the river?

RED CLOUD. I do not know of any such. I do not listen to them. There are many Indians who like to stay about the agency, and see what is going on.

Brave Bear here came in and advised Red Cloud to name a place, and said his (Red Cloud's) sons had sent word for him to name it.

MR. BRUNOT. How soon will I see you again.

RED CLOUD. I cannot say, I cannot name a day.

*Report of a conversation held at General John E. Smith's headquarters the day following the council.*

FORT LARAMIE, June 13, 1871.

MR. BRUNOT. How soon can you decide about the agency?

RED CLOUD. I told you before I could not say alone where to put the agency; I told you yesterday I would go to my camp and consult my people, and bring you the message, whether they consent to go over the river with the agency or not. I say again wait for me. The earth will not move away, it will be here for a long time, and there need be no hurry. I am trying to persuade my people all to go, and it takes time to bring them all to it.

GENERAL SMITH. My friend, the earth does not go away, but the sun comes and goes, the seasons pass away, and nothing is done.

Mr. BRUNOT. Last fall some of the Ogallalla chiefs wanted to go. Red Cloud said wait, and he still says the same.

RED CLOUD. It is a fact.

Mr. BRUNOT. They are all waiting for him; the Great Father is waiting for him; the summer is going away; winter will come, and there will be no house in which to put the food.

RED CLOUD. It is a fact, it takes time to build houses.

Mr. BRUNOT. If we begin soon all will be comfortable before winter.

RED CLOUD. If you build a house back of the river, how long will it be before the Great Father sends soldiers? I want to tell the Black Twin.

Mr. BRUNOT. We want to built it back where the white man cannot come; not just over the river.

RED CLOUD. (To Major Wham.) You mentioned the bend of the river.

MAJOR WHAM. I told him, before Mr. Brunot came, that I would ask the Great Father to build it in a bend of the river, and mark off a reservation, and after a while we could move it back into the country.

Mr. BRUNOT. Such a proposition ought not to have been made to them.

MAJOR WHAM. I have the authority now at my office to so locate it.

RED CLOUD. How long before there will be soldiers?

Mr. BRUNOT. I do not think there will be any as long as the Indians do well.

RED CLOUD. There are fools on both sides; after I came back from the East, white men whipped my people seven times, I want my people to understand this before I name the place.

Mr. BRUNOT. We want them to go where white people cannot go to do so.

RED CLOUD. It was not long before till soldiers came to places we had selected, and it will be so again.

Mr. BRUNOT. The Great Father wants you to go where soldiers will not come. When there was war, the soldiers went into all parts of your country. Here, Indians get drunk and fight, and soldiers have to be sent after them. We do not want it to be so, and if you locate your agency in your own country, where white men dare not go, the soldiers will be kept out much longer.

RED CLOUD. Every place a white man goes whisky goes. You can see them here drinking night and day.

Mr. BRUNOT. Will you return the middle or the last of next moon?

RED CLOUD. I do not want to tell a lie, and will not name the day, but messengers will come in every few days.

Mr. BRUNOT. What do you think of White River?

RED CLOUD. Of course it is good, but I do not know what to do.

Mr. BRUNOT. Will you go to White River and plant corn?

RED CLOUD. I do not know anything about farming I never came here.

Mr. BRUNOT. After you go away, we will hold a council with the other chiefs, and see what they say.

RED CLOUD. There are four other head chiefs back of me. When you were here before you gave me cloth and calico, but there were no guns nor ammunition. I told my people to take it. I told you to go back to the Great Father and tell him we must have guns and ammunition.

Mr. BRUNOT. I told you I would tell the Great Father; but that you had not been at peace long enough; and that as soon as the agency was fixed the guns would be sent.

RED CLOUD. They promised guns and powder and lead to Spotted Tail, on the Arkansas, and he has not got them. I do not know it but some one told me.

Mr. BRUNOT. Some guns were sent to Spotted Tail, and as soon as your agency is fixed they will be sent to your people. We want you to come back soon, before the rations are stopped. Some of your people want to talk and name a place over the river. You want all to talk one way, but we will wait till you consult your people.

RED CLOUD. Wait on me.

Mr. BRUNOT. General Smith and Major Wham will wait fifteen days, unless you can get back sooner, and if you are not back at the end of fifteen days, there will be a council for them. Does that suit you?

RED CLOUD. It does not make much difference; call them up at any time. They will talk, their hearts are not all the same.

MAJOR WHAM. We want Red Cloud to say where the agency shall be, and be the big chief after it is fixed. Remember it is fifteen days.

Here the conversation ended. The chief, after a friendly greeting with those present, set out immediately upon his mission to the rest of the tribe, saying that he would send word every few days, and would come and inform General Smith and Major Wham as soon as his people could arrive at a decision.

THOS. K. CREE, *Secretary.*

FORT LARAMIE, June 13, 1871.

*Report of an interview with the other chiefs after Red Cloud had gone.*

FORT LARAMIE, June 14, 1871.

Mr. BRUNOT. I am glad to see you all, and will bear to the Great Father the message that your hearts are good, and that you will do what he wants. Red Cloud has gone to see more of his people, and I hope will be back in fifteen days, when you will hold a council and decide where to put your station. I think you will find a good place; White River is a good one, but you will decide, and I will tell the Great Father that all is right. If you have anything to say I will be glad to hear it.

RED DOG. There is nothing to say now; Red Cloud is gone out and we will wait fifteen days for him; if he comes back, all is well; if he does not, we will have a talk and send word to the Great Father what we will do.

Mr. BRUNOT. That is good.

AMERICAN HORSE. We will fix the place for our agency.

RED DOG. Where we fix the place for our agency, we want a gun and ammunition for each lodge, so that we can shoot game. We will wait for Red Cloud; you are waiting for him; if he cannot fix a place we will select one for ourselves. There are many Ogallalla and Brulés here, and more are coming. We all want to go over the river. We understand you; Red Cloud said he would be back in fifteen days; if he comes all is right; if he does not, we will choose one.

MAN AFRAID-OF-HIS-HORSE. When we are at our new agency and you come to smoke the pipe again with us, you will not say all the time go over the river.

THOS. K. CREE, *Secretary.*

FORT LARAMIE, June 14, 1871.

#### DEPARTMENT OF THE INTERIOR,

*Office of Indian Affairs, March 15, 1871.*

SIR: I have the honor to invite your attention to the following subjects, in connection with the duties of the Board of Indian Commissioners, viz:

Provision is made by the second article of the treaty concluded September 30, 1854, between the United States and the Chippewa Indians of Lake Superior and the Mississippi, (Stats. at Large, vol. 10, p. 1109,) for the issue of patents for the selections of certain members of the tribe.

Provision is also made by the eighth article of the treaty concluded October 2, 1863, with the Red Lake and Pembino bands of Chippewa Indians, for the issue of patents for certain selections for members of said bands.

Under date of August 5, 1870, R. F. Crowell, esq., received instructions as special agent to investigate and report who are entitled to the benefits of the above provisions, and has made a partial report to this office.

It is suggested whether the supervision of the Board of Indian Commissioners in the adjustment of the claims of said Indians is not required, and whether it would not be well for them to visit the locality where these Indians are, and fully investigate the matter.

A treaty of peace is about to be concluded between the Pawnee tribe and the Sioux, at the Santee Sioux agency. The time fixed for the meeting is to be not later than April 7. It is also suggested whether it would not be well for some of the Indian commissioners to be present.

A treaty is also contemplated between the Blackfeet and Pend d'Oreilles, and I deem it advisable that a representation of the Indian commission should be present when said negotiations take place; further information in regard to the same will be given said commission upon the subject, if they should propose to send a representation.

Provision is made by a resolution of Congress, approved July 1, 1870, for negotiation with the Indians upon the Umatilla reservation in Oregon, to ascertain whether said Indians will relinquish their right to said reserve and remove therefrom; this negotiation will take place in a short time, and it is respectfully suggested whether it would not be well for a representation of said commission to be present.

The selection of a reserve for the Osages on Cherokee lands west of 96° having been recommended, and there being conflicting statements in regard to the price for the same, I respectfully recommend that said commission be requested to send a delegation to travel over the selection for the Osages, and examine thoroughly every part, and report their views as to the price to be fixed upon the same, and that also they extend their visit over all of the Cherokee land west of 96°, extending to 100° west, and report in detail the character of the same, and their views as to the proper value to be affixed.

Frequent reports have been received in regard to trouble which is apprehended with the Cheyennes and Arapahoes, and Kiowas and Comanches, and I therefore deem it advisable that said commission should have these Indians visited by members of their

commission and the fact fully ascertained, and their labors extended to avert trouble if necessary.

There are also two subjects relative to Indian affairs in California, which I deem it proper should receive the attention of the commission, viz:

The Mission Indians in Southern California, who are without a reserve and without an agent also.

Tulare River farm, rented for an agency, where there has been much trouble between the Indians and surrounding whites, and where it is questionable whether the renting of said farm should be continued.

With reference to the act of July 15, 1870, making it the duty of the Board of Indian Commissioners to supervise the expenditure of money appropriated for the Indian service, I would state that the custom of this office in regard to placing funds at the disposal of superintendents and agents is as follows:

The officers referred to submit itemized estimates of the funds required by them each quarter or half year, and this Bureau remits to them what is deemed necessary and advisable, due regard being had to the amount appropriated and applicable for the objects for which the funds are required, I respectfully submit whether it is desired to make any change in this custom, and if so, shall this office advise the Board of Indian Commissioners when remittances are made, that some member or members thereof may supervise the expenditure of the money.

Referring to the provision in the last Indian appropriation act, relative to submitting vouchers for goods and supplies furnished to the Indians, or for the transportation thereof, or of machinery, buildings, &c., under and by virtue of any contract, to the executive committee of the Board of Indian Commissioners for examination and approval, it is respectfully submitted for your decision whether any vouchers except those given for goods and supplies, &c., furnished under written contract are to be so submitted, or does the law require all vouchers of whatever description, including the accounts of superintendents and agents, to be referred to said committee for the objects stated.

To avoid making this report of too great a length, as brief statements as possible have been made. Full information in detail will be furnished said commission upon any of the subjects mentioned by this office, if the same is required.

I will also add that, in addition to the foregoing, I deem it of great importance that the attention of the commissioners should be called to the proposed council to be held between the civilized tribes of Indian territory and the wild tribes west, to take place in the ceded Creek country about the 1st of April next, as it is important that said commission should be represented there.

Also to the condition of the freedmen residing in the Choctaw and Chickasaw countries, provision having been made in regard to them in the Choctaw and Chickasaw treaty of April 2d, 1866. (Stats. at Large, vol. 14, page 769.) The condition of these people is entirely unsettled, and demands attention and action.

Very respectfully, your obedient servant,

E. S. PARKER, *Commissioner.*

Hon. C. DELANO,  
*Secretary of the Interior.*

### A No. 1.—*Visit of the Cheyenne, Arapahoes, and Wichita Indian chiefs, to New York and Boston, June, 1871.*

RECEPTION AT COOPER UNION—SPEECHES BY PETER COOPER, LITTLE RAVEN, BUFFALO GOOD, PROFESSOR MARTIN, AND OTHERS.

The ever-recurring and never-settled Indian question was forcibly and pathetically pressed upon public attention last night at Cooper Institute, on the occasion of the public reception of the Indian chiefs who have been visiting Washington under the auspices of the United States Indian Commission, to confer with the Government concerning the settling of their boundaries. The rear of the platform was decorated with national flags, and festoons of red, white, and blue hung from the ceiling over it. The hall was completely filled by an intelligent audience. At 8 o'clock the chiefs and their friends appeared upon the platform, the Indians seating themselves in chairs behind the speaker's desk. They were dressed partly in their native style, wearing moccasins and ear-rings, and having their long black hair braided. One wore a gaudy red robe. Of Arapahoe chiefs there were Little Raven, Powder Face, and Bird Chief; of Cheyennes, Little Robe and Stone Calf; and of the Wichita, Buffalo Good. The latter, the most eloquent speaker among them, was dressed in a plain black pale-face suit. Their prevailing type of face is that usually seen in the warlike Sioux race—that is, a coarse, broad lower face, Hebrew nose, and retreating forehead.

Powder Face is a marked exception among them. His profile has all the grandeur of the traditional "noble Indian," and his appearance generally is very expressive of pluck and stolid endurance.

Among the persons on the platform were William E. Dodge, Messrs. Bishop and Colyer, of the United States board of peace commissioners, Peter Cooper, Henry Burgh, B. Tatham, E. Cromwell, secretary of the commission, Wilson G. Hunt, Chancellor Crosby, and Professor Martiu, of the university. Peter Cooper, president of the commission, was chairman of the meeting, which was opened with prayer by Chancellor Crosby. The speeches by Little Raven and Buffalo Good were delivered in the earnest, impetuous manner which usually characterizes the orations of the American aborigines when repeating the tale of their wrongs. Mr. Dodge fitly illustrated their appearance and manner when he said, "You never see a smile on the face of Buffalo Good." Their whole behavior shows that the one fact is ever uppermost in their minds, that they are passing away, like snow in spring-time, before the face of the all-conquering white race; that the difficulty of their effort to continue the hap-hazard struggle of their ancestors with the "dull material accidents of the sensual body"—in the old way—is continually enhanced by the pressure of civilization upon them on all sides. Their gestures are singular; they indulge but little in the wide-swinging motions of civilized orators, confining themselves mostly to quick, nervous jerks of the hands near the breast. The audience always applauded them heartily when they were most energetic in their denunciations of their white oppressors.

Little Raven, the first Indian speaker, standing behind the desk, with his well-tanned white interpreter beside him, told the story of the last two centuries from the Indian stand-point. As he uttered each sentence the interpreter turned it into English with considerable grace of utterance.

The opening remarks were made by Peter Cooper, who said:

#### PETER COOPER'S REMARKS.

About this time last year the visit of Red Cloud and his party interested a large audience in this hall. Although he had been disappointed in realizing his hopes, he assured us that he would counsel peace to his people; and he has faithfully fulfilled his promise. We have now with us the representatives of the Cheyennes, Arapahoes, and Wichitas, whose record fills a deeply-interesting chapter in the history of our country—more to the honor of the Indian than to the white man, I am sorry to say. These Indian chiefs have just visited Washington by invitation of the Government, and are returning to their homes. They are here, now, under care of Agent Mahlon Stubbs, a member of the Society of Friends, and, instead of being on the war path upon the plains, their presence here is a practical illustration of the peace policy of President Grant, which, however detrimental to the schemes of those who profit by Indian wars, cannot but meet the approbation of the nation, which has been saved from taxation to the extent of at least a hundred millions of dollars, while the western settler has been enabled to cultivate his land in peace. It is the desire of this association to unite with all good citizens to strengthen the hands of the President in his endeavors to secure to the Indians, and also to all men, that justice which is alone the key to peace. Mr. Crosby will address a word of welcome, and our Indian friends will speak for themselves.

The Rev. Dr. Howard Crosby then welcomed the Indians as follows, his remarks being interpreted to them by Mr. Smith:

We are members of a society that pleads the cause of the Indian against injustice. We believe that God made all men that they might live in peace with one another, each doing good to his neighbor. We greet you as brothers, and give you a cordial welcome to this city.

Little Raven, chief of the Arapahoes, spoke through the interpreter as follows:

#### LITTLE RAVEN'S SPEECH.

I have come from a long distance to see my friends. Years ago, when I was at home, they told me that I had a home here, and father and mother. I have come now to find them. When at home, in my camp, a letter came from the Father at Washington, asking me to come and see him away in the States. I had been waiting for it for a long time, and when it came I did not hesitate a moment, but came at once. I felt that the Father at Washington would right the wrongs of myself and my people. In this letter they told me I had many friends in this country who never saw the Indians, and who would be glad to see them. I talked with the chiefs of the other tribes, and we came here to see you to-night. Before leaving, I told my young people to remain with the agency till I came home, when I hoped to bring them good news. I told them I would be gone forty or fifty nights; they will expect me when that time is passed. They think I will look like a white man when I come back, because I have been to see the white man in the big house. I am glad to see so many of my friends here to-night,

so many gentlemen, chiefs, and ladies. I think the Great Spirit has something to do with bringing you all here to-night. Long ago the Arapahoes had a fine country of their own. The white man came to see them, and the Indians gave him buffalo meat and a horse to ride on, and told him the country was big enough for the white man and the Arapahoes too. After a while the white men found gold in our country. They took the gold and pushed the Indian from his home. I thought Washington would make it all right. I am an old man now. I have been waiting many years for Washington to give us our rights. The Government sent agents and soldiers out there to us, and both have driven us from our lands. We do not want to fight. The white man has taken away everything. I want to tell you of this, because I believe if you know it you will correct the evil. I think the Great Spirit is looking at all that is said here, and for that reason I am talking truth. I want my people to live like white people, and have the same chance. I hope the Great Spirit will put a good heart into the white people, that they may give us our rights. When I saw the old man (Peter Cooper) who invited us to come here to-night, my heart opened to him. I have thanked the Great Spirit many times that I have been permitted to be here. I want to tell you all that is in my heart, and if I do not it will be because I forget it, and not because I hide it. We want to travel in the same road as the white man. We want to have his rifle, his powder, and his ball to hunt with. My people are waiting on the hills to greet me when I return, and I want to give them a good report.

Buffalo Good, of the Wichitas, was next introduced, and spoke as follows:

#### SPEECH OF BUFFALO GOOD.

I am glad to meet my friends here to-night, and I want to have a good strong talk with you. I think there must be a great many big chiefs here to-night, by the looks of this audience. I have heard that there are a great many white people in the East who know nothing of the wrongs which have been done to our people, and would like to hear of them, and I am here to-night to tell a little of them. I will tell you a straight story, and no lies. We want houses built for our people to live in, and school-houses for our children, the same as white children have. I have heard that this house belongs to an old gentleman who loves everybody, and pities all poor people in the country. [Loud applause.] I think we should all be brothers. I want you to help all the Indians. Some are a little further along than we are, and we want to push ahead and get as far as they are. The white people have done a good deal of wrong to our people, and we want to have it stopped. If you are going to do anything for us we want you to do it quick. I saw the Commissioner of Indian Affairs in Washington, and he told me he knew all about it, and was going to fix it up; but I have heard that so long that I am afraid it is not true. But you look like good people, and I don't think you will fool us. The Commissioner told us he wanted we should come and see the white people; that they would do us no wrong, and we have had a very good time, and I think that time the Commissioner talked straight. Some white men come among the Indians, and seem to like to live there, just as we have come here; and I would like to stay here, too. Since I have been here I have met several gentlemen that I knew in my country, and I am very glad to meet them here, and to meet all the new friends that I have made here; and no white man has said anything bad to me since I have been here, and for that I feel very good. I have often heard, in my own home, that we had a great many white friends in the East, and since I have been looking over this audience, I think it is true. I want you to stop the white men from killing the Indians after this. The Indian loves to live as well as the white man. They are there, and they can't help being there. That is all I have got to say to you to-night. I have tried to make a straight talk, and to tell no lies, and I am much obliged to you for listening to me.

Professor B. N. Martin was then introduced, and said:

#### PROFESSOR B. N. MARTIN'S SPEECH.

Far to the southwest of the Plains, which are homes of the chiefs you see before you, lies our newest acquisition of the Mexican territory, the Territory, now, of Arizona, and among the arid wilds, which have given it its descriptive name, are the homes of the Apaches. After years of hostility, many of those fierce and bloody savages have been driven or induced to surrender themselves prisoners of war, and some five hundred of them had been collected near Fort Grant, one of the principal military stations of the Territory, where they were in charge of our military authorities. According to the official account which has just reached us, and been published in our newspapers within the last three days, a volunteer military expedition was got up at Tucson, the principal city of the Territory, some sixty or seventy miles off, to go and destroy those now submissive and friendly Indians. Word was sent to the commander of the post, but unhappily did not reach him in time for any measures of protection; and upon visiting the scene of the outrage, the bodies of twenty-three persons were found treacher-

ously murdered under all the guarantees of peace. Of these butchered bodies twenty-one were those of women, one of a boy, and one of an aged man. Further search revealed yet more dreadful facts. It was found that many more had been slaughtered. A hundred or more had been missed, but were supposed to be carried off as prisoners, for the slavery which, in those wild and distant regions, yet lingers to offend Heaven; but of those some sixty-three were found to have been murdered, like the preceding, and still the great preponderance was of women.

From these facts, officially certified to their authorities by officers in command upon the spot, it is evident that another great crime has been committed. The former unpunished massacres, against which the commission has heretofore made earnest protest, have borne their natural fruit, and the blood of the helpless, slain in mere wanton vengeance and hate, once more cries to Heaven against all who do not, by an energetic remonstrance, wash their hands of it.

Fellow-citizens, does such a deed demand many words to express its true character, or call for any eloquent amplification to make it felt? Shame on us if it is so. Shame on us if our hearts do not respond to the feeblest voice, and thrill at the truest appeal that condemns such outrages. I add two or three remarks in conclusion.

1. We repeat our conviction that Indian wars and disturbances arise not out of the brutal savagery of the Indian, but out of the frauds and crimes of the depraved frontier population. We believe, with increasing confidence, that the way to prevent or to suppress them is to show forbearance, to exercise patience, and, above all, to maintain good faith, and to do justice to the Indian.

2. Next, we call upon all good men to join with us in the expression of their conviction. We beseech you to give heed to this cry which again and again conscience hears from the dumb lips of the slain. Ought not all men of humane hearts to unite in demanding of our Representatives and Senators a policy of kindness and generosity in appropriations which shall inaugurate an era of promise and hope for the Indian, and guard him from the ruthless hands which seek thus remorselessly to cut him down? Let us send plows and seed, let us send cattle and implements—above all, let us send honest and faithful agents and teachers, who will carry cultivation and education to these poor sons of the forest and the prairie. Let good men arouse themselves from apathy, and, instead of sneers and neglect, let the interests of these unfortunates have outspoken sympathy and earnest thought for their relief.

3. We call on the Government to punish this atrocious outrage on its good name and on its helpless prisoners. The good faith of our Government is foully wronged by this deed of blood. It has pledged itself for the protection of these people, and, whatever their interests may be worth, its good name and good faith are precious. Let it, then, hunt out and punish these fiends in human shape. They are not the peaceable and orderly citizens of the Territory, but the outlaws and criminals who have devised and perpetrated this atrocity. The gamblers and murderers who have been driven out by vigilance committees from the more accessible portions of that western country, have fled to Arizona and congregated there, and are the terrors of that infant community. I hold in my hand a report from the Indian agency in New Mexico, which declares that many of the crimes which are attributed to Indians in that neighborhood are instigated by these men, Mexican or American. Sometimes they are not only the instigators but the perpetrators as well. They disguise themselves as Indians and run off the stock of the industrious settler; and no one will welcome the effort to suppress and punish these pests of the new settlements more warmly than the honest and laborious settlers themselves. We call on the Government to stretch forth its arm and see if it cannot reach these wretches and bring them to the punishment they deserve. Why, if a tribe of Indians had perpetrated such a wrong on our citizens, there would be no hesitation about the result. There would be law enough and force enough in the hands of the Government to pursue such a marauding horde to the farthest wilds of the continent and do a retribution that would ring through the land. The Government has done as much for far lighter sins. Where is the arm of its power now? Shall these men walk abroad in that land which they have defiled with blood, and boast of their guilt?

MR. W. E. DODGE

said that he had met these Indians in their own country, and before speaking they always went round and shook hands with him. (Mr. Dodge then shook hands with each Indian.) He then said that, as one of the commissioners sent to visit the Indians, he had seen these sons of the forest in their home. The Indians had told the audience a simple story, but it was the story of two hundred years ago. Ever since the landing of our ancestors on the Plymouth Rock the Indians have had the same tale to tell. It was not too late for the nation to do something for the little tribe of Indians that were left. Where were the Mohawks and the Six Nations, of this State, whom Mr. Cooper remembered in his youth? They were all swept away. By far the larger portion of the land which the great American people boasted was now theirs was once the ground of the noble sons of the forest. The poor Indian was driven hither and thither by the

railroads, looking for a place upon which to place his foot. The nation had promised to do this and that for them, yet many of these promises remained unfulfilled to this day. The military experience of General Grant had taught him that something ought to be done to save a remnant of these Indians. The policy of the present administration, if it can be carried out, will be to place the Indians on their reservations and educate and train them to walk in the white man's path. It had been settled by the Indians just out of Kansas that they could adopt civilized habits. What was now wanted was to put the Indians on these reservations, and spend a little of the money that had been spent in butchering them, to educate, elevate, and christianize them. The great object of the friend of the Indians was to let the people see them at public meetings and see that the Indians could be civilized. There was something that citizens could do, and that was they could manufacture public opinion. These Indians were looking to the white men to save them from extermination and to teach them Christianity.

#### MR. BENJAMIN TATHAM

said that he, with others, had pleaded the cause of the Indian before General Grant previous to his inauguration, and the President promised to do what he could for the Indian, and he (Mr. T.) believed that the promise had been kept. (Cheers.) Mr. Tatham traced the history of the treaties from the year 1851 to the present time, and the result of those treaties was that the Indians before them had been robbed of every foot of land they possessed. The speaker then urged upon the audience not to cast a ballot for a President that felt less for the Indian than the present President. (Cheers.)

#### RECEPTION IN BOSTON, MASS.

The Indian chiefs, whose advent among us was noticed in the morning, attracted much attention. This morning they were up early, admiring the green trees and listening to the singing of the birds in the park opposite the St. James, and said it quite carried them back to the banks of the Wichita, with its groves and mocking-birds.

Commissioner Tobey was on hand at an early hour with three open carriages, and the delegation were delighted with a drive through the suburbs of the city. They thought that the white man's houses were better than their buffalo tents, and that it was a good thing to go to school and learn trades if it would bring them such pleasant homes to live in; so said little Raven.

They stopped at the ice-houses on Jamaica Pond, and studied carefully the way they make frozen water; and at the water-works, to see how they get the water to run into their washbowls at the hotel.

Going through the grounds at Harvard, Little Robe thought he would try and send his son there to be educated, and the prints of Catlin's Indian history with Audubon's birds greatly interested them.

On their way home they stopped for a few minutes at the house of Commissioner Tobey, to see his family, and then called on the governor at the State-house to pay their respects.

Governor Claflin received them, kindly welcoming them to Massachusetts, and said that the policy of kindness to the Indian should always have his heartiest support.

Little Raven replied through the interpreter that he thanked him, and wished to say that he had been received with great kindness by all the people of the East, and that he was much pleased with all that he saw around him. He would carry it all back to his people, and tell them to live at peace with the whites.

After being shown into the two "talking-rooms," as they called the senate and assembly chamber, they drove to their hotel.

[From the Boston Daily Advertiser.]

**PUBLIC RECEPTION IN TREMONT TEMPLE—AN IMMENSE ASSEMBLY—ADDRESSES BY GOVERNOR CLAFLIN, MAYOR GASTON, "LITTLE RAVEN," "BUFFALO GOOD," "STONE CALF," VINCENT COLYER, E. S. TOBY, AND WENDELL PHILLIPS.**

Any person who attempted to enter the Tremont Temple at eight o'clock last evening, to be present at the public reception to the visiting Indian chiefs, under the auspices of the Massachusetts Indian Commission, realized that between three and four thousand people had been there before him, and that his chances of getting into the hall were exceedingly slim. From every entrance scores of people, unwilling to risk the unmerciful jamming which they saw that they were sure to be subjected to, turned

away without attempting to enter. They were indeed unfortunate, for the proceedings of the evening were most interesting, and all who were within seeing and hearing distance of the platform were satisfied to remain and applaud the speakers until long after 10 o'clock.

The Indian chiefs, Little Raven, Powder Face, Little Robe, Stone Chief, Bird Chief, and Buffalo Good, belonging to the Arapahoes, Cheyenne, and Wichita tribes, and the incidents of their visit to the city, have already been chronicled. They were brought into the Temple at eight o'clock, Governor Claflin leading the way with Little Raven on his arm, and the other chiefs following. They were followed by Mayor Gaston, Hon. Vincent Colyer, the Hon. E. S. Tobey, of the United States Board of Indian commissioners, and the Rev. John T. Sargent and other officers of the Massachusetts Indian commission. They were provided with seats on the front of the platform, in full view of the audience, who received them with loud and continuous cheers, much to their apparent gratification. After the applause had subsided Governor Claflin briefly announced the object of the reception, and called upon the assembled multitude to join in singing the first verse of "My Country, 'tis of thee," which was done. Mayor Gaston was then introduced, and made the following speech of welcome:

#### WELCOME OF MAYOR GASTON.

**CHIEFS:** In behalf of these good people with whom you have been daily associating, I greet you. They are here before you with their thousands of voices, if needed, to swell the voice of welcome. They are here to express the wish that this visit may be an agreeable one to you, and that it may be the means of promoting a lasting friendship between them and you. And they desire that when you shall return to your distant homes by the setting sun you will carry with you to your people their assurances of good will and friendship, and they trust that there will continue to be an abiding affection and peace between their people and your people forever. [Loud applause.]

The mayor was then introduced to the chiefs individually by one of the interpreters. After the conclusion of this ceremony, Little Raven, head chief of the Arapahoes, was presented to the audience, and spoke in substance as follows, his speech being interpreted by Mr. McCusker:

#### LITTLE RAVEN'S SPEECH.

**MY FRIENDS:** These big chiefs on the left and right have invited me into this big council-house and invited us to hear what you have got to say. This is a good house, and this is just the kind of a house to have a good talk in. [Laughter.] Some years ago General Sheridan met my tribe in the Wichita Mountains and told us that he did not want the Arapahoes to fight any more. It was a good talk, and I listened to what the general told me. I have kept that talk ever since, and have never fought with the white man. I want you to look upon these men around me; they do not look so strong as they really are, but they are not to be despised, even if they are Indians. [Laughter and applause.] The Great Father invited me and these other chiefs to come to Washington to see him, and he made just such a talk as Sheridan did, in a nice talking place. It was a good talk. It was just the kind of talk I wanted to hear, and I was glad I did hear it. Then I and my friends went to Philadelphia and to New York, and we had just such a good talk there. I told them that I wanted to have peace with the white man; and that I only wanted to be let alone. I was glad to see this, and my heart was glad to hear this. I was told that I had some friends at the North that I had never heard of nor seen before, and I found a great many chiefs here; some of them have been showing me through the city. The women, the children, boys and girls are glad to see me, and my heart is big, and I am glad to meet them. [Applause.] My people, the Arapahoes, the braves, and the women, are all anxiously looking for my return. My friends are waiting for me; they are now looking for me, and I am glad I have got so good a talk to carry back to them as I have received here. When I sleep at night I sleep with all this talk in my heart, and when I wake up I find it still there, and I am going to take every word of it home with me. [Applause.] I believe God is going to pity the Indians. He has shown us a good many friends here, and there is not one that has said anything or done anything wrong to my party. I am very glad of that, for if anything should happen to any member of my party my people would feel very bad on my return. Once the Arapahoes had a fine country in the West (Colorado,) but the white man has driven us from there. I hope some day the white man will do justice to the Arapahoes. There are a great many chiefs listening to what I say to-night, and I want to say that I only ask for justice. I am growing old, and I may die, but my children will live, and I hope justice will be done to my children if not to myself. God gave this country to the Indian, and God sent the white man here, but I don't think God sent the white man to do injustice to the Indian always. [Applause.] When I get home I shall talk to my young men, to any of them that are disposed to do wrong, and tell them to hold on and to behave themselves. I think my

white brethren I have seen here have made a great talk and that they mean what they say. [Applause.] That is all I have to say.

Buffalo Good, chief of the Wichitas, the acknowledged orator of the party, was then introduced, and made a long speech, which was interpreted by the same gentleman that performed the office for Little Raven. He spoke his native vernacular very fluently and with graceful gestures, and appeared to wait very impatiently while Mr. McCusker informed the audience what he had been saying. His speech in effect was as follows:

#### SPEECH OF BUFFALO GOOD.

GENTLEMEN: Washington (President Grant) invited me and these other chiefs to go to his big house in Washington City, to have a talk with him. I thought I was going to have a straight story, that my heart would be made glad by what I was to hear. But I have been disappointed, and I think Washington is not so much of a chief after all. [Laughter.] God gave this country to the Indians. He gave the white man a country across the waters. When He gave this country to the Indian He gave them the bow and the arrow and the land, and he was able to hold his own until the white man came over here. He gave the white man paper and a great deal more knowledge than He gave the Indians. Then they came to this country, but the Wichitas never fought them, but took them by the hand and treated them kindly. When I left home it was to see Washington, for I thought he was all the great chief in this country. But my friends told me that there were a great many chiefs, and that I should find some here; that is why I come here to-night—I didn't intend to come. But I am glad to see you. God told the Indians that some day the white men would come here. But we did not think they would treat us so unkindly and try to drive us from our lands. The bones of my fathers lie in every hill and valley of my country, and I don't want to be turned out from that country, for I love it very much. Nearly thirty years ago Washington gave me and my people a good chief, who tried to put us on the white man's road. We think he meant all that he said. We wanted to go on the white man's road very much. I and my brother represent five different tribes, who have always been friendly, and who wanted to be friendly to the whites. But because we do not fight, Washington takes away our lands and gives them to the tribes that are fighting them all the time. My people are grieved at this, and when I left home they told me to preach hard and get some satisfaction in regard to our country; but, when I return, it will be with my hands before my eyes and my head cast down, for I can tell them nothing new. They knew it all before I left. I, too, am getting along in years. I can't live forever, but I would like to see churches and school-houses built in my land, and would like to see my children educated before I die. [Applause.] For the white men have driven the buffalo off, and now we have got to live like white men, and so I want my white brothers to help me. Since I have been here I have heard a great deal about the people in this town. They help everybody else; they send their missionaries all abroad, but I ask you why you won't assist me and my people. [Applause.] I am glad I have met you all. You are all my friends—my brothers. I have taken fast hold of you with my hand, and I am not going to let go. Some of the tribes are living well. They ought to, for the white men have stolen our lands, (we who never hunted the whites,) and had given them to them, and they are learning them to grow up like white people. If they would give us our lands we would learn to do the same thing. When I got to Washington they said they knew all about my people. If they did know it, why didn't they help us, and fix it? But I am very glad I came on. One thing I wanted to speak about; I had nearly forgotten it. We settled in Texas, but the Texans drove us out; they wanted the country, for it was a very fine one. They stole our cattle and our pigs; they broke down our fences and obliged us to move. The Government told us we should be made all right, but it hasn't been done yet, and I want to know to-night why it hasn't? Then we went to Kausas, and when we got there some friends said we would whip the Texans all out, and then Government would appreciate our services. But the war broke out, and the soldiers who were going to help whip the Texans were called away. I reckon you know those people in Texas; they are a mighty hard people down there. [Laughter.] We have got a very good agent down in our country now, and if Washington does not help that agent to help us, I would like to have you help him, for we don't want to lose him. I wonder why your Government has not done something for the Wichitas and those other Indians that have done all that was wanted of them. They help the others, who are fighting them all the time, but it is no use doing anything for them. That is what I think. When I go home I want to, and I shall, carry home a big talk with me, to tell all my brothers down there. I shall remember it all; I shan't forget a word of it on the way. This is all I have got to say to you. I am sorry that I can't talk English, or you can't talk in Wichita, for if you did I would have a great deal more to say to you. [Applause.]

Stone Calf, a Cheyenne chief, who appeared in all the paraphernalia of an Indian warrior, a man with a ready utterance and a continual smile playing around his mouth,

was brought forward by Governor Claflin to respond also. His speech was interpreted by Mr. Smith.

## REMARKS OF STONE CALF.

FRIENDS: There is a great assemblage of persons here to-night. Ladies and gentlemen and children are assembled to see us and hear what few remarks we may have to say.

Friends, I have recently received an invitation from the President, our Great Father in Washington. This gentleman, the Indian agent, went from his own country to where we live with our invitation, and we at once accepted it and started for the East to see our Great Father in Washington. On our arrival there we found that he was kind to us, but we have had little to say to him. Our friend Little Raven—he is our friend; we are of two different nations, but we live in one nation—inasmuch as Little Raven, our great friend, has spoken to you and told you the wishes and thoughts of his tribe, you may consider it is for the Cheyennes as much as for the Arapahoes.

Friends, when we left our homes a long way in the West to come to see our Great Father in Washington, as well as the balance of my friends who are now before me, I had no idea of having to be called upon to get up and speak in their presence; but notwithstanding this I will make a few remarks. There is but a remnant of our tribe left. A few years ago they were in trouble with the Government, not from any causes that we created ourselves, but from abuses from western white men who are on the borders and are nearly connected with us. We have made several treaties with the United States Government, and in the last treaty of 1867 there were seven commissioners sent out to talk with us in regard to living in peace with the American people. But their promises made then have never been fulfilled; they never have been complied with, while ours have been. Now why are we confined to this small strip of country that is left us in return for the whole Territory of Colorado that belonged to us? They said they would teach our people to plant and raise corn, and to build our habitations from trees. But before they ever ploughed or planted an acre of corn for us they commenced to build railroads through our country. What use have we for railroads in our country? What have we to transport from our nations? Nothing. We are living wild, really living on the prairies as we have in former times. I do not see that we have been benefited in the least by all the treaties that we have made with the United States Government. We wish the Government at present, with the aid of this association here, to stop the railroads from going through our country until we have some way to support ourselves there. We haven't an ox, we haven't an acre of corn growing to-day in our great country that the Government has said they would reserve for us.

I speak of railroads; not that we have any objection to railroads if we had any use for them; but you can't build railroads through our territory without white men being left among us on each side of the railroad, and they will come in conflict with us. They cannot remain there in peace with the Indians. Bad men are sent to build these railroads, and bad men are left among us. We have young men that are foolish, who have not been thoroughly civilized. I for my part am at peace with the white man, and desire to remain at peace with him; but if you send bad men among us, not chiefs like those who are here to-night, we cannot remain at peace. We expect these white chiefs who are here to-night will support us in what we are saying, and we hope they will stop at once the progress of any railroads through our country, so that we may live at peace for a long time with the American people.

Friends, I see many here whom I shall probably never see again, and I am about to conclude the few remarks I have to say to you. To-morrow morning I expect to leave this city, but I shall never forget the friends I see here around me. I shall never forget the gentlemen whom I have been introduced to here, for I know they are my friends. Peace is all I want. I meet you all in peace, and return home with the hand of every one of you ladies and gentlemen here, and I will give the hand of every one of you to my nation when I return, and say that we shall be at peace with the American nation hereafter. [Applause.]

Friends, I have made all the remarks I have to make. I am to leave you to-morrow morning, to start westward to see my women, and friends, and children I left behind. [Applause.] The secretary of the board of Indian commissioners under whose auspices the delegation had been brought to Boston was then introduced.

## REMARKS OF VINCENT COLYER.

My friends, and, better still, the friends of the Indian, it was that you might hear and see the Indian that I came to this city. For that I am here to-night. You have seen them and you have heard them, and my work is done. But it was thought by the managers of the Massachusetts Indian Commission that I should say a few words of the character of these people, briefly touching upon their history, and endeavor to make clear to you what are their wants. We of the Indian Department divide the In-

dian tribes of America into three classes. The first. The nomadic tribes, who subsist by the chase and rarely abide more than a season in the same locality. Second. The partially civilized, who fish and hunt, and yet live in fixed localities and permanent homes. Third. The civilized, who cultivate the soil, manufacture garments, stone-ware, &c.; live in well-constructed houses, and dress like white men. Of the first class you have five eminent specimens before you to-night—that class which roam over the great plains east of the Rocky Mountains. Among these the foremost in the southern country are the Cheyennes and Arapahoes, whose leading chiefs you have just listened to. Associated with them are the Comanches, Kiowas, and part of the Apaches in the southern plains. They are all roving bands, not unlike what we call the Bedouins of Arabia, and are furthest removed from civilization. You have seen and heard them here to-night. You can tell for yourselves whether they talk like men and look like men, and, as I believe I am talking to a Christian audience, I will ask you also whether, as Christian men and women, you cannot, in looking upon and listening to these men, see in them the image of God, and proper objects for Christian solicitude and Christian effort. I might talk to you by the hour and I would fail to convince you of the character of these people in anything like the extent by what you have seen and heard. It was for this, in a great measure, that the Government at Washington invited these Indians to Washington and to the East. Mr. Colyer referred to the action of the President in initiating peace measures when trouble with the Sioux existed, and said that many an anxious mother and brother were waiting to hear the result of the visit of these chiefs. They were invited to come to the East in order to avert the threatened troubles on the southern plains. The commissioners hardly dared tell the chiefs that General Sheridan was investigating the state of affairs on the border, so fearful were they that some trouble might arise. There were bad men among the Indian tribes just as there were in this city—the only difference being that the Indians have no police. It would be no more wicked to shoot down disturbers of the public peace in this city, in case of any act of vandalism, than it was to shoot down such men as stood before them. Now the Indians were to carry back peace to their country, as the result of their visit. Mr. Colyer said some might think the President's policy was being carried out most effectively, but just now intelligence had come of an Indian massacre equaling in horror the Chivington massacre of four years ago. The late massacre in Arizona was described in burning and indignant language, and denounced as the crowning outrage against the Indians. Numerous examples were cited of the bad faith of the Government in keeping its treaties with the tribes, and an earnest appeal was made to the people to lend their aid in rendering justice to the remnant of this great people now driven to their reservations in the extreme West.

#### REMARKS OF E. S. TOBEY.

I may as well yield to your very natural and proper wish to listen at once to the distinguished orator whose name you have called. Indeed, I might rest the appeal made by these chieftains just where they have left it—I believe on your hearts. I would even leave the touching remarks and facts which have been presented by my colleague, were it not that by an act of the Government I have been placed on such intimate relations with this whole subject that my silence would be misconstrued throughout the land wherever my name is known. Mr. Tobey thought they had really been having a "good straight talk," as Little Raven had expressed a desire to have. He would say to the Indians that the Great Chief at Washington is not a talking chief, but he has an earnest purpose to maintain a peace policy toward the Indian, with all the strength and all the power at his command. He desired to inform them that his powers were limited, and that he must have the sanction of the Congress of the United States, and Congress must have the sanction of the people before he could carry out his policy to protect the Indian. Mr. Tobey praised the President for his efforts in this direction, and referred to the fact that he was the first of the Presidents to call attention to the condition of the Indians in an annual message. In closing, he appealed to the audience to assure the Indians of their sympathy and their purpose to sustain Congress in meeting the obligations of the country to the red men. He believed the people of Massachusetts would be unanimous in their vote upon this question, if it could be put to them.

In response to the enthusiastic calls for Mr. Phillips, he was introduced, and a hymn on the programme was omitted in deference to the impatience of the audience. He said:

#### ADDRESS OF WENDELL PHILLIPS.

Ladies and gentlemen, and Mr. Chairman: The extremes of the earth meet on this platform to-night. Here we are, the fruit of two or three thousand years of civilization. All that art and letters and religion could do for us we have inherited. We harness the steam; we send the lightning on errands; we subjugate nature. More than that, we have learned the omnipotence, the absolute omnipotence of order. We

know what patient, persevering effort, generation after generation, marrying the ages together, can accomplish. We are educated by a thousand years into the consciousness of the sacredness of law. These are very great powers. Now we stand side by side to-night with the rude tenants of the forest; men with few ideas, scanty traditions, rude arts. They come to us with only three elements of humanity. One is the indestructible sense of right and justice, which we never found a race so demoralized that they did not possess it. In their case these are added to an eloquence to assert their rights, and a courage to defend them, which places the Indian side by side with the Saxon and the Greek. No race ever outdid him. There is a class of men in our country that gather up the tradition of Indian violence, from Massachusetts Bay back to Colorado, and try to fire the heart with revenge. Why, fellow-citizens, if, from Philip of Pokanoket down to Black Kettle on the far plains and prairies, the Indian had not resisted us inch by inch for every acre of land that we stole from him, I should be ashamed of the soil that fed him and the sun that looked down upon him. What is to give our children courage? This same climate and this same sun. Is our race in the next thousand years to run out into cowardice, into pigny thoughts, into standing coward and at bay? No. The Indian who taught us what this American continent can make of manhood has written that record in a resistance that neither the omnipotence of civilization nor the overwhelming numbers of forty millions of people could ever reduce into yielding to us tamely. I thank him. I am only proud of my country as a continent, because the race that preceded us was no race to yield up tamely their rights. I should be ashamed to be the successor of some of the *roues* that go out in history. Why, you know, fellow-citizens, that the darkest page in human record is the contact between civilization and the aborigines. The contact of civilization with barbarism is the scandal of history. The civilized man approaches his victim, demoralizes him with his vices and then crushes him under his feet. And if we were to measure the justice or the merit of civilization by the fringe which comes in contact with barbarism, as we advance we should have to cover our faces and put our hands upon our lips, for it is a record of infamy from the earliest stage which history has recorded down to the present day; and the only and the brightest spot in that section of our history is that the Englishman, with all his art, with all his wonderful superiority, with all the omnipotence of his warlike machinery, with his overwhelming numbers, has never yet met the Indian and frightened him anywhere.

You say, these representatives of three hundred thousand men, they can only appeal to our pity. From Massachusetts Bay back to their own hunting-grounds, every few miles is written down in imperishable record as a spot where the scanty, scattered tribe made a stand for justice and their own rights. Neither Greece, nor Germany, nor the French, nor the Scotch, can show a prouder record. And instead of searing it over with infamy and illustrated epithets, the future will recognize it as a glorious record of a race that never melted out and never died away, but stood up manfully, man by man, foot by foot, and fought it out for the land God gave him, against the world, which seemed to be poured out over him. I love the Indian, because there is something in the soil and climate that made him, that is fated in the thousand years that are coming to mold us, and I hope we shall always produce heroes as persistent as Philip and Meketavata, the Philip Sidney of the prairies.

Now, one word more. Do you know the history of a single aboriginal race, brought in contact with a great civilized wave, that has ever behaved any better? Can you show me a finer record on any continent? When the barbarians of India met Alexander of Macedon, and the Macedonian king hurled in their faces the same reproach that the press of America does at the Indian, "You defend yourselves savagely!" the haughty chief replied, "Sir, if you knew how sweet freedom was, you would defend it even with axes!" That is what the Indian says to us. No matter what be the massacre; no matter what be the weapon; no matter what be the ruthlessness with which I assert my right against your uncounted millions. If you knew how sacred justice was and how sweet liberty, you would recognize that I was right in defending it even with these stern methods.

But still there is another word to be said. Every fair-minded man that approaches the Indians comes back with the same testimony. Every gentle heart, be it in the bosom of man or woman, every fair-minded man, be he soldier or citizen, comes back with the same record. The ordinary ruffian paints him black; he has to in order to excuse himself. But ask Jesse Fremont, after her years of residence, with no man within reach but an Indian, in her lonely home, where the general left her week after week and month after month, and nothing but women under the roof! "They told me," said she, "to lock every door, to leave no article of property outside my walls. I never drew a lock, I never brought in an article from the lawn, and I never had an unkind word, nor the triflingest article stolen in that whole two years." You go from the women to the Episcopal bishop of Minnesota, Bishop Whipple, twelve years at the head of that diocese, and within its girth the representative of some of these tribes and their neighbors. I was his guest for a day. Said he: "I have traveled on foot and in the saddle over every square mile of my diocese. I know every Indian settle-

ment in it. I have watched them for a dozen years. Some of them will drink and some of them will steal, and they are of our race, for they have the same vices; but in every difficulty that has occurred in this twelve years of my residence between the Indian and the Government, the Government has been always wrong, and the Indian has been always right." But he was a Christian priest—perhaps judged from a sentimental point of view. We will go out to St. Louis. We will open the door of that old rough frontier soldier, General Harney, graduated at West Point and sent out to the frontier when 19 years old, living there 50 years until to-day. General Harney, cradled in experience with the Indian tribes, grown gray in their companionship—what does he say? I never yet knew an Indian chief to break his word! [Applause.] Search me now—Mr. Colyer, forgetting his own education, called our great men at Washington our chiefs—search me now the catalogue of great chiefs from Maine to Florida, and find the man of 70 years that can lay his hand on his heart, and say, I never knew an American brave to break his word. Put into one scale the Christian, with his education and his honor, his instincts and his chivalry, and put into the other the savage, and then summon your witness of fifty long and weary years, and find me a man so green, from Bangor to Texas, that he has not found the larger number of American chiefs have sadly broken their words. Well, General Harney goes on to say: "I have lived on this frontier 50 years, and I have never yet known an instance in which war broke out between these tribes that the tribes were not in the right. Why, I can tell you that every one of these men with us to-day is able to say of the United States, 'Its word is a lie; its treaty is a snare; its flag is a shame.'" Mr. Phillips narrated General Harney's experience in attempting to keep faith with the Indians, and referred to the last war with the Cheyennes, in which the Government spent nine millions of dollars and some hundreds of lives in the killing of six Indians. That was an expensive way, and if they undertook to kill off the 330,000 and their descendants at that rate, Boutwell would have to attempt some new arithmetic to settle the national debt. [Laughter.] He then presented in a telling manner the worst phases of the governmental relations with the Indian tribes, recalling the incidents of two of the most atrocious massacres, and contrasting the whole policy of the Government and that of the Canadian dominions, which ninety years ago anticipated General Grant by protecting the Indian, and have never had much of any trouble with him. We have spent a thousand millions in fighting him and have never been just to him. Mr. Phillips closed as follows: "What I want of every one of you to-day—what I want of every editor in Massachusetts is that you should say to Grant: Forget republicanism, forget democracy. Deep down in the hearts of the people, in a substratum which no division of party can reach, there resides the indefeatable purpose of the New England people that the law shall be as potent on the prairies as it is in State street—that these ruffians of Arizona and these murderers of the Apaches shall be hung just as certainly as if they committed murder in the yard of the State House, or upon the very steps of the capitol. Don't fear that when you have carried out that exact justice to the very shores of the Pacific it will weaken the republican ranks or lose you a single vote. We assure you that the justice of the American people, the honor they give to their flag, the respect that they pay to law is so perfect, that it overrides the lines of party, and will not only save but lift higher the man who, risking office, trampling under foot party lines, forgetting all the greed of Indian rings, shall carry out the most perfect protection in the minutest particular to every atom of property and the most trifling right of the smallest Indian tribe. Let our pride be, fellow-citizens, that there is not an enemy so weak, that there is not an Indian tribe so small, there is not a lonely cavern beyond the Rocky Mountains so distant that the American flag and the American arm cannot reach there, and make the law triumphant over every force." [Applause.]

Mr. Phillips was the last speaker, and after the singing of a hymn the benediction was pronounced by the Rev. Dr. Kirk, and the meeting ended.

#### VISIT TO THE LOWELL MANUFACTORIES.

Yesterday forenoon the chiefs, accompanied by Commissioners Tobey and Lang, Agent Stubbs, the interpreters and several others, went to Lowell on the 8 o'clock train, and visited the mills of the Tremont and Lawrence companies, and the Merrimack Print Works. They expressed much delight at witnessing the process of manufacturing cotton goods. They were shown about the places named by Mr. Cumnock of the Boot Mills, Dr. J. C. Ayer, Thomas S. Shaw of the Tremont and Suffolk Mills, and Mr. Burrows of the Merrimack Print Works. They were furnished a collation at the Merrimack House at twelve o'clock by A. G. Cumnock, esq., and returned to Boston by the noon train. Buffalo Good, on behalf of the visitors, made a speech of thanks for courtesies received. Each of the chiefs received samples of goods manufactured by the Lawrence and Merrimack companies.

## APPENDIX A b.

## REPORT ON THE APACHE INDIANS OF ARIZONA AND NEW MEXICO.

BY VINCENT COLYER.

This report shows plainly that, according to the records of the Indian Department, the Apache Indians were the friends of the Americans when they first knew them; that they have always desired peace with them, and when placed upon reservations in 1858 and 1859 were industrious, intelligent, and made rapid progress in the arts of civilization; that their ill-will and constant war with the Mexicans arose from the fact that the Mexicans denied them any rights to the soil as original occupants, and waged a war of extermination against them; that the peaceable relations of the Apaches with the Americans continued until the latter adopted the Mexican theory of "extermination," and by acts of inhuman treachery and cruelty made them our implacable foes: that this policy has resulted in a war which, in the last ten years, has cost us a thousand lives and over forty millions of dollars, and the country is no quieter nor the Indians any nearer extermination than they were at the time of the Gadsden purchase; that the present war will cost the people of the United States between three and four millions of dollars this year; that these Indians still beg for peace, and all of them can be placed on reservations and fed at an expense of less than half a million of dollars a year, without the loss of a life.

On representing these facts to the President, Commissioner Colyer was directed to proceed to New Mexico and Arizona, and there take such measures as he deemed wisest to locate these Apache Indians upon suitable reservations, feed, clothe, and otherwise care for them; and the President instructed the War Department to co-operate with the commissioner. In obedience to these orders, he went to those Territories, and in consultation with the officers of the Army, Indian agents, and the Apache chiefs, he selected suitable reservations in four localities, remote from settlements, invited the Indians to come in, and left them in charge of the Indian agents in New Mexico, and officers of the Army under General Crook, in Arizona. The Indians came in gladly in large numbers, and at last advices over four thousand, being one-half of all the roving Apaches, were living peaceably upon the reservations; that no depredations have been committed by any of these Indians since they came in; and that before spring, if they are unmolested, and have sufficient food, he believes we shall have peace restored to these Territories; that Major Generals Schofield, Stoneman, and other Army officers, reported that the Apaches, who came into the military posts last year paid for a large part of the rations issued to them by supplying hay and wood to the garrisons at much less cost to the Government than that paid to the contractors for the Army. The report further shows that the act of Captain Nelson, the Army officer in command at Camp Grant, in turning back the party of two hundred armed citizens, who imperiously demanded to cross the Indian reservation at that post, was necessary, saved the three hundred Indians collected there from another bloody massacre, and the nation from a disgrace, and thanks Captain Nelson for it. The order countermanding the previous order of General Crook, of employing Apaches to fight Apaches, was made by the general himself, greatly to his honor. The commissioner traveled through the heart of the Apache country with an escort of fifteen men, and though the Indians came around them day and night in scores, frequently outnumbering them five to one, not an animal was disturbed or an article stolen. He was received with cordiality by General Granger, General Crook, and all the officers of the Army in New Mexico and Arizona, and that there was at no time any discord of action. On his return to Washington, the reservations selected by the commissioner, and the arrangements made by him for the protection and subsistence of the Indians upon them, under the care of the officers of the Army under General Crook, were approved by the President, the Secretary of the Interior, and directions given by General Sherman for their permanency.

Of the complaints made by officials and editors in Arizona, of a want of courtesy toward the white people, as well as of the numerous threats against his life, the vituperation and abuse of the press of Arizona and California, the commissioner takes but slight notice, as the business for which he was sent was accomplished, and he trusts for his vindication to time and the good results with which he believes God will prosper the work.

## REPORT.

For the last fifteen years the records of the Indian Department show that the Apache Indians of New Mexico and Arizona have desired peace, and the agents of the Government have asked in vain that means might be supplied them to place these Indians on reservations and feed them. In 1857 M. Steck, the Apache Indian agent for New Mexico, which then included Arizona, wrote: "In my last annual report I urged the

necessity of liberally supplying the Indians of my agency with food. Another year's experience and close observation has still more forcibly impressed me with the conviction that this is the only means of effectually controlling the Apache tribe. \* \* \* The language of a former Secretary of War, when urging the policy of feeding the Indians of Texas, is peculiarly applicable to the Apaches of New Mexico: "Brave men with arms in their hands will not starve, nor see their children starve around them, while the means of subsistence is within their reach. To locate the Apaches and teach them the cultivation of the soil and other arts of peace is the only policy that can be adopted with a reasonable hope of advancing them in civilization, and giving protection to property in this Territory. This course will require time and liberal appropriations to supply them with food. If they are located, they must abandon their marauding expeditions, whereby one-half of their subsistence is cut off." And he speaks from experience when he says: "The success that has attended the farming operations with those bands for the last two years has removed every doubt as to the practicability of this policy. \* \* \*

If they are not provided for as I propose, they must continue to feed themselves upon the white man's property, the inevitable consequence of which will be a continued state of hostility, requiring, on the part of the military department, the organization of large campaigns to fight them, at the sacrifice of life and an immense expense to the Government. Two campaigns have been made within the last three years—one against Gila, at an expense, directly and indirectly, to the Government of \$400,000; and I feel confident that I will be sustained by all who are familiar with the number and resources of those Indians, in the assertion, that if one-twentieth part of that sum had been judiciously expended annually for provisions, the campaigns might have been prevented." The urgent appeals of Agent Steck were heeded, and a small appropriation made for the Apaches in 1858. Of the good results of this liberality this is the way he writes: "The Mescalero band of Apaches are still living in the White and Sacramento Mountains in the immediate vicinity of Fort Stanton, and the most friendly relations have been maintained between those Indians and the military authorities of that post during the year. With the bands west of the Rio Grande, since my last annual report, our relations have been of the most friendly character. During the year not a single depredation has been committed on the California road east of the Chilibuihui Mountains, and parties of from two to five men are constantly traveling that road from the Rio Grande to Fort Buchanan undisturbed."

Of the abuses practiced upon them in 1858, he writes:

"The Mimbres and Mogollon bands seem willing to be controlled by the advice of their agent, and have confidence in the kind intentions of the Government toward them. In their intercourse with the citizens they have suffered many impositions; have been made drunk; have been swindled out of their horses, and many of them stolen by the Mexicans, at or near the agency. They have also been murdered in cold blood, yet not a single instance is known of their having committed a murder, or even stolen a horse to retaliate for their wrongs."

Of the feasibility of uniting the Mimbres and Mogollon bands together, he says:

"I encouraged such a union, and now many of the Mogollon band live with those of the Mimbres, and have corn planted together, and among them their old chief, Magnus Colorado. If, therefore, the proposition to locate them together should meet the approbation of the superintendent, there will be no difficulty in its accomplishment."

#### THE APACHES AS FARMERS.

Of their ability and willingness to cultivate the soil, he reports:

"The interest manifested in the farming operations has been greater than in any former year. Having no lands set apart for them by treaty, they were advised to plant upon their old fields on the Rio Mimbres and upon the Rio Palomos. They have, in all about one hundred and fifty acres planted, and in a state of cultivation that will compare well with any corn-field in the country; and all by their own labor, except the breaking up of the land, digging, and repairing of their acequias."

The Coyoteris, (Cochise's band,) the Apaches north of the Gila River, he reports as peacefully keeping faith, as follows:

"The White Mountain Coyoteris have occasionally visited the agency during the year, have remained quiet, and faithfully kept their promise that 'no depredations should be committed on the California road as far west as their country extended.' The Coyoteris are by far the most powerful branch of the Apache tribe. They occupy the north side of the Gila and its northern tributaries, from the Mogollon Mountains to near the Pima villages.

Agent Steck, as well as others, at that time included all the Apaches north of the Gila, the Tontos, Aravapas, and Apache Mohaves, under the general title of Coyoteris for he says:

"The White Mountain Coyoteris is that portion of the Apaches living north of the Gila, upon the Rio San Francisco (Verde River) and headwaters of the Salinas; they

occupy a fine country, with many beautiful mountains, streams, and rich, fertile valleys for cultivation. This division numbers two thousand five hundred souls, of whom six hundred are warriors. In all their intercourse with the Government, their deportment toward travelers and traders, they have shown themselves to be the most reliable of all the bands of the Apaches."

In 1867 he had a peace talk with the chiefs of the Piñals, and reports: "The result of these meetings was very satisfactory, and, up to the present time, no well-authenticated robbery has been committed by them. Many attempts have been made by interested and dishonest parties to create the impression the Piñals are stealing, with the hope of inducing the department commander to send more troops to their territory. I know, however, that the country has never been so safe as at present." Of their industry and intelligence, in 1868, he writes: "The Piñal and White Mountain Coyoteros cultivate the soil extensively, raise wheat, corn, beans, and pumpkins in abundance. In this particular they are far in advance of all the other Apaches. They have some game, mescal, and tufia to subsist on, and, as no settlements yet encroach upon their country, all they will need for a few years will be a liberal distribution of presents yearly, and some hoes and spades, to enable them to cultivate the soil more extensively."

John Walker, who was appointed agent for the Pimos and Maricopas, in 1859, reports on the Piñal Apaches thus: "It might here be proper also to report the disposition, as near as possible, of the Piñals, who visit me frequently, professing great love for the American people, and say they will not violate the treaty made last March with Agent M. Steck, which I am disposed to credit, as they have been visiting Tucson ever since, and I have no recollection of any animal being stolen which the Indians have been charged with. \* \* I had a long talk with them; they appeared very candid. As they tell the same consistent tale every time, I am compelled to give them credit; for they have frequently met Americans, and not interrupted them in any way, when there were but two or three together, and the number of Indians was large.

The Mexican government, formerly in possession of this Territory, differed widely from ours in its policy and views in relation to the rights of the Indians in the soil. That government held that the Indian had no rights, as original possessors of the land, which it was in any manner bound to respect, and to this policy is due the unceasing war which has been waged by this brave people against the Mexicans.

When the Americans first came among them bringing the better traditions of their country with them, and treating them as a people whose rights to the soil not having yet been extinguished by treaty or otherwise, were entitled to some respect, and so treated them kindly, the Apaches received them as friends. But with the natural gravitation toward barbarism which seems inherent in human nature when left unrestrained, as in the life on the border, the Americans soon learned to follow the example of the Mexicans, and adopting their anti-Christian law of "might makes right," began to treat the Apaches as incumbrances to be exterminated. They reaped the bloody fruits of that policy in a war which has cost us a thousand lives and forty millions of dollars."

#### CRUELITIES OF WHITE PEOPLE TOWARD THE APACHES.

Mr. J. H. Lyman, of Northampton, who spent a year in 1840 and 1841 among the Apaches of Arizona, relates an incident which occurred among the Apaches at a time when they treated Americans with the most cordial hospitality.

"The Indians were then, as now, hostile to the Mexicans of Sonora, and they were constantly making raids into that State, and driving off the cattle. The Mexicans feared them, and were unable to meet them man to man. At that time American trappers found the beaver very abundant about the headwaters of the Gila river, among those rich mountain valleys where the Apaches had, and still have, their secure retreats. At the time I speak of there were two companies of trappers in that region. One of the companies, about seventeen men, was under a captain named Johnson. The other company consisted of thirty men, I think. I was trapping on another head of the Gila, several miles north. The valleys were full of Apaches, but all peaceful toward the white men, both Indians and whites visiting each other's camps constantly and fearlessly, with no thought of treachery or evil. Besides the Mexicans, the only enemies of the Apaches were the Pi-Utes and Navajoes on the northwest. But here in their fastness, they felt themselves safe from all foes.

"One day Johnson concluded to go down into Sonora on a spree, as was occasionally the way with mountain men. He there saw the governor of the department, who, knowing that he had the confidence of the Indians, offered him an ounce of gold for every Apache scalp he would bring him. The bargain was struck. Johnson procured a small mountain howitzer, and then, with supplies for his party, returned to his camp. Previous to entering it, he loaded his howitzer with a quantity of bullets. On approaching the valley, he was met by the Indians, who joyfully welcomed him back, and proceeded at once to prepare the usual feast. While they were boiling and roasting their venison and bear meat, and were gathered in a dense group around the fire,

laughing and chatting in anticipation of the pleasure they expected in entertaining their guests, Johnson told those of the party who had remained behind trapping of the offer of the governor, and with such details of temptation as easily overcame any scruples such men might have. As they were all armed with rifles which were always in hand, day and night, together with pistols in belt, they needed no preparation. The howitzer, which the Indians might have supposed to be a small keg of whisky, was placed on the ground and pointed at the group of warriors, squaws, and little children around the fire, watching the roasting meat. While thus engaged, with hearts full of kindly feelings toward their white friends, Johnson gave the signal. The howitzer was discharged, sending its load of bullets scattering and tearing through the mass of innocent human beings, and nearly all who were not stricken down were shot by the rifles of the white men. A very few succeeded in escaping into the ravine and fled over the dividing ridge into the northern valleys, where they met others of their tribe, to whom they told the horrible story.

"The Apaches at once showed that they could imitate their more civilized brothers. Immediately a band of them went in search of the other company of trappers, who, of course, were utterly unconscious of Johnson's infernal work. They were attacked unprepared and nearly all killed, and the story that 'the Apaches were treacherous and cruel' went forth into all the land, but nothing of the wrongs they had received."

The "Penole treaty by King Woolsey," as it is called, of 1863, narrated by J. Ross Brown, esq., in his "Adventures in the Apache Country," (10th chapter,) in which twenty-four Piñal and Tonti Apaches were treacherously murdered by Woolsey's party of white men and Maricopa allies while they were seated by their side in perfect confidence and security, having laid down their arms and come in under a promise of protection and pledge of peace. The killing of the Coyotero Apache chief, Magnus Colorado, arrested through deception and under false charges, by pushing a heated bayonet through the canvas tent in which he was prisoner, and shooting him when he moved, under the pretense that he was trying to escape. The equally treacherous attempt to kill his brother-in-law and successor, the present famous chief Cochise, by inviting him in under a flag of truce and then attempting to take him prisoner, and, as he bravely cut his way out of the tent, shooting him in the leg and killing his relatives who remained prisoners in the tent. And more recently the massacre at Camp Grant, which has shocked all Christendom, wherein one hundred and eighteen women and children and eight men were killed in cold blood by white people of Tucson and their Papago allies, while they were sleeping in confidence under the "protection" of the American flag "as prisoners of war." (See Appendix A b, No. 2.) Events like these and many others would seem to be quite sufficient to have made these Apaches the "blood-thirsty and relentless savages" they are now reported to be.

With these official records before us, showing the injustice and folly of their treatment by the Mexicans in denying them any rights to the soil on which they lived as the original occupants; their good-will toward the Americans, who, on their first acquaintance, treated them justly; their industrious habits and peaceable character when placed upon reservations and allowed a fair opportunity to gain a livelihood; the inhuman treachery and cruelty on the part of white men, which has made them our implacable foes, and the heavy cost, both in life and treasure, which these events have entailed upon us, we have felt it to be our duty, for the last three years, to endeavor to better the condition of the Apache Indians of Arizona. Of the *present character* of these Indians there is not much difference of opinion between "Christians" and "Exterminators," but in their *treatment* as one believes in their salvation, the other in their destruction—there is disagreement.

Congress, at the earnest solicitation of the board, having passed the appropriation of \$70,000, referred to in our report of last year, "to collect the Apache Indians of Arizona and New Mexico upon reservations, furnish them with subsistence and other necessary articles, and to promote peace and civilization among them," the board at its meeting in May directed "its secretary to visit the Apache country, to take such measures as might seem expedient to prevent the perpetration of further outrages like the Camp Grant massacre, and, if possible, avert the apprehended war."

On the 13th of July, in company with Commissioner George H. Stuart, I called upon the President at Long Branch, New Jersey, and reporting to him the condition of affairs in New Mexico and Arizona, we received letters from him to the Secretary of the Interior and Secretary of War, directing that enlarged powers be given to such agent as the Secretary of the Interior might select to effect "so desirable an object" as above indicated. (See Appendix A b, No. 4.)

The Acting Secretary of the Interior having selected me as the agent, authorized and requested me to proceed to New Mexico and Arizona Territories, and there take such action as in my judgment seemed wisest and most proper for locating the nomadic tribes of those Territories upon suitable reservations, bringing them under the control of the proper officers of the Indian Department, and supplying them with necessary subsistence, clothing, and whatever else might be needed. The Department invested

me with full powers to be exercised according to my discretion in carrying into effect its views in relation to the Indians referred to. (See Appendix A b, No. 5.)

The order of the Secretary of War was as follows:

"WAR DEPARTMENT, ADJUTANT GENERAL'S OFFICE,  
*Washington, July 18, 1871.*

"SIR: I have the honor to inform you the President directs that so far as your resources will permit, assistance be given in provisions and transportation and military protection to Mr. Vincent Colyer, of the Indian commission in endeavoring to collect the wild Indians of New Mexico and Arizona upon a reservation at Cañada Alamosa; and also to such Indians as may be induced to come in, both on the way and after arrival at the reservation.

"Very respectfully, your obedient servant,

"E. D. TOWNSEND,  
"Adjutant General.

"THE COMMANDING GENERAL,  
"Department of the Missouri, Fort Leavenworth, Kansas."

And similar letters were addressed to the commanding generals Department of Arizona, military divisions of the Missouri and Pacific, and to the Commissary General of Subsistence.

[First letter.]

My first report was as follows:

SANTA FE, NEW MEXICO, August 11, 1871.

Board of Indian Commissioners:

Agreeably to the request contained in the letter of authority from the Hon. B. R. Cowen, Acting Secretary of Interior, under date 21st of July, that I should "from time to time report to the Department my action and progress, and the result of my investigations on the condition of Indian affairs in New Mexico and Arizona," I have the honor to report: That on the day after the receipt of that letter, on the arrival of the Hon. John D. Lang, to take my place in the office in Washington, as member of the executive committee of the board of Indian commissioners, I left for this place via New York.

On my way through Pittsburgh, finding that the orders issued from the War Department did not correspond with the authority received from the Department of the Interior, I telegraphed to the President as follows:

"PITTSBURGH, July 27, 1871.

"TO U. S. GRANT, PRESIDENT UNITED STATES,  
Lang Branch, New Jersey:

"SIR: In your letter of 13th instant to Secretary of War, you directed that protection should be given to Indians desiring peace, under our care, coming in at Cañada Alamosa, New Mexico. Later advices show that they are one hundred and fifty miles southwest of that place. General Parker, in his letter to Secretary of the Interior, (see Appendix A b, No. 6,) suggesting my instructions, recommends that I be invested with discretionary powers to do whatever, in my judgment, may appear most wise and proper in locating the roving tribes of Arizona and New Mexico upon suitable reservations, and the Secretary has so instructed me.

"In the event of my not being able to get the Indians to Cañada Alamosa, would it not be well for you to direct the War Department to enlarge its orders protecting us, not only there, but at such other reservations as I may select, in harmony with instructions with the Indian Bureau? A line added to General Townsend's order of the 18th instant would do it.

"Please telegraph to me early your action, care General Pope, Fort Leavenworth, Kansas."

On arriving at Leavenworth I received from General Porter, the President's secretary, a reply that my "message had been sent to the Secretary of War and answer sent to me at Leavenworth," which answer was received the following day, as follows:

"WASHINGTON, D. C., July 31, 1871.

"The Secretary of War directs that order of 18th instant, for protection of Indians at Cañada Alamosa, be extended to include such other reservations as Mr. Colyer may select.

"E. D. TOWNSEND,  
"Adjutant General."

On receipt of the above dispatch, on my arrival at Lawrence, Kansas, I telegraphed to you as follows:

"LAWRENCE, July 30, 1871.

"Agreeably to powers conferred upon me by the President, and communicated in your instructions of 21st instant and to-day's supplementary order of War Department of this date to order of 18th instant, I have selected Camp Grant, in Arizona Territory, as a reservation on the west, where the Apache Indians are to be protected and fed, and beg that the War Department be earnestly requested to retain Lieutenant Whitman in charge, and that he be instructed to send out Indian runners to notify all peaceably disposed Apaches to come in and find asylum there, and the order be telegraphed to Department of the Pacific to forward promptly to Arizona.

"Please telegraph your action to me at Santa Fé. My plan is to have this reservation at Camp Grant on western border, and another which I will select in New Mexico, on eastern border of Apache country, when I get there, and bring in, feed, and protect all Apaches who wish to be at peace. The expenses to be paid from the special appropriation for the Indian Department."

On my arrival at Santa Fé I received a dispatch from the Secretary of the Interior as follows, dated August 1, 1871:

"Your telegrams received. War Department requested to act as you desire.

"C. DELANO, *Secretary*."

And from the War Department this reply:

"Instructions telegraphed for retention of Lieutenant Whitman and employment of runners as requested.

"E. D. TOWNSEND,  
"Adjutant General."

#### APACHE INDIANS IN NEW MEXICO.

Nathaniel Pope, the superintendent of Indian affairs for New Mexico, reports that "the Southern Apache Indians continue to come in to Cañada Alamosa. There are now over twelve hundred at that place"—the majority well behaved and peaceable. Beef and corn only—for food—being issued to them, with a small amount of calico, manta, and a few shirts to cover the extremely naked." In so large a number it would be strange if there were not some dishonest ones, and therefore you will not be surprised to hear that several thefts of oxen and horses were traced to Indians on this reservation. They were promptly detected, however, by the Indian chiefs, who at once reported them to the agent, O. F. Piper, who delivered up the stolen stock to their respective owners. (See inclosed paper marked A b, No. 7.)

#### WHITES THREATENING TO MASSACRE APACHES ON RESERVATION.

On the 30th of July, Hon. B. Hudson, probate judge of Grant County, New Mexico, inclosed to Colonel Pope the following series of resolutions passed by the citizens at a public meeting at Rio Mimbres, New Mexico, 19th July, 1871:

"Resolved, That the people of Grant County, New Mexico, organize themselves into a posse and follow their stock to wherever it may be, and take it by force wherever found, even if it be at the sacrifice of every Indian man, women, and child, in the tribe.

"Resolved, That if opposed by Indians or their accomplices, be they Indian agents, Indian traders, or Army officers, let them be looked upon as our worst enemies and the common enemies of New Mexico, and be dealt with accordingly." (Appendix A b, No. 8.)

And the Hon. B. Hudson wrote as follows:

"What we want to know is, whether our stock can be recovered or not from Indians on your reservation, when fully proved and identified, or if we are to be forever at the mercy of these thieving murderous Apaches, who have a 'house of refuge' at Alamosa; if so, the sooner we know it the better, because the citizens of this county are determined to put a stop to it, and if they carry out their programme *the Camp Grant massacre will be thrown entirely in the shade, and Alamosa will rank next to Sand Creek.*" (See accompanying document A b, No. 7.)

Superintendent Pope (see his letter marked A b, No. 9) has asked that troops be placed at Cañada Alamosa, and as I hope to visit the Indians there early next week, if I find the place suitable, I will designate it as a reservation, and call upon the military to protect it agreeably to your instructions of the 21st ultimo, and the orders of the War Department of the 18th ultimo.

V. C.

\* As we go to press there are nineteen hundred Indians at Cañada Alamosa.

[Second letter.]

## THE APACHE INDIANS AT CAÑADA ALAMOSA, NEW MEXICO.

FORT CRAIG, NEW MEXICO, *August 22, 1871.*

Before leaving Santa Fé I received a letter from Agent Arny, of the Pueblos, written by C. E. Cooley, esq., dated "Camp Apache, Arizona Territory, July 26, 1871," marked A b, 10, giving an account of the good conduct and poverty of a band of Coyotero Apaches at that place, who, for several years past, under their chief Miguel, have been living peaceably and using their best endeavors to induce the other portion of their band under Cochise, who is a Coyotero, to do the same. Remembering that the records of the Department amply testified to the general truth of this letter, immediately on its receipt I wrote to N. Pope, esq., superintendent of Indian affairs for New Mexico, requesting him to see that these Indians, 400 in number, be promptly supplied with beef, corn, and clothing to an amount not exceeding two thousand dollars; and as Agent Arny had been previously instructed to go to the Pueblo Village at Zuni to send out Indian runners to inform the roving Apaches that, if they wish for peace, they must come in upon the reservations either at Camp Grant or Cañada Alamosa, and, as Zuni was but 100 miles from Camp Apache, I requested Superintendent Pope to employ Mr. Arny to execute that order, (Appendix A b, No. 11.) Superintendent Pope immediately gave the necessary instructions, and I am in hopes that Agent Arny is on his way to Camp Apache before this with the supplies and order to purchase the beef.

Before leaving Santa Fé I telegraphed to you briefly the situation of Indian affairs in New Mexico, (Appendix A b, No. 12.) The discontent of the Utes referred to in that telegram demands our serious consideration. By the reports of the agents for the last three years, and reports of our board, 1870, page 105, you will find full information on the subject. On my way through Cimmaron, Agent C. F. Roedel earnestly called my attention to their situation, and begged us most earnestly not to overlook them any longer. Both whites and Indians disregard the treaty and consider it a fraud.

In company with Superintendent Pope, and John Ward, esq., as interpreter, I left Santa Fé on the 14th instant for Fort Craig, where we arrived on the 16th instant after a hot and fatiguing ride night and day. Major Buffum, commanding Fort Craig, with great kindness fitted us out with a team and ambulance, and the next day, 17th instant, we started for Cañada Alamosa, distant forty-two miles southwest.

On our arrival at the agency at Cañada Alamosa, we found all the Apaches had left the place, (as I telegraphed to you that day,) frightened away by the threats from the residents at Rio Mimbrea, New Mexico, as contained in the resolutions quoted above. (See Appendix A b, No. 8.)

Agent Piper, who is a discreet and able officer, on receiving a copy of those resolutions, together with Judge Hudson's letter, sent to Fort McRae for a detachment of soldiers, who were sent up to the reservation that day.

Immediately on the arrival of the soldiers, the Apaches, who are the most scary Indians I have seen, called upon Agent Piper to know the reason for their coming. It was necessary to tell them, as they have a great dread of the soldiers, having met them for the past eight years only as enemies; and as soon as Mr. Piper informed them that they came as friends, they were satisfied; but the news that the people of Rio Mimbres threatened to attack them, as their friends had been killed at Camp Grant, they were afraid to remain, and that night, Thursday, a week ago, they stampeded to the mountains, where they have remained ever since. The day after our arrival I rode up the valley, and could see hundreds of their wicker wigwams standing, but not an Indian was to be seen. We sent out runners, and toward night some twenty or thirty came in; and the day following being Saturday, when the rations are issued, seventy-five or eighty out of twelve hundred were all that could be gathered. Is it not a shame that a few lawless white men can thus be allowed to overturn all the good work of the Government, costing thousands of dollars, and, by their unrestrained conduct, risk the bringing about of a costly war, and jeopardize the lives of hundreds of innocent people?

However, we are not discouraged. All the Apaches who came in were, physically, of a slighter build than any Indians I have seen, but in other respects equal to any.

I had a talk with the headmen, and told them of the friendly intentions of the Government toward them so long as they remained at peace. None of the chiefs being present, the headmen declined to say anything until their return.

The valley of Cañada Alamosa (Cottonwood Valley) is beautiful. A stream of pure spring water, eight feet wide by one foot deep, flowing rapidly through it. Every acre of it is occupied by the Mexicans, who have a town of over three hundred inhabitants in the midst of it. The Indians claim the valley as their own, and will be reluctant to go far from the neighborhood. To attempt to buy out the Mexicans, as has been proposed by some, when there are millions of acres of unoccupied land in the immediate neighborhood, I feel would be preposterous. As the Indians are now in a state of transition, not unlike a swarm of bees seeking for a hive, I shall endeavor, as quickly as possible, to find them another place as near to Cañada Alamosa as practicable. For

this purpose I returned to this post Saturday last to secure transportation and an escort. I propose to go west first to the neighborhood of Ojo Caliente, (Hot Springs,) twenty miles north of Cañada Alamosa, thence northwest to the Tularosa Valley and River, which has been recommended to the Department as a suitable place for a reservation, (see report of the board, 1870, page 108.) After we had started from the agency on our way back, the head chief present rode rapidly after us and asked us to return, saying that two Indians from Cochise's band had just arrived, and he wished me to hear what they had to say. We immediately returned, and had an interview with the two men. They were light, sorry-looking, half-starved men, and very cautious in what they communicated. The chief, however, made them tell as much as this: that they were two of a party of forty or more—mostly women and children—who had left Cochise's camp twenty-five days before in the mountains of Sonora. Cochise had a fight while he was sick, his band were whipped, and had got scattered; he had retired up to the inaccessible part of the mountains, having first killed his horses and taken them up with him for food. Some five or six of the Apaches had been killed. They were Papagos or Mexican scouts who had attacked them. We had heard some time since that the Mexican government had offered a large price for Apache scalps; the people hereabouts have it as high as \$300 in Mexican currency, or even more, but if it amounts to \$30 in gold, it is probably as much as they will get.

As I said, the two Indians were very reticent, and left the impression on us all that they knew more than they were willing to communicate of Cochise's whereabouts.

We arrived here at midnight on Saturday night, 19th instant. At 4 o'clock, Sunday morning, 20th instant, we were awakened by a courier who had ridden all night over from the agency. He came with a letter from Agent Piper saying that a brother of Cochise had arrived with eighteen more Apaches, twenty days from Cochise's band, who said that Cochise had sent them, saying that "they would find a good peace here with us," and that they must come and stay.

Last night, 21st instant, another courier arrived from Cañada Alamosa. He came to inform us that a Mexican named Troero, whom Superintendent Pope, a week before I arrived, had sent out to find Cochise, had returned with the information that he had been ordered back by General Crook, with a reprimand. (See Agent Piper's letter herewith inclosed, marked A b. No. 14.)—V. C.

---

[Third letter.]

OJO CALIENTE AND TULAROSA VALLEY, NEW MEXICO.

CAMP APACHE, ARIZONA TERRITORY,

September 6, 1871.

Since my last letter, dated August 22, 1871, I have the honor to report that, in company with Nathaniel Pope, superintendent of Indian affairs in New Mexico, John Ward as interpreter, and Philip Gonzalez as guide, with an escort of twenty soldiers under a sergeant of the Fifteenth U. S. Infantry, Company K, we left Camp Craig, New Mexico, on the 23d of August, 1871, with fifteen days' rations, for the Apache Indian country, in New Mexico and Arizona, to inspect the upper valley of the Cañada Alamosa, beyond the mountains, at Hot Springs, "Ojo Caliente," and the Tularosa Valley, to ascertain their suitability for an Indian reservation. After a very interesting ride of three days, traveling about twenty-eight miles a day and camping at night, we arrived at noon of the 25th at Ojo Caliente. We here met, by appointment, O. F. Piper, esq., agent for the Southern Apaches, who, in company with Señor Trojero, alcalde of the Mexican village of Cañada, his nephew, and Sergeant Stackpole, Fifteenth United States Infantry, had ridden on horseback over the mountains which run between the Cañada proper and the Springs. They also brought with them Loco, one of the Apache chiefs, who had been in company with Señor Trojero over to Arizona in search of Cochise, under the direction of Superintendent Pope, who has already forwarded to the Department an account of their expedition, and of its failure, owing to Trojero's having fallen in with General Crook, commanding department of Arizona, and being, as he says, ordered back and forbidden to pursue his errand further.

We examined the neighborhood of Ojo Caliente (Hot Springs) carefully, and finding the area of land capable of being cultivated far too small for the necessities of a tribe so large as this band of Southern Apaches, we were very reluctantly compelled to seek further. Its proximity to Cañada Alamosa, though separated by high hills or mountains, and, like that valley, it being a favorite place of resort of the Indians, made us hope to find it suitable for a reservation.

Trojero, the scout, said that the Mexicans employed by General Crook, whom he met at his camp, were among the worst villains in Mexico, and the Indians were part of

Miguel's band of peaceable Apaches from the White Mountain reservation, who said they had to enlist in the service or be considered enemies.

These stories, circulated by Trojero among them; his having been sent back by General Crook, together with the excitement produced by the threats of massacre from the settlers at Rio Mimbres, so alarmed the Indians that it was next to impossible to secure an interview with them. Although Agent Piper had promised any and all of them presents, who would come out to meet the "commissioner from Washington," whom they were eager to see, only two, Loco and Francisco, the Navajo interpreter, could be persuaded to trust themselves, and Loco trembled like a frightened child when they saw us coming. Time, however, with patience and care, will yet succeed. We left Ojo Caliente on Saturday, 26th August, resting over Sunday, and, after a very interesting trip, we arrived at the Tularosa Valley on the 29th August, and the White Mountain reservation, this place, on the 2d September.

#### VALLEY OF THE TULAROSA.

I carefully inspected the valley and neighborhood of the Tularosa River, and finding the same to possess most of the requisites necessary for a home for the Indians, it being remote from white settlements, surrounded by mountains not easily crossed, sufficient arable land, good water, and plenty of wood and game, I officially notified Colonel Pope that I would designate it as an Indian reservation, agreeably to the authority given to me by you in your letter of the 21st July; and I telegraphed to the Secretary of the Interior, via Santa Fé, to that effect, on the 29th August. (See Appendix A b, No. 15.)

#### CAMP APACHE, ARIZONA.

I was received very kindly by Colonel Green, commanding, and the officers of the post, at Camp Apache, and found that at the time of my arrival dispatches had been received from General Crook at Camp Verde, countermanding his order to enlist Apache Indians to fight Apaches, which was construed by those present to mean a virtual suspension of hostilities. This order of General Crook, abandoning the practice of taking peaceable Indians from the corn-fields and compelling them to go on the war-path against their brethren, speaks much for his humanity and good sense, and was a great relief to my mind. The General being on his way to Prescott, where his headquarters are established, and his campaign for the present being at an end, all fears of my orders crossing his movements are now removed. There are several tribes and bands of Indians, who have lived here for many generations, and who could not be removed to either Camp Grant or the Tularosa Valley without great suffering to themselves, possibly a war or great expense to the Government, and as this reservation had been set apart for this special purpose by the War Department, under the advice of the late General Thomas, I concluded, with the matured advice of Colonel John Green, to select it as a reservation, and asked that the protection, provisioning, &c., ordered by the Government, be extended to the Indians at this place also. I inclose you a copy of my letter to Colonel Green upon the subject, (Appendix A b, No. 15.) Before leaving Santa Fé I believe that I reported that I had set apart \$2,000, to be expended and forwarded, under the superintendence of W. T. M. Army, agent of the Pueblos, for clothing, a few agricultural implements, subsistence, &c. Agent Army came in the day after our arrival, with about \$1,200 worth of clothing, &c., in good order and well selected. We have waited four days for the Indians to come in, and to-day about three hundred and forty reported.

#### INDUSTRY OF THE APACHES.

I inclose several reports of Lieutenant Colonel Green, (see Appendix A b, No. 15,) giving an account of his experience with and the character of these Apaches. By referring to one of these letters you will see Colonel Green, First Cavalry, says: "The Apache Indians furnished one hundred and ninety tons of hay, for which he paid them in flour. They brought it into his camp, in White Mountains, fifteen tons a day. They supplied the garrison with all the wood they used, bringing it in at the rate of thirty cords a day, using their hands and a few old broken axes to break it off, and the hay they cut with old knives, and the whole was brought into the post on their backs, and it was really interesting to see with what spirit they went to work, and what nice, clean hay they brought in, much superior to any I have seen furnished by contractors in Arizona. Yesterday upward of four thousand pounds were brought. Even the children went to work with alacrity. One little child that could scarcely more than walk brought in nine pounds, for which he received three-quarters of a pound of flour, and was highly delighted with his success. I propose to supply the new post with hay in the same way, which will be much cheaper than if done by contract."

I was sorry that the supply of grain at this post did not admit of my complying fully with the general's wishes in giving them corn for seed. I could ill spare a very small

amount, so that their planting will not be as extensive this year as I had hoped. I am in hopes that by next year I will be able to furnish them with sufficient seed, and would also respectfully recommend that the department commander urge the necessity of furnishing the ruder implements of agriculture, as at present their only means of farming are sharpened sticks, and it is wonderful to see with what advantage they use them. They frequently ask for other seed than corn, particularly pumpkins, beans, squashes, and melons. It would probably be well for the Indian Bureau to send an agent to look after the interests of these people. I ask them, "Why are you so poor?" and the answer invariably is, "How can we be otherwise? We had not much originally, and now we can get nothing; we do not steal; we cannot go to the mescal country, as we are liable to be met and killed by scouting parties." I know myself this to be the case, hence they have either to starve or steal, or we must feed them until they can raise enough for themselves. Mrs. Green informed me that when the sick garrison was removed from Camp Goodwin, on account of its unhealthiness to this place, she was carried all the way, ninety miles, over the mountains, on a litter by the Apaches, on their shoulders; she having been a great invalid at that time. Mrs. Green was much attached to them in consequence. I expect to leave for Camp Grant in a day or two.

V. C.

---

[Fourth letter.]

### CONDITION OF APACHE INDIANS—CAMP APACHE, WHITE MOUNTAINS, ARIZONA.

CAMP GRANT, ARIZONA TERRITORY,  
September 18, 1871.

Immediately after the massacre of the peaceable Indians at Camp Grant by the citizens of Tucson, (see Appendix A b, No. 2,) the news was received by the peaceable Apaches on the White Mountain reservation, and nearly all of them, some six hundred in number, under the leadership of Es-cet-e-cela, their chief, fled frightened to the mountains. The evening before their departure a herder, a soldier detailed for that duty, was killed. The only band which remained was Miguel's, numbering about two hundred and seventy-five Indians, under that chief. Colonel Green demanded of Miguel the arrest of the murderer; Miguel replied that he did not belong to his band. The colonel persisted, and Miguel sent out and had one of Es-cet-e-cela's Indians killed, and parts of the body brought in as testimony that the order was executed. On the arrival of General Crook some twenty-five Indians belonging to Miguel's band were enlisted as scouts, much against their will as we afterward learned, to operate against the other Apaches.

These twenty-five Indians, acting under Colonel Guy V. Henry's orders, had attacked a ranchario within hearing of the garrison at Camp Apache, and killed five Indians of Es-cet-e-cela's band. As I before reported to you, on the evening of my arrival at the reservation, four couriers, arrived from General Crook, at Camp Verde, one hundred and sixty miles distant, from which place they had ridden in three days, with orders to discontinue the enlistment of Indians, the orders having previously been to enlist as many as one hundred.

Hearing that Es-cet-e-cela was in the mountains near the post, I dispatched his son-in-law, a Mr. Stevens, mail-rider at the post, with a message for him to come in, a promise of protection, and a suit of clothes. Miguel had been sent for by Colonel Green, some days before. The two chiefs arrived the same afternoon, September 6th, and visited me apart.

I told Es-cet-e-cela the war was over, and all offenses must be forgiven. He said the soldier-herder was not killed by one of his band, but by an Indian from Rio Bonita, sent over by the Indian survivors from Camp Grant massacre to stir them up to war. He complained of Miguel's killing an innocent Indian for it, and afterward for killing five more of his band without cause. We had hard work to reconcile him, but, with the aid of Colonel Green and Mr. Cooley, the interpreter, we succeeded. The chiefs met, stood some forty feet apart, eyeing each other, with arms folded haughtily. The interpreter stepped up, and, leading Miguel forward, put his hand into the hand of Es-cet-e-cela, when they first shook hands and then embraced.

The next day we opened the boxes of clothing, coats, pantaloons, manta, (sheeting,) calico, thread, needles, awls, handkerchiefs, and blankets, and placing them in charge of Mrs. Colonel Green, who has been a warm friend of the Indians, arranged the Apaches in bands and families, and, taking a careful list of the names of the heads of all the families, with the number of their wives and children, Mrs. Green distributed to every one, three hundred and sixty-two persons all told, a suit of good clothing. Without being solicited to do so, the chiefs all dressed in coats and pantaloons, and many more young men requested pantaloons and coats than we could supply. When all had

received their presents, and were departing for their villages, a happier, more grateful, and decently behaved set of poor people I have never seen.

#### TALK WITH COYOTERO APACHE CHIEFS, CAMP APACHE, ARIZONA TERRITORY.

A few hours before the issue of clothing, the following interview with the Apache chiefs was held at Camp Apache, (Fort Thomas,) Arizona Territory, September 7, 1871: In the presence of Colonel John Green and the officers of the post, Commissioner Colyer opened the council with prayer, and, addressing the chiefs, said his words would be few; Colonel Green would inform them what his orders were from the President. The colonel told them that he was instructed to feed all the Apaches who came in and remained peaceable upon the reservation, the boundaries of which were explained to them. Commissioner Colyer then said that the great council (Congress) at its last session appropriated money to feed and clothe them so long as they remained at peace and upon the reservation; if they went off the reservations they were liable to be killed.

ES-CET-E-CELA shakes hands: "He asked God's blessing upon this meeting. It is getting late and he has but little to say. He has heard all that is said, and before God he believes that it is good. To-night he will sleep well. He won't have to tread sleepless over the mountains, but has a plain road. Now they have grass, can hunt the turkey, and have what they need. Some of his people are absent, but he will get word to them as soon as possible; for the purpose of getting them in he wants a pass."

Commissioner COLYER said: "The colonel will give it to him."

MIGUEL—"He has but little to say. He sees now that we have fixed things so that he won't have any stones to stumble against. He, like the commissioner, has but little to say, but what little he does say he means to live up to. His reputation is well known as a man of peace. He likes his home and quiet way of living. He has always been a farmer on the Carriso, and that valley has been father and mother to him. He sees that when the soldiers do wrong they have balls and chains to their feet, therefore he is afraid to do wrong, nor has he any desire to. In his youth he was wild, but since he was up to Santa Fé and talked with his governor, he has kept on the Carriso and worked his farm. He asked for Stevens and Cooley as his agents. He knows Cooley, and wants him to keep his young men from going out. Some of his people are sick, and he has corn to gather, so he wants to go home in the morning. He will come in to see the colonel whenever he can. Some time since he was told his father from Washington would come, and now he has come. His beef and his corn will be weighed out to him; when can he reach up to it? He would like his beef issued on the hoof, so that he can get the hide and tallow. (The colonel so promised.) He sees that peace has been actually restored. When his young men return from General Crook, he will see that they do not go soldiering any more. It is well one of his soldiers came back sick."

The morning after the distribution of clothing, Miguel, Es-cet-e-cela, and Pedro, with several head-men, called at our quarters to bid us good-by. Miguel said he should pray to the Great Spirit to take care of the commissioner, and hereafter, if any soldier kicked him, (Miguel), he should send him word to tell the President.

#### DEPARTURE FOR CAMP GRANT.

We left Camp Apache at noon, September 8, 1871, for Camp Grant, Arizona, with an escort of ten mounted infantry, under Lieutenant Peter S. Bonus; a pack-train to carry our provender, with some clothing for the Indians at Camp Grant, and such Indians as we might meet by the way. We had two Indian young men, one from Miguel's and one from Es-cet-e-cela's band, to accompany us, to act as runners to communicate with any Apaches they might meet, and inform them of the peaceful intentions of the President, and of the establishment of reservations, with protection and food for all who wished to be at peace.

Our route lay across the mountains to Black River, over to the head-waters of the San Carlos, down the San Carlos to the Gila River, across the Gila to Mount Trumbull, over that mountain to and down the Aravapa Valley to Camp Grant. Our march through this portion of the heart of the Apache country was very encouraging. Our Indian guides, improvising white flags and signaling their friends of our approach by lighting fires and making smokes, brought them out by scores. They met us on the trail, bearing white flags made of white buckskin, and came from the most inaccessible places and from where you would least expect them. At night our camp was surrounded with them, and the soldiers soon got so used to their presence that we all slept soundly though they frequently outnumbered us five to one. During the whole march, though we were thus surrounded, not an animal was disturbed nor an article stolen. We opened our packs and distributed clothing to all, old and young.

I have visited seven-eighths of all the Indians now under our flag, including Alaska, and I have not seen a more intelligent, cheerful, and grateful tribe of Indians than the roving Apaches of Arizona and New Mexico.

## CAMP GRANT, ARIZONA TERRITORY.

We arrived at Camp Grant on the 13th instant, and found a white flag flying over the post, the effect of the telegram forwarded to its commander through the kindness of the Secretary of Interior and the Secretary of War on the 3d of August last. We were hospitably received by Lieutenant Royal E. Whitman and Captain Wm. Nelson, commanding the post. Soon after our arrival we learned that a company of one hundred and seventy-five or two hundred armed white citizens from Tucson (the town where the body of citizens came from who committed the massacre some few months since) were on their way to, and within twelve miles of, the reservation, and were expected in on the morrow. Two Mexican couriers, who had arrived some days previous, reported that the expedition was gotten up with a view to breaking up the reservation. Captain Thos. S. Dunn, Twenty-first United States Infantry, and Agent Wilbur, of the Papagos, who came up with the party, informed us that it was a party of "prospectors," who were coming through the reservation on their way to the mountains. At the same time we were informed that Governor Stafford, with a party of three hundred citizens, who had recently passed through the reservation, were expected in on their return homeward on the morrow. As the reservation is within a valley and surrounded with mountains, without a road or trail through it leading anywhere, and as the Indians had only just come in after much persuasion, and were under evident fears of another attack, the impropriety of allowing these armed bands of citizens to rendezvous upon the reservation was apparent. As either the Indians or these citizens had to leave the reservation, I promptly informed Captain Nelson that if he permitted these citizens to come nearer than ten miles of the post, I would have to send out Indian runners to the Apaches, and, gathering them together, ask him for a sufficient escort to conduct them with me over to the White Mountain reservation. Captain Nelson replied that he should regret to have me do that, and instead he would forbid the party of citizens from approaching nearer than within ten miles of the post; and he issued an order to that effect. (See Appendix A b, No. 17.) He forwarded this order by a corporal and four men that evening, who met the party twelve miles away. At 4 o'clock the corporal sent in word that he had met the leaders, and that they had declared that "they would cross the reservation." Captain Nelson then directed Lieutenant Whitman to ride out and meet the party and inform them that he was prepared to enforce his order, and had his guns in position, and would open fire upon them on their appearance at the mouth of the cañon opposite the post; Captain Nelson loading up the water-wagon belonging to the post and sending it out to them, that they might not suffer in case they should conclude to go back, which the report of Captain Nelson says they very reluctantly consented to do. They left with the declaration that they could use the white flag as well as we, and if that would bring in the Indians they would bring them in and put them on a reservation where it would not cost much to feed them. They went off around the reservation toward the east, Captain Thos. S. Dunn accompanying them. It was reported that a band of the Papago Indians were with them, but Dr. R. A. Wilbur, the agent of the Papagos, who came into the post with the party, said that he had no knowledge of any Indians being present. As the Papagos, for many years, have had a feud with the Apaches, and as they were the people whom the citizens of Tucson brought with them on their former visit and who had assisted so vigorously in the massacre, I was very much surprised, and expressed my great regret to Dr. Wilbur at seeing him accompanying another expedition from the same place of a character so similar to the former, and composed of a portion of the same people, in a foray against another Indian tribe. He informed me that he had no authority from Dr. Bendel, the superintendent of Indian affairs of Arizona, or from the Indian Office, to leave his agency. I called his attention to the fact that his presence with such a party was calculated to awaken distrust among the Apaches as to the honesty of our intentions in inviting them in, and I suggested to him the propriety of returning to his agency as soon as possible. The Doctor said that he had never received any copy of the laws of the Indian Bureau, and being uninformed of his duties, was not aware of there being any impropriety in his being here under such circumstances. He returned to his agency two days after the above interview. Before he left I requested him to use every means in his power to recover back from the Papagos the 28 children stolen from the Apaches during the massacre. He promised to do so. (See Appendix A b, No. 19.)

## THE APACHE CHILDREN TAKEN INTO CAPTIVITY.

Permit me to call your attention to the fact that these children have not yet been returned to their families, though it is now more than four months since they were stolen. As they were captured while their parents were being killed, though held as "prisoners of war" by the Army, the War Department, without other aid, has the power, it seems to me, to recover them if they are still in our country. It is reported that the majority of them have been carried over into Sonora by the Papagos and sold

to the Mexicans. In that event, I would respectfully suggest that application be made to the government of Mexico, through the Department of State, for their return. Events at this post (Camp Grant) are, in one respect, singularly similar to those at Camp Apache. Here, as there, immediately after the massacre at Camp Grant, the killing of one white man was their official announcement that the Apaches were going out on the war-path. The first Indian chief who came to this post last spring and asked to be allowed to live at peace, was Es-cim-en-zeen. He was the leader of his people and, up to the time of the massacre, was as peaceable and contented as man could be. He had two wives, five children, and about fifty of his people killed in the massacre, and this seems to have partially crazed him. He came in after the attack, and, assisting at the burial of his family, seemed reconciled, but, by a very unfortunate blunder, some troops from the White Mountains, who came down the Aravapa Valley nearly a month after the massacre, getting frightened at unexpectedly coming upon some of the Indians who had peaceably returned, opened fire upon them. It was Es-cim-en-zeen and his family. At this he became enraged, and bidding Lieutenant Whitman a formal good-bye, fled with his people to the mountains, and, it was said, killed a white man on his way. As I considered the massacre of Es-cim-en-zeen's family and people at Camp Grant an inauguration of a condition of war between the whites and the Apaches, and Es-cim-en-zeen's act in killing the white man, assuming that he did it, an incident in that war, and as my instructions were to feed, clothe, and otherwise care for all roving Apache Indians who wished to come in and be at peace, without regard to previous offenses, I had no hesitation when Lieutenant Whitman sent for him, to give him, together with Captain Chiquito and the other chiefs and their people, assurances of peace and protection.

The chiefs first sent in their runners to see all was right, who, meeting with the Indian runners from the White Mountains, and hearing of the liberality and kindness of the Government, as displayed on our journey thither in the distribution of clothing, &c., returned to their chiefs and people, told their story, and brought them in.

Up to this time two hundred and forty-five Apaches have arrived,\* all but ten (White Mountain Indians) being the same that were here before the massacre. As at Camp Apache, I distributed a suit of clothing, manta, (sheeting,) calico, needles and thread, to each Indian, man, woman, and child.

INTERVIEW WITH APACHE CHIEFS, HELD AT CAMP GRANT, ARIZONA, SEPTEMBER 15, 1871.

William Kness and Conception Aquirre, interpreters.

Lieutenant Whitman informed the chiefs that his orders from the Secretary of War were to feed them so long as they remained at peace upon the reservation. Commissioner Colyer told them Congress had appropriated the money, and the President had sent him here with the clothing, and instructions to the lieutenant to feed them. If they left the reservation, the limits of which he explained to them, they were liable to be killed.

ESCE-NELA, chief, and Cassay counsellor, claims to have always kept the peace. Ten years ago he was at Goodwin, and then they had a chief named Na-nine-chay, who governed all their tribes. He has met many officers, but that I was the first one to express regret at the Camp Grant massacre. (William Kness here remarked that Lieutenant Whitman had expressed regret, but this chief was not present.) He had no doubt but that God put it into the heart of the President to send me out here. He is satisfied that God is listening to this talk. He intends now to talk with reference to eternity, as though the world was to last forever. He believes that I will tell him the truth. He has no doubt but that I am sorry for the killed at the massacre. He is sorry for the Indians who have been taken away prisoners. He believes now that the centipedes and tarantulas (bad reptiles) among their enemies will no more hurt them. He believes that now we will protect them; that we are now as father and mother to them. He heard of our coming; now he is glad to meet us. He said his people were living here peaceably, receiving rations three times a week, up to the time of the massacre. He believes neither the lieutenant nor any of the officers knew of the people coming to attack them. It was about 4 o'clock in the morning when they were attacked; 128 killed, 29 taken prisoners. He and all the captains lost some of their families. He lost two wives, four children, three men, (one an old man,) and two of his nephews were taken away. He also lost fifty of his band. When the Tucson people attacked him, his best wife got separated from him and he could not find her. It was dark. If he could have found her he would have fought and died with her. There had been over five hundred of his people on the reservation at the time of the massacre. About thirty days after the attack about four hundred had returned, and were on the reservation when a lieutenant, and a party of troops under his command, fired into some of his people.

Commissioner Colyer asked: Does this country still please them, after what has oc-

\* At the date of going to press there are nine hundred Indians at Camp Grant.

curred? Or, if Lieutenant Whitman and the interpreters and soldiers were to take them further up into the Piñal country, would they prefer it?

Answer. The country still pleases them; they wish to remain here; this has always been their home, the home of their fathers, and they want Lieutenant Whitman as their agent, and these two men as their interpreters. They wish to go out and hunt, and if this campaign is stopped they will show that they can behave themselves. They have now had their talk, and they would like to have their share of the goods distributed to them now. When the other chiefs come in they can have theirs.

In the afternoon they came again. Esce-nela said he had been thinking over what I had told him, and now he had come to speak of it. Said he wanted to plant wheat on the San Pedro, and corn on the Aravapa.

Commissioner Colyer remarked that the chief had changed his mind since yesterday. He said nothing to that, but that he wished the man who was there should remain there. Mr. Austin owns the farm. Mr. Filmore occupies it.

#### TALK WITH ES-CIM-EN-ZEEN, THE HEAD CHIEF OF THE ARAVAPA PIÑALS.

ES-CIM-EN-ZEEN said: "He was glad to come in to his old home. He was the first to come in and make peace before and was happy in his home here. He got his rations every three days. He was not living far from here. He was making tiswin (a drink) in peace, when one morning he and his people were attacked, and many of them were killed. The next day after the massacre he came into this camp because he knew it was not the people here who had done it; it was the people from Tucson and Papagos. He then continued to live here in the valley for nearly thirty days, when his people were again attacked; this time it was by a squad of military men, and, although none of his people were killed, yet that made him mad, and he went on the war-path. He now admits he did wrong, but he was grieved and angry, and he could not help it. The one who first breaks the peace is the one who is to blame. He believes Commissioner Colyer has come to make peace, and is glad he has put tobacco before him to smoke. They have always known that they had a great father and a great mother. The commissioner had sent out for him, and probably thought he would see a great captain, but he only saw a very poor man, and not very much of a captain. If he had seen him about three months ago, he would have seen him a captain. Then he had a band of seventy men, but they had all been massacred; now he has got no people. Ever since he left this place he has been in the neighborhood; he knew he had friends here, but he was afraid to come back; but as soon as he heard the commissioner was here then he came in. He never had much to say, but this he could say, he likes this place. He has said all he ought to say, since he has no people anywhere to speak for. If it had not been for the massacre, there would have been a great many more people here now; but, after that massacre, who could have stood it? It was not possible for any man to have stood it. When he made peace with Lieutenant Whitman his heart was very big and happy. The people of Tucson and San Xavier must be crazy. They acted as though they had neither heads nor hearts."

SUNDAY MORNING, September 17, 1871.—The chiefs calling to see Commissioner Colyer, he told them "he was glad to see them. They must not expect everything to go right at first. It takes a long time to heal a wound. They have a good friend in the President, and he will do his best to deal justly and kindly with them."

Ex-cim-en-zeen replied that "he thanked God. They are happy now, but perhaps as soon as the commissioner has gone the soldiers will begin to kick them and point their rifles at them. That they don't like. They are contented now, but their young men are active, and being prevented from hunting they collect around the post, and get mixed up with the soldiers. Sometimes the soldiers kick them and throw stones at them; this makes trouble, as the young men feel bad."

Commissioner Colyer told them they would try to separate the post from the Indian agency. This they said was good, and it pleased them. They were glad that nothing had happened while he was here to break this good peace. They think the people of Tucson and San Xavier (the Papagos) must have a thirst for their blood. They seem to be always pursuing them. They think that as soon as the commissioner has gone these people will return again and try to massacre them. They want, as soon as he hears anything of the kind, that he will return and judge for himself. They believe these Tucson people write for the papers and tell their own story. The Apaches have no one to tell their story, so they want the commissioner to come again. They think it must have been God who gave him a good heart to come and see them, or he must have had a good father and mother to make him so kind. The commissioner told them "It was God," they said, "It was." They said, "They believed the Papagos could not have any God, they had always been so cruel, and had tried to persecute the Apaches as long as they could remember." It is just three days since they, the Apaches, have been here, and they have been happy. It seems to them that the arroyos (ravines) have been all smoothed over; that there are no more thorns or briars to prick them, nor snakes and reptiles to poison them. He said that Lieutenant Whitman knew

their story; knew how happy they were here in peace, up to the time of the massacre; knew all about that massacre; knew how he had returned after it; knew how he had been fired upon by the White Mountain soldiers. After that he wished to confess he had gone on a raid against the Papagos to recover his children. He liked Lieutenant Whitman, but he was so unhappy that if he had not heard that the commissioner was coming, he never would have come in.

Commissioner Colyer told them that "they must not fight the Papagos or white people any more. He had already sent for the children, and when he got back to Washington he would ask the President to request the government of Mexico to return their children."

Es-cim-en-zeen said, "It seems to him now as if he had his children in his own hands. God had certainly put it in my heart. He was very happy."

Commissioner Colyer said that he would ride up the valley with them this morning to see the place of the massacre and hear their story.

Es-cim-en-zeen. A long time ago they took off a wife of his, and he believed she now is at Fort McDowell. "Na-zen-i-lee" is her name. She is living in the house of one of the captains of the soldiers.

September 19, 1871.—Captain Chiquito, of the Aravapa. The commissioner told him he was glad that he had seen him before he left for Washington.

Captain Chiquito: "He has nothing more to say than the other chiefs had said; he confirms all that they have said. He had heard that his father and mother had come and he asked to see him. The same God who rules the sun, he believes, had sent me here to see them. Ever since the other Indians had told him that I was here he wished to see me, and for that reason he had hurried in from the hills. It must have been God who had put it into both of our hearts to hurry to see each other. He thanks us for having sent him out food and clothing last night."

Two Pinal Indians came with Es-cim-en-zeen. Says that yesterday he sent a boy named Un-pin-al-kay to the Piñals, and about noon he saw a smoke on his trail, and he don't know what it means unless he saw his people. He was to return in four days. He will bring in all the people he can. He thought that all the Piñals would come into this reservation as soon as they heard of the treatment he was receiving.

I visited the scene of the massacre on Sunday morning, September 17; some of the skulls of the Indians, with their temple-bones beaten in, lay exposed by the washing of the run and the feeding of the wolves. I overtook Es-cim-en-zeen, who had ridden before us, and found him wiping the tears from his eyes when he saw them.

By referring to accompanying papers, (Appendix A b, No. 2,) it will be seen that the account of this horrible massacre as given by Lieutenant Royal E. Whitman, Third Cavalry United States Army, the officer in charge of the camp at the time, is amply sustained by his brother officers and citizens then present. Some of these affidavits make the affair even more horrible than Lieutenant Whitman described it to be. Dr. C. B. Briesly, the post surgeon who was sent out to the bloody field to minister to the wounded on the day of the outrage, says: "On my arrival I found that I should have but little use for wagon or medicines. The work had been too thoroughly done. The camp had been fired, and the dead bodies of some twenty-one women and children were lying scattered over the ground; those who had been wounded in the first instance had their brains beaten out with stones. Two of the best-looking of the squaws were lying in such a position, and from the appearance of the genital organs, and of their wounds, there can be no doubt that they were first ravished, and then shot dead. Nearly all of the dead were mutilated. One infant, of some ten months, was shot twice, and one leg hacked nearly off."

#### OPPOSITION TO THE INDIAN PEACE POLICY.

The Arizona Citizen, a professedly republican paper, published at Tucson, and the Arizona Miner, democratic paper from Prescott, have been excessive in their abuse of Lieutenant Whitman, Colonel Green, and all other officers of the Army who have shown the least sympathy for the Apaches, charging them with many crimes. The editors seem to fear the damaging effect produced on the public mind by the statements made officially by these Army officers of the general good conduct of the Apaches whenever they have been allowed an opportunity to display it, and of the horrible brutalities committed by the people of Arizona upon them at the Camp Grant massacre. Their statements that the Indians left that reservation and went on raiding parties against the citizens is denied by every officer and citizen at the post.

Oscar Hutton, an old pioneer, who has the reputation of having personally killed more Indians than any man in Arizona, testifies under oath (see Appendix A b, No. 3,) "not only that the statement of Lieutenant Whitman is correct, but that he had never seen Indians on a reservation or at peace about a military post under so good subjection, so well satisfied and happy, or more teachable and obedient, than were these. I was repeatedly requested to watch every indication of anything like treachery on their part, and I will give it as my deliberate judgment that no raiding party was ever

made up from the Indians fed at this post. I have every reason to believe, that had they been unmolested, they would have remained and would have gradually increased in numbers, as they constantly had been doing up to the time I left the post."

And Mr. F. L. Austin, the post trader, a gentleman well known and respected, not only "fully indorses Lieutenant Whitman's statement throughout," but says, "the Indians, while here, seemed to be under perfect control, and in all my business with them, in paying for some one hundred and fifty tons of hay for the contractor, never had any trouble or difficulty of any kind. They very readily learn any little customs of trade, &c. It is my opinion they would have remained and increased in numbers, had they not been attacked."

Mr. Miles L. Wood, the beef contractor for the military, testifies that he "was not absent one day, and personally issued every pound of beef drawn by them. They brought tickets to me, on which I issued. After completing the issue, I took the tickets to acting commissary of subsistence, and verified them by the official count of that day. I never had any trouble in my delivery. Lieutenant Whitman selected an Indian for policeman, gave him his orders, and good order was always preserved. I have lived in California, and have seen a great deal of Indians. Have heard a good deal of the Apaches, and was much surprised at the general intelligence and good behavior of those I saw at this post."

William Kness, the mail-carrier at the post, swears that though he has lived on the Pacific coast for twenty-six years, familiar with Indians, and prejudiced against the Apaches, yet "made it a point to study the character and habits of the Apache Indians at Camp Grant, before the massacre, and the result was that I was convinced that they were acting in good faith and earnestly desired peace. They were industrious, the women particularly so. Among all the Indians I have ever seen I have never met with as great a regard for virtue and chastity as I have found among these Apache women. In regard to the charge that after they were fed they went out on raiding parties, I have to say that I do not believe it. They were contented under our supervision, being in every three days for rations, and their faces familiar, and their number constantly increasing. I have read the statement of Oscar Hutton in regard to this point, and I have no doubt that he is correct, that no raiding parties were ever made by the Indians from this post. I also believe that if the massacre had not occurred we should have had from eight hundred to one thousand Apache Indians on this reservation before this time."

(See Appendix A b, No. 3.)

On the day of my arrival at Camp Grant, finding that no copy of the orders of the War Department dated Washington, July 13, 1871, and of July 31, 1871, had yet been received here from General Crook, I took the liberty of inclosing copies, and also a copy of the instructions of the Interior Department, to him for his information.

In our interviews with the chiefs of the Aravapa and Piñal Apaches at Camp Grant we found that, notwithstanding so many of their people had been killed at Camp Grant, they still clung to the Aravapa and San Pedro Valleys as their home, and would not listen to our proposal to remove them over to the White Mountains. Believing it better, for the sake of peace, that their wishes should be acceded to for the present, in consultation with the officers of the post, we concluded to fix the limits of their reservation as follows: Bounded north by the Gila River; west by a line ten miles from and parallel to the general course of the San Pedro River; south by a line at right angles to the western boundary, crossing the San Pedro ten miles from Camp Grant; east by a line at right angles to the southern boundary, touching the western base of Mount Trumbull, terminating at the Gila River, the northern boundary. (See Appendix No. 15.)

We carefully instructed the chiefs about these boundaries, impressing it upon their minds that they must not go beyond them; that while within these limits they would be protected and fed; if they went beyond they would become objects of suspicion, and liable to be punished by both citizens and soldiers. They said they understood it.

Our first intention was to limit the boundaries of the reservation to a distance of ten miles square on each side of the post; but as the Gila river on the north did not much exceed that distance, and formed a good natural boundary which the Indians could easily remember, and the country on the east was a barren waste, yielding nothing that the white man cared for, but considerable food, such as mescal, mesquite beans, and cactus fruit, of which the Apaches were very fond, we concluded to extend the limits to the Gila river on the north, and the westerly base of Mount Trumbull on the east. The assurances given to us by the officers and citizens most familiar with the habits of the Indians before referred to, and found in Appendix A b, No. 3, that they would not leave the reservations if properly fed and cared for, dismissed all doubts from our mind concerning this point.

Should the Government approve my action in locating this reservation, there are some improvements made by several settlers, on the San Pedro, which should be appraised by Government officers and the owners paid for them. Several of the ranches are good adobe buildings, which will be of value for the use of the Indian department.

While it is true that no claim of pre-emption by settler holds good as against the Government, when made on Government land not yet surveyed, yet it is but fair that where the improvements can be of use to the Government, as in this case, that the owners should be compensated.

As the mountains are barren and the valleys infected with a malarial fever, the tract of country designated above is worth little or nothing to any one but the Indians, who are acclimated. And as it is absolutely necessary that a certain and well-defined tract shall be first set apart for them before we can expect them to leave the highways and other portions of the Territory, it seemed to me that justice, as well as wisdom, suggested that we should select such places as they themselves chose and would reside upon—where we could protect and civilize them.

That the massacre at Camp Grant fairly illustrates the sentiment of a large portion of the people of Arizona and New Mexico on the Indian question, is painfully confirmed by the fact that nearly every newspaper here has, either justified or apologized for the act. That the President's "peace policy," so popular in the States, does not meet with much approval out here is unquestionably true; and any one who comes here to execute it must expect to meet with disapprobation. I have been met with a storm of abuse from these newspapers in their every issue; but, thank God, it does me no harm, and though I have received positive assurances that my life would be in danger if I visited certain localities, yet, as much of this is probably mere bluster, I should go there if my official duties required it.

Probably I should not have referred to these threats if the governor of the Territory, A. P. K. Stafford, esq., had not taken the precaution to issue a "proclamation" in the Arizona Citizen, calling upon the people to treat the commissioners "kindly," as though the governor supposed they were not likely to treat us kindly, unless he took some such extraordinary means as this to induce them to do so. This proclamation concludes with the following words: "If they (the commissioners) come among you entertaining erroneous opinions upon the Indian question and the condition of affairs in this Territory, then, by kindly treatment and fair, truthful representation, you will be enabled to convince them of their errors." A manifesto, so remarkable that we thought, in kindness to the governor, the less notice I took of it the better. (See Appendix A b, No. 20.)

There is evidently a wrong impression on the minds of the editors of these newspapers concerning the object of our visit to these Territories. They seem to think that we have come to "examine into the Indian affairs of the Territories" generally; whereas, our instructions from the President, through the Secretary of the Interior, are simply to "locate the nomadic tribes upon suitable reservations, bringing them under the control of the proper officers of the Indian Department, and supplying them with necessary subsistence, clothing, and whatever else may be needed."

---

[Fifth letter.]

### THE PIMAS AND MARICOPAS.

CAMP McDOWELL, ARIZONA TERRITORY,  
September 24, 1871.

#### THE FRONTIERSMAN'S SYMPATHY WITH THE PEACE POLICY.

We left Camp Grant at 6 o'clock, evening, September 19, preferring a night ride to the hot sun across the desert of fifty miles, from the San Pedro to the Gila River. We arrived at Florence, a new and enterprising town, chiefly occupied by Americans, on the Gila, by noon the next day. Here I met a number of citizens, and a party of miners who had just returned from an unsuccessful tour of prospecting among the Pinal Mountains near by. They all wished me "God-speed," and said they "hoped before God the President would be successful in his efforts to bring in the Indians upon reservations." Nothing could have been kinder than their expressions of hearty goodwill toward the present administration. From this I infer that I may have been hasty in my conclusions contained at the close of my last letter, that the "peace policy" toward the Indians was unpopular in Arizona. I arrived at that impression from reading the newspapers of Tucson and Prescott. But I am told that these papers only reflect the opinions of the traders, army contractors, bar-rooms, and gambling-saloon proprietors of those two towns, who prosper during the war, but that the hardy frontiersman, the miner, poor laboring-men of the border, pray for peace, and I believe it.

Our ride down the dusty valley of the Gila, from Florence to the Pima and Maricopa reservation, a distance of twenty-eight miles, in the hot sun, on horseback, the thermometer standing at 135° in the sun, 104° in the shade, was fearful. The men and animals were thoroughly used up.

## GILA RIVER AGENCY.

The agency building is a good one, though too small for the work to be done. A school-house and room for the teacher should be built. Agent Stout and his young wife, the Rev. Mr. Cook, the teacher, and the physician were at home and attending to their duties. Mr. Stout complained of want of means, the remittances received from Superintendent Bendell being too small to meet the quarterly dues for salaries of the officers.

The chiefs were called together the next day, September 22, and we had a talk with them. Those present were Antonio Azul, the head chief; Swa-mas-kor-si, chief of Ki-ki-mi village; Ki-o-sot, 2d, chief of Ki-ki-mi village; Ki-co-chin-caue, chief of Shu-uk village; Miguel, chief of Staw-to-nik village; Candela, chief of Stu-ka-ma-soo-satiek village; Sa-per, chief of Pep-chalk village. I told them that, by the President's directions, I had been sent to learn about their troubles, especially with regard to their quarrel with the settlers on Salt River, and the diversion of the supply of water from their acequias, and to inform them that, under your direction, I had set apart reservations for the Apaches. They, in common with the Papagos, have been in the habit of raiding on the Apaches, and I informed them that this must cease; that if the Apaches came down there and troubled them they were to defend themselves and punish the Apaches; but that they must not go up to the Apache country and make war upon them, unless they were requested to do so, officially, by some Army officer, which request would come through their agent. I told them they must also quit their raids on the white settlers on the Salt River, or else they would be punished. They had made several wholly unprovoked attacks on the settlers on the Salt River, destroying their crops of corn and tearing to pieces their houses and furniture; one poor man, now employed as farm-hand at the agency, having lost everything he possessed by them.

The chiefs replied that they had some bad young men in their tribe as we had among white men. That they go up to Salt River, notwithstanding their remonstrances against it; if they got into trouble or were killed they could not help it and no one would be sorry, but that their whole tribe ought not to suffer for it. They have always lived peaceably with the whites and they meant to continue to do so. They said they required more land than the present limits of their reservation allowed.

In their early days they lived more by hunting; deer abounded in that country before the white man came, and that with deer-meat and mescal they then got along very well, but that now they had to depend for subsistence almost wholly upon farming, and as they now had schools and were rapidly learning the ways of the white man, they needed more land and larger water-privileges.

They were always led to suppose that the white men wanted them to kill the Apaches, but that if they knew the boundaries of the Apache reservation they would keep off from it. I explained the boundaries of the Camp Grant reservation and told them that the Apaches complained bitterly of the Pimas and Papagos for their constant warfare upon them, and particularly of late of the Papagos for having assisted at the massacre at Camp Grant and carrying off their children into slavery, and again repeated that these feuds must cease. That the President would have peace. They promised to tell their young men; separated from us on very good terms, and, lingering about the agency for some time, rode off well mounted on brisk-looking ponies. Most of their tribe seemed quite prosperous and independent in their manner; indeed this last quality they carry so far it becomes rudeness. They have a very large idea of their own importance and prowess, and I was informed that on one occasion when Colonel Alexander, who had command at Camp McDowell, the nearest military post, threatened them with chastisement for some misconduct, they drew up five hundred fighting men of their tribe and dared him to come on. As Colonel Alexander had but one small company of cavalry, he had to forego the "chastisement."

I fear their young men will need a little disciplining before we shall have things run altogether smoothly on their reservation, and I sincerely hope Congress will make provision to purchase the additional land they really need for their support and comfort.

The school under Rev. Mr. Cook is hopefully under way, and I think the Government is fortunate in securing his efficient and earnest services.

On my return to Washington I received the following letter from the agent, showing how much the Pimas and Maricopas are suffering from the want of the water of the Gila River, diverted by the white settlers, and how serious is their dissatisfaction:

"UNITED STATES INDIAN AGENCY,  
"Gila River Reservation, Arizona Territory, October 19, 1871.

"DEAR SIR: When you were here it was supposed from the amount of water in the bed of the river above here that there would be a sufficient quantity to reach the lower part of this reserve to enable our Indians to irrigate their fields as usual in preparing them for the reception of their crops. Though there was apparently plenty of water

for that purpose, and though it continued to rise for a while after you left, it has now fallen to its normal state, and not a drop of it has reached their fields. The time for preparing their lands is now at hand, but having no water they can do nothing.

"People who have lived on the Gila for years tell me there never was before such a thing as a dry river-bed on this reserve this time of the year. As a matter of course, our Indians are much dissatisfied and blame the settlers who are above us for taking away their water. On Sunday morning last, Chin-kum, a chief of one of the lower villages, and one of the best chiefs in the reserve, came to me and said that for many years he and his people had 'lived from what they planted,' but now they had no water; white men up the river had taken it from them, &c. After spending a few moments in telling me of his wrongs, he made known the object of his visit, which was to obtain leave to take the warriors of his village, numbering one hundred and twenty-seven men, and by force of arms drive the whites from the river.

"I was not a little astonished at this manifestation, but quietly told Chinkum he must not go. I spent an hour in telling him of the fearful results which must surely follow such a step, and finally succeeded in inducing him not to go. But he told me this, that he would wait one month, and if the water did not come to them he would take his whole village, which numbers one hundred families, and move to the Salt River settlements, where, as he said, there is always water. As the settlers of that vicinity are and have been for years at enmity with these Indians, I assured him that trouble would certainly follow such a step as that, and urged him to remain on the reserve. He then asked me how he could stay here next year, with nothing to eat. I told him that the Great Father at Washington would not let him or his people starve. He went away silenced, but not satisfied, and I have not the slightest doubt that in a month from now he and his village will leave the reservation.

"Day before yesterday Ku-vit-ke-chin-e-kum, chief of Va Vak village, called and said he was going to Salt River with his tribe, as there is no water for his fields. I of course told him not to go, but am afraid it did no good. There are six or seven other villages on that part of the reserve, which is about the only part of it that can ever be reached by the water, the rest of the land being too high; and if the water does not come soon I think they will all leave.

"These Indians have always been well-disposed toward our Government, and for years they have served as a protection to them on this route from Texas to the Pacific coast. They claim the land lying above them on the Gila, (see report on Indian affairs for 1859, by Agent Sylvester Mowry, page 358,) but long since gave it up, because they were assured that when they needed it they should have it. It seems to me that time has come, and while these Indians are still friendly to the whites, it would, in my opinion, be a wise plan to give them a portion of the land they claim. A few thousand dollars would do this now, and may, perhaps, avoid an expenditure of ten-fold proportions, in case there should be trouble between them and the citizens here. The superintendent of Indian affairs is away on business at San Francisco just now, so I write this to you.

\* \* \* \* \*

"Very respectfully, &c.,

"J. H. STOUT,

*"United States Special Indian Agent."*

"Hon. VINCENT COLYER."

#### TONTO APACHES AT CAMP MCDOWELL, ARIZONA TERRITORY.

We left the Pima agency on the evening of the 22d, preferring night-riding to the hot sun across the desert to McDowell, arriving at Desert Station, twenty-five miles, at 4 o'clock in the morning; and leaving there at 9 in the morning, reached Camp McDowell at 9 at night, meeting with a cordial and most hospitable reception from General N. A. M. Dudley and the other officers at the post.

My object in coming here is to open communications with the Tonto Apaches, and for this purpose General Dudley has this morning sent out runners with white flags, and kindled "a smoke." (See Appendix A b, No. 21.) I am informed that Del-shay, the able chief of the Tontos, has been in at McDowell several times during the past few years, and that on two occasions he has been dealt with very treacherously; at one time shot in the back, and at another time attempted to be poisoned by a post-doctor, whether he will answer my call remains to be seen. A party of Indians were reported last evening as having been seen by two straggling soldiers, making signs as if they wished to come in, a few miles below the post. As I had informed the Indians at Camp Grant that I was coming here, and they had sent runners up this way, the officers here think that the Indians know it and wish to come in.

4 p. m.—The Indians have kindled their answering fires upon the top of the Sierra Ancha—a high mountain twenty miles from here—northward, near old Fort Reno. They are evidently in earnest, as the smoke at times is dense, extending at intervals

over a distance of a quarter of a mile. We hope to see some of the Tontos here to-night.

Two companies of Third United States Cavalry, being part of Colonel Henry's and General Crook's command, are camped below here under waiting orders.

I inclose copy of my official letter to General Dudley asking for detachment of soldiers to open communications with the Tonto Apaches, and his reply thereto. (A b, No. 22.)—V. C.

"CAMP McDOWELL, ARIZONA TERRITORY,

"September 27, 1871—11 p. m.

"The party with the flag of truce, sent out at my request, by General Dudley, to try to open communications with the Tonto Apaches, returned this afternoon, having been only partially successful, as you will see by the report inclosed, (marked A b, No. 21) from Major Curtis. He had seen several Indians on the hills, exchanged friendly signals with them, and after spending a day immediately surrounded by them, had separated from them without any indications of ill-will, or molestation. It is very difficult to obtain their confidence so soon after they have been pursued by the soldiers, and as I am now dealing with another band of Apaches, different in their habits, and living quite apart from the Piñals, Coyoteros, Aravapa, and the other bands with whom I so recently have held friendly intercourse. I am not in the least discouraged at Major Curtis not having brought in any of the tribe. As you will see by his report he is quite sanguine that they will come in soon.

"In the event that they should come in I have provided that General Dudley, commandant of McDowell, should feed, protect, and otherwise care for them at this post, until such time as he may have a sufficient number, when he can remove them to Camp Grant. Meanwhile, in order that they may be thus looked after, I was compelled to declare this military reservation, five miles square, a temporary Indian reservation, which I did with the advice of the military officers at this place. (See Appendix A b, No. 22.) As soon as we can see how many of them come in, and learn their wishes as to a locality for their home, I have arranged with General Dudley that he should communicate with the Department, and it can order their removal. For the present, I am only anxious to keep them in from the "war-path," and to get them to look upon the Government as their friend. Other things will follow.

"That there may be no delay in this, and that every effort may be made to get them in, I requested Captain Thomas McGregor, who commands a detachment of troops in the field, under marching orders (temporarily suspended) from General Crook, to send out another flag of truce in another direction to the Tont. country. (See Appendix A b, No. 23.)

"Although copies of your instructions of July 21, and order of War Department July 18 and 31, written at the suggestion of the President, were forwarded to General Crook from Camp Apache, September 7, and have been received there, and an express messenger arrived here from there yesterday, yet no copies were forwarded to the officers here. They are much troubled about it and have written to the general. Fortunately it has made no difference in my progress, as I have gone right on with the work, and the officers here as well as at Camp Grant and Apache have not hesitated to carry out those orders. I mention it only that you may fully comprehend the situation. Probably General Crook's movements have disarranged his mail.

"Altogether, I feel greatly encouraged and am confident that in Arizona, and among the Apaches, the President's policy of peace will be as successful as it has been in all other portions of the Indian country.

"I leave for Camp Verde (D. V.) to-morrow."—V. C.

Since my return to Washington I have received the following report of the coming in of the Tonto Apaches to Camp McDowell, Arizona Territory:

"CAMP McDOWELL, ARIZONA TERRITORY,

"November 2, 1871.

"SIR: As you will remember, just before you left McDowell I sent Major Curtis out with a white flag to old Fort Reno; he was at the time unsuccessful in his attempt to open communication with them notwithstanding he saw several Indians in the bluffs and hills near him, none of whom showed any hostile demonstrations. He left his flag in the old ruin of a chimney of the stockade, returning to McDowell. This expedition had its good results, as events since have proved. The Tontos saw the soldiers with an emblem of peace. It was a strange sight. Days passed and no Apaches visited the post; signal fires were constantly kept burning during the night at the garrison for some time. At last a party of four came in. I received them warmly, took them to my quarters, and had a long talk with the principal man among them, 'One-Eyed Riley.' He had been twice in at McDowell two or three years since, and was recognized by Lieutenant Grant, who had I think met him at Reno. He said the Tontos wanted

to know what the soldiers were going to do; that he had been sent in to find out what the white flag meant in the hands of the soldiers; that if we said peace, they were ready. I assured him that the President wanted all fighting to cease; that he was ready to feed and reasonably to clothe all good Indians who would come in with their families and do right; that I could not talk with him more fully as I wanted to see some of the great men of the tribe; that I would clothe him up, give him a good supply of provisions for his party, and he must go out and bring in a good number of chiefs. He asked for six days. I gave him the time, and faithful to the hour he sent in a principal man, who possessed most excellent sense. He said all were ready for a peace; they were tired living in holes and tops of the mountains; now their women and children had to pack all their water two and three miles; they could not go down to the streams at all, except at night, for fear of the soldiers; that they had to scatter in parties of two and three to sleep in safety; that they hid their infants and small children away in the holes among the rocks for safety; even the rabbits were safer than the Indians; that their people were all nearly starving; that they must steal or starve; that the soldiers had driven them away from their corn-fields; game was scarce; they were afraid to go out and hunt. He spoke of his children, four of whom had been killed by the soldiers, with tears running down his cheeks. He wanted to make a big peace, roll a big rock on it, and make it last till the rain came and washed the rock level with the ground; that God told him he must come into McDowell that day and do all he could to make the big soldier's heart like his—ready to do what was right. He said he did not want any blanket that day for he was satisfied that the soldiers now wanted to do right, and he wanted to go back and induce Del-shay and all his captains to come in, and the blankets and clothes would retard his rapid traveling. I have been present at a great many talks with Indians on the plains the last seventeen years, but I have to acknowledge that I have never seen more feeling or good sense exhibited by an Indian than this Apache showed. He asked for five days to go and see all his people; said they would take different directions, and get as many to come in as possible. He expressed great fear of the Pimas; did not want them allowed to come into camp while the Apaches were here. I sent a military escort out in their rear, and fortunate that I did, for some lurking Pimas were lying in wait for them out on the trail, all of whom were brought into camp and told if they even fired at an Apache on the reservation I would shoot them as readily as we had been shooting the Apaches. Up to the time I was relieved, (Major Curtis has succeeded me in command,) I would not permit the Pimas to come near the garrison when I could prevent it. I consider it unfortunate that the Pimas are allowed by their agent to come to McDowell at present. This last party sent out by me kept their word, and returned at the time appointed. This party brought in some eighty or more Indians of the Tonto band. Major Curtis was much engaged at the time they came in and did not have the opportunity to give them the attention they expected.

"The Indian ration was reduced to one pound of beef and one pound of flour, or rather corn, upon which an Indian cannot subsist, and of course will not be content with it, as they have neither roots, game, or fruit here to eke out the ration. I do not believe it requisite to keep them near McDowell. All that I have talked with express a desire to be allowed a reservation near Reno or Sunflower Valley; these points are away from the Pimas, from settlements, and need have only one company of soldiers near them with their agent. There is not a particle of doubt in my mind, all the stories to the contrary, that they at this moment are anxious for a peace, and a lasting one. No man can talk with them an hour without being convinced of this fact.

"Captain McNetterville, who has been out by direction of Major Curtis, and had a talk with Del-shay, on his return seemed to have been most favorably impressed with their sincerity; before, I believe, he never had any confidence in them, and was in favor of exterminating them if possible. Dr. Howard, the medical officer who accompanied Captain McNetterville, expressed great surprise at the intelligence and earnestness shown by their talk and manner.

"It must not be expected that a peace made with these various bands, scattered all over a great, wild territory like Arizona, New Mexico, and Sonora, will be perfect for a long time. Many bad Indians will refuse to come in. These will have to be hunted down; and if the good ones are now cared for, properly fed, reasonably clothed, and kindly treated, they can easily be induced, in my opinion, to help catch this class of renegades and bring them to proper punishment. It is going to take a good deal of patience, careful judgment, forbearance and humane treatment; but I have the strongest belief it can be accomplished. If we fight them one or two years, it has to be done in the end; for it is not supposed the Government is going to keep up a perpetual war on them.

"If I remain in the Territory, I only ask that I may be stationed at a post overlooking a reservation; for I know a race of beings possessing the intelligence so prominently exhibited by the Apaches can be taught to appreciate the advantages of living at peace with the whites, whom they frankly recognize as every way superior to them-

selves. But this desirable result can never be brought about by following two directly opposite policies at the same time—one of war, the other of peace.

"With best wishes, &c.

"N. A. M. DUDLEY,  
"Brevet Colonel, United States Army.

"Hon. VINCENT COLYER."

CAPTAIN CURTIS'S REPORT OF ARRIVAL OF EIGHTY TONTO APACHES AT McDOWELL.

HEADQUARTERS CAMP McDOWELL, ARIZONA TERRITORY,  
November 3, 1871.

SIR: Since your departure I have been steadily engaged in trying to open communication with the Tontos and Apache Mohaves. They sent in a messenger about October 14, and by the 20th I had in over eighty of them, from the two different bands above stated. Es-cal-la-tay, the head of the Four Peak Indians, came with his band, and the Apache Mohaves with their own chief. I had only a short talk with them at the time, they being willing to wait until others could get in, so as to have a grand council and settle the whole matter. Del-Shay, with his Indians, had not yet arrived. At this juncture of affairs, and after they had been camped near me for three days, they suddenly disappeared about midnight, and went back to their mountain homes.

I found upon inquiry that some rascally Mexicans had been talking to them, and, as near as I could learn, had frightened them out by telling them that the Pimas were coming after them. I cannot prove this, but I believe it. That these Indians have a great dread of the Pimas is well known. I have written the Indian agent at Sacaton, Mr. J. H. Stout, telling him that he must keep his Pimas and Maricopas away from this post. These Mexicans are many of them guides, &c., and are well aware of the fact that if we make peace their occupation will be gone.

Two days after these Indians left I sent Captain Netterville, Twenty-first Infantry, to Sunflower Valley, thirty miles from here, to renew communications and find out what was the matter. Inclosed please see his order, private instructions, and copy of report.

They do not wish to come here and stay for two or three very strong reasons: 1. They are afraid of the Pimas and Maricopas, and the latter can readily reach this place. 2. They are too far from their mountains to gather fruit or mescal or to hunt, and without some such aid they cannot subsist on a pound of beef and one of flour. 3. They have a natural indisposition to leave a country where they have always been accustomed to live. 4. They say that they can plant and get plenty of water on Tonto Creek, (near Reno.) It is, however, difficult to supply Camp Reno, as the road is very bad. Troops were stationed there at one time, but the post was broken up on this account.

It seems to me that there ought to be a trusty agent constantly on the spot here to attend to all these things. I have but \$400 that I can expend for them, which is but a drop in the bucket, when they all need blankets and clothing. All that I can do is to give them a little manta, calico, and tobacco. Then, again, I am peculiarly situated. If I take the responsibility of declaring a temporary reservation my action may be disapproved by the department commander, or I may not be able to get the means of supplying it. Troops should be with them wherever they may be, and I have not the power to put them there. One thing seems to me certain, that they will never be contented near this post. I believe that it is better to so shape things as not to crowd them. The whole country around Reno, Tonto Creek, and Greenback Creek is unsettled by the whites, and they never go there. It seems to me that Tonto Valley is the place for them. It can be supplied with flour by pack-trains, and beef can be driven there.

Tonto and Greenback Valleys (the latter about twenty miles southeast of Reno) are said by those who have been there to be the best adapted places for this purpose in this whole Territory. Greenback Valley is small, but very pretty, and has plenty of timber and grass and fine bottom-land for cultivation with but little irrigation. The road from here to Reno, as I said before, is very bad, but Reno can be supplied, as stated, by pack-trains for the present.

I hope that you will take some action in this matter without delay. In the mean time I shall try and collect these Indians here or at Sunflower, and let them, if there, send for their rations. It is impossible for me to send out there, for I have not the means of so doing. You can see that I am so situated that I cannot promise them anything, and the whole thing may fall through for this reason. I think that they mean to make a lasting treaty of peace if they can be made to feel that they are not being deceived.

I will advise you further when the grand council is held.

I am, sir, very respectfully,

JAMES CURTIS,

Captain Third Cavalry, Commanding Post, and ex-officio Indian Agent.

Hon. VINCENT COLYER.

## TALK WITH DEL-SHAY AND SHELTER-PAU, HEAD CHIEFS OF THE TONTO APACHES, AT MCDOWELL.

CAMP McDOWELL, ARIZONA TERRITORY,  
November 2, 1871.

SIR: I have the honor to report that, in compliance with Special Orders No. 170, dated Headquarters Camp McDowell, Arizona Territory, October 25, 1871, I left this post and proceeded to Sunflower Valley, and complied as near as possible with special instructions given me by the post commander. I arrived at Sunflower Valley at 5.30 p. m. on the 27th of October, and went into camp at the stockade. On the morning of the 28th I commenced building fires and kept them burning during the day as signals. On the morning of the 29th my signals were answered from a hill near camp. At 10 o'clock four Indians came into camp. I gave them something to eat and sent them out at once to tell their chief, Del-Shay, to come in; that I wanted to have a talk with him. In the evening two more Indians came in from another direction, who said they belonged to Shelter-Pau's band. I also sent them out with the same instructions. On the 30th four Indians and two squaws came into camp with a message to me from Del-Shay and Shelter-Pau that they would come and see me the next day. I gave these Indians something to eat, and sent them out of camp to come in again when their chiefs came. On the 31st, about 12 o'clock, Shelter-Pau and forty warriors arrived. In the afternoon of the same day Del-Shay, with twenty of his warriors and four or five squaws, with children, arrived. I had a talk with both chiefs that afternoon, and told them my mission; they appeared to be well pleased with what I said to them, and would reply to me the next morning. They were in a very destitute condition, being nearly naked and apparently suffering very much from the cold. They both appeared to be very anxious for peace, and expressed a desire to live happily with all mankind. I gave each band a sack of flour and issued them some beef. The next morning, November 1, both chiefs came into camp, and desired to have a big talk. The following is what Del-Shay said: "I don't want to run over the mountains any more; I want to make a big treaty; I will live with the soldiers if they will come to Sunflower Valley or Camp Carroll, if Government will establish a camp there; I will make a peace that will last; I will keep my word until the stones melt; I cannot go to Camp McDowell, because I have no horses and wagons to move my women and children, but at Camp Carroll I can live near the mountain and gather the fruit and get the game that is there. If the big captain at Camp McDowell does not put a post where I say, I can do nothing more, for God made the white man and God made the Apache, and the Apache has just as much right to the country as the white man. I want to make a treaty that will last, so that both can travel over the country and have no trouble; as soon as a treaty is made I want a piece of paper so that I can travel over the country as a white man. I will put a rock down to show that when it melts the treaty is to be broken. I am not afraid of the white man or the Mexican, but I am afraid of the Pimas and Maricopas, who steal into my camps at night and kill my women and children with clubs. If I make a treaty I expect corn and wheat, pumpkin and melon seed, and I will plant near old Camp Reno. I want the big captain to come and see me; see how I get along; and will do whatever he wants me to do. If I make a treaty I expect the commanding officer will come and see me whenever I send for him, and I will do the same whenever he sends for me. If a treaty is made and the commanding officer does not keep his promises with me I will put his word in a hole and cover it up with dirt. I promise that when a treaty is made the white man or soldiers can turn out all their horses and mules without any one to look after them, and if any are stolen by the Apaches I will cut my throat. I want to make a big treaty, and if the Americans break the treaty I do not want any more trouble; the white man can take one road and I can take the other. I will send some men with you to the big captain at Camp McDowell, and when they return I want him to put on a piece of paper what he promises, so that I can keep it. Tell him that I am sick now, but will go to see him in twelve days if I have to crawl on my hands and knees to get to him. Tell him that I will bring in all the wild Apaches that I can, and if any will not come I will tell the captain who they are and where they live. I have got nothing more to say."

I then asked Shelter-Pau what he desired to say: He said "he had nothing more to say than Del-Shay; he wanted the same as Del-Shay did, and that he would come into the post the same time as he did." I then gave each chief one beef and left the camp at Sunflower Valley at 10 o'clock, accompanied by sixteen Indians belonging to the two bands, and arrived at this post this a. m. at 7 o'clock, having marched a distance of sixty miles.

I have to report the loss of one mule, which was kicked by a horse and so badly disabled that he had to be shot, after which the Indians eat him.

I am, sir, very respectfully, your obedient servant.

W. McC. NETTERVILLE,  
Captain Twenty-first Infantry.

First Lieutenant A. D. KING, U. S. A.,  
Post Adjutant, McDowell.

## CAMP McDOWELL, ARIZONA TERRITORY,

November 17, 1871.

DEAR SIR: I thought you might be glad to hear how your policy was working at this point. Major Curtis has done all in his power, and consulted my views in nearly all his actions. It has been slow work, however, the responsibility having to be taken for everything done.

Captain McGregor's command has never sent out the white flag you arranged for; I believe he intended to, but for some reason unknown to me he did not do it. The company of Mexicans enlisted as soldiers are still here, as worthless a set and as idle as I want to see.

Major Curtis and myself compared notes night before last, and we counted up about two hundred Indians in all, of who have come into camp since you left, representing the Apache Mohave, Four Peak, Del-Shay, and Tonto Apaches. Del-Shay, with full eighty males, a few boys included, but no women, came into garrison and was warmly received by Major Curtis. He fed them the scanty allowance prescribed, clothed up Del-Shay and three other principal men, and gave the four good blankets. The first two days they appeared quite happy and pleased. On the afternoon of the 14th the major had a talk with them. All expressed a desire for peace. Del Shay said he was sick; his breast, where he was shot by an infamous surgeon, most foully, gave him great pain. He appeared earnest for peace; said they were poor, starving, but that his people could not come into McDowell and live on the half-ration allowed by the Government; that there was no mescal, no game, no chance to obtain anything beyond the pound of corn and pound of beef. His people would not be satisfied; the soldiers had no right to expect an Indian to live on less than a white man. Some of the points put by Del-Shay were discussed at length. He seemed to comprehend the situation. It was explained to him that no officer here was authorized to locate them on a reservation in their own country; that there was no authority to increase his ration or give blankets to his people. (Your order for blankets had not come to hand approved, at the meeting of this council.) He appeared somewhat dissatisfied, but did not express it in words. Up to the breaking up of the talk he asserted his wishes for peace, and a good long one.

He wanted to go out for a few days; said he would come in again in four or five days. Major Curtis told him that he would send off a written treaty for the approval of the great chief at Washington, the President. In it he would recommend that a large tract of country near Reno, including Tonto Bottom and Sunflower Valley, be reserved for their sole occupation; that he would try and get an agent sent among them for the purpose of instructing them how to cultivate the soil and use the implements which the Government would undoubtedly furnish them; that the Government would in all probability locate a company of soldiers near them to protect them from the Pimas and whites who might attempt to hunt or locate on their grounds. These points they seemed to be pleased with; but they could not live upon what they were getting now.

The council for the day was ended. They sent their parties up to the wood-yard at dark, as they had been doing the two nights previous, for their night's supply of fuel, built their fires, and commenced cooking their beef. About 7 p. m. they suddenly left in a body, Del-Shay, the Mohaves, and all. That they were frightened off by some parties or person no doubt can exist, inasmuch as they left their meat cooking on the fire; besides, they left several of their bows and quivers filled with arrows hanging on the trees where they were encamped.\*

At the council in the afternoon, Del-Shay stated that he would leave some of his men back in garrison till he returned. What should have so suddenly changed his mind none of us are at all able to tell. The Mexican soldiers and citizen packers had free access to their camp, as well as soldiers. No insult was offered or injury done them that we know of.

I feel very much disappointed at this result; everything promised so fair. I heard Del-shay say two or three times that all his people would come in soon; that the Four Peak Apache Mohaves were all in Sunflower Valley talking about coming in; that he thought they would come to the post with all their families in the course of ten days, when they heard what the soldiers had to say.

They have more warriors than I gave them credit for; nearly all that came in with Del-shay were able-bodied men, only one or two very old men in the party.

I believe an influence was brought to bear upon him by outsiders which frightened him off. His former treatment made him suspicious and fearful of some treachery, notwithstanding he was assured that if no understanding was come to, he should be allowed to go unmolested back to his family, providing no depredations were committed by his band. Not a thing was taken by one of them that I have heard of, and there were hundreds of soldiers' shirts hanging on the clothes-lines of the laundresses

\* Latest advices show that a party, Pimas and Maricopas, hearing that the warriors were all at Camp McDowell, had gone up to Reno and killed thirty-two defenseless women and children of the Tontos.—V. C.

near their camp. There is a singular mystery regarding their sudden departure that I cannot understand.

The robbery of the mail-stage, and the killing of five citizens, a week ago, by an unknown party, near Wickenburgh, of course is laid to the Indians. At first even the Prescott papers partially admitted that it was a part of Mexican bandits from Sonora. Indians, when they attack a stage, are not apt to leave the horses, blankets, and curtains of the coach behind; in this case they did. I do not believe there was an Apache near the scene of the murder. All honest men have the same opinion, if they dared to express it.

Yours, truly, &c.,

N. A. M. DUDLEY,  
*Brevet Colonel United States Army.*

### CAMP VERDE RESERVATION.

#### APACHE MOHAVES.

CAMP VERDE, ARIZONA TERRITORY, *October 3, 1871.*

We arrived at Camp Verde on the evening of September 30. General Grover and the officers under his command at the post received us kindly. Early in the morning after our arrival, at my request the general sent out an Indian interpreter to inform the Apache Mohaves of our arrival, and to request them to meet us at the Springs, twenty-five miles up the valley of the Verde, on the following day at noon. Arrangements were made to have one thousand pounds of corn, three beef-cattle, and a good supply of clothing forwarded to the Spring, and at daybreak October 2 we were up and ready for the journey. General Grover, a lieutenant, (former commandant of the post,) Mr. Beal, a citizen, Mr. Ward the interpreter, and an escort of five cavalry accompanied us. The beef-cattle were driven ahead, and the corn and clothing carried on twelve pack-mules. We arrived at the Spring about noon. General Grover selected for our camp a clear hill-top a short distance above the Spring overlooking the valley. There were no Indians to be seen, though there was smoke burning up a near ravine. The Indian interpreter informed us that he had been to several of their villages, and found many were sick from want of food, but that all who were able had promised to come. General Grover, thinking that the presence of several white men who, returning from a deer hunt, had followed us, might be one of the causes of the absence of the Indians, suggested that they should be requested to leave us. I agreed with him, and the hunters went down the valley. Soon after their departure, Soulay, the head chief, and five Apache Mohaves arrived. Soulay was so emaciated from sickness and hunger that the general hardly recognized him. He was so weak he lay down on the ground, his head resting under the shade of a sage-brush. There were no trees near. The general thinking that he was suffering from an attack of intermittent fever, I prepared a mixture of quinine and whisky and gave it to him, but he soon asked for food, which we gave him. After an hour or two he recovered his strength and we had a talk. He pointed to the valley of the Verde below, where a white man had erected a cabin the year before, and said, "Where that house stands I have always planted corn; I went there this spring to plant corn, and the white man told me to go away or he would shoot me; so I could not plant corn there any more. Many white men hunted for deer over his mountains, like the three men who had just gone down the valley; that if they met any Indians they shot them, and that they killed all the game or frightened them so much the Indians could not get near them with their bows and arrows, and as the white people would not let them have any ammunition, they could not kill the deer. There was some mesquite beans, mescal, and cactus figs on the mountains, but they could not live on that in the winter, and they did not see what was left for them but to die. If they went to the post to get some food they could not get any, and the general scolded them about their young men stealing and drove them off. The chiefs could not get anything for their people to eat; they were gradually losing their influence over their young men, who, finding themselves starving, would occasionally go on the roads and farms and steal stock to eat; he knew it was wrong, but how could he stop it, or blame them, when they were all dying for food?" At my request the Indians kindled more fire, and sent out three more runners to bring the Indians in. During the afternoon four parties of three or four each arrived; they were hungry and nearly naked, and confirmed the interpreter's story that numbers of the Indians in the villages from which they came were too sick to come in. We gave them food and clothing. During the night several fires answering our signals were seen on the mount-

ains across the valley, and early the next morning, October 3, a party of thirty men, women, and children arrived. After giving them some food and clothing we had a talk. The chiefs repeated nearly all that Soulay said the day before, and together earnestly desired that the valley of the Verde from Camp Verde up to the old Mexican wagon road, about forty-five miles, and for a distance of ten miles on each side of the river, might be set apart for them as an Indian reservation, and they agreed that if the Apache Mohaves, who were scattered over the middle and western portion of Arizona, who rendezvous about Date Creek, would come in and live with them, they would make room for and welcome them cheerfully upon their reservation. I asked them if they would not be willing to go over to Date Creek and have their home located there. They said there were too many white people around there, and the country did not suit them as well as the valley of the Verde. General Grover and the officers and the citizens I met at the post, all agreed that the valley of the Verde was the best location for a reservation for them. Accordingly, on my return to the post this afternoon, I addressed a letter to General Grover setting apart the valley of the Verde as a reservation for the Apache Mohave Indians. (See Appendix A b, No. 15.)

Since my return to Washington I have received the following letter from Rev. David White, post chaplain, reporting the full success in the coming in of over five hundred Apache Mohaves at Camp Verde Reservation:

"CAMP VERDE, ARIZONA TERRITORY,  
"November 22, 1871.

"DEAR SIR: I write congratulating you on the success of your mission to the Indians of this Territory. Since you left, five hundred and eighty Apache Mohaves have been in and drawn rations. It affords me pleasure to say that the food given out by Captain Hawley (now in command) is done in good faith. The Indians appear well pleased. There is but little danger in traveling anywhere on account of Indians. I have made the trip alone from here to Prescott." Others have done the same.

"Respectfully, your obedient servant,

"DAVID WHITE,  
"Chaplain United States Army.

"HON. VINCENT COLYER."

[Seventh letter.]

#### GENERAL CROOK'S HEADQUARTERS.

CAMP WHIPPLE, NEAR PRESCOTT, ARIZONA TERRITORY,  
October 6, 1871.

We arrived here on the evening of the 4th, and were received quite cordially by General Crook, who insisted upon my making his quarters my home. Indeed, throughout my journey in Arizona and New Mexico, I have been received with the utmost kindness by the officers of the Army, as I have before reported.

The general and I differed somewhat in opinion as to the best policy to be pursued toward the Apaches, but as these differences were honestly entertained and kindly expressed, it did not lessen the cordiality of our intercourse; and as he desired me to frankly express my opinion if there was anything in his official action which I questioned, and as he had been pleased to do the same with me, much to my satisfaction I told him I could not help expressing my regrets that he should have felt it to be his duty to censure Major Wm. Nelson for his manly defense of the Indians upon the reservation at Camp Grant. (See Appendix A b, No. —.)

The following day, with the advice of General Crook and that of Captain Frederick Van Vliet, who commands at Camp Hualapai, we arranged that the Hualapais Indians, who congregate around Beal Springs, a military post, about two hundred miles to the northwest of Prescott, should be fed at that post, and a temporary reservation be declared one mile around the camp until a more permanent reservation could be selected. (See Appendix A b, No. 24.) The recent discovery of silver mines, and the uncertainty of their precise location, in the country inhabited by the Hualapais Indians, made it impracticable for us to do any more than the above for the present.

General Crook also thought it not advisable to attempt to move the Apache Mohaves who range through the country in the neighborhood of Date Creek, this winter, to the reservation at Camp Verde, but that they should be fed at Camp Date Creek until the spring, where they may consent to move. With his advice, we therefore decided to name that post, and for one mile around it, a temporary reservation, and General Crook issued the necessary orders accordingly.

Mr. Merriam, the editor of the "Arizona Miner," and several other gentlemen, called to invite me to address in public meeting the citizens of Prescott on the Indian ques-

\* About fifty miles.—V. C.

tion. I read to Mr. Merriam his editorials, published before my arrival, wherein he called me a "cold-blooded scoundrel," "red-handed assassin," &c., and said, "Colyer will soon be here. \* \* We ought, in justice to our murdered dead, to dump the old devil into the shaft of some mine, and pile rocks upon him until he is dead. A rascal who comes here to thwart the efforts of military and citizens to conquer a peace from our savage foe, deserves to be stoned to death, like the treacherous, black-hearted dog that he is," &c., and told him I had no hankering after that kind of "mining."

The gentlemen assured me that they would protect me with their rifles and revolvers; but as my official duties were wholly with the Indians, and the officers of the Government having them in charge, and I was unable to see sufficient reasons for addressing a public meeting in which I should have to be protected with rifles and revolvers, I respectfully declined. Mr. Merriam gave me a beautiful specimen of gold quartz, and I thought we had parted pretty good friends; but three days after he published an editorial containing several gross calumnies, and abusing me worse than ever.—V. C.

[*Eighth letter.*]

RETURNING HOME.

WASHINGTON, D. C., *December 20, 1871.*

We left Prescott for home Saturday morning, October 7, accompanied with many expressions of good-will from the officers of the Army stationed at Camp Whipple.

In passing through Kirkland Valley near Date Creek, the stage stopped at a farmer's house and inn toward evening, where we found the family greatly excited over the murder of an Indian. The landlord declined to give me the details of the affair, and I vainly endeavored to obtain them from a corporal and two soldiers who were standing there; they having been sent for from Camp Date Creek to protect the family. The landlord asked for seats in the stage for his wife and daughter to go to Wickenburg, saying he feared an attack upon his house that night by Apache Mohave Indians, and wished to have his family in a place of safety. As the Apache Mohaves had been for the last two years at peace, and were not included among those against whom General Crook was conducting his campaign, and, as I have reported before, are estimated to number over two thousand people, the affair was important. The ladies, who were refined and intelligent persons, were taken in the coach, and from them I learned the following particulars:

"The Indian was standing in the front door of the tavern, when three white men came up the road on horseback, and demanded a Henry rifle which the Indian held in his hand. 'No,' was the reply, 'this is my gun—my property.' 'Jump off and take it,' says one to another; upon which one of the riders dismounted, and reached for the rifle. The Indian stepped back. The white man sprang forward and seized the rifle, and with the butt end knocked the Indian down in the door of the tavern. We screamed, and begged the party not to murder an Indian in the house, or his tribe would retaliate by murdering the inmates. The Indian was dragged out and killed and buried there in the yard, when the party mounted and rode off with his rifle. The day following, a straggling party of the same tribe of Indians—the Apache Mohaves—were coming up the road, soliciting work from the farmers along the route, as is their custom. When within a mile of the tavern where the Indian was killed, three farmers, who supposed they were coming to attack our house fired into the Indians—about twenty in number—and wounded or killed several of them, who were carried off by their associates in their rapid retreat."

The killing of the first Indian took place while the landlord was absent, or he said he would have prevented it. He had thought it prudent to send his family by stage to Wickenburg, but, with the aid of the soldiers and some neighbors, he intended remaining, and would endeavor to pacify the Indians.

On our arrival at Camp Date Creek, near midnight, I awoke Captain O'Beirne, the commander, and delivered the orders of General Crook, arranging for the feeding of the Apache Mohaves at his post. I informed him of the above facts in the hope that he would investigate the affair.

At Colling's Rancho Way Station on the desert, east of Ehrenberg, I found nearly two hundred and fifty Apache Mohave Indians living in temporary wicker-ups, and hanging around begging at the rancho. I called the head men together and inquired why they did not go to the agency on the Colorado, or at Date Creek, and what were their means of obtaining a living. They said that at the Colorado Agency, Iraytabe, the chief, discouraged their coming, drove them off, and threatened them with punishment if they returned. At Date Creek they could get nothing to eat, and "it only made the officers angry to see them. Mr. Collings fed them occasionally, but they were half starving and naked." I distributed some wheat among them and gave them a letter to Colonel O'Beirne at Camp Date Creek, requesting him to look into their condition, and if they

belonged to the band which usually reported to him, to feed them under the President's order.

At Ehrenberg I met Dr. J. A. Tonner, agent for the Mohave Apaches, on the Colorado River, who reported everything peaceable and progressing hopefully at his agency. He said he would take care of the Indians at Collings ranch, and remonstrate with Iraytabe at his inhospitality. He earnestly asks for help in the establishing of schools, and reported the children eager to learn.

Arriving at Los Angeles on the 13th of October, I regretted that my time would not allow me the pleasure of calling upon General Stoneman, at Wilmington, as his position as former commander of the department of Arizona would enable him to give me much information on Indian affairs. I addressed him a note, however, and on my arrival at San Francisco, October 19, I received a very kind reply from the general, accompanied with a copy of his final report on Arizona.

#### AT SAN FRANCISCO.

General Schofield was glad to see me. The many exaggerated reports in the newspapers of the "cross-purposes between General Crook and the peace commissioner," had made him desirous to learn the truth. When he ascertained that instead of placing the Indians on the reservation which I had selected, "under the care of the proper officers of the Indian Department," as I had been directed to do in my instructions from the Secretary of the Interior, I had availed myself of the clause which allowed me "full power to use my best discretion," and I had left the whole business under the supervision of General Crook and the officers of the Army. I believe he was satisfied that the "cross-purposes" only existed in the imagination of a few worthy people in Arizona, and those whom they have misled.—(Appendix A b, No. 25.)

I arrived in Washington on October 27, and made my verbal report to the President in the presence of the Secretary of the Interior and Secretary of War, on the 6th of November. By direction of the President, on the following day I made a brief report, in writing, to the Hon. Secretary of the Interior, giving a description of the reservations selected in New Mexico and Arizona, (see Appendix A b, No. 15,) which was inclosed to the President by the Secretary of the Interior, with an indorsement recommending that "in pursuance of the understanding arrived at in our conversation with the Secretary of War on the 6th instant, that the President issue an order authorizing said tracts of country described in Mr. Colyer's letter to be regarded as reservations for the settlement of the Indians until it is otherwise ordered. I have the honor also to suggest that proper officers of the War Department be directed to notify the various bands of roving Apaches that they are required to locate upon the reservations immediately, and that upon so doing they will be fully protected and provided for by the Government so long as they remain on said reservations, and preserve peaceable relations with the Government, each other, and the white people, and that unless they comply with the request they will not be thus provided for and protected." (See Appendix A b, No. 26.)

These recommendations were approved by the President, transmitted to the Secretary of War, and, under General Sherman's orders, were directed to be carried into execution by Lieutenant General Sheridan and Major General Schofield, commanding the division of the Missouri and Pacific. (See Appendix A b, No. 27.)

#### APACHE INDIANS COMING IN.

Late advices from the agents and Army officers in charge of the Apache Indian reservations established in New Mexico and Arizona, under the President's order, state that the roving Apaches have come in in large numbers. There are now reported to be at Cañada Alamosa nineteen hundred; Camp Apache, Arizona Territory, thirteen hundred; Camp Grant, Arizona Territory, nine hundred; Camp Verde, Arizona Territory, five hundred; Camp McDowell, Arizona Territory, one hundred—total four thousand seven hundred.

No reports have been received at this office from the feeding stations temporarily established until the reservations can be selected, at Camp Hualapas and Camp Date Creek, where there are probably one thousand more. Without counting these there are more than one-half of all the roving Apaches of these Territories now at peace and within call, reaping the benefit of the "peace policy."

Of the complaints made by the officials and editors of Arizona of my want of courtesy in not accepting their generous hospitalities, as well as of the threats so freely made to "mob," "lynch me," "hang me in effigy," "stone me to death" as a "thief," "robber," "murderer," "red-handed assassin," &c., and abuse generally of the press of Arizona and elsewhere, I have taken little notice, as the business upon which I was sent to Arizona and New Mexico was successfully accomplished, has received the approbation of the administration and I trust to time and the good results which I believe will follow as my vindication.

Very respectfully, your obedient servant,

VINCENT COLYER.

## APPENDIX A b, No. 2.

*Report of the massacre of friendly Apache Indians at Camp Grant, Arizona Territory, April 30, 1871, by white citizens of Tucson, Mexicans, and Papago Indians, while the Indians were prisoners of war under the American flag.*

CAMP GRANT, ARIZONA TERRITORY, May 17, 1871.

DEAR COLONEL: Thanks for your kind letter of last week. If I could see you and have a long talk, and answer all your questions, I could come nearer giving you a clear idea of the history of the Indians at this post than by any written account. Having had them constantly under my observation for nearly three months, and the care of and for them constantly on my mind, certain things have become so much a matter of certainty to me that I am liable to forget the amount of evidence necessary to convince even the most unprejudiced mind that has not been brought in contact with them. I will, however, try and give you a connected account, and if it proves not sufficiently full in detail, you may be sure all its positive statements will be sustained by the testimony of all competent judges who have been at this post and cognizant of the facts. Some time in February a party of five old women came in under a flag of truce, with a letter from Colonel Greene, saying they were in search of a boy, the son of one of the number, taken prisoner near Salt River some months before. This boy had been well cared for, and had become attached to his new mode of life, and did not wish to return. The party were kindly treated, rationed while here, and after two days went away, asking permission to return again. They came in about eight days, I think, with a still larger number, with some articles for sale to purchase manta, as they were nearly naked. Before going away they said a young chief would like to come in with a party and have a talk. This I encouraged, and in a few days he came with about twenty-five of his band. He stated in brief that he was chief of a band of about 150 of what was originally the Aravapa Apaches; that he wanted peace; that he and his people had no home, and could make none, as they were at all times apprehensive of the approach of cavalry. I told him that he should go to the White Mountains. He said, "That is not our country, neither are they our people. We are at peace with them, but never have mixed with them. Our fathers and their fathers before them have lived in these mountain and have raised corn in this valley. We are taught to make mescal our principal article of food, and in summer and winter here we have a never-failing supply. At the White Mountains there is none, and without it now we get sick. Some of our people have been in at Goodwin, and for a short time at the White Mountains, but they are not contented, and they all say, 'Let us go to the Aravapa and make a final peace and never break it.'" I told him I had no authority to make any treaty with him or to promise him that he could be allowed a permanent home here, but that he could bring in his band and I would feed them, and report his wishes to the department commander. He went out and returned about the 1st of March with his whole band. In the mean time rumors had been in from two other small bands, asking the same privileges, and giving the same reasons. I made the same reply to all, and by about the 5th of March I had over three hundred here. I wrote a detailed account of the whole matter, and sent it by express to Sacaton, to department headquarters, asking for instructions, having only the general policy of the Government in such cases for my guidance. After waiting more than six weeks my letter was returned to me without comment, except calling my attention to the fact that it was not briefed properly. At first I put them in camp about half a mile from the post, and counted them, and issued them rations every second day. The number steadily increased until it reached the number of five hundred and ten. Knowing as I did that the responsibility of the whole movement rested with me, and that in case of any loss to the Government coming of it I should be the sufferer, I kept them continually under observation, until I not only came to know the faces of all the men, but also the women and children. They were nearly naked, and needed everything in the way of clothing. I stopped the Indians from bringing hay, that I might buy from them. I arranged a system of tickets with which to pay them and to encourage them; and to be sure they were properly treated, I personally attended to all the weighing. I also made inquiries as to the kind of goods sold them and prices. This proved a perfect success; not only the women and children engaged in the work, but many of the men. The amount furnished by them in about two months was nearly 300,000 pounds.

During this time many small parties had been out with passes for a certain number of days to burn mescal. These parties were always *mostly women*, and I made myself sure by noting the size of the party, and from the amount of mescal brought in, that no treachery was intended. From the first I was determined to know not only all they did, but their hopes and intentions. For this purpose I spent hours each day with them in explaining to them the relations they should sustain to the Government, and their prospects for the future in case of either obedience or disobedience. I got from them in return much of their habits of thought and rules of action. I made it a point to

tell them all they wished to know, and in the plainest and most positive manner. They were readily obedient and remarkably quick of comprehension. They were happy and contented, and took every opportunity to show it. They had sent out runners to two other bands which were connected with them by intermarriages, and had received promises from them that they would come in and join them. I am confident, from all that I have been able to learn, that but for this unlooked for butchery, by this time we would have had one thousand persons, and at least two hundred and fifty able-bodied men. As their number increased, and the weather grew warmer, they asked and obtained permission to move farther up the Aravapa to higher ground and plenty of water, and opposite to the ground they were proposing to plant, and were rationed every third day. Captain Stanwood arrived about the first of April and took command of the post. He had received while en route verbal instructions from General Stoueman to recognize and feed any Indians he might find at the post as "prisoners of war." After he had carefully inspected all things pertaining to their conduct and treatment, he concluded to make no changes, but had become so well satisfied of the integrity of their intentions that he left on the 24th with his whole troop for a long scout in the lower part of the Territory. The ranchmen in this vicinity were friendly and kind to them and felt perfectly secure, and had agreed with me to employ them at a fair rate of pay to harvest their barley. The Indians seem to have lost their characteristic anxiety to purchase ammunition, and had, in many instances, sold their best bows and arrows. I made frequent visits to their camp, and if any were absent from count made it my business to know why.

Such was the condition of things up to the morning of the 30th of April. They had so won on me, that from my first idea of treating them justly and honestly as an officer of the Army, I had come to feel a strong personal interest in helping to show them the way to a higher civilization. I had come to feel respect for men who, ignorant and naked, were still ashamed to lie or steal, and for women who would work cheerfully like slaves to clothe themselves and children, but, untaught, held their virtue above price. Aware of the lies and hints industriously circulated by the puerile press of the Territory, I was content to *know* I had positive proof they were so.

I had ceased to have any fears of their leaving here, and only dreaded for them that they might at any time be ordered to do so. They frequently expressed anxiety to hear from the general, that they might have confidence to build for themselves better houses, but would always say, "You know what we want, and if you can't see him you can write and do for us what you can." It is possible that during this time individuals from here had visited other bands, but that any number had ever been out to assist in any marauding expedition I know is false.

On the morning of April —, I was at breakfast at 7.30 o'clock, when a dispatch was brought to me by a sergeant of Company P, Twenty-first Infantry, from Captain Penn, commanding Camp Lowell, informing me that a large party had left Tucson on the 28th, with the avowed purpose of killing all the Indians at this post. I immediately sent the two interpreters, mounted, to the Indian camp, with orders to tell the chiefs the exact state of things, and for them to bring their entire party inside the post. As I had no cavalry, and but about fifty infantry, (all recruits,) and no other officer, I could not leave the post to go to their defense. My messengers returned in about an hour, with intelligence that they could find no living Indians.

The camp was burning and the ground strewed with their dead and mutilated women and children. I immediately mounted a party of about twenty soldiers and citizens, and sent them with the post surgeon, with a wagon to bring in the wounded, if any could be found. The party returned late in the p. m., having found no wounded and without having been able to communicate with any of the survivors. Early the next morning I took a similar party, with spades and shovels, and went out and buried all the dead in and immediately about the camp. I had the day before offered the interpreters, or any one who could do so, \$100 to go to the mountains and communicate with them, and convince them that no officer or soldier of the United States Government had been concerned in the vile transaction; and, failing in this, I thought the act of caring for their dead would be an evidence to them of our sympathy at least, and the conjecture proved correct, for while at the work many of them came to the spot and indulged in their expressions of grief, too wild and terrible to be described.

That evening they began to come in from all directions, singly and in small parties, so changed in forty-eight hours as to be hardly recognizable, during which time they had neither eaten nor slept. Many of the men, whose families had all been killed, when I spoke to them and expressed sympathy for them, were obliged to turn away, unable to speak, and too proud to show their grief. The women whose children had been killed or stolen were convulsed with grief, and looked to me appealingly, as though I was their last hope on earth. Children who two days before had been full of fun and frolic kept at a distance, expressing wondering horror. I did what I could; I fed them, and talked to them, and listened patiently to their accounts. I sent horses into the mountains to bring in two badly-wounded women, one shot through the left lung, and one with an arm shattered. These were attended to, and are doing well, and will

recover. Their camp was surrounded and attacked at daybreak. So sudden and unexpected was it, that no one was awake to give the alarm, and I found quite a number of women shot while asleep beside their bundles of hay which they had collected to bring in on that morning. The wounded who were unable to get away had their brains beaten out with clubs or stones, while some were shot full of arrows after having been mortally wounded by gunshot. The bodies were all stripped. Of the whole number buried, one was an old man and one was a well-grown boy—all the rest women and children. Of the whole number killed and missing, about one hundred and twenty-five, eight only were men. It has been said that the men were not there—they were all there. On the 28th we counted one hundred and twenty-eight men, a small number being absent for mescal, all of whom have since been in. I have spent a good deal of time with them since the affair, and have been astonished at their continued unshaken faith in me and their perfectly clear understanding of their misfortune. They say: "We know there are a great many white men and Mexicans who do not wish us to live at peace. We know that the Papagos would not have come out after us at this time unless they had been persuaded to do so." What they do not understand is, while they are at peace and are conscious of no wrong in tent, that they should be murdered by government arms, in the hands of Papagos and Mexicans. One of the chiefs said: "I no longer want to live; my women and children have been killed before my face, and I have been unable to defend them. Most Indians in my place would take a knife and cut his throat, but I will live to show these people that all they have done, and all they can do, shall not make me break faith with you so long as you will stand by us and defend us, in a language we know nothing of, to a great governor we never have nor never shall see." About their captives they say: "Get them back for us; our little boys will grow up slaves, and our girls, as soon as they are large enough, will be diseased prostitutes to get money for whoever owns them. Our women work hard and are good women, and they and our children have no diseases. Our dead you cannot bring to life, but those that are living we gave to you, and we look to you, who can write and talk and have soldiers, to get them back." I will assure you it is no easy task to convince them of my zeal when they see so little being done.

I have pledged my word to them that I never would rest easily, day or night, until they should have justice, and just now I would as soon leave the Army as to be ordered away from them, or to be obliged to order them away from here. But you well know the difficulties in the way. You know that parties who would engage in murder like this, could and would (and have already) make statements and multiply affidavits without end in their justification. I know you will use your influence on the right side. I believe, with them, this may be made either a means of making good citizens of them and their children, or drive them out to a hopeless war of extermination. They ask to be allowed to live here in their old homes, where nature supplies nearly all their wants; they ask for a fair and impartial trial of their faith, and they ask that all their captive children living may be returned to them. Is their demand unreasonable?

Unless some action is taken to convince them that Government means kindness and justice, and they are driven away desperate and disappointed, blinded by ignorance, rage, and superstition, I assure you I could hardly command men to fire on them; and if I fail to do for them now everything in my power, I should expect it to be remembered against me when I am finally called to account as my gravest offense and my greatest life responsibility. This letter has been hastily written, but not inconsiderately. You may consider yourself at liberty to use it as you think best. I am willing for a copy of it to go to the Indian Department. Captain Stanwood will, by this mail, send a full account of the matter direct to division headquarters.

If you are able to accomplish anything, I know you will gratify yourself, and your anxiety to do so has already gratified,

Yours, very respectfully,

ROYAL E. WHITMAN,

*First Lieutenant Third United States Cavalry.*

Colonel J. G. C. LEE, U. S. A., Tucson, Arizona Territory.

#### APPENDIX A b, No. 3.

*Testimony of Dr. Briesly, United States Army—Indian women ravished and then killed—Children killed and bodies mutilated by people from Tucson, at Camp Grant massacre, Arizona Territory, April 30, 1871.*

TERRITORY OF ARIZONA, *Camp Grant:*

On this 16th day of September, 1871, personally appeared Conant B. Briesly, who, being duly sworn according to law, deposeth and saith: I am acting assistant surgeon

United States Army, at Camp Grant, Arizona, where I arrived April 25, 1871, and reported to the commanding officer for duty as medical officer. Some four hundred Apache Indians were at that time held as prisoners of war by the military stationed at Camp Grant, and during the period intervening between April 25 and 30, I saw the Indians every day. They seemed very well contented, and were busily employed in bringing in bay, which they sold for manta and such little articles as they desired outside the Government ration. April 29, Captain Chiquita and some of the other chiefs were at the post, and asked for seeds and for some hoes, stating that they had ground cleared and ready for planting. They were told that the garden-seeds had been sent for, and would be up from Tucson in a few days. They then left, and I saw nothing more of them until after the killing.

Sunday morning, April 30, I heard a rumor, just before inspection, that the Indians had been attacked, and learned from Lieutenant Whitman that he had sent the two interpreters to the Indian camp to warn the Indians and bring them down where they could be protected, if possible. The interpreters returned and stated that the attack had already been made, and the Indians dispersed, and that the attacking party were returning.

Lieutenant Whitman then ordered me to go to the Indian camp to render medical assistance and bring down any wounded I might find. I took twelve men (mounted) and a wagon and proceeded without delay to the scene of the murder. On my arrival I found that I should have but little use for wagon or medicine; the work had been too thoroughly done. The camp had been fired and the dead bodies of some twenty-one women and children were lying scattered over the ground; those who had been wounded in the first instance, had their brains beaten out with stones. Two of the best-looking of the squaws were lying in such a position, and from the appearance of the genital organs and of their wounds, there can be no doubt that they were first ravished and then shot dead. Nearly all of the dead were mutilated. One infant of some ten months was shot twice and one leg hacked nearly off. While going over the ground we came upon a squaw who was unhurt, but were unable to get her to come in and talk, she not feeling very sure of our good intentions. Finding nothing further could be done, I returned to the post and reported the state of affairs to Lieutenant Whitman, commanding post.

May 1, Lieutenant Whitman, some citizens, and myself went out to the Indian camp, and on our way we met two squaws and a buck coming in. They stated that their loss was much heavier than we had supposed, and that some eighty-five had been killed, of whom eight only were men, and that some twenty-five of their number had been taken prisoners. We found six more dead bodies, one of which was an old man, two half-grown boys, and three women. The evening of May 1, Lieutenant Whitman sent two Indians, who had come during the day, into the mountains, mounted on horses furnished by him, to bring in two wounded women. The women were brought in in two days. One of them, a wife of Chipuita Caqitan, was shot through the left arm, and the other had received a gunshot wound through the left lung. The Indians who came expressed themselves as satisfied that we had nothing to do with the murder, and further stated that their only wish was to get back the captives and live at peace.

I know from my own personal observation that during the time the Indians were in after my arrival, they were rationed every three days, and Indians absent had to be accounted for; their faces soon became familiar to me, and I could at once tell when any strange Indians came in. And I furthermore state that I have been among nearly all the various tribes on the Pacific coast, and that I have never seen any Indians who showed the intelligence, honesty, and desire to learn, manifested by these Indians. I came among them greatly prejudiced against them, but, after being with them, I was compelled to admit that they were honest in their intentions, and really desired peace.

C. B. BRIELEY,

*Acting Assistant Surgeon United States Army.*

WM. NELSON,

*Captain Twenty-first Infantry, Commanding Post.*

---

*Testimony of Oscar Hutton, post-guide, Camp Grant, Arizona Territory, who affirms that no raiding party was ever made up from the Indians fed at Camp Grant.*

**TERRITORY OF ARIZONA, County of Pima, Camp Grant:**

On this 19th day of September, 1871, personally appeared Oscar Hutton, who, being duly sworn according to law, deposes and says:

I am post-guide at Camp Grant, Arizona Territory. Have occupied the position uninterruptedly for nearly three years under its different commanding officers. I came

to California from the States in 1850, since which time I have been constantly on the frontier and in Indian country. I have been an officer of volunteers in this Territory, and have perhaps seen as much active service against the Indians as any man living in Arizona.

From the time the first Indians came to this post, in February, 1871, until April 25, when I was ordered out with a scouting party, I was not absent one day. I was in constant consultation with Lieutenant Whitman in regard to them. I acted as Spanish interpreter at nearly every talk with them, and, when other interpreters were employed, was always present, at the request of Lieutenant Whitman. I did not return to the post until some days after the massacre.

Before Lieutenant Whitman forwarded his account of the affair to Colonel Lee, (which account has since been published,) it was read to me, and I fully concurred in all its statements. Now, after having re-read the letter, I see no point in it that is not accurately and faithfully correct, and I further state that I have never seen Indians on a reservation, or at peace about a military post, under so good subjection, so well satisfied and happy, or more teachable and obedient than were these, up to the time I left the post five days previous to the massacre.

I was repeatedly requested to watch every indication of anything like treachery on their part, and I will give it as my deliberate judgment, that no raiding party was ever made up from the Indians fed at this post. I have every reason to believe that, had they been unmolested, they would have remained, and would have gradually increased in numbers, as they constantly had been doing up to the time I left the post.

OSCAR HUTTON.

Sworn to and subscribed before me this 19th day of September, 1871, at Camp Grant, Arizona Territory.

WM. NELSON,  
*Captain Twenty-first Infantry.*

*Testimony of F. L. Austin, post-trader at Camp Grant, Arizona Territory.*

**TERRITORY OF ARIZONA, County of Pima, Camp Grant :**

On this 19th day of September, 1871, personally appeared F. L. Austin, who, being duly sworn according to law, deposes and says:

I am post-trader at Camp Grant, Arizona Territory; have been in Arizona nearly four years; have heard a great deal of the Apache Indians, and was once attacked by them on the Tucson road; I was at this post when the first Indians came in here in February, 1871, and nearly all the time up to the time of the massacre, April 30. I was taking breakfast with Lieutenant Whitman at about half-past seven a. m. of that day, when the dispatch from Captain Dunn was delivered. I have read the letter of Lieutenant Whitman to Colonel Lee, (since published,) and I fully indorse it throughout. The Indians while here seemed to be under perfect control, and in all my business with them, in paying for some one hundred and fifty tons of hay for the contractor, never had any trouble or difficulty of any kind. They very readily learn any little customs of trade, &c. It is my opinion they would have remained and increased in numbers had they not been attacked.

F. L. AUSTIN.

Sworn to and subscribed before me this 19th day of September, 1871, at Camp Grant, Arizona Territory.

WM. NELSON,  
*Captain Twenty-first Infantry.*

*Testimony of Miles L. Wood, beef-contractor at Camp Grant, Arizona Territory.*

**TERRITORY OF ARIZONA, County of Pima, Camp Grant :**

On this 19th day of September, 1871, personally appeared Miles L. Wood, who, being duly sworn according to law, deposes and says:

I have been contractor's agent for the delivery of beef at this post since December, 1870. While the Indians were at this post, I was not absent one day, and personally issued to them every pound of beef drawn by them. They brought tickets to me, on which I issued. After completing the issue, I took the tickets to the office of the assistant commissary of subsistence, and verified them by the official count of that day. I never had any trouble in my delivery. Lieutenant Whitman selected an Indian for policeman, gave him his orders, and good order was always preserved. I have lived in California, and have seen a great deal of Indians. Have heard a good deal of the Apaches, and was much surprised at the general intelligence and good behavior of

those I saw at this post. I have read the letter written by Lieutenant Whitman to Colonel Lee, and I believe all therein stated to be the truth. I have no doubt, if Lieutenant Whitman had not been interfered with in his management, the Indians would have remained here, and would have gone on increasing in numbers.

MILES L. WOOD.

Sworn to and subscribed before me this 19th day of September, 1871, at Camp Grant, Arizona Territory.

WM. NELSON,  
*Captain Twenty-first Infantry.*

*Testimony of William Kness, mail-carrier, Camp Grant, Arizona Territory, asserting that no Indian raiding parties ever left Camp Grant.*

**TERRITORY OF ARIZONA, County of Pima, Camp Grant:**

On this 19th day of September, 1871, personally appeared William Kness, who, being duly sworn according to law, deposes and says:

I have resided at this post and Tucson since the 24th of last February; was employed to carry the mail from Tucson to Camp Grant up to the 24th of April; after that I was interpreter until the 30th of April, the day of the massacre, since which time, and whenever the Indians have returned to the post, I have acted as interpreter. I have been on the frontiers for twenty-six years; am familiar with Indians and their habits; have fought them and lived peaceably with them. I had not much faith in Apaches; till I came to Camp Grant I was prejudiced against them. I made it a point to study the character and habits of the Apache Indians at Camp Grant before the massacre, and the result was that I was convinced that they were acting in good faith and earnestly desired peace; they were industrious, the women particularly so. Among all the Indians I have ever seen, I never met with as great regard for virtue and chastity as I have found among these Apache women. In regard to the charge that after they were fed they went out on raiding parties, I have to say that I do not believe it. They were contented under our supervision, being in every three days for rations, and their faces familiar, and their number constantly increasing. I have read the statement of Oscar Hutton in regard to this point, and I have no doubt that he is correct—that no raiding parties were ever made by the Indians from this post. I also believe that if the massacre had not occurred, we should have had from 800 to 1,000 Apache Indians on this reservation before this time.

There were one hundred and sixty-six at the distribution of clothing by Commissioner Colyer on the 16th of September, and this morning there are seventy-nine more in from Captain Chiquita's band for the same purpose, and I firmly believe that if they are let alone and firmly protected, they will remain at peace and advance in civilization.

WILLIAM KNESS.

Sworn to and subscribed before me this 19th day of September, 1871, at Camp Grant, Arizona Territory.

WM. NELSON,  
*Captain Twenty-first Infantry.*

**CAMP GRANT, ARIZONA TERRITORY,**

*September 10, 1871.*

SIR: I have the honor to submit for your consideration the following statement relative to the so-called Camp Grant Indians, properly known as Aravapa Indians, who were collected upon this reservation early in the spring of the year current. I have been on duty at this post as an officer of the Third United States Cavalry since October 17, 1870. I was present at this post about the middle of February, when the first Aravapa Indians came in and asked for terms of peace. The subject was first introduced by two or three squaws, who came in under flag of truce, and informed the post commander, Lieutenant Royal E. Whitman, Third Cavalry, that a large number of the Aravapa Indians desired to come into the post, with a view to the establishment of a permanent peace with the Government of the United States. After hearing the wishes of the Indians expressed, Lieutenant Whitman granted permission for those who desired to come in and talk, telling the squaws that he desired to converse with the chiefs of bands, and assuring them that those who came in for that purpose would be protected and allowed to go out unmolested, provided the terms of peace should not

prove satisfactory. Upon this the squaws went out and reported to the chiefs of several small bands, who came in under flag of truce with their people. The three who came in first were as follows : Es-kim-en-zee, Chiquita Capitan, and Santo. Upon arrival of these chiefs, a conference was held, at which conference I was present, as also those subsequent, up to the 11th of April. Many of the Indians of the three bands were also present, but the chief of each band was the representative for his people, expressing their wishes for them. I am unable to quote the precise language of the chiefs, but the purport of their words was as follows, viz : That they were tired of war with the whites, and wished permanent peace ; that this section of the country, stretching along the Aravapa Creek from the Rio San Pedro to the Aravapa or Galiura Mountains, they had always considered as their homes, and that they wished now to come in and be allowed to plant in the valley of the Aravapa Creek ; also that they might be supplied with farming utensils and the necessary provisions to sustain life until they could raise crops. After hearing their propositions, Lieutenant Whitman informed them that he thought their requests would be granted, but that he had no authority to establish a reservation for them and make permanent peace without the approval of higher authority, telling them he would report without delay for instructions from the department commander, and, until he received further instructions, would furnish them with what provisions he was allowed to issue, viz, one pound of beef and one pound of corn or flour per day to each Indian. They expressed themselves satisfied with this, but stated that it would be necessary for them to go out occasionally a short distance from the post, on the side-slopes of the adjacent mountains, for the purpose of gathering mescal, as they considered it a necessary article of their diet, and were told by Lieutenant Whitman that this permission would be granted when considered necessary. At this period it was supposed that the department commander, Colonel George Stoneman, Twenty-first Infantry, would soon be at the post, and the Indians expressed themselves very anxious to see him as soon as possible, that they might get authority to commence planting. Lieutenant Whitman immediately reported the matter by letter bearing date February 24, 1871, and his second, February 28, 1871. Of these letters I understand you are to receive official copies, so that it is unnecessary for me to mention them, except to refer to that dated February 28. This latter was written in considerable haste, and, to expedite matters as much as possible, a special messenger was sent to accompany the mail to Florence settlement, on the Gila, with instructions to procure a horse there and carry the letter to Sacaton, the first mail-station on the regular line between Tucson and department headquarters, the latter then being at Drum Barracks, California. In the haste of preparing this letter, the proper briefing, as required on the outer fold, was unintentionally neglected, and this fact served to delay the instructions which Lieutenant Whitman required, as the letter came back in about the usual time necessary for a communication to pass to and from Drum Barracks, with an indorsement calling attention to the neglected briefing, but giving no instructions in regard to the Indians. During this period nothing had occurred at the post to cause any one to doubt the sincerity of the Indians. At all times they behaved themselves in a perfectly orderly manner, and obeyed implicitly the orders of the post commander. They had requested, upon their arrival, to be given a camping-ground, and had been placed inside the reservation on the Aravapa, about one mile from the post ; however, as the water in the Aravapa soon disappeared, it was necessary for them to follow the stream up, and for this reason they were allowed to change their camp several times, until finally they established it, when the so-called Camp Grant massacre took place on the 30th of April last. Whether or not this latter camp was inside the military reservations of this post I consider as of little importance, for, at all events, the Indians were allowed by the post commander to establish it there, and he in my presence had told them repeatedly that, so long as they behaved themselves properly, and remained subject to his orders, they should and would be protected ; and, in referring to the life which they were now leading as compared with that which they had led, he told them they could sleep at night in their camp in as perfect security as could we, the officers of the garrison, inside our quarters. They were allowed, at this time, to sell hay to the Government at the contract price, and, with the proceeds of such sale, were able to clothe themselves very decently. Repeatedly they expressed themselves contented, but often asked when the department commander would come, and when they would be allowed to plant. Discontent appearing to prevail with a portion of the people of Southern Arizona, and certain articles of censure appearing in one or two of the journals at this time, Lieutenant Whitman was very particular to warn all of the Indians that in no manner should they lay themselves liable to suspicion, telling them that if ever one or two of them should go out and engage in hostilities, all would suffer the consequences. They were made to understand that, by making peace with the military at this post, they had made peace with the citizens of the Territory as well, and with us, as with them they was no distinction of tribes. They were also told, and made to understand, that they would not be permitted to depredate in Sonora, and expressed themselves as anxious for peace with all.

You have asked me, sir, to state to the best of my knowledge the general character

of the Indians referred to, and whether, or not, they were in the habit of making predatory excursions during the time they were at this post. First, in regard to the character of the Indians, it has been my fortune at various periods of my life to be brought in contact with several tribes of friendly Indians, and, as a natural consequence, I have compared the character of the Apaches with that of others. Speaking generally of these Indians, I have considered them superior in intelligence to any tribe I have met with.

The general reputation for honesty of the Apache tribe is poor; but these people, as I have before stated, gave no cause of complaint until their final outbreak, the causes of which it would, perhaps, be well to consider before condemning all. Of these causes I understand you will be informed, so that it is unnecessary for me to mention them here. As regards any acts of hostility committed by these Indians from the time they came upon the reservation up to their final outbreak, June 8, 1871, at which time they killed Charles McKenney, I submit the following: From the time they came in, these Indians were counted and their numbers recorded every three days. I kept no journal at that time, but very frequently went with Lieutenant Whitman and counted the various bands; those counts, of course, were recorded, as the issues were made accordingly, and the records, I believe, are preserved. Comparing, then, the date of any depredation in Southern Arizona, or elsewhere, with the records, will show whether or not any of these Indians could have been engaged therein. In this, however, there is one difficulty, viz: At various times small parties were permitted to go out for mescal, as the allowance was not sufficient; during these periods I am unable to vouch for their acts, and can only say that usually those who went out were mostly women and children, it being the custom among the Indians of this tribe, as of others, to require their women to do the greater portion of their work. For the reasons stated, it is impossible for me to say positively that no Indians upon the reservation engaged in hostilities, but my conviction was that they did not, and I shall continue so to believe until I have seen some evidence to the contrary. I do not consider the statements of a few citizens that some of these Indians had committed depredations a sufficient proof to warrant the indiscriminate murder of a whole band, and it is certain that it was impossible for any large number to have been engaged in hostilities during the time the bands were here; moreover, I do now doubt the ability of any person or persons to prove that any one Indian of these bands committed a single hostile act from the time of their arrival here, about the middle of February, 1871. It has been asserted that this fact can be proved. By proof, I mean sufficient proof to convict before a properly constituted tribunal. I have not arrived at the conclusions I have formed on account of any especial love for the Apache tribe, nor from any prejudice against the citizens of this Territory, among whom I have found fine gentlemen and warm friends. On the contrary, I was strongly opposed to the peace policy with these Indians when they first came in, and was not convinced of their sincerity until I received evidence by watching their actions carefully. Moreover, as I was in nowise responsible in the Indian matter, I consider myself an impartial spectator from the middle of February up to the 11th of April, at which time I left the post on leave of absence, and from May 21 to June 8. In closing, I deem it my duty, sir, to mention a subject in connection with the Indian question which relates to the acts of an officer of the Army, viz: Lieutenant Royal E. Whitman, Third Cavalry. Attempts have been made, principally through the columns of the Arizona Citizen, a journal published in Tucson, Arizona Territory, to make it appear that this officer was a debauched scoundrel and a slave to vice. Among other things, he has been accused of associating with Indian women, and of being a confirmed drunkard. I know little of this officer's history previous to his assuming command of this post, December last, but from the time the Indians came in up to the 11th of April, and from May 21 to the time they left, to the best of my knowledge he touched not a drop of liquor. The other statement given in the Arizona Citizen had not the slightest foundation in truth. Of his official acts, if I had a right to speak, I could speak only in his praise; but the records of this post are his sufficient vouchers. I have taken this liberty to correct the abuse that has been hurled at Lieutenant Whitman, for the reason that I have been a great portion of the time the only officer serving with him, and I have not corrected it before for the reason that no proper opportunity presented itself.

The statements I have set forth in the foregoing I certify on my honor are correct, and have the honor to be, sir, very respectfully, your obedient servant,

W. W. ROBINSON, JR.,

*Second Lieutenant Third United States Cavalry.*

HON. VINCENT COLYER,  
*Indian Commissioner.*

## APPENDIX A b, No. 4.

LONG BRANCH, NEW JERSEY,  
July 13, 1871.

Hon. C. DELANO,  
*Secretary of the Interior:*

Mr. Colyer, secretary of the board of Indian peace commissioners, has told me of the report of Superintendent Pope, to the effect that with enlarged powers and assurances of protection and proper provisions, the wild Indians of New Mexico and Arizona may now be induced to come into Cañada Alamosa. I suggest that enlarged powers be given to Superintendent Pope to effect so desirable an object, or that Mr. Colyer be sent with all the necessary powers. I will direct the War Department to give all the assistance necessary to carry out the object of Mr. Pope or Mr. Colyer, as the case may be.

Please call on the Secretary of War, or, in his absence, upon General Sherman, for such orders to the troops for supplying transportation, provisions, or escort as may be needed to carry out the designs of the Indian Bureau in the matter.

Very respectfully, your obedient servant,

U. S. GRANT.

## APPENDIX A b, No. 5.

DEPARTMENT OF THE INTERIOR, INDIANS,  
Washington, D. C., July 21, 1871.

SIR: You are hereby authorized and requested to proceed to New Mexico and Arizona Territories, and there take such action as in your judgment may be deemed wisest and most proper for locating the nomadic tribes of those Territories upon suitable reservations; bringing them under the control of the proper officers of the Indian Department, and supplying them with necessary subsistence and clothing, and whatever else may be needed.

The Department invests you with full powers, to be exercised according to your discretion, in carrying into effect its views in relation to the Indians referred to, and I have to request that you will, from time to time, report to the Secretary of the Interior your action and progress and the result of your investigations.

I transmit herewith, for your information, a copy of a letter of this date from the Commissioner of Indian Affairs, together with the papers therein referred to.

Very respectfully, your obedient servant,

B. R. COWEN,  
*Acting Secretary.*

Hon. VINCENT COLYER,  
*Secretary Board Indian Commissioners, present.*

## APPENDIX A b, No. 6.

*Letter from Commissioner Parker, suggesting enlarged powers be given to Vincent Colyer.*

DEPARTMENT OF THE INTERIOR,  
OFFICE OF INDIAN AFFAIRS,  
Washington, D. C., July 21, 1871.

SIR: I have the honor to transmit you herewith a copy of office letter of the 18th of March last to Superintendent Pope, of New Mexico, directing him to send Apache chief Cochise and other prominent Indians of that tribe to this city, for the purpose of conferring with this Department in regard to the condition and welfare of their people. I also forward copies of letters, in reply thereto, from Superintendent Pope, of the dates of April 6, April 21, May 14, and June 28, in which he reports his progress in the search for said Indians and the finding of Cochise, but that he was unable to prevail upon him then to come in, because of his fear of the military and the citizens. I also transmit a copy of a letter from Governor Pile, of New Mexico, dated June 19, 1871, referred to this Department by the Secretary of State.

The President having directed that enlarged powers be given to Superintendent Pope, or that Mr. Colyer be sent with the necessary powers to establish friendly relations with and locate the wild Indians of New Mexico and Arizona, I would respectfully suggest, as requested by you in verbal conversation yesterday, that the above letters be taken by Mr. Colyer as his guide of procedure, and that, in addition, he be

invested with discretionary powers in the matter, to be used as the circumstances which may develop themselves upon his arrival in those Territories may demand. I suggest that he be authorized to do whatever in his judgment may appear most wise and proper in locating the roving tribes in those Territories on suitable reservations, in bringing them under the supervision of the respective agents, and in arranging issue of the necessary supplies for their wants, as will be for the best interests of the Indians, the Government, and citizens of said Territories.

Very respectfully, your obedient servant,

E. S. PARKER,  
*Commissioner.*

Hon. C. DELANO,  
*Secretary of the Interior.*

---

APPENDIX A b, No. 7.

PINOS ALTAS, NEW MEXICO, July 18, 1871.

SIR: Yours of June 15 was duly received, giving me the information I requested, &c., for which accept my thanks. I was also pleased to hear from Captain Stevens, although sorry to hear he is so sick; he is a noble, good man.

Since the receipt of your letter I have been notified of several Indian depredations being committed on the Mimbres River on the 19th of June. Indians stole three horses from the Upper Mimbres while picketed within four hundred yards of the house of George O. Perrault, justice of the peace of that precinct, who at the time was trying a case for the parties whose horses were stolen. They were followed about thirty miles in the direction of your reservation by the owners of the horses on foot. About the same time two or three horses were stolen from a ranch about seven miles above the town of Rio Mimbres; since then some cattle were stolen from the same ranch and followed to your reservation, where they were recovered, for which I thank you. About a week ago two horses and one mule were stolen by Indians from near Fort Bayard, which stock was followed some distance in the direction of your reserve.

I am reliably informed, by prominent citizens who have seen and conversed with the Mexicans who followed and recovered their oxen from the Indians on your reservation, that they saw, in possession of Indians under your charge, other stolen stock that they identified, but that you was not able to recover it from the Indians, and that they positively refused to give it up to the owners or to yourself; therefore I hope that this matter will be fully explained to Superintendent Pope, to see how long this state of affairs is to exist. What we want to know is, whether our stock can be recovered or not from Indians on your reservation, when fully proved and identified, or if we are to be forever at the mercy of these thieving, murderous Apaches, who have a house of refuge at Alamosa? If so, the sooner we know it the better, because the citizens of this country are determined to put a stop to it, and, if they carry out their programme, the Camp Grant massacre will be thrown entirely in the shade, and Alamosa will rank next to Sand Creek.

I have done my best to keep the people of Grant County from committing any overt act; but unless we have some reliable protection furnished us soon from the thieving, murderous villains, whom you are feeding and have not power to keep from robbing and plundering our people, I shall hereafter do nothing to prevent an armed body of true bold frontiersmen from leaving this county on one of the numerous trails that lead to Alamosa, to find their stock and punish the robbers and murderers wherever they may find them.

I do hope you may do all in your power to prevent such a thing, but I can assure you unless something is done soon, our indignant citizens will turn out *en masse* and settle the Alamosa reservation question fully. Hoping to hear from you soon,

I remain, yours truly,

R. HUDSON.

O. F. PIPER, Esq.,  
*Indian Agent at Cañada Alamosa, New Mexico.*

---

UNITED STATES INDIAN AGENCY FOR SOUTHERN APACHES,  
*Cañada Alamosa, New Mexico, July 24, 1871.*

DEAR SIR: Yours of the 17th instant received. You have been misinformed of what occurred here when the two Mexicans from Rio Mimbres were here looking for stock stolen from them. The chiefs came in the morning these men came, to inform me that two or three of their young men had stolen some animals (giving the number and

kind) from the Mimbres, and wished to know what to do. I told them that they must bring the stock to me, which they promised to do. As soon as I got a description of these men's animals, I sent one of the chiefs and an Indian after the oxen and one horse, said to be in the mountains. That night they brought in the oxen, but could not find the horse. I sent for all the chiefs and principal men, and told them that those horses that had been identified by these men as theirs must be given up by the parties that had them, and that neither they nor their families could have rations until this was done. They did bring in all the animals identified by the Mexicans. One horse that they claim to have lost, has not been found. I think it has not been brought here; if it is brought in, I have no doubt but I will get it. Had the two Mexicans acted prudently, I could have obtained the animals with much less trouble, and they could have had them to take back with them. The Indians never did refuse to give the animals up to me, but always said that they should be given up. One of the Mexicans, I was confident, would misrepresent what had occurred here.

I again, through you, say to the people of Grant County, that if they trace their lost stock to the reservation, and will come to me in a peaceful manner, I have no doubt that they will recover them.

I also assure you that the Indian Department is doing, and will do, all that is possible to protect the people of this Territory, and settle the Indian troubles. A little patience and forbearance by the people at this particular time will go far to assist in this object. I will refer your letter to the superintendent of Indian affairs for this Territory.

Yours truly,

O. F. PIPER,  
*United States Indian Agent.*

Hon. R. HUDSON,  
*Pinos Altas, New Mexico.*

---

CANADA ALAMOSA, NEW MEXICO,  
July 27, 1871.

SIR: I have the honor to transmit herewith a private letter from Judge Hudson, of Grant County, and a copy of my reply. The letter contains severe threats that I thought you should be notified of. I recovered all the stolen stock claimed by the parties mentioned in the Judge's letter, except one horse, which I have good reasons for believing was not brought here. I am confident that the chiefs and leading men are doing all in their power to prevent any of their people from committing depredations on the citizens of the Territory.

Respectfully, your obedient servant,

O. F. PIPER,  
*United States Indian Agent.*

NATHANIEL POPE, Esq.,  
*Superintendent Indian Affairs, Santa Fé, New Mexico.*

---

#### APPENDIX A b, No. 8.

PINOS ALTAS, NEW MEXICO,  
July 30, 1871.

COLONEL: I have the honor to inclose herewith resolutions of the people at Rio Mimbres, New Mexico, so as to show you the feeling of the citizens of Grant County, which I hope will call your immediate attention to affairs at the Alamosa reservation, as our citizens are determined to take the law in their own hands, if it is impossible to get justice from you or your subordinates.

I have used my best endeavors, and have kept our citizens from going to Alamosa on former occasions, in hopes that some measures would be taken to return stolen stock to persons claiming it and proving their property personally to the agents.

I have no fault to find with Mr. Piper, but our citizens say he is powerless with the Indians at Alamosa at present. Hoping you will give this matter your prompt attention, and keep our citizens from doing an overt act that I should very much regret,

I am, yours respectfully,

RICHARD HUDSON,  
*Probate Judge, Grant County, New Mexico.*

Colonel POPE,  
*Superintendent of Indian Affairs, Santa Fé, New Mexico.*

*Proceedings of a meeting of the citizens of the town of Rio Mimbres, Grant County, New Mexico, which assembled spontaneously at the store of R. V. Newsham, at 3 o'clock p. m. on Wednesday, July 19, 1871.*

The meeting organized by electing R. V. Newsham as president, and Henry Schwenker as interpreter and secretary.

The president explained the object and wish of the meeting to be, to take what steps were deemed necessary in view of the incessant robberies by Indians.

A committee, consisting of Agapito Balencia, Marshall St. John, and Henry Schwenker, was appointed to draught resolutions.

The following preamble and resolutions were introduced by the committee and unanimously adopted by the meeting:

Whereas the people of Rio Mimbres, Grant County, New Mexico, have been continually robbed and plundered of their stock and household goods, and have, by actually following their stock, found it on the Indian reservation at Cañada Alamosa, and, upon identifying their property, could not recover it or get any satisfaction from the Indian agent; and whereas the Constitution of the United States grants to every American citizen the right of life, liberty, and property; and whereas they have until now supplicated in vain to the authorities, both civil and military, for a redress of their grievances; therefore, be it

*Resolved*, That our own is all we ask, and will and must have, even at the peril and sacrifice of our lives and property.

*Resolved*, That the people of Grant County, New Mexico, organize themselves into a posse, and follow their stock to wherever it may be, and take it by force wherever found, even if it be at the sacrifice of every Indian man, woman, and child, in the tribe.

*Resolved*, That if opposed by Indians or their accomplices, be they Indian agents, Indian traders, or Army officers, let them be looked upon as our worst enemies, and the common enemies of New Mexico, and be dealt with accordingly.

*Resolved*, That a copy of these resolutions be forwarded to the probate judge of this county.

No other business being before the meeting, it adjourned *sine die*.

R. V. NEWSHAM, *President*.

HENRY SCHWENKER, *Secretary*.

OFFICE OF SUPERINTENDENT OF INDIAN AFFAIRS,  
*Santa Fé, New Mexico, August 3, 1871.*

SIR: Inclosed herewith I send you a copy of resolutions passed on the 9th July, 1871, by the citizens of Rio Mimbres, New Mexico, regarding the depredations of the Indians of your agency; also a copy of a letter from Hon. R. Hudson, probate judge, dated Pinos Altas, New Mexico, 30th July, 1871, upon the same subject.

You are directed to make every effort to recover any stolen property that may be brought to your reservation, and to secure the thieves for punishment. If necessary, you will call upon the commanding officer of the nearest military post for troops to enforce your demands for thieves and stolen property. If you cannot secure the thieves, drive them from the reservation.

You will keep your Indians on the lookout for scouting parties, and send them far enough to enable you to learn of the approach of scouts in time to call for troops, if you consider it necessary to prevent an attack.

I have requested the commanding officer of this district to hold a sufficient force in readiness to enable you to carry out these instructions, and to prevent a repetition of the Camp Grant affair.

With much respect, your obedient servant,

NATHANIEL POPE.

O. F. PIPER, Esq.,  
*Indian Agent, Cañada Alamosa, New Mexico.*

APPENDIX A b, No. 9.

OFFICE OF SUPERINTENDENT OF INDIAN AFFAIRS,  
*Santa Fé, New Mexico, August 4, 1871.*

SIR: I have the honor to transmit herewith, for your information, a copy of a letter from Hon. R. Hudson, dated Pinos Altas, New Mexico, 20th July, 1871, transmitting a series of resolutions passed by the citizens of Rio Mimbres, New Mexico, dated 19th July, 1871, regarding the depredations of the Apache Indians located at Cañada Alamosa, New Mexico; also copies of a letter from Hon. R. Hudson to Agent Piper, dated Pinos Altas, New Mexico, 18th July, 1871, and Agent Piper's reply, dated Cañada Ala-

mosa, New Mexico, 27th July, 1871, and a copy of a letter to me from Agent Piper, all upon the same subject.

I have directed Agent Piper to make every effort to recover any stolen property that may be brought to his reservation, and, if necessary, to call upon the commanding officer of the nearest military post for troops to enforce his demands for thieves and stolen property, and have also directed him to keep his Indians on the lookout for scouting parties, so that he may be advised of their approach in time to call for troops, if he considers it necessary to prevent an attack.

Therefore I have to request that at least one company of troops may be held in readiness to move at short notice to assist Agent Piper should he consider it desirable to apply for a force to prevent an attack upon the Indians of his agency, or to secure thieving Indians and recover stolen property.

With much respect, your obedient servant,

NATHANIEL POPE,  
*Superintendent of Indian Affairs.*

The COMMANDING OFFICER,  
*District of New Mexico, Santa Fé, New Mexico.*

---

APPENDIX A b, No. 10.

CAMP APACHE, ARIZONA TERRITORY, July 26, 1871.

DEAR SIR: According to promise, I drop you a few lines to let you know what is going on in the "land of the Apaches." I returned from Tucson on the 24th instant. General Crook left that place on the 11th, with five companies of cavalry, en route to Apache Pass, supposed to be after Cochise. Arizona people expect great things of him, and say that he has unfurled the black flag, and goes in for extermination or a permanent peace.

Indians about Tucson are numerous, committing many depredations which you undoubtedly have seen account of ere this.

Miguel, the chief of the Coyoteros near this place, has refused to leave his country, and has offered his services to Colonel Green to fight any of the Apaches. We all believe in him, and are satisfied that he has always acted in good faith with the whites, and will continue to do so. He and his people have a large amount of corn planted this year, and have prospects of a fine crop. There have been no rations given to Indians at this post for over two months; still, Miguel and his people are quiet, and have committed no depredations. Hawkins, who was lately shot at Prescott, has two thousand head of cattle on the Little Colorado, and at present has but two herders, and the cattle scatter for several miles, but as yet the Indians have not taken or killed any of them. Miguel says that all the Indians of his band have promised him not to go near or interfere with them in any way.

We are making preparations for a big campaign, and will fight Apaches with Apaches. Miguel and some of his people go with us. I want you, governor, to try and do something for old Miguel. I assure you that he deserves it more than any other Indian in the country, and I know, governor, that you have the influence and the power, and that you take great interest in the Indian; so turn your attention over this way and help old Miguel. If you can possibly do so, come over and see us, and have a talk and see for yourself. Colonel Green sends his regards. I gave Charley Franklin a note to you while in Tucson; I hope you will give it your attention; it will be for the benefit of the Quenas. I will send you, by next chance, a note to Vincent Colyer, in regard to what we spoke about at Wingate. I have talked to Miguel about you, and he is very anxious to see you; so come on.

I am, governor, very respectfully, yours, &c., &c.,

C. E. COOLEY.

W. F. M. ARNY, Esq.,  
*Santa Fé, New Mexico.*

---

APPENDIX A b, No. 11.

*Order to N. Pope, superintendent Indian affairs New Mexico, to forward supplies to Apache Indians on White Mountains, Arizona Territory.*

SANTA FÉ, NEW MEXICO, August 14, 1871.

SIR: You will please see that the peaceable band of the Coyotero Apaches, under their chief Miguel, at Camp Apache, Arizona, are supplied with beef, corn, and clothing, (blankets, manta, &c.) to an amount not exceeding \$2,000; and I would suggest that Agent W. F. M. Arny be directed to extend his visit from the Zuni Pueblo village to

the Apache reservations, to execute these instructions. I would have given this order to the superintendent of Indian affairs in Arizona but for the fact that this reservation is more accessible from your superintendency, and Mr. Army is going so near it on his present visit.

Very respectfully, your obedient servant,

VINCENT COLYER.

NATHANIEL POPE, Esq.,  
Superintendent Indian Affairs, New Mexico.

#### APPENDIX A b, No. 12.

[Telegram.

SANTA FÉ, NEW MEXICO, August 14, 1871.

Hon. C. DELANO,  
Secretary of the Interior, Washington, D. C. :

The roving Apaches rapidly coming in; twelve hundred now at Cañada Alamosa; five hundred at Fort Stanton, New Mexico. Cochise heard from. Runners sent out from several points to give Indians fair warning, if they want peace, must come to reservations. I leave for Alamosa this morning with Superintendent Pope. All the Utes seriously discontented. Should be promptly attended to. Navajoes quiet; have over forty thousand sheep; will be self-sustaining in few years. The schools among Pueblos well attended.

VINCENT COLYER.

#### APPENDIX A b, No. 14.

CAÑADA ALAMOSA, NEW MEXICO, August 21, 1871.

SIR: Mr. Trujillo has just got in without seeing Cochise. He says that he very unexpectedly met General Crook, who ordered him back, and refused to recognize his authority to go to Cochise's camp, and threw his letter down in disdain, saying that the superintendent of Indian affairs in New Mexico nor any of the Indian agents had any authority to send parties to Arizona; that his instructions authorized him to capture any American or Mexican that was found in his route. He also says that they attempted to arrest his Indian, but Lieutenant Ross knew Loco, and interceded for him. General Crook would not let him get his rations, which were at some distance from where he met the party. The general told them that they were lucky to get back with their lives without their rations. If you can return here, I think that this affair should be investigated further.

Yours truly,

O. F. PIPER.

NATHANIEL POPE, Esq.

I should also state that General Crook selected the route for him to return, and told him not to go by any other.

#### APPENDIX A b, No. 15.

WASHINGTON, D. C., November 7, 1871.

SIR: Reservations for the roving Apache Indians of New Mexico and Arizona were selected under your instructions of 30th July, 1871, as follows:

For the Mimbres and Coyoteros, at Tularosa Valley, in New Mexico. See accompanying paper marked A.

For the Coyoteros and Chileons, of Arizona, at Camp Apache, in White Mountains, Arizona. See paper marked B.

For the Aravapas and Pinals, at Camp Grant, Arizona Territory. See paper marked C, and accompanying map.

For the Mohave Apaches, at Camp Verde, Arizona Territory. See paper marked D. A detailed description of the Camp Apache reservation, which was established by Major General Thomas, will be found on file in the War Department.

I also requested, with the advice of General Crook, and the several post commanders, that temporary asylums, where the Tontos, Hualapais, and Western Band of Apache Mohaves might be protected and fed, should be established at Camp McDowell, Beal's Spring, and Date Creek, until such times as the Indians collected there could be removed to permanent reservations.

Very respectfully, your obedient servant,

VINCENT COLYER,  
Commissioner.

Hon. C. DELANO,  
*Secretary of the Interior, Washington, D. C.*

NOTE.—The Camp Apache or White Mountain reservation was selected and its boundaries fixed by the late Major General Thomas, United States Army, with the view of placing all the roving Apache Indians of Arizona and Western New Mexico upon it. As that scheme did not appear to me practicable at this present time, and yet might become so in a few years, I thought it best to still reserve this extensive tract, as yet wholly unsettled, until such time as the experiment contemplated by General Thomas may be attempted, should the Government ever deem it advisable to try it.

V. C.

---

A.

*Tularosa Valley, New Mexico, reservation.*

CAMP TULAROSA, NEW MEXICO,  
August 29, 1871.

SIR: Agreeably to the power conferred upon me by the President, and communicated to me in the letter of the honorable Secretary of the Interior of the 22d July, 1871, that I should proceed to New Mexico and Arizona, and there take such action as in my judgment should be deemed wisest and most proper for locating the nomadic tribes of those Territories upon suitable reservations, bringing them under the control of the proper officers of the Indian Department, &c.; assisted by yourself and O. F. Piper, agent for the Southern Apache Indians, I have carefully examined the place and neighborhood at Cañada Alamosa, where the agency is at present located, and for several reasons find the same unsuitable for a reservation. Assisted by the officers named above, I have also carefully inspected the valley of the Tularosa, and finding the same to possess most of the requisites necessary to a home for the Indians, it being remote from white settlements, surrounded by mountains not easily crossed, sufficient arable lands, good water, and plenty of wood and game, I hereby declare the said valley of the Tularosa, beginning at the head-waters of the Tularosa River and its tributaries in the mountains, and extending down the same ten miles on each side for a distance of thirty miles, to be an Indian reservation, for the sole use and occupation of the Southern and other roving bands of Apache Indians, their agent, and other officers and employés of the Government, the laws relating to Indian reservations in the United States governing the same until such time as the Executive or Congress shall approve or set aside this order. I would, therefore, suggest that Agent Piper be instructed to remove his agency and the Indians under his charge from Cañada Alamosa to the Tularosa Valley, as soon as practicable after the receipt of this letter. The War Department having directed the officers commanding the district of New Mexico and Arizona to afford military protection to such Indians as may be induced to come in, both on their way and after arrival at the reservation, the agency will be amply protected, and the Department having authorized me to supply these Indians with whatever may be necessary, you are at liberty to incur such moderate expenditure as may be absolutely necessary to carry out the above instructions.

Very respectfully, your obedient servant,

VINCENT COLYER,  
Commissioner.

NATHANIEL POPE, Esq.,  
*Superintendent of Indian Affairs.*

---

B.

*White Mountain reservation, Arizona.*

CAMP APACHE, ARIZONA TERRITORY,  
September 5, 1871.

SIR: As the White Mountain region has been set apart by the War Department as an Indian reservation, and there are several bands of peaceably disposed Apaches who

have for many years lived in this country, who cannot be removed without much suffering to themselves, risk of war, and expenses to the Government, I have concluded to select the White Mountain reservation, the boundaries of which were defined in letter of H. M. Roberts, major of engineers, dated headquarters military division of the Pacific, San Francisco, California, January 31, 1870, as one of the Indian reservations upon which the Apache Indians of Arizona may be collected, fed, clothed, and otherwise provided for and protected, agreeable to the power conferred upon me, at the suggestion of the President, by the honorable Secretary of the Interior, under date July 21, 1871, and the orders of the War Department July 18, 1871, and supplementary orders July 31, 1871, copies of which are herewith inclosed.

Agreeable to your wish that I should name the articles and amount of provisions to be issued, I would suggest that one pound of beef and one pound of corn *per capita* be issued with salt daily, and sugar and coffee occasionally.

Very respectfully, your obedient servant,

VINCENT COLYER,  
*Commissioner.*

Lieutenant Colonel JOHN GREEN,  
*First Cavalry, U. S. A., Commanding Camp Apache, Arizona Territory.*

*Detailed description of the White Mountain reservation, Arizona Territory.*

ENGINEER'S OFFICE,  
HEADQUARTERS MILITARY DIVISION OF THE PACIFIC,  
*San Francisco, California, January 31, 1870.*

SIR: I respectfully forward the following description of the proposed Indian reservation in Arizona. The boundaries of the reservation to be as follows, as shown in red on the accompanying map: Starting at the point of intersection of the boundary between New Mexico and Arizona, with the south edge of the Black Mesa, and following the southern edge of the Black Mesa to a point due north of Sombrero or Plumoso Butte, then due south to said Sombrero or Plumoso Butte, then in the direction of the Picache Colorado to the crest of the Apache Mountains, following said crest down the Salt River to Pinal Creek, and then up the Pinal Creek to the top of the Pinal Mountains, then following the crest of the Pinal range, "the Cordilleras de la Gila," the "Almagra Mountains," and other mountains bordering the north bank of the Gila River, to the New Mexican boundary near Steeple Rock, then following said boundary north to its intersection with the south edge of the Black Mesa, the starting point.

Very respectfully, your obedient servant,

H. M. ROBERT,  
*Major Engineers.*

General W. D. WHIPPLE,  
*Adjutant General Military Division of the Pacific.*

C.

*Camp Grant reservation.*

CAMP GRANT, ARIZONA TERRITORY,  
*September 18, 1871.*

SIR: The boundaries of the reservation, selected with the approval of the President and Secretary of the Interior and Secretary of War, at Camp Grant, Arizona Territory, within the limits of which all peaceably disposed Arivapa, Pinal, and other roving bands of Apache Indians are hereafter to be protected, fed, and otherwise provided for, will be as follows: Bounded north by the Gila River; west by a line ten miles from and parallel to the general course of the San Pedro River; south by a line at right angles to the western boundary, crossing the San Pedro ten miles from Camp Grant; east by a line at right angles to the southern boundary, touching the western base of Mount Turnbull, terminating at the Gila River, the northern boundary.

Citizens who have built, or are now working, ranches within the above-described boundaries, will be allowed to remain, to secure their crops and care for their property, until further orders from Washington, D. C.; provided they conform to the laws prescribed by Congress for the government of Indian reservations.

A copy of the laws and regulations governing this, as well as all other Indian reservations, will be forwarded to you on my return to Washington.

Very respectfully, your obedient servant,

VINCENT COLYER,  
*Commissioner.*

Lieutenant ROYAL E. WHITMAN, U. S. A.,  
*In charge Indian reservation, Camp Grant, Arizona Territory.*

## D.

*Camp Verde reservation.*

## CAMP VERDE, ARIZONA TERRITORY,

October 3, 1871.

GENERAL: Having personally inspected the country and the condition of the Apache Mohave Indians on the Verde River above this post, and finding the Indians to be in considerable numbers sick, destitute, and in a starving condition; having no boundaries defining their home; their country overrun by hunters who kill their game, and not unfrequently kill the Indians—gold prospectors and others, none of whom locate in this section of the country—agreeably to the powers conferred upon me by the President, and communicated to me in the letter of the Secretary of the Interior dated July 21, 1871, and the orders of the Secretary of War of July 18 and 31, 1871, and in harmony with the humane action of Congress in providing funds for this purpose, I have concluded to declare all that portion of country adjoining on the northwest side of and above the military reservation of this post, on the Verde River, for a distance of ten miles on both sides of the river to the point where the old wagon-road to New Mexico crosses the Verde, supposed to be a distance up the river of about forty-five miles, to be an Indian reservation, within the limits of which all peaceably disposed Apache Mohave Indians are to be protected, fed, and otherwise cared for, and the laws of Congress and Executive orders relating to the government of Indian reservations shall have full power and force within the boundaries of the same unless otherwise ordered by Congress or the President.

VINCENT COLYER,  
*Commissioner.*

Brevet Major General C. GROVER,  
*Commanding Camp Verde, Arizona Territory.*

## APPENDIX A b, No. 16.

*Industry of the Apaches.—Testimony of Colonel Green.*

## HEADQUARTERS CAMP THOMAS, ARIZONA TERRITORY,

December 31, 1870.

[Extract.]

SIR: I have the honor to inclose orders Nos. 66 and 67, current series, and would respectfully ask their approval by the department commander.

The Indians furnished one hundred and thirty tons of hay, at \$30 per ton, for which they were paid in flour, charging cost and transportation, 16½ cents per pound. After they delivered this amount of hay, I ordered the acting assistant quartermaster to purchase sixty additional tons, and pay them in corn; but the weather became so bad they could not furnish it at that time, and as they had nothing to eat but the beef issued, I directed the acting commissary of subsistence to purchase six thousand pounds of corn from the quartermaster's department and issue it to them. I afterward concluded it would be better to keep them employed, and therefore directed the purchase of the wood from them.

My whole aim is to keep them employed this winter if possible, as I think it will induce them to plant more next season than if they were fed for nothing; but the difficulty is, they furnish the wood so fast that in a few days we shall have enough for the winter; they bring at the rate of thirty cords per day. When they furnished hay, they brought as high as fifteen tons in one day; and it must be remembered that the former is broken off by hand or cut with worn-out axes, and the latter cut by knives, and all carried in on their backs. It is wonderful with what alacrity they go to work. It is true, nearly all is done by women and children, but a few men also work—more than at first; but this is the custom of the Indian, and cannot be eradicated at once. If the weather continues good we shall commence receiving the sixty additional tons of hay in a few days—not that the hay is of the best quality at this late season, but in order to give the Indians employment, which I believe will meet the views of the department commander, from what he said when at this post.

I am, sir, very respectfully, your obedient servant,

JOHN GREEN,  
*Major First Cavalry, Commanding Post.*

ASSISTANT ADJUTANT GENERAL,  
*Department of Arizona.*

HEADQUARTERS, CAMP GOODWIN,  
Arizona Territory, May —, 1871.

[Extract.]

SIR: There being no grain on hand here, and no hay fit for feeding, I was in considerable trouble as to how to subsist the animals of the post, until I thought the hay might be furnished by the Indians, and I at once tried the experiment, directing the acting assistant quartermaster to pay them \$1 per one hundred pounds, either in currency or quartermaster's or commissary stores, charging cost and transportation for the two latter; and it was really interesting to see with what spirit they went to work, and what nice, clean hay they brought in, much superior to any I have seen furnished by contractors in Arizona. Yesterday, upwards of four thousand pounds were brought. Even the children went to work with great alacrity; one little child, that could scarcely more than walk, brought in nine pounds, for which he received three-quarters of a pound of flour, and was highly delighted with his success. I propose to supply the new post with hay in the same way, which will be much cheaper than if done by contract.

As we have to feed these Indians more or less, I would even recommend that wood for fuel be received from them, paying, say, \$5 per cord, and thus show them that labor is valuable and brings its own reward. While the Indian will be a gainer the Government will not be a loser, as I propose to make them pay cost and transportation for what is issued to them.

I was sorry that the supply of grain at this post did not admit of my complying fully with the general's wishes in giving them corn for seed. I could ill spare a very small amount, so that their planting will not be as extensive this year as I had hoped. I am in hopes that by next year I will be able to furnish them sufficient seed, and would also respectfully recommend that the department commander urge the necessity of furnishing the ruder implements of agriculture, as at present their only means of farming are sharpened sticks, and it is wonderful to see with what advantage they use them. They frequently ask for other seed than corn, particularly pumpkins, beans, squashes, and melons. It would, probably, be well for the Indian Bureau to send an agent to look after the interests of these people.

I know the War Department is very close in regard to the issue of rations to Indians; it believes they should be fed out of the Indian appropriations; but can I see them starve before my eyes and not give them relief?

I ask them, "Why are you so poor?" and the answer invariably is, "How can we be otherwise? We had not much originally, and now we can get nothing; we do not steal. We cannot go to the mescal country, as we are liable to be met and killed by scouting parties." I know myself this to be the case, hence they have either to starve or steal, or we must feed them until they can raise enough for themselves.

I would also recommend that if they really turn out faithful they be furnished with stock cattle, which can be very cheaply purchased in Texas by the herd; also some sheep, which can be as cheaply bought in New Mexico; thus in a few years they will not only be self-sustaining, but have material for sale. Here I would state that the above propositions would of course be only an experiment, but one I think well worth trying. The Pinal Indians have sent me word that they are desirous to come in and be at peace, but they are afraid we will either confine or kill them. I suppose they are influenced by guilty consciences. I have sent them messengers to say if they want to have a talk, I will guarantee their safety and report their words to my superior officers. I expect them back in a few days, when I will report the result of their mission. I gave the messenger particularly to understand we did not care whether they came in or not, but if they did they might do so with perfect safety.

I am, sir, very respectfully,

JOHN GREEN,

*Major First Cavalry, Brevet Lieut. Colonel U. S. A., Commanding Post.*

ASSISTANT ADJUTANT GENERAL,  
*Department of California.*

HEADQUARTERS CAMP ORD, ARIZONA TERRITORY,  
August 13, 1870.

SIR: I have the honor to report that the Indian chief, Cochise, sent a message to me, saying that he wanted to make peace with the whites, and was tired of war, and that he would like to make arrangements to come and see me himself, but, as he is such an old offender, I thought it best to ask instructions from the department commander in regard to his case. All the Indians seem to think that if they come here and talk with me they are all right, notwithstanding I have been endeavoring to explain to them, at all times, that I have no authority to make any arrangement with them, except that while they were not marauding, but remained in this part of the country, they would

not be molested. I would, therefore, respectfully ask for instructions as to what course to pursue toward them. The White Mountain Indians are, as heretofore, full of their protestations of friendship, large numbers being here at all times, and I am issuing a pound and a quarter of beef daily to each adult, and to the children half, my endeavor being to keep them quiet until some definite policy is established toward them. I believe that the chiefs, Es-kel-te-say-lat, Pedro, and Miguel, and several minor chiefs, are sincere, but those further west I have considerable doubt of.

I am, sir, very respectfully, yours,

JOHN GREEN,  
*Commanding Post.*

ASSISTANT ADJUTANT GENERAL,  
*Department of Arizona, Prescott, Arizona Territory.*

#### APPENDIX A b, No. 17.

*Order of Captain Wm. Nelson forbidding armed bodies of citizens from crossing the Indian reservation.*

[Special Orders No. 76.—Extract.]

HEADQUARTERS CAMP GRANT, ARIZONA TERRITORY,  
*September 13, 1871.*

II. The vicinity of this post having been selected as an Indian reservation, and its limits not yet having been fixed, no armed body of citizens will be permitted to come within ten (10) miles of this post.

WM. NELSON,  
*Captain Twenty-first Infantry, Commanding Post.*

#### APPENDIX A b, No. 18.

HEADQUARTERS CAMP GRANT, ARIZONA TERRITORY,  
*September 15, 1871.*

SIR: I have the honor to report that under telegraphic instructions from the Secretary of War, transmitted through headquarters department of Arizona, I proceeded to collect in the friendly disposed Indians, and in a few days three bands were represented at this reservation by over one hundred Indians, about which time two Mexicans came to this post from Tucson and reported that an expedition was being gotten up there for the purpose of attacking the Indians collected here.

I immediately communicated with the commanding officer at Camp Lowell in reference to the matter, and requested his assistance to prevent such an attempt. He ordered Captain Dunn, Twenty-first Infantry, to this post, to consult with me on the subject. On his arrival here, Captain Dunn informed me that a large party, composed of citizens of Tucson, Mexicans, and Indians, would leave Tucson the day after he left, and that the party intended passing through this reservation on a prospecting tour. The next day Mr. Vincent Colyer arrived at the post, and I informed him of the state of affairs, he showing me his authority—copies of which have been forwarded to you—requested me, if possible, to prevent the expedition from Tucson from crossing the reservation, and authorized me to proclaim a reservation of ten miles from the post in either direction, until the limit of the reservation could be defined. Some of the leading men of the expedition from Tucson arrived at the post the evening of the day upon which Mr. Colyer arrived. I saw and informed them that under the circumstances it was my opinion the presence of such a party from Tucson at the particular time would be antagonistic to, and probably defeat, Mr. Colyer's mission, and requested that they pass around the reservation. I was informed that my request would not be complied with, and that the party, some two hundred strong, would reach the post about daylight the following morning, and would cross the reservation.

I immediately issued an order forbidding armed parties of citizens approaching within ten miles of the post, and sent a courier with a copy out to meet the party, with instructions to report the result without delay. The courier returned about 3 o'clock in the morning, reported having found the party encamped twelve miles out, and that they informed him that they would cross the reservation.

I then sent Lieutenant Whitman, Third Cavalry, out to inform them that I was prepared to enforce my orders, and had my guns in position, and would open fire upon them on the approach at the mouth of the cañon opposite the post. At the same time sent out my water-wagon loaded, so they should not suffer in case they concluded to go back, which they very reluctantly decided to do. I would respectfully state, in connection, I do not think the present strength of garrison sufficient to insure this reservation against attacks similar to the one made here some months since.

Very respectfully, your obedient servant,

WM. NELSON,

*Captain Twenty-first Infantry, Commanding.*

ASSISTANT ADJUTANT GENERAL,

*Department of Arizona, Prescott, Arizona Territory.*

#### APPENDIX A b, No. 19.

*Dr. Wilbur on returning the Apache children stolen at the Camp Grant massacre.*

TUCSON, ARIZONA TERRITORY,

*October 25, 1871.*

LIEUTENANT: At the suggestion of Hon. Vincent Colyer, I proceeded on my return from Camp Grant, to place on foot an investigation for the purpose of ascertaining the whereabouts of as many as possible of the captives taken at the massacre of Apache Indians near your post on the 30th of April last.

In my report to the department for the quarter ending September 30, 1871, transmitted through Superintendent H. Bendell, Arizona City, I stated that I had discovered the residence of five of these captives, had made application to have them turned over to me to be returned to their proper homes and families, and been refused; and that I should immediately take legal measures to obtain possession.

Since then I have been informed by the United States district attorney that you are the proper person to proceed in this matter. That these Indians having been under your control, you are the proper officer to make application for writ of habeas corpus and take possession of these children as your wards. I therefore hasten to give you all the information in my possession up to the present time. There are eight of the captives now in possession of parties residing in and near Tucson, as follows: At the "Mission of San Xavier Del Bue," nine miles from Tucson, Jesus Mendosa has one girl ten years old, shot through arm and slightly wounded in side. Nicolas Martinez has one captive; José Lucas has one captive. In Tucson, Arizona Territory, the following: Leopoldo Corilo has one captive; Manuel Martinez has one captive; Francisco Romero has two captives. I am also informed that Manuel Duran, Apache guide, sold one captive, a girl aged six years. I will try and ascertain where this child is, and inform you at once. Should you desire, I shall take great pleasure in furnishing you with the necessary form of procedure and any other assistance in my power.

I would suggest that immediate action be taken in this matter, as the indictment for murder found by the late United States grand jury against a portion of their citizens has brought the people of this to such a pitch of excitement that any unnecessary delay would result in the disappearance of all trace of the identity of these captives, if not in their death.

Very respectfully, your obedient servant,

R. A. WILBUR,

*United States Special Agent for Papago Indians.*

Lieutenant ROYAL E. WHITMAN, U. S. A.,

*In charge of Apache Indians, Camp Grant, Arizona Territory.*

#### APPENDIX A b, No. 20.

*Proclamation by the governor.*

Whereas I am informed, as I am departing for the Pinal Mountains with a large force for the purpose of exploring the agricultural and mineral resources of that region, that a commission has been ordered by the President of the United States to examine into the Indian affairs of the Territory, with the view, if possible, of securing a peaceful solution of the question, and my absence may continue until after the arrival of said commission; and whereas the object most desired by the people of this

Territory is the cessation of Indian hostilities, and the means that will most speedily accomplish this result will be hailed with joy by every inhabitant;

Now, therefore, I, A. P. K. Safford, governor of Arizona, call upon all the officers and citizens of the Territory to receive said commissioners with kindness and hospitality; to give them all the aid and information upon the subject before referred to within your power and knowledge. They have been selected with a view to their integrity and humanity of purpose, and sent here in the legal performance of duty.

If they come among you entertaining erroneous opinions upon the Indian question and the condition of affairs in the Territory, then by kindly treatment and fair, truthful representation you will be enabled to convince them of their errors.

Given under my hand and the great seal of the Territory this 15th day of August, A. D. 1871.

[SEAL.]

A. P. K. SAFFORD.

By order of the governor:

THEO. F. WHITE,

*Assistant Secretary of the Territory.*

# APPENDIX A b, No. 21.

*Flag of truce sent out to Tonto Apaches at Camp Reno, by General N. A. M. Dudley.*

CAMP McDOWELL, September 27, 1871.

SIR: I have the honor to report the result of my mission under the following special order:

"[Special orders No. 148.]

"HEADQUARTERS CAMP McDOWELL,  
"Arizona Territory, September 25, 1871.

"Hon. Vincent Colyer, special commissioner to the Apache Indians in this Territory, acting under the authority of the President of the United States, having requested that a party be sent out from this post with a flag of truce, with a view of inducing some of the Indians to come into McDowell for the purpose of a council, Captain Curtis, with twenty men of I Troop, and a detachment of one first lieutenant, one sergeant, and one corporal, and ten men of M Troop, will proceed in the direction of Old Camp Reno, accompanied by Salaza, the post guide, and Francisco, Apache interpreter, belonging to Captain McGregor's command, and by attracting the attention of Indians in that vicinity endeavor to induce as many of them as possible to come in and visit Mr. Colyer; the latter will inform Captain Curtis what propositions to make these Indians if reached.

"The party will be provided with two day's rations, and get off immediately.

"By command of Major N. A. M. Dudley:

"A. D. KING,

"First Lieutenant Third Cavalry, Post Adjutant."

Lieutenant A. D. KING,

*Post Adjutant, Camp McDowell, Arizona Territory.*

In obedience to the above I left the post on September 25th, at 1 p. m. My party consisted of Lieutenant Wessell, Third Cavalry; Acting Assistant Surgeon V. Havard, United States Army; Captain W. M. C. Netterville, Twenty-first Infantry, as a volunteer; one sergeant, one corporal, and eight men from M Troop, Third Cavalry, and one corporal and nineteen men from I Troop, Third Cavalry, my own, all mounted. In addition there were two packers, four pack-mules, and two guides, Francisco and Hadjeille, making in all thirty-eight persons and forty-two animals. About an hour and a half after crossing the river I saw signal smokes in the mountains about twenty miles ahead of me, and near the road I was to follow. They were kept up all day on the same range. I made signal in return, and continued on, reaching Sunflower Valley at about 1 a. m. There were no signal fires on the mountains that night. The next morning I built fires at daylight, and displayed the white flag, but there was no response; I waited until about 9 a. m. of the 26th, and started on, leaving a white flag in my deserted camp. I reached old Camp Reno, forty miles from the post, at about 12 a. m. Fresh trails were seen at various places along the road, though not in any large number, generally two or three at a time; one trail, a day or two old, within a mile of the post. The greater part, however, were seen after we left Sycamore Creek, ten miles from the post. Before I had fairly unsaddled at Reno, a signal smoke was made in the side of the mountain close to camp, apparently not more than a mile and a half away. I

answered it at once. It was kept up until about 2 p. m., when it died away. Thinking that it might be a small party who were afraid to come in, I sent Lieutenant Wessels, Francisco, and six men up the side of the mountain. They went well up to where the fire had been, but could elicit no response to their speech. The command was put en route back to Sunflower Valley, at 4 p. m., and reached there at 7.30 p. m., remaining for the night. In going from Sunflower Valley to Reno, fresh signal smoke was made at the same place where we had observed it when leaving the post. On reaching Sunflower Valley, it was found that the flag which I had left in the morning was missing. The end of the staff had been broken off and the remainder pointed towards Camp McDowell, stone being piled around it to keep it in place. Nothing transpired during the night. I am confident that the whole object of the mission was fully made known, and it is my impression that the parties observing our movements left for the purpose of consulting their chief. I am strengthened in this belief from the fact that they did not, as is usual with them, use any defiant language or fire any shots. Had my rations permitted, I should have remained at Reno long enough to allow them to communicate; as it is, I think that a day or two will bring some of them into the post; if not, they do not intend to come at all. Nothing worthy of notice occurred further. I left Sunflower Valley at 7 a. m., and reached this post at 3 p. m.

I am, sir, very respectfully,

JAMES CURTIS,  
*Captain Third Cavalry, Commanding Troop I.*

---

APPENDIX A b, No. 22.

*Camp McDowell as a temporary asylum for feeding Apaches.*

CAMP McDOWELL, ARIZONA TERRITORY,  
September 25, 1871.

GENERAL: In the event that some of the Apache Indians should be induced to come in at McDowell to be at peace, you are requested and authorized to protect, feed, and otherwise care for them, under the authority of the orders of the War Department, by direction of the President, dated Washington, D. C., July 18 and 31, 1871, (copies of which were forwarded to you on the 25th instant,) until such times as there may be a sufficient number to be forwarded to the reservation at Camp Grant, or to another reservation, which it may be found desirable to establish for the Tontos, at a place to be hereafter designated. Meanwhile you will please consider the limits of this military reservation as an Indian reservation, and you are also authorized to purchase clothing, manta, calico, &c., to an amount not exceeding four hundred dollars.

Very respectfully, your obedient servant.

VINCENT COLYER,  
*Commissioner.*

GENERAL N. M. DUDLEY,  
*Commanding Post.*

---

APPENDIX A b, No. 23.

*Requesting Captatn McGregor to open communications with the Tonto Apaches.*

IN THE FIELD, NEAR CAMP McDOWELL,  
Arizona Territory, September 27, 1871.

CAPTAIN: General Dudley's party, interpreter, and escort having failed to open direct communications with the Apache Indians near Camp Reno, though receiving many encouraging signs of a peaceable disposition on the part of the Indians, and the soldiers and animals belonging to General Dudley's command requiring rest, will you have the kindness to send an interpreter with a white flag, and such escort as you may think necessary, starting within the next two days to the Apache Indians living in the direction of Superstition Mountain, in a southeasterly direction from this post, with a view to bringing them in and placing them on a reservation where they can be protected, fed, and otherwise cared for?

For your authority, I respectfully refer you to the inclosed copies of orders from the War Department, dated July 18 and 31, 1871.

Very respectfully, your obedient servant,

VINCENT COLYER,  
*Commissioner.*

Captain THOMAS MCGREGOR, U. S. A.,  
*Commanding Detachment Troops.*

## APPENDIX A b, No. 23½.

*General Crook censuring Captain Nelson for defending Camp Grant Indian reservation.*

HEADQUARTERS, DEPARTMENT OF ARIZONA,  
Prescott, Arizona Territory, September 22, 1871.

SIR: Referring to your communication of the 15th instant, and to Post Orders No. 70, Part II, Camp Grant, Arizona Territory, September 13, 1871, in which you report having prohibited armed bodies of citizens from approaching within ten miles of your post, I have to state that this would virtually prohibit the passage of any citizens over the public mail road from Tucson to Florence, which passes within four miles of your post. As all citizens in this Territory, in order to secure protection, must go armed, while it is your duty to give every assistance in your power to the peace commissioner, and protection to the Indians who may come peaceably disposed to your post, you must not forget the duties you owe to the citizens of this Government. Your action in this matter was unwarrantable, as you transcended the limits of your authority, and in future you will be governed by the proper military authorities and the customs of service in like cases, nor will you unnecessarily provoke the hostilities of the citizens toward the military and the Indians under their protection.

Very respectfully, your obedient servant,

GEORGE CROOK,

*Lieut. Col. Twenty-third Infantry, Brevet Major General U. S. A., Commanding.*

Captain WILLIAM NELSON,

*Twenty-first Infantry, Camp Grant, Arizona Territory.*

## APPENDIX A b, No. 24.

*Providing temporary reservation for the Hualapais at Beal Spring, A. T.*

CAMP WHIPPLE, ARIZONA TERRITORY,  
October 5, 1871.

GENERAL: As there are a number of Hualapais Indians reported to be in a destitute condition in the neighborhood of Beal Spring Camp, Arizona Territory, who have lately been peaceable, will you have the kindness to see that they are fed, protected, and otherwise cared for, agreeably to the orders of the War Department, dated Washington, D. C., July 18 and 31, 1871? The reservation within which the above order will apply shall be temporary, and extend for the distance of one mile around the camp, until such time as a more permanent reservation can be selected.

Very respectfully, your obedient servant,

VINCENT COLYER,  
Commissioner.

Brevet Major General GEORGE CROOK,  
Commanding Department of Arizona,  
Camp Whipple, Prescott, Arizona Territory.

## APPENDIX A b, No. 25.

*Report to General Schofield, U. S. A., and arranging for supply of blankets.*

OFFICE OF THE HEADQUARTERS, DIVISION OF THE PACIFIC,  
San Francisco, California, October 19, 1871.

GENERAL: Under the orders of the President, dated War Department, Washington, D. C., July 18, and supplementary order, July 31, 1871, copies of which have been forwarded to you, I have collected together several thousands of the roving Apache Indians on reservations which I have selected in Arizona Territory, and requested the commanding officers at the military posts around which these reservations are located to feed, partially clothe, protect, and otherwise care for them, leaving the whole business under their supervision, until such time as the Department at Washington may otherwise order.

The reservations are located as follows: At Camp Apache, for the Cayotero; at Camp Grant, for the Aravapas and Pinals; at Camp McDowell, for the Tontos; at

Camp Verde and Date Creek, for Apache Mohaves; Beal Spring, for Hualapais; and the boundaries have been carefully defined and left with commanding officers at the several posts designated. Provision has been made for all they immediately require, except a supply of blankets. As I understand there is a liberal supply of these, of the old style used in the Army, and the officers inform me that they would much prefer the new article, manufactured on the Pacific slope, for the use of the troops under their command, I would respectfully request that about two thousand be distributed for the immediate use of these Indians, in quantities, at the several posts, about as follows: At Camp Grant reservation, 300 blankets; at Camp Verde reservation, 250 blankets; at Camp McDowell reservation, 250 blankets; at Camp Date Creek reservation, 300 blankets; at Camp Beal Spring reservation, 400 blankets; leaving a margin of 500 to be distributed as the commanding general of the department of Arizona may direct. As the season is late, the winter already upon us, may I suggest that the order be telegraphed to San Diego, thence by mail to several depots, it being understood that the payment for the above is to be made by the Indian Department.

Very respectfully, your obedient servant,

VINCENT COLYER,  
*Commissioner.*

General J. M. SCHOFIELD, U. S. A.,  
*Commanding Division of the Pacific.*

#### APPENDIX A b, No. 26.

*Recommendations of Secretary of Interior approving reservations selected by Commissioner Colyer in New Mexico and Arizona.*

DEPARTMENT OF THE INTERIOR,  
*Washington, D. C., November 7, 1871.*

SIR: I have the honor to transmit herewith copy of a communication addressed to this Department by the Hon. Vincent Colyer, one of the board of Indian peace commissioners, who recently visited Arizona, wherein he states his views in relation to the Apache Indians, and describes certain tracts of country in Arizona and New Mexico, which, during his recent visit to said Indians, he has selected to be set apart as reservations for their use, as authorized to do by orders issued to him before visiting the Apaches.

I have the honor to recommend, in pursuance of the understanding arrived at in our conversation with the Secretary of War on the 6th instant, that the President issue an order authorizing said tracts of country described in Mr. Colyer's letter to be regarded as reservations for the settlement of Indians until it is otherwise ordered.

I have the honor, also, to suggest that the proper officers of the War Department be directed to inform the various bands of roving Apaches that they are required to locate upon the reservations immediately, and that, upon so doing, they will be fully protected and provided for by the Government so long as they remain on said reservations and preserve peaceable relations with the Government, each other, and the white people; and that unless they comply with this request they will not thus be provided for and protected.

I suggest that they also be notified that they will not be permitted to send their old men, women, and children upon such reservations, and permit their young men and braves to go upon the war-path.

I beg, also, to request that the proper officers of the War Department be instructed to notify the white people of Arizona and New Mexico of this determination of the Government to preserve, if possible, peace between the whites and the Indians, and that neither will be allowed to depredate or trespass upon the other, with impunity; and that so long and so far, as the Indians comply with these requirements of the Government, and settle upon these reservations before indicated, and conduct themselves peaceably thereafter, they will be protected by the Government to the full extent of its power, and no longer.

I beg also to inform you that it is the intention of this Department to communicate a copy of this letter to the superintendents of Indian affairs for Arizona and New Mexico, and to direct the superintendent of Indian affairs for Arizona to remove his headquarters immediately to the headquarters of the commanding officer of the department of Arizona, and to request him to co-operate fully with the officer in charge of the troops in Arizona, in the execution of the purpose of the Government, as indicated in this request, provided the views herein expressed shall have the approbation of the President and the War Department.

I would further suggest that the War Department will, for the present, select some suitable and discreet officer of the Army to act as Indian agent for any of the reser-

vations in Arizona which may be occupied by the Indians, under the orders herein contemplated.

Such agents will be superseded by persons hereafter appointed by this Department, at such times as the President may hereafter deem proper.

Very respectfully, your obedient servant,

C. DELANO, *Secretary.*

The PRESIDENT.

These recommendations were approved by the President as follows:

EXECUTIVE MANSION,  
*Washington, D. C., November 9, 1871.*

Respectfully referred to the Secretary of War, who will take such action as may be necessary to carry out the recommendations of the Secretary of the Interior.

U. S. GRANT.

And indorsed by General Sherman thus:

HEADQUARTERS ARMY OF THE UNITED STATES,  
*Washington, D. C., November 9, 1871.*

GENERAL: I now inclose you copies of a correspondence between the Secretary of the Interior and War Department on the subject of the policy that is to prevail in Arizona with the Apache Indians. The Secretary of War wishes you to give all the necessary orders to carry into full effect this policy, which is the same that prevails in the Indian country generally, viz: to fix and determine (usually with the assent expressed or implied of the Indians concerned) the reservations within which they may live and be protected by all branches of the Executive Government; but if they wander outside they at once become objects of suspicion liable to be attacked by the troops as hostile. The three reservations referred to in these papers, and more particularly defined in the accompanying map, seem far enough removed from the white settlements to avoid the dangers of collision of interest. At all events, these Indians must have a chance to escape war, and the most natural way is to assign them homes and to compel them to remain thereon. While they remain on such reservations there is an implied condition that they should not be permitted to starve, and our experience is that the Indian Bureau is rarely supplied with the necessary money to provide food, in which event you may authorize the Commissary Department to provide for them, being careful to confine issues only to those acting in good faith and only for absolute wants.

The commanding officer of the nearest military post will be the proper person to act as the Indian agent until the regular agents come provided with the necessary authority and funds to relieve them; but you may yourself, or allow General Crook to appoint these temporary agents regardless of rank.

The citizens of Arizona should be publicly informed of these events, and that the military have the command of the President to protect these Indians on their reservations, and that under no pretense must they invade them, except under the leadership of the commanding officer having charge of them.

The boundaries of these reservations should also be clearly defined, and any changes in them suggested by experience should be reported, to the end that they may be modified or changed by the highest authority.

After general notice to Indians and whites of this policy, General Crook may feel assured that whatever measures of severity he may adopt to reduce those Apaches to a peaceful and subordinate condition, will be approved by the War Department and the President.

I am, your obedient servant,

W. T. SHERMAN, *General.*

General J. M. SCHOFIELD,  
*Commanding Military Division Pacific.*

#### APPENDIX A b, No. 27.

#### ORDERS OF LIEUT. GENERAL SHERIDAN.

The following order issued by General Sheridan relative to the Apache Indians under his jurisdiction:

[General Orders No. 8.]

HEADQUARTERS MILITARY DIVISION OF THE MISSOURI,  
*Chicago, Ill., November 20, 1871.*

To carry out the wishes of the Secretary of the Interior and instructions of the Secretary of War, relating to southern and other roving bands of Apache Indians, the following is ordered:

1. The valley of Tularosa, in New Mexico, beginning at the head-waters of this river and its tributaries in the mountain, and extending down the Tularosa ten miles each side for a distance of thirty miles, is declared and hereby announced to be an Indian reservation, for the sole use of the southern and other roving bands of Apache Indians, now in, or who may hereafter come into New Mexico, their agents and other officers, and such officers and employes of the military service as may be designated by competent military authority.

2. The Indians at the Canada Alamosa agency, and all roving Apaches now in New Mexico, are hereby commanded to go immediately to the Tularosa reservation, remain there, and preserve peaceable relations with the Government, the white people, and with each other. They are notified that they will not be permitted to place their old men, women, and children on the reservation, and send their young men and braves on the war-path. As long as the Indians remain on the reservation, and conduct themselves peaceably, they will be fully protected and provided for by the Government; if they fail to go upon the reservation in due time after having been informed of this order, or leave it after having once gone there, they will become objects of suspicion—liable to attack as hostile. The terms and conditions of this order will be applied to all Apaches who may hereafter go into New Mexico.

3. All concerned are hereby notified that the Government is determined, if possible, to preserve peace between the whites and Indians, and to allow neither to depredate or trespass on the other, and it is the command of the President that the Indians be protected on their reservation, and that under no pretense shall their reservation be trespassed upon, nor shall it be invaded except under the leadership of the commanding officer having charge of them.

4. The troops will co-operate with and aid the Indian Bureau to the full extent of their ability in transferring Indians to the Tularosa reservation. A military post will be established there as soon as practicable, and full protection given to the Indians who remain peaceably on the reservation. If from want of supplies the Indian Bureau shall at any time be unable to provide for the Indians on the reservation, such issues will be made from the army supplies as may be necessary for the support of all the Indians who act in good faith.

5. The commanding general Department of the Missouri is charged with executing this order, and with issuing such further instructions as may be necessary to accomplish the purposes indicated. He will have the various bands of roving Apaches in New Mexico, or who may hereafter come there, informed as soon as practicable of the requirements herein set forth, and at the earliest convenient season will fix more specifically the boundaries of their reservation.

6. After general notice to Indians and whites of the policy above defined, the department commander may feel assured that whatever measures of severity he may adopt to reduce these Apaches to a peaceful and subordinate condition will be approved by the War Department and by the President.

---

#### ORDERS OF MAJOR GENERAL SCHOFIELD.

MILITARY DIVISION OF THE PACIFIC, Maj. Gen. J. M. Schofield, commanding.—In accordance with authority and orders received from the War Department, the following instructions are given for the government of Indians subject to military control in the Territory of Arizona:

All roving bands of Indians, for which reservations have been set apart by the Indian commission, under the authority of the President of the United States, will be required to go at once upon their reservations, and not to leave them again upon any pretext whatever. So long as they remain upon their reservations in due subordination to the Government, they will be fully protected and provided for; otherwise they will be regarded as hostile, and punished accordingly. The reservations heretofore set apart will be publicly declared in general orders from headquarters from the Department of Arizona, and an officer of the Army will be designated by the department commander to act as Indian agent for each reservation.

All male Indians (old enough to go upon the war-path) will be enrolled, and their names will be recorded in a book kept for that purpose, with a full and accurate descriptive list of each person. Each Indian will be furnished with a copy of his descriptive list, and will be required to carry it always with him. The numbers of women and children belonging to each head of family will also be recorded opposite his name in the descriptive book. The presence on the reservation of every male adult will be verified once a day, or oftener, if found necessary, to prevent the possibility of any leaving the reservation and returning without the knowledge of the officer in charge. Care will be taken to inform the Indians that this precaution is intended to insure the protection of the innocent and punishment of the guilty, and that it is to

their interest to assist in the detection of guilty individuals, so that the whole tribe may not suffer for the crimes of a few. And as far as possible the Indians will be held responsible only for their own individual acts. Punishment will not be inflicted upon a tribe for the acts of individuals, unless they are guilty of complicity with the criminals by harboring them or otherwise. But when any enrolled Indian is found absent from his reservation without permission, all his family will be arrested and kept in close custody until he has been captured and punished according to his deserts.

Every Indian found off his reservation without permission, after a time to be fixed by the department commander, will be regarded and treated as hostile, and any Indian who shall so leave his reservation shall be presumed to have done so for hostile purposes, and upon his return to the reservation shall be arrested and punished accordingly. No Indian will be given permission to leave his reservation, except upon such conditions as the department commander may prescribe.

No persons except those in the United States service will be allowed upon any Indian reservation without the permission of the officer in charge. Citizens desiring to enter or cross a reservation for any legitimate purpose will, when it is deemed practicable and proper, be permitted to do so, but will always be escorted by a sufficient detachment of troops to prevent any collision with the Indians. The ration for issue to adult Indians will consist of one pound of meat and one pound of breadstuffs; two quarts of salt to each 100 rations, and four pounds of soap to 100 rations once a week. Rations in half of the above proportions will be issued to children under twelve years of age. Beef will be issued on the hoof. An officer will always be present to witness and direct the slaughtering of beef and the distribution of food among the separate bands and families, and will certify to the commanding officer that it is fairly done. The utmost care will be taken to see that rations are issued only for the number of Indians actually present, and that no opportunity is afforded for the barter of provisions for arms, ammunition, whisky, or anything whatever. Active operations will be kept up against the hostile Apaches of Arizona, and pressed with all practicable vigor until they submit to the authority of the Government, cease from hostilities and remain upon their reservation. After a reasonable time has been given for all the Apaches to avail themselves of the liberal terms offered by the Government, the department commander will, in his discretion, make use of the friendly Indians to hunt out and destroy those who remain obstinately hostile. Full authority is conferred upon the department commander to adopt such measures as may be necessary to carry out these instructions, and to give full effect to the policy of the Government.

By order of Maj. Gen. Schofield.

J. C. KELTON,  
*Assistant Adjutant General.*

#### APPENDIX A c.

#### REPORT ON UMATILLA RESERVATION.

REPORT OF A VISIT TO UMATILLA RESERVATION IN OREGON, WITH MINUTES OF A COUNCIL HELD WITH THEIR CHIEFS IN HIS PRESENCE, BY COMMISSIONER FELIX R. BRUNOT.

##### *To the Board of Indian Commissioners:*

GENTLEMEN: In compliance with the request of a letter from the Secretary of the Interior that some member or members of the board of Indian commissioners should be present at a council to be held with the Indians on the Umatilla reservation in Oregon under the joint resolution of Congress of July, 1870, providing for the appointment of three commissioners to negotiate with said Indians, to ascertain upon what terms they would be willing to sell their lands and remove elsewhere, I have the honor to report, that, leaving Umatilla Landing on the Columbia River, at 1 o'clock a. m., on the 7th August, the day named for the council, accompanied by T. K. Cree, esq., secretary, I arrived at the reservation, forty miles distant, at 10.

Hon. A. B. Mescham, A. Conoyer, and J. G. White, the three commissioners appointed to conduct the negotiation, organized the council at 2 p. m., and after arranging necessary preliminaries adjourned until the morning of the 8th.

The council was continued from day to day until the afternoon of the 12th, when it was finally adjourned. The proceedings were conducted by the commission in accordance with the letter of instruction from your department, and the spirit of the resolution of Congress. They fairly and fully presented to the Indians the grounds upon which their removal was deemed expedient, suggested other districts of country which might be secured to them, should they consent to remove; and made a proposition, deemed to be the most favorable, likely to meet with Government approval. Ample time was given to the business, so that the conclusions reached should be deliberate and final. The Indians evinced a full and perfect understanding of the subject; and with entire una-

nimity expressed their determination not to sell their lands at any price, or to consent, upon any terms, to leave the reservation, which the Government had by the treaty marked out for their occupation.

HOWLISH-WAM-PO, the Cayuse chief, a Catholic Indian, in dress, personal appearance, and bearing, superior to the average American farmer, said: "You talked with a good heart when you told me that you believed in God. I thought that was good; that is my heart too, while I stand upon this ground." And after enumerating the promises of Governor Stevens and the treaty unfulfilled, he said in regard to the proposition of the commissioners:

"What you have spoken this people have heard; all understand what you have said. You came here to ascertain what is our mind. This reservation is marked out for us. We see it with our eyes, and our hearts, we all hold it with our bodies and with our souls. Right out here are my father and mother, and brothers and sisters, and children, all buried; I am guarding their graves. My friend, this reservation, this small piece of land, we look upon it as our mother, as if she were raising us. You come to ask me for my land. It is like as if we, who are Indians, were to be sent away and get lost. I look upon all sides. On the outside of the reservation I see your houses, they have windows, they are good. You are bringing up your children well. What is the reason you white men who live near the reservation-like my land and want to get it. You must not think so. My friends, you must not talk too strong about getting my land. I like my land, and will not let it go. You have been asking my heart about the reservation. This is my heart."

HOM-LI (chief of the Walla-Wallas) said: We have looked upon you for six days with our hearts. The heart is as it were difficult to arrange, and I have tried all the reservation in my heart, and it cannot be loosened. It is dear as our bodies to us. My friends, you see your children growing outside the reservation. They are growing well, and I think they ought to grow out there, just where they are. My cattle and stock are running on this reservation, and they need it all. Some good white men look at us, and see our land, and they say this is right; they need that country for their stock. I see it is not the white man who has helped me; I have made all the improvement on my own land myself. I speak to you, my friends, with a good heart; with love. I hope the President, though he is a long way off, will look at my heart just as if I had laid it open to him. You, my friend, (to Mr. Brunot,) see my face; you see how I have been speaking; I want you to present my heart to the President.

WENAP-SNOOT (chief of the Umatillas) said: Our red people were brought up here and some one had to teach them as they grew. Those who were taught grew up well; I believe the man who understands and follows the way he is taught grows up well. I learned from the way in which I was brought up, and am going to have my children taught more and they will grow up better than I am. When my father and mother died, I was left here. They gave me rules, and gave me their land to live upon. They left me to take care of them after they were buried. I was to watch over their graves. I do not wish to part with my land. I have felt tired working on my land, so tired that the sweat dropped off me on the ground. Where is all that Governor Stevens and General Palmer said? I am very fond of this land that is marked out for me, and the rest of the Indians have no more room for their stock than they need, and I do not know where I'd put them if I had to confine myself to a small piece of ground; should I take only a small piece of ground, and a white man sit down beside me, I fear there would be trouble all the time.

PIERRE, one of the younger chiefs, said: I am going to make a short speech. I have only one heart, one tongue, although you say, "Go to another country." My heart is not that way. I do not wish for any money for my land; I am here, and here is where I am going to be. I think all these young men's hearts are like mine; I think a great deal, and have but little to say. What I have said will go on paper to Washington. There they will think over what we Indians have said; this is all I have to say. I will not part with lands, and if you come again, I will say the same thing, I will not part with my lands.

WAL-CHE-TE-MA-NE, said: Listen to me, you white chiefs, you are my friends, and you (to Rev. Father Vermeerch) are the one who straightens out my heart. My father and mother and children have died; I am getting old now, and I want to die where my father and mother and children have died; I do not wish to leave this land and go off to some other land. I see the church there, I am glad to see it, and I think I will stay beside it, and die by the teachings of the Father. I see where I have sweat and worked in trying to get food. I see the flour-mill the Government has promised, I see my friends. I like all that I have and I cannot go away from here. What the whites have tried to show me, I have tried to learn. It is not much, but I have fenced in a small piece of land and try to raise grain on it. I am showing you my heart. The President will see the record, and know what we poor men have said in this council. I love my church, my mills, my farm, the graves of my parents and children. I do not wish to leave my land, that is all my heart and I show it to you.

All the Indians who spoke expressed the same views both in regard to removal and

any reduction of their reservation. There is reason to believe they represent the minds of every individual of the tribes, who is now, or has been, on the reservation.

At the close of the council, I made some remarks to the Indians, and to the whites who were there, in which I assumed that the question of removing the Indians from the Umatilla reservation was now finally settled. That the Government would protect them in their right, and advising the whites to give up all expectation of ever getting the Umatilla lands. A record in detail of the proceedings of the council and the speeches of the commissioners and the Indians, kept by Mr. Cree, is submitted herewith.

The Umatilla reservation contains probably 20,000 acres of land well adapted for cultivation, the remainder, and largest part of the reservation, being mountainous or hilly, but well timbered and watered, and with abundance of grass. It was set apart by a treaty in 1856, which was ratified by the Senate and proclaimed by the President in 1859 for the Cayuse, Walla-Walla, and Umatilla tribes of Indians, who were there confederated; and who agreed to relinquish their title to all the land owned and occupied by them, except so much of it as was embraced within the boundaries of the reservation.

For the lands ceded to the United States, which included the Walla-Walla Valley, now so celebrated for its beauty and fertility, they were to receive the following sums of money and other benefits, viz: "For the first five years \$3,000 per annum; the second five years, \$6,000; the third, \$4,000, and the fourth term of five years \$2,000 per annum. The money to be expended by the President to advance them in civilization, by buildings, opening farms, buying wagons, agricultural implements, &c. In addition to this the Government agreed to build a saw and grist mill, a hospital, two school-houses, a blacksmith's shop, carpenter's shop, and wagon-maker's shop, and a dwelling for each of the men employed in them; also a dwelling each for two millers, one farmer, one superintendent of farming, and two school-teachers, and to pay and subsist for twenty years one superintendent of farming, one blacksmith, one carpenter, and two school-teachers, also to pay the head chief of each tribe \$500 per annum, and build each a house and fence, and break for him ten acres of land. Fifty thousand dollars were appropriated for the erection of buildings, opening and fencing farms, buying teams and implements the first year.

Special appropriations were made for the erection of the flouring-mill, and \$40,000, I am informed, from time to time for the erection of a saw-mill. Ten thousand dollars was appropriated to make a new road and close up the old one through the reservation. And in addition to these special sums, it is presumed that the stipulated annual appropriations have been made for payment of annuity and pay of the promised employes.

What I find upon the reservation to show for these expenditures is summed up as follows: From 800 to 1,000 acres of land under cultivation by the Indians, about 2,500 under fences, and a miserably inadequate supply of worn-out agricultural implements. A group of eight or ten dilapidated shanties, used for the agency buildings, originally erected to serve a temporary purpose with green cotton-wood poles and logs, and now unfit for habitation. A good grist-mill, seven miles distant, erected from special appropriations at a cost largely in excess of its value. A saw-mill, comparatively useless, owing to its distance from timber and the annual destruction of its injudiciously located dam. I see no evidence that it has ever made any lumber except that of which the small church is built. It cost \$40,000, and a better one could be built in a proper location for \$5,000. The \$10,000 has been expended for the road; nevertheless, the old road has never been closed, as agreed to be done, and is the one in common use.

The houses for the chiefs are thus correctly described by one of them: "I see a house that was supposed to have been built for me. It is about five feet high, made of round cotton-wood logs. It is all rotten and falling down. Wenap-snoot's house, is down below. It is as if it had been made for a pig-stye. Hom-li's house is up the river, and looks like a house for pigs. They are the only houses built. I see my real house over there is made of mats; that is the one the chief lives in, but he was promised a good house with glass windows and doors."—(Howlish-Wampo's speech, page 524, council.)

There seems to have been no attempt made to establish a school for some years after the treaty, although two schools were promised. In 1866, Rev. A. Vermeersh was appointed, and has since that time been employed as principal teacher. The school has never been a success, the number of scholars being only seventeen last term. A small frame building was erected by agent William H. Boyle in 1869, which is used as school-room and chapel. The physician promised has never resided upon the reservation, but lives and practices his profession at Pendleton. The hospital promised has not yet been erected.

The estimated number of Indians belonging to the treaty when made was 3,500 souls. Many have died or become absorbed in other tribes, and it is probable the number was originally overestimated. By the census taken in 1870 the number was 1,622. Of this number 837 reside upon the reservation, and 785 on the Columbia River, the latter never having partaken of the benefits of the treaty.

The Indians on the reservation are comparatively wealthy, nearly all cultivate small

farms, and they are reported to own 10,000 horses, 1,500 horned cattle, 150 swine, and some sheep; the estimated value of live stock being over \$180,000. A portion of them, probably one-third, a majority of whom are Catholics, profess Christianity and wear civilized costume. One of the chiefs informed me that he and some others were of "Mr. Whitman's religion, and went to this church, until some day they could have one of their own." The balance are followers of an Indian prophet, named Smohollow, one of whose tenets is to retain Indian customs and dress. The bad feeling existing between the Catholic and heathen Indians seems to be an obstacle in the way of the advancement of the latter. The same feeling seems to have been counted upon, by the whites who covet the lands, as likely to cause the uncivilized to favor removal.

#### CONCLUSIONS.

In view of the maladministration of agents and the misapplication of funds, the failure of the Government to perform the promises of the treaty, and the fact that the Indians have been constantly agitated by assertions that the Government intended their removal, and that their removal was urged for several years in succession in the reports of a former agent, (thus taking away from them all incentives to improve their lands,) it must be admitted that the progress these Indians have made in ten years has been wonderful. Had they, as the result of the late negotiations, given their consent to removal, I should have felt bound to remonstrate earnestly against any action of the Government to take advantage of so injudicious a decision of their incompetent wards. Happily, the unanimous refusal of the Indians to sell or remove from the remnant of land which the United States has solemnly guaranteed to them, leaves no room for any question of that kind. The arguments used in favor of their removal will apply with equal force to any other place to which they might be sent; and even if they did not, these poor people, relying on the promises of their "Great Father" for protection, prefer to keep their little homes and die by the graves of their fathers, and nothing remains but to do them simple justice and protect them in their rights. It is earnestly hoped that the determination to do so will be authoritatively announced. If assured of this protection, and furnished with a saw-mill, their visible improvement will be rapid.

I also respectfully recommend that measures be taken to execute the provisions of the treaty yet unfulfilled, that the Indians not yet on the reservation be removed thereto, by persuasion if possible, or force if necessary, and required to till the ground as soon as they can be induced to do so; that the saw-mill be reconstructed in a suitable place, and the promised buildings erected for the agent and employes at a suitable place near the flouring-mill; that a manual-labor school be established, and, as soon as possible, a second one, in accordance with the treaty; that a hospital be erected and a physician be employed upon the reservation; that the lines of the reservation be marked out, and the farms allotted by metes and bounds.

It is proper to say that anything in this report which reflects upon the past management of the Umatilla reservation is not meant to apply to the present agent, or to his predecessor, Lieutenant William H. Boyle. The former has but recently entered upon his duties, and Mr. Boyle seems to have been conscientious in the management of the agency while he had charge of it. Nor is the ill success of the school chargeable to any lack of honest zeal on the part of Rev. Father Vermeesch, but simply to the fact that a day-school cannot be successful among Indians. A boarding and manual-labor school always succeeds under fair management.

Very respectfully, your obedient servant,

FELIX R. BRUNOT.

PITTSBURGH, November 15, 1871.

RECORD OF COUNCIL AT THE UMATILLA INDIAN RESERVATION, EASTERN OREGON, AUGUST 7 TO 13, 1871, ACCOMPANYING REPORT OF FELIX R. BRUNOT ON THE UMATILLA INDIANS.

#### *Umatilla reservation.*

By request of the honorable Secretary of the Interior, Hon. Felix R. Brunot, chairman of the board of Indian commission, accompanied by his clerk, Thos. K. Cree, attended a council held August 7, 1871, under a special act of Congress, with the Indians at Umatilla reservation, Oregon. Left Dalles, Saturday, August 5, arriving at Umatilla Landing on Saturday evening; spent Sunday there, leaving by stage at 1 o'clock Monday morning; after a very dusty ride of thirty-six miles, arrived at the village of Pendleton at 9 a. m., where Agent Conoyer met us with a wagon; drove over

to the agency, and found Hon. A. B. Meecham, superintendent of Indian affairs for Oregon, and J. G. White, special commissioner, and many settlers from the surrounding country.

UMATILLA, August 7, 1871.

The council convened this afternoon at 2 o'clock. On account of the absence of several important Indians it was decided only to arrange for the preliminaries of the council, but to introduce no business until to-morrow.

Hon. A. B. Meecham, president H. H. Neville, and A. Duffin were then sworn in as interpreters by United States Commissioner Mathew Davenport. Matthew Davenport was appointed secretary, J. C. Desoivary assistant secretary, and R. L. Lockwood reporter.

Mr. MEACHAM said: This is an important occasion for all these people, and we will ask Mr. Brunot to invoke God's blessing on the council. After prayer by Mr. Brunot, Rev. Father Vermesch repeated the Lord's Prayer in the Indian tongue, the Indians following him.

Mr. MEACHAM. We do not propose to do any business to-day, but to arrange for business. Some of the Indian people are not here to-day. We fully realize the importance of this council to this people, and are not going to be in a hurry; we want you to know that we come here as your friends, and have nothing bad in our hearts toward you; we are here to stand between you and the white people. We have taken a solemn oath to be honest; Major Conoyer is your agent; you have known him for a long time. Mr. White has been your trader, and you have also known him for a long time. I have lived on the mountain, your neighbor, six years, and you all know me. We were appointed commissioners by the President because you know us; we want all your people to be represented here before we proceed to business; we have sent for Homily, chief of the Walla-Walla, to come, and we want Lalle Walla-Walla to come to-morrow, and when you are all here we will open this business. We do not want to do business while some of the Indians are away, but when all are here we will show you our hearts, and keep back nothing; you will not be hurried to do anything until you understand it well. Mr. Brunot, who sits here, came from Washington; he was appointed by the President of the United States, with eight other gentlemen; they do not work for pay, they work from good hearts, because they want the Indians to get justice. Mr. Brunot is chairman of the committee; the other gentlemen are visiting Indians in other parts of the country. Mr. Brunot heard of you, and came to see you himself; he wanted to see your country, and see whether the agents were all doing right, and the superintendent also. I want you to open your ears to the good words he has to say. He is a man who never drinks whisky, nor gambles, nor swears; he is a good man and talks with but one tongue; he will tell you what he wants you to talk about.

Mr. BRUNOT. I have come a long way to see you; I have been to see the Sioux, Cheyennes, and Arapahoes, in the east, and Warm Spring and Simcoe reservation on the west coast. Now I have come to see you, because the President wants to know about you from some one who has seen you with his own eyes.

You hear a great many things about the President and about Washington; some things are good and some are bad; some men tell one thing, some another. The President hears a great many things about the Indians; some tell one thing and some another. I have come here to see you with my own eyes, and hear with my own ears what you say, and to talk words straight from the President, that you may know what he wants you to do, and I will carry back to him what you say. I am glad to see you and I want to see your reservation and your farms; I want to know how many of you are doing right, and how many are doing wrong; I want to tell those that are doing right that it is good, and it is the way the President wants them to go, and those who are not doing right, who are gambling and running about the country, I want to tell them what is right. I want them to open their ears and try to do right. I heard an Indian say, (not one of these,) "If you build me a house, make a fence, and plant grain for me, I will be a farmer; I don't want a little house, I want a big one." He wanted pigs, and chickens, and cows, and horses given him; do you think that is the way the Indians ought to do, to get to be like white men? No. Did you ever see anybody do all these things for a white man? That is not the way to get rich, the only way is to work for it. The white man goes on the prairie, makes his fence, plows his ground, and builds a log house; after a while he gets more and more property and builds a large house. If the Indians expect to get farms and houses without working they cannot do it any more than a white man can. If you want to get salmon do you sit down and wait for them to come into your wigwams? No; you make nets, and work to catch them. Now the President wants you to work so that you may get good homes. The agent will help you, and soon you will be comfortable. I know some of you think you are more comfortable running about; you do not care where you go; some of these chiefs know better than that; it is good to have one place, and they will always have one place to go to. But the wild Indians who have

no heart in one place get along well enough, perhaps, now while they can get fish and berries, but their game is almost all gone. The steamboats will be more abundant; there will be white people all along the river, and soon you will have no salmon. The white people coming in all around will settle on the Camas prairies, and the roots and berries will be destroyed. What are the wild people to do then? Hold out their hands and beg? Or will they go about like Cayotes and pick the bones about the camps? There is nothing else for them, and unless they begin now to do as some of the chiefs do, begin to live like white men. That is what all the friends of the Indians want them to do, and to teach their children; instead of being beggars, after a while they will be chiefs. I did not mean to say much to-day, but I want to hear what you have to say, and some other time I will talk again, and will talk about the business you are here for. But I won't say anything about that until you are all present, and Mr. White and Mr. Meacham and Mr. Conoyer have talked; then I will have something to say. Now anything you have to say, I want you to speak it.

HOWLISH-WAMPO, (chief of the Cayuses.) I understand what is said, but will not talk until all are here.

The agents then announced that arrangements had been made for their subsistence during the continuance of the council. Arrangements were then made for getting all the chief men present; after which council adjourned to meet at 10 o'clock a. m. to-morrow.

#### SECOND DAY, AUGUST 8.

The council met at 12 m. There were present Commissioner Brunot and T. K. Cree, his secretary; the three special commissioners, and their secretaries; the chiefs Wenap-Snoot, Howlish-Wampo, and Hom-li, and, the most prominent of all, the Umatilla, Cayuse, and Walla-Walla tribes; the interpreter and a large number of whites and Indians. Donald McKay was substituted for N. H. Neville as interpreter, and Mr. Pamburn was added, and both were sworn in as United States interpreters. Mr. W. R. Looland was appointed sergeant-at-arms.

MR. MEACHAM said: All men acknowledge the Great Spirit as Father, and He made us all brothers. When we have any great business on hand we ask His guidance, and we will ask Mr. Brunot to pray. We want all to rise up, and what he says to the Great Spirit will be interpreted to you.

MR. BRUNOT. The Great Spirit made us all. He sees us now, and knows what we are going to do. We want to ask him to make all our hearts right. We know that He can and does hear us, and all who pray to Him with a right heart. I know the Great Spirit will hear me if I talk to Him with a good heart. He will hear any of the red or white men if they talk with a good heart. This time I am going to ask my friend Mr. Cree, who is with me, to talk to the Great Spirit.

Mr. Cree then led in prayer, which was interpreted.

MR. MEACHAM. We are here to do right; we are willing to work to make everything right; and we will go very slow. We have added Mr. Pamburn as interpreter, as we have tried him and found him with a straight heart; we are satisfied with him. If any are unwilling to have him interpret, we want them to say so. If there is any other man you want, name him. There has been some talk about other men coming here to interpret. Those who have a right to talk we will listen to; those who have no right to talk need not be heard. We will wait to see if you have any other man whom you wish to interpret for you.

WENAP-SNOOT. We are satisfied.

HOWLISH. We are, for we don't know of anybody outside.

HOM-LI. We do not know of anybody else.

MR. MEACHAM, (to the interpreters.) We want you to watch each other, and if any one don't talk straight, stop him; and if any one of the headmen don't understand at any time, we will stop until they do understand.

The minutes of the preceding day's meeting were then read, and the offer made that if the Indians wanted any one else to keep the record for them they could have him. Mr. Brunot came from the President to know what is said, and hears what is written. If there is any reason why we should not now proceed, you can make it known. The chiefs expressed their willingness to go ahead.

HOM-LI, (chief of the Walla-Wallas.) What you said is right, and we want both sides to understand. (A proposition the chiefs all assented to.)

MR. MEACHAM. Sixteen years ago these people met Governor Stevens and General Palmer at Camp Stevens, (Walla-Walla.) You made a treaty then. I read your names, and find some of the same men are here now. Some have gone to their fathers. When you began that treaty you owned all the country up the Columbia River to Priest's Rapids, across by the side of the Nez Perces, over to the Snake Country, and down to the Wascos, and over to Simcoe. That is the country you owned when you began the treaty. Closed, you had the little country here, beginning at Weiborn Creek up to its head, then to Lee's encampment, then to the divide in Buck Creek and Houtrimy, down that divide to McKay's land claim, and back to Medhouse. That is your country yet.

The money has been paid for the ——— that was promised. Nine years more and the money will all have been paid and you will be left to stand alone to take care of yourselves. When you made the treaty Indian law ruled all the country. There were then 3,300 Indians; to-day, on this reservation, there are but 837, just one-fourth as many people represented in this treaty as there was in that one. Some of the people who belonged to that treaty have never been on the reservation nor had any benefits of the treaty. Those who are here now have had all the benefits of the money. We are not here now to inquire whether you have had the full benefit of these moneys or not; you know for yourself. Your country shows for itself. It is not the business of the commission to inquire how that money was spent. It is our business to look out how the remainder shall be applied. We believe in a God, and we have taken an oath to do you justice while our term of office lasts. I am your superintendent, Mr. Conoyer your agent, Mr. White your neighbor. He has been your trader. His office only continues during the council. Our present business with you is to talk about what is best for you. We are not authorized, and do not come here to take sides as against you, but, as the officers of the Government, to council with you, and represent the Government and to represent you. Mr. Brunot came from Washington, directly from the President. Here are the three commissioners. First is Mr. Brunot, after the President. He comes from the President, and he stands here to hear all that is said, to see all that is written, and he has Mr. Cree, his own secretary, who writes down all the words that are said, and he will take them to the President that he may see if the commissioners' hearts are right—whether they are honest, just, and impartial.

HOM-LI. What do you mean by the reservation showing for itself what was done with the money?

INTERPRETER. The mills, and houses, and what you see, is what is meant.

MR. MEACHAM. We have talked about the other treaty. Then there were a great many Indians and few white people in all this country. The country has changed, and the people have changed. Then it was a wild country, with wild people in it; now it is a settled country and no wild people. The Indian law that ruled the country is dead and gone. It has been the same story for two hundred years. At that time, Indian law ruled from one ocean to the other. The home of Mr. Brunot used to be an Indian home, but there is no Indian home within a thousand miles of it now. Then the red man was as the leaves on the trees in number, but where are they now? Their bones are mixed with the ground for three thousand miles. There is no wigwam in all that country. Where they had their camp-fires, there are now great cities and railroads, and telegraphs, and great farms. And the white man melts the rock, and makes iron. The canoes have left the river, and the white man's steamboats are on it. This will be the case all over the country some time, and that time will soon come when all these red men who now hear my voice will go to the Father's Spirit, and but few of your boys will be here to speak for you, and they will only know the history of their fathers by tradition and the white man's books. The white man for a thousand years has been making books, and there are no people who ever lived but what his books tell about. To know all that ever happened in this country, things that occurred before we were born, our fathers wrote them down in books, just as the secretaries are doing now.

MR. BRUNOT. While we wait, I want to say a word. Do you know the reason why so many of the Indians are gone, why so many whites are everywhere, and have so much more power than the Indians? I will tell you. The Indians are gone because they tried to be Indians always. Some of you here are trying to be Indians still. All such will soon be gone like their fathers; but if the Indians listen to the white man's teaching and become like the white man, instead of getting fewer every day they will increase like the white man, and will have become like the white man, and can make a history for themselves. These chiefs know that and some of them are trying to be white men. The wild men must come and do the same thing.

UMAPINE. My friend Meecham, I won't say what you say to me is right or wrong; what you have to say I will listen to; say what you have to say; I do not want to be told what I am to say. I have my own mind; it is deep down yet; I have not given expression to it. So, also, your heart is deep down yet, you are keeping back what is in your heart; so am I. We will understand each other when our hearts are opened.

MR. MEACHAM. If it takes from now till Christmas, every man shall have a chance to talk his heart, and shall be heard. We are here to conduct and keep order, not to do all the talking. When the time comes, we will ask you to talk and we will talk about the matter we came here to talk about. Things that will make bad hearts we will not talk about. We have only begun to show our hearts; we will show them down to the bottom. We leave nothing in the grass; we have nothing hid; we will talk everything that all can hear.

UMAPINE. My heart is this way; you thought over it; you wished for this reservation; you wished for Grand Ronde, for Walla-Walla Valley and Umatilla; you wished for it. What kind of a heart was it that wished for all these places? Speak plain and all will hear it.

Mr. MEECHAM. I hear what Umapine says, and it is right to speak his heart; but do not make up your mind until you know our want about this reservation matter. We came here to use our tongues and our hearts; we did not come here with soldiers; we came as friends, as brothers.

UMAPINE, (to Mr. Brunot.) You brought the mind of the Great Father from Washington. I am poor, and I speak; I know nothing; you are a long way ahead of us. You say we are far behind you; that is all right, and we do not mind if you tell us so.

Mr. MEECHAM. I heard Umapine's words, and they do not make me feel bad; and the others have all heard his words. He left off talking just where I did in my other speech; that the Indians have gotten away behind; some so far behind you can hardly see or hear them; some are so close to me I can hear them talk, and some are ever with me. I look away ahead of me and I see hundreds of red men who have gone ahead of me. How did they get there? Let every one ask his own heart, how these Indians got ahead of the white man? They learned it from the book. They did not get there by digging camas. I say this with a good heart. We have read books and they tell us the history of the red man. From the books we learn truths; they tell us that knowledge is power. The more man can do, the stronger he is; it has always been so, and always will be so. The weak people who have no books have always given away to the stronger who had books. No matter what color they were, no matter what religion, in what country. We have seen these things. You have had something in your eyes. It has been a dark night with you; you could not see, and do not know why your people are dying out. The white man has learned it from the book. The white men are not all bad men; there are a few bad; they have bad hearts and double tongues, but the great men of the white man's race have a heart for the Indian. You should not open your ears to bad men's talk; you should open your ears to the advice of your friends. We want to give you the benefit of what we learn from the books. We do not want to steal your lands. We will not allow it to be done; but we want to talk about what is best for you, and that is why we talk about books, because they tell what has been good and what bad, for the white man and the red man. We propose to make our knowledge useful to the Indian, and not use it to cheat. Now, we want you to look straight in our eyes, and be satisfied that we are your friends, that we are honest, and will do you justice, and will protect you with the power of our Government. We will allow no man to steal your lands. You have a beautiful country, and if left to yourselves you could not keep it twenty-four hours. If you get a doubt on your mind and think sometimes the President is not your friend, we want you to get on the top of a hill and look all over this country, and you see no white man's house. The white men have come to reservation lines. It has been like a high fence; they could not get over it. Why? Could you keep them off? Could you protect yourselves for one moment without a government to protect you? This country would have been covered with white men's houses, farms, orchards, and railroads, just like Walla-Walla. You know I talk straight. General Palmer and Governor Stevens, in the treaty with Walla-Walla, agreed with you that you should have this country—that no white man should make a home on it. The President has kept his word; he has paid the money he agreed to; he has done his best to protect all your rights. If you have had little troubles, it is like the point of a stick; he could not help that; but the great things he has promised he has done. As he did for the promises of Stevens and Palmer, so he will do for this commission. We come here with the same kind of a paper, the same authority, with good hearts, to say good words, straight, not on the white man's side and crooked on the Indian's side, but only what is right. We want your people to think on the things we are telling you, and see if we have told any lies—whether we have talked straight about things that are past. We judge what men will do in the future by what they have done in the past. This way of judging things is sometimes hard to take into our hearts, and we want to throw it away, but it keeps coming back to us, that what has been before may be again. We told you we did not want to hurry you; we say so now. We have not talked anything to deceive you. We do not look on you as though you were children. You have hearts and can think; you reason, and the things we have talked about here to-day was to get your minds on the road to the business we came here for. You all know what this council is called for. We have had nothing. Umapine talked true. The white people do want all your country. If we say they don't want it, we know we would tell a lie. The white men have wanted this country for ten years. They have built cabins all around it. You know this. They are watching all the time. They have talked to you much about it. Some of them have talked good and some bad. All your men have been afraid a long time; at last they talked to the President about it six or eight years ago. He did not hear them then. He wrote no letter about it then. The white man kept on talking, until the President wrote a letter to Congress about it. Congress is composed of the men who make the laws. Congress passed a law, and that law reads as follows:

"DEPARTMENT OF THE INTERIOR,  
 "OFFICE OF INDIAN AFFAIRS,  
 "Washington, D. C., May 31, 1871.

"SIR: By direction of the honorable Secretary of the Interior, contained in his letter addressed to this office, under date of 7th of January last, you will proceed to carry into effect the requirements of a joint resolution of Congress, approved July, 1870, which is as follows: 'That the President of the United States is hereby requested to negotiate with Indians upon the Umatilla reservation, in Oregon, with the view of ascertaining on what terms said Indians will relinquish to the United States all their claims or rights to said reservation and remove to some other reservation in said State or Washington Territory; or take lands in severalty in quantities not exceeding one hundred and sixty acres each on this present reservation, and to report to Congress; and to defray the expenses of such negotiation, the sum of \$2,000 is hereby appropriated out of any money in the Treasury not otherwise appropriated, or so much thereof as may be necessary.' In accordance with the direction of the honorable Secretary of the Interior, contained in his letter to this office of the 8th of March last, you are directed to confer with Superintendent A. B. Meacham and Mr. J. G. White, who are authorized to assist you in conducting the negotiations contemplated by the resolution. Superintendent Meacham and Mr. White have this day been notified to place themselves in communication with you for the purpose of designating a day of meeting to enter upon the negotiations. In conducting said negotiations you will take special care that the Indians fully understand the proposition presented, and that no outside influence is brought to bear to induce them to agree to anything they might hereafter regret. As soon as the negotiations are completed, a report of the same must be made to this office, which report will be submitted to the honorable Secretary of the Interior, to be laid before Congress at its next session.

"Very respectfully, your obedient servant,

"E. S. PARKER, *Commissioner*.

"TO NARCISSUS CONOYER."

After fully explaining it to them, Mr. Meacham continued: The letter has been read and you see the President's heart. The President has not written any letter but this one. He has made no proposition; he wants your words written down. Mr. Brunot explained to them that the intention of the President was that they should decide about it themselves, regardless of what anybody outside, or the members of the commission might say; that they were to do what they thought was best for themselves, and then they could not reflect on Mr. Meacham or anybody else if they regretted what they now might do.

MR. MEACHAM. We want to hear what you have to say, but it is not worth while to start to-day. We will come at noon to-morrow.

HON. LI. What we are talking about is important. If it was not important I would talk about it to-day. I would like to think it over. I want to hear what you have to say, and then I want you to hear what I have to say.

MR. BRUNOT. You are my brother, and I want you to do what is best for you, and when you talk about these things among yourselves you must talk as brothers. If you don't all think the same way in some other things, you must think the same in regard to this. It is as important to one as the other, and you must talk about it among yourselves, because it concerns you all, and when you make up your minds it will be right, and the matter will be settled forever.

MR. CONOYER. We have let Mr. Meacham, my superior in office, have all the talk with you. Mr. White and myself have decided Mr. Meacham is to speak for us. Our hearts are all the same. Mr. Meacham is a good man; he will not propose anything but what is right. He will talk from the heart; his desires are good. We know if all of us talked we might have to stay a month, but if Mr. Meacham proposed what was not right, then Mr. White and I would talk to you; that is why Mr. Meacham does all the talking. Our hearts are all right to you. If we have bad hearts to you, you have one friend that looks over this. Mr. Brunot came for that purpose; he will remain with us during all our talk. We do not want to take advantage of any. We want the white people who live about here to listen to us, so they may tell those who are not here what is done. I hope you will talk as friends, and will talk to us as friends. I hope to-night you will make yourselves good friends. I will furnish provisions to you that you may remain here.

THIRD DAY, AUGUST 8.

In addition to those present yesterday, Hon. Senator Corbett was in attendance to-day. There was a much larger attendance of Indians, as well as of white settlers, at the opening of the council.

Council opened at 2 p. m., with prayer by Father Brouillet. The minutes of yesterday's session were then read; after which WENAP SNOOT said: I want to show what the Indians' hearts are to the white men who come to hear. I have had no one to take

care of me or my fathers, nor do I ask any man to come and give me or my people advice now.

MR. BRUNOT. There is a man here to-day who is one of the men who made the law that was read yesterday; he belongs in this country; he has been to Washington for a long time, and has now come back to see his white and Indian friends. This man is Mr. Corbett, and he will say a few words to the Indians, which they ought to hear and keep in their hearts.

MR. CORBETT. My friends, I have come to the council to hear what you have to say to the proposition of the President at Washington. We have observed you for a long time, that you have been at peace with the white man. While the white man has been settling about you, coming near your reservation, and committing small depredations against you, you have been peaceful. Perhaps some of you have committed some wrong against the white man. You ought all try and commit no depredations against white men if you would keep peace. The white man, on his side, should treat the Indian with justice and observe his rights. We have given you this country for the reservation. Make it your own. The white man has no right here without your consent, but we desire to maintain peace between you and the white man. Looking forward to the great future, we desire to make a treaty with you to prevent war. There are a great many white men coming to this country and settling all about you. They are crowding near the lines of the reservation. We fear they may do you some wrong, and you may do them some wrong in return. Our hearts are with you, and we desire to protect you and prevent this. In thinking of this we have deemed it best to come and see you and learn if you might not think it best to move to some other reservation or some other part of the country. If you do not all desire to move to other reservations, a portion of you might want to live upon a part of the land upon this reservation. If you should choose, each one, to take a piece of this reservation, each one might own it himself, and no one could take it from you. A portion of those who now have farms might have those farms to themselves, and the remainder of the reservation might be sold to white men for your benefit. The Government at Washington would sell it to the white man and give you all they receive for it. They do not desire to cheat you; they want you to have all your rights. If you get all the whites pay for the land you could take a portion of the money you receive to pay to Indians on some other reservation, on which you might want to live. You could choose what reservation each of you would like to go to. The whites will, perhaps, in the course of time, want to build railroads through your reservations, when the President thinks it necessary. The railroads will bring more white people into the country. They may settle about the reservation, and we may not be able to prevent their committing some wrong. If they should commit wrong on the Indians, we fear you would commit some wrong against them in retaliation. Then the white people and the Indians might have a great war. There are great numbers of white people, and we fear they would exterminate the Indian. This we wish to prevent. Our hearts are with the Indians, and, as law-makers, we wish to protect them. We want them to understand fully the danger that surrounds them. The President will do all he can to protect them; but there are some bad white men as well as bad Indians. We want you to think of it, and decide whether it would be better to get away from the roads and the railroads that may some time be built through the country. If we give you all the land is worth, and you are able to find some other home equally good, will it not be better in the future? We have made the law in such a way that you may choose which you prefer, whether you would all prefer to leave the reservation for some other place, or only a part of you. This we wish you to think of, and to think it over and over in your minds what is best for you under the circumstances. I have come here to see that justice is done you, so that when I go back to Washington we can make another law that will protect you. Mr. Brunot has also come to see that you have justice done you, so as to be sure no wrong is done toward you, that you may feel kindly in your heart to the President and those in Washington, so that when your council is closed you will have no wrong to complain of, and that your hearts may be contented and happy. I wish to say further that Mr. Brunot visits all the reservations in the United States, he with others who are appointed by the President for that purpose, to see that justice is done to the Indians. We have no doubt but the commissioner appointed here will do you justice, and not wrong. But the President does here the same as he does with other reservations when they go to make a treaty; he sends a man from Washington, who can come back and tell him all about the treaty. He also sends a secretary to take down in writing just the same as the commissioner has taken down in writing, so that there may be no mistake in their treaties either here or elsewhere; so that the Indians cannot say they did not agree to do so and so, neither can they be wronged; so that whatever you do you will know it is reported at Washington just as it is received.

MR. MEACHAM. This is our third day in council. The two days before we have been making our hearts ready for the great talk; so far we have done all the talking, but we have made no propositions; when we get all ready we intend to make some propositions.

We are not in a hurry; if we go slow we will not fall down; if our eyes are open, and we see everything, we will make no mistakes. You have known for a long time what this council would be called for; so far you have not given us your hearts. If you have any questions to ask we will hear them. If you have anything you want to say now we will hear you. Think well and talk slow, and do nothing in the dark. We are now ready to hear you; that is all for the present.

**HOWLISH WAMPO.** I have heard and understand all that you have said, and what your business is. We had a council with Governor Stevens, and heard him talk in Walla-Walla, and he made a treaty with us and said there would be as much money as their mules could pack come here for us. He pointed out this reservation and said, "There is so much land for you." I don't know what has become of the money he promised us Indians for the land. He said, "All your chiefs are to have good houses with windows—houses like other white chiefs." I don't see any such as he promised us. I got up and moved on this reservation. He told me that we were to stay here "twenty years." He said, "You are to have an agent to take care of you, and after twenty years you must look out for yourselves." I came here and have been here eleven years. Of all that was promised I have seen none. It must have been lost. I heard what you said about our lands, and I understood what you said. We like this country and don't want to dispose of our reservation. I look at this land, this earth; it is like my mother, as if she was giving me milk, for from it I draw the food on which I live and grow. I see this little piece of land; it is all I have left; I know it is good land. This reservation was marked out for me. The people that are on this reservation are working, are doing their own work for themselves. I understand that you are asking me for my land. I say I like my land, and I don't know whether you will fulfill your promise if I accept your promises for my land. I did not see, with my own eyes, the money that was promised me before. All the stock I have had to feed on this land here. That is why I say this little piece of land, all I have here, I want left for me. The large country I gave Governor Stevens, and you have not paid for it. The white man has settled on it. I feel that I have here a small piece of land left, this that I live on now. The whites have all the land outside, and the other reservations are all full of people who belong on them. The Nez Percé are living on their reservation, and the Indians at Simcoe are on their reservation. The Indians below live on Warm Spring reservation. I see that they are all living on their own reservations, and feel just as I do living on mine. The same I said before I say again, I cannot let my reservation go. That is what I have to say now to your commissioners.

**WENAP-SNOOT.** You come to see my heart. I want you to see it; it is good. Listen well to me and keep what I say. You have talked this long; now I want you to hear the Indian words. I have now looked at your hearts for over two days. This is the way my heart is: I am going to open my heart truly. What are we hunting for? We are hunting for good, not for bad. We will hear each other's words, and will keep them on both sides; then we can compare our hearts. I wish you would pay good attention to my words. It is as if we were searching into the person who has the care of us now—he who has taken care of our breaths and our bodies. I do not know if we will find our bodies, and our forefathers' bodies, in the search. That will lead us so as to make us both good and happy. We cannot cheat our own bodies and our own breaths. If we deceive ourselves, then we will be poor and miserable; only from the truth can we grow ourselves and make our children grow. Where is all that Governor Stevens and General Palmer said? I am an Indian, and am afraid of the same thing happening again. I am very fond of this land that is marked out for me. I see that; and the balance of the Indians have no more room for their stock than they need, and don't know where I'd put them if I had to confine myself to a small piece of ground. Should I take only a small piece of ground, and a white man sit down beside me, I fear there would be trouble all the time. I am not well to-day and cannot speak much more.

**HOM-LI.** I have no desire to talk to-day, but will talk to-morrow. These men who want to speak can say what they want to-day. We talk in friendship, and are in no hurry. I am no little boy, and don't jump at what you offer me.

**TENALE TEMANE.** I have heard what you said to me. There is my friend Mr. Brunot; he has just come here; I heard him with my ears and with my heart, and what I heard him say he talked straight. When he talked of God, of Him who made the ground on which we stand, my heart was glad, and I thought he talked straight; this is why I thought we were going to have a straight talk. The whites talked to me some time ago, and I came over here. The land was marked out for me and I came upon it. We have been here eleven years; and since I saw this reservation, I have been on it ever since. I looked and saw with my eyes, there is so much land they have marked out for me. Now, my friend, when I came here, I saw the white man's fences and how they were made, and I went to work. Ever since that I have worked hard. I am an old man; I have worked till the sweat rolled off me to get food for my children; that is the reason for what I have to say now. I never opened my lips to say that I was going to throw away or give away my lands; I see with my own eyes, and I have grown tired in working on this land; I have only one heart; it is just what I have said now; I have worked hard for my children that are growing up. My friends, the whites who are living about me have farms, and work till they get tired for

their children. I see the size of this reservation and the number of people who are living on it; there are three tribes, the Walla-Walla, the Umatilla, and the Cayuse. I do not wish you, my friend, to have bad feelings at what I have said. The President when he sees what is written, will see what his children have said, and then he will think in his heart that his children (the Indians) love their country. My friend, I tell you again, I love my country; I want to raise my children, and also raise provisions for them on it. That is why I don't want any white man to come and live inside the reservation. That is what Governor Palmer and Governor Stevens told us, that no white man shall go and live inside our reservation. Now, my friend, you have heard what I have said about my land, and that is why I want to stay here; I cannot find any other country outside; my friend, the white man, has occupied the whole country. I see the whites traveling through the country on all sides, but I stay here on these lands that they promised me I should keep.

Mr. MEACHAM. We have heard your words; it does not make our hearts sick. We know you love your country; it is right you should love it, and you should think long and well before you agree to sell it. You want to look the ground all over, for to-morrow, for one year, for always. We do not talk with you as we would if we were trading horses. We realize that it is a great question to you. We know you have hearts to feel. We know it is true the land was given to you for your home; you have had this home; since it was given to you, nobody has been allowed to take it away. Nobody ever will take it away from you by force. You complain some of Palmer and Stevens; the Government has done what Palmer and Stevens agreed to do. They promised that the Government would protect your homes, and it has done so. The Government built a high fence all around your reservation. You did not see the fence. No man has put a house on your lands. The Government has paid the money they agreed to pay. If you have not had all the benefit of it we are not to blame. The President of the United States has made a new plan about Indian matters. He has heard that things are not going right. He told Conoyer that things were not going right. The President and Conoyer talked together, and they made a new set of officers. They go out every summer and see all the Indian people, and how their business is done, and they go back to Washington every winter, and tell how things are going. This is a new thing and a good thing. It was not done so when you had the treaty with Stevens and Palmer, or things might have been different. You say Palmer and Stevens promised three mule-loads of money. The Government paid you more money than that, in the kind of money Palmer meant. You knew nothing but silver money. It has been paid a little at a time each year; that is the reason your eyes cannot see it all at once. You have had it in blankets, in clothes, and plows; in paying men to keep your schools, to doctor people, to make plows, and mend your guns; in building your mills to grind your grain; he has made a mill to make boards; he has bought the cattle to haul your logs; he has kept the white men from stealing your trees; he has kept a man here to watch that people do not wrong you; a carpenter to make houses for your children and old people; and a father has been here for six years to teach your religion. If you have not realized all you expected to do by coming here the President has not been to blame. Congress has given the money, and has not been to blame. The agents and employes have not all been to blame. Perhaps they have not done as well as they might have done. On other reservations the Indians have gone to work. Only a few of your people have learned to work. If your children can't read, who is to blame? The school has been there all the time. I don't mention these things to make them feel bad, but I want you to see that it is not all bad; that the Government has done pretty near what is agreed to do. I had to say these things, because you accused my Government of not doing what it had agreed to do; and when you remember the bad, remember also the good. If the Government had failed to protect you, where would you have been to-day? If the Government were to take away the high fence from around it, you could not hold the reservation a week yourselves; and you know and feel in your hearts, what we now say is true. The Government is always good, and always tries to do what it agrees to do. But the President can't see all over the world. He can't know of all the little bad things. We want you to respect and love that Government nine years more. The Government takes care of you, and keeps the whites from you. It will keep up an agent, the mills, schools, and some preachers. At the end of that time will you be able to hold your own?

Mr. BRUNOT. I protest against giving them an idea that the Government will abandon them at any time.

Mr. MEACHAM. When you made the treaty with Stevens and Palmer it was thought that in twenty years you would become like white men; that at the end of that time you be, like the white men around us, able to take care of yourselves. What I meant before was this thing. Now I ask you if you think at the end of nine years you will be able to take care of yourselves. A few of you can do it now; but suppose there were no agent, no Government, but yourselves to look out for you, could you do it? Suppose there was no agent, no Government, the white men of the land could trade you out of all your stock and all you have in five years. With all the law, they do cheat and swindle you. If there was no law to protect you, where would this people be? I have mentioned these things, not from a bad heart, but to get them before your mind, and have you think of them. I want you to know my Government is honest and true. I know some white people are

bad. I know there are bad Indians, too. That is about an even thing. There are white men mean enough to sell and give you whisky and ruin you. And after eleven years these people are foolish enough, some of them, to drink whisky. The Government does all it can to prevent it. Our good men don't like it, and your good men don't. But the question we are here to talk about now is, what is for your good; not to talk like enemies that are trying to cheat you; but to trade our hearts, and see what is good. When we have looked everything over we will agree what is good. We want to help you. We know the white man wants this country. We have not said for you to sell out; but when we have changed hearts about it we may conclude you never ought to sell. We look into the days to come, all time to come. We need not look behind us unless we can learn something from it. Sometimes a man looks back on his trail; he finds it very crooked. He can't see when he turned out of the right path where the crooked places are, and he may learn something from it. We talked with you about looking back yesterday. Tawalks Temany looks back when he was a little boy. What does he see? He sees all the country full of red men; no white men. Where are they now? What killed them? I need not tell you; you know that they were not strong enough to hold their hand against the white man. If you could not do it when the country was full of red men, can you do it now? I do not mean in war; I mean in business. You could not stop the white men coming here. You can't stop the progress of the white man; he goes where he will; he is strong. We can learn something by that, and not forgetting all these things that have happened, and looking over your present home, we see just how it is situated, and how it is surrounded with all the bad white people crowding in on all sides wanting your lands; a great road running through your reservation with a railroad talked of that may go through here, with a little town down here where some of your young men get drunk, and Birch Creek, and over on that side Med House—would it not be worth while to study over this matter, to see whether any change ought to be made? I do not know of any place so good as Umatilla for you. Supposing this all to be an Indian country; it is the best there is in this country; you know it, and the white man knows it. You love your country, and it is right you should, and you ought not to give it up unless another home can be found for you. That is just what we want to talk about. I don't know just where it is myself; these men do not know; the Indians do not know; but when we sit down like brothers and council together, maybe we can find some place where they will be out of the way of the white man; maybe we can and maybe we cannot. We (commissioners) are not willing that ever you give up this land unless a home can be found for you where you can live at peace. We have heard of a great many places where you might go, talked by your friends, and those who were not friends. We have heard Walloa Valley talked of. We have never seen it. We have heard that the Nez Percé have a good country and a big one. Some of us have seen that, and some have not. We do not know what the Nez Percé's heart is. We do not know what their country is. We have heard talk of the council at the mouth of the Yakama. We have seen that country. It looks as if there was little good land there—a great deal of bad land. We suppose there are many fish there. We have heard of Simcoe reservation. We do not know what the heart of the Simcoe people is. We have not seen that country. Mr. Brunot has seen it. We have heard of the Snake country, a large country south of here. We have seen that country; it is a very big country, has a great deal of rich land, and a great deal more sage bushes, very little timber, a great deal of grass, a great deal of fish. It is a great root country. We have heard these places all talked about, and perhaps you would not like any of them. But there is no harm in talking about them. It may be a good thing to think it over. If we (whites and Indians) could find a country to suit this people, and after we have changed hearts if we find we want to select another country, the money that Umatilla would sell for would fix you comfortably for many years, if you ever find another home. The old law about homes will be dead, and wherever you are located you will have your homes in severalty, and it will not be in common; and you can hold them forever, whether it be on that reservation or anywhere you may go. Mr. Brunot agrees with us about this thing.

We have talked a long time, we have tried to show you some of our heart. We don't want to keep anything back; we don't want to hurry anybody; we want to do everything in the sunlight. God can see us all, and what we do. We can see each other, what is done. Now let us think strong on this subject, and come back, and talk again. Unless some of them want to talk we will now adjourn until noon to-morrow.

WENAP SNOOT. I want to say a few words to answer what you have said. I saw Lapwai (Nez Percé) with my own eyes, and I have seen the mouth of the Yakama with my own eyes; I have seen the Yakama reservation (Simcoe) with my own eyes, and I have seen Walloa Valley with my own eyes, and all the Snake country away south I have seen with my own eyes, and all these countries. I have seen all them with my own eyes, and none of these countries would suit me.

The council then adjourned till noon to-morrow.

#### FOURTH DAY COUNCIL, AUGUST 9.

The opening prayer was offered by Senator Corbit, of Oregon. After which the minutes of yesterday's proceedings were read.

Mr. MEACHAM then said: This is four days we have come together; we have done nearly all the talking, and have given you our hearts about the condition of things. We have not decided on anything, and we do not want to decide anything. We do not want a thing all on one side; we want you to show some heart too; when you have talked we may see what your heart is, then we will know what other kind of talk to have. Think well what you say, and say nothing but what you have thought over. We will tell you anything you want to know when you ask us for it. We are ready to hear you talk.

HOWLISH WAMPO (chief of the Cayans.) You are all my friends who are sitting here. This is what my heart is. My heart does not feel sad. I feel that you have talked the truth, and talked good. We are like brothers, although I am a red man. We are talking with you white chiefs. You talked with a good heart when you told me that you believed in God. I thought that was good. That is my heart, too, while I stand on this ground. When I came on this reservation, all that Governor Stevens told me, and all that was said at the council, I brought with me to this reservation. I just wanted to show you chiefs what is in my heart. All that was promised me I kept in my heart, and brought with me onto this reservation. This is what was told me: "You (the three chiefs) are going to live well, to have a house like white men." That is what I heard. That is one thing that was promised. Another thing that was promised, when we went on the reservation, that we should have a white man for a doctor, a good one; and we were to have a good blacksmith, a good school-teacher to teach our children, and a man to teach us religion, a good man. And we should have a flour-mill as soon as we got to the reservation, and a good man to show us how to farm, and a good sawyer to attend to the saw-mill. Now I want to show all of you white chiefs that none of these things that were promised to us can we see. And that we were to have a hospital in which to put our sick people for the doctor to attend to them. All of these words I got from chiefs like you; and brought them with me. I will tell you all that I see on this reservation. I see a small church; some of my children go to school at the church. And all of us—the head chiefs. We do not see any of the houses they promised us. I see a house that was supposed to have been built for me. It is about five feet high, made out of round cottonwood logs. It is all rotten and falling down. There is Wenap Snoot's house, down below; it is as if it had been made for a pig-sty. Hom-li's house, up the river, is made out of cottonwood logs, and looks like a house for pigs. There are only two houses besides mine; one belongs to Hom-li, and one to Wenap Snoot. They both look like pigs' houses. I see my real house over there; it is made out of mats; that is the one the chief lives in. He was promised a good house with glass windows and doors in it. The reason why I say we have no doctor is, that my people get sick and die off. I can only look at them and see them die; there is no one to doctor them. When we had as agent, Barnhard, before Mr. Conoyer came, when my people died, a coffin was made for them, and they were put in naked, and had no clothes to cover them. When Barnhard was agent, he had a blacksmith here; we thought he was here for us, but when an Indian went to have anything fixed he was driven out of the shop. Was that right? It is the same when an Indian takes a gun to be fixed; it is taken to the shop, they are told to leave it, and there it stands until it rots, and they do not see it any more. There are some Indians have wagons; when they break them they take them to the shop to have them fixed. They stay there weeks and months, and are never repaired. If a white man comes along with a broken wagon it is repaired at once, they do not have to wait. Yet these very men who repair them are working for us and not for the white man. My friends, I want to tell you how we have been served since we have been on this reservation. When Barnhard was agent I used to see twenty hogs in a pen, fed with wheat that grew on the reservation, and I never knew what became of the hogs. I think he did not take good care of us.

Mr. CORBETT. Who raised the wheat that was fed to the pigs?

HOWLISH WAMPO. The men who were working on the reservation, the employés. After the Indians came on the reservation they worked to bad advantage; they had no one to teach them to work; that is what I want to show my friends. It is the way things have been done since we came upon the reservation. That is why some of the Indians say: Yes, we want to try and follow in the white men's ways. I have listened to you. You said we should have a good talk, and a straight one, and I am glad we shall do so. I show you our hearts, and the way we have done since we have been here. You say you will show us a good heart, and I will show you a good heart. I want to show my own heart. I have no bad feelings toward anybody, and I do not want anybody to feel bad at what I say.

Mr. CONOYER. Houlish Wampo forgot to say that there was a mill here; it would look bad on paper not to say so.

HOWLISH WAMPO. I forgot that there is a mill.

Mr. MEACHAM, (to Houlish Wampo.) Has Dr. Leil ever refused to doctor your children when called upon?

HOWLISH WAMPO. Dr. Leil is hardly ever here when we want him. Sometimes when any one is sick he came to see us; but at other times he gave us medicine and told us to give them ourselves.

Mr. CONOYER. I wish to correct a little error as to what has taken place before. There has been a school here always, (at least for six years.)

HOWLISH WAMPO. I meant my children went to school in the church; that there were no school-houses.

HOM-LI, (chief of the Walla-Wallas.) I have listened to you for three days. You see those Indians, (his own band,) they have all heard what has been said. For a great many years they have listened to your teachings. These peoples' fathers were not without instruction. The earth was their teacher. That is the true teacher. That is where the Indian first discovered (from the ground) that he was a human being. Our forefathers taught their successors that were left on the earth. In the same way, from the earth, your fathers spring, and the earth taught you in the same way. From that you have found out how the earth was; that is why we talk to each other now with our bodies, with friendly feelings. Both were made from the same ground; you have said true about the past. From the talk, (addressing Mr. Meecham,) your children, the whites, are happy, and are well, and why should we not be happy, too, in talking well to each other. The same with the Indians, when they hunted for happiness, they searched the ground first. You, too, (Mr. Brunot and Corbett) have come with your hearts. To-day you see the Indians very plainly. We have talked about a great many things, and we have made things straighter. We have talked of hours from childhood to old age. We have not all talked about the land here with all our minds. We have not all spoken about the land. There are a great many of us. You have talked about all our children, and about the whites from all over the land, and over the sea. Everywhere the white man is to be found. That is all I have to say at present. You (to Mr. Meecham) make speeches too long. All day yesterday you talked. We cannot remember what you say.

MR. MEECHAM. We do not ask you talk because we have nothing to say, but we want to give you a chance. If anybody has a speech to make, we are ready to hear him, we want to do everything right. You know what we are all here for. May be you are waiting for us to tell you how we propose for you to do. We want you to make up your own hearts. We have told you all the time that we would answer any questions. We told you the white man wanted your country. We told you it was the best country we know of. We hide nothing. We do not want to hide anything. You know how you get along here. We have told you true, how the white man and Indian have always got along everywhere. We wanted you to know all that we know. We wanted to tell you these things, and to have you make up your heart, if you want to see any of these places we have talked about your going to. We are ready to go with you, when you make up your mind. Perhaps you are waiting to know how we propose to sell your land in case you propose to sell it. Perhaps you want to say something about how much money it is worth. There has been no law made about it, but we believe the President will do what is right, that you will get all the benefit from it.

MR. WHITE. My friends, I want to go home this evening. Senator Corbett, one of the law-makers for both whites and Indians, is going to accompany me home. His reason for wanting to go is that he may see that part of your reservation. He wishes, while here, to see as much of your country as he can, and to learn as much about the lay of your land as he can, that he may act intelligently regarding it. I did not want to go away without explaining to you why I was going; you all know me. Every Indian here has known me for a long time. You know I am your friend. I want to show Senator Corbett this country, and talk to him about your interest. You can go on with your council, and as many as wish to can talk to-morrow morning at 9 o'clock. Senator Corbett and I will return and meet you. If you council together to-night, talk with each other in friendship and love, as brothers ought to. I know the question that has been raised as to the purchase of your lands is one of a great deal of importance to you. You may differ among yourselves in regard to this matter, and the proposition made to you, but I ask you as my friends and neighbors to put away all bad feelings in regard to this matter.

PIERRE, (Walla-Walla.) I only have nine years more, under the treaty, to live on this reservation. When you say, "I want to buy your land," I say I do not wish to sell my land, or to throw it away, as long as I live. I will say I will not sell, I have thought, (thinking powers,) and should I say what is wrong? I am no little boy. I am an old man. You see my white beard. I have no wish for money; I will work and make my money. I shall live to be old, and I shall die on this reservation. When these young men and children see me, and know how I have been doing, and how I have gotten along, they will follow my example when I am dead. My heart will always be that way. I will never part with or sell this land. When I die my children will do the same. They will live on this land and work on it, and they will never part with it. I am in earnest, and talk straight, and but one word to say. God hears me now, and he hears you; we have spoken plainly to one another, and not with bad hearts. I have no wish to go and see that country you talked to us about. I have no wish for any other country; I am satisfied to live at this reservation. What I have said to you is not from a bad heart; but I love this country. This is the way I show you my heart. When these papers get to the President, he will see that I am fond of my land. The land is the same to me as my body. I am no more blind. My heart and my eyes are open, and I see how I am going to make a living. I never change what I say. I will not change my heart for any other person's heart. That is all I want you to write, coming from me, an Indian. My friends, that is all I have to say.

WENAP-SNOOT, (the man without any weapon,) chief of the Umatillas. I am only going to say a few words. We have now been talking four days, and what are we looking for—anything that is bad, or something that is good? I think if we were to look and find something that was good, I think that would be right. I will keep what is good—that has been said—and you will do the same. I think we are looking for what would be good for us. We both keep the good; we like all that is good, and all that is right, and I wish to live according to it. I think, after this, your children and my children will live together with good hearts, doing right. That is what I like—all that is right and true. The Indian law I used to have, and the law you have taught me, I have put them together, and made one law. That is why I think hereafter we will have no more trouble. I think we will raise our children together—not in one place—but I mean to raise mine on the inside of the reservation, and you raise yours off it, side by side. I have traveled all over this Indian country about here, and none of it suits me but this. It is the same with the other three reservations, Simcoe, Nez Percé, and Warm Spring. I do not like any of them, and all the country over here outside of the reservation. I have traveled all over it. I see our reservation, how little work has been done on it. The whites did very little of it; all the rest the Indians have done. They learned it themselves, and did the best they could. They learned very slowly, but, seeing what we have done, we love it. I can see for myself that we have put you to some trouble to teach us. Some did not take hold and learn what little the whites did try to teach us. I never said anything about selling my reservation. No one ever came to me to talk about buying it. I am saying this for the truth. I never had a white man come to me and say, "I am going to buy your reservation," and I never said I would sell it. I don't wish any one to count out any money and say "Here is so much for it." I can see for myself what was promised me before half of it was lost. I cannot see it. I do not want to ask about what is lost. The half of that promised I have not seen with my eyes. I do not want to inquire about it. I think you have seen for yourselves what has become of that money. You see that some of it has not come here. I taught myself. I see myself, what little I have learned about work, and I try and imitate those who know better.

LALLS, (Umatilla.) You are my friends. Our hearts have been talking together. You have brought us the heart of the President. It has come to this land, and it has reached my heart. The President made a law, and sent this law to this land. I want you, my friends, to listen well; all our hearts are addressing you. You have come for us to open our hearts to you in this land. I have nothing to say. You came and found our two bodies on this land. Listen to me, my friends. I do not say listen, but my heart says listen. It is only our hearts that will put us all right on this earth. The President heard about this land, and sent you to open his heart about it.

Mr. MEACHAM. If there is nobody ready to talk—it is getting late. In the mean time you can study it over, and we will adjourn until noon to-morrow.

#### FIFTH DAY, AUGUST 11.

The opening prayer was offered by Mr. Brunot, after which the minutes of yesterday's session were read.

Mr. MEACHAM. We are now ready to proceed with the talk. Some of you have shown your hearts, and many of you have not. We wish to see your hearts; you need not be afraid; you have a right to talk, and your talk will be taken for what it is worth. Talk freely, and show your whole heart; you are talking to friends when you talk to us. We are all of one race of people. God made all men; all men's hearts are not the same. Every one should have a right to tell their hearts. Yesterday Homili said his people would show their hearts. If you are ready to talk, we are ready to hear you. (To the young chief who is about to speak;) You have a great deal of sense. Talk your own heart, but you know what we want to talk about. The white man considers you a strong man.

THE "YOUNG CHIEF" OF THE CAYUSE. We have been talking about this thing many days. The red man and the white man held a council in Walla-Walla. They had a talk about the country, and they arranged everything—how much money and different things; but we know now. Both you and me know what was talked about at that council. What was promised was not done. It was as if you had taken the treaty as soon as it was made and torn it up. The treaties made with the Indians on all the reservations have never been kept; they have all been broken. It is the same way on the Indian side. What we promised has not been done. We have neglected our promises every day. We have not cultivated this land right, and improved it as we ought to have done. We have been so long—since the treaty—and now you (commissioners) have come to remedy anything that is not right. You, commissioners who came here, thought, perhaps, the Indians had clean hearts. I think it right that you have come to remedy these things that are not right. I think it is right for you to come and see about this land. It is true that you are asking me my heart. I do not wish to refer back to what was done at the other treaty at Walla-Walla; it is past. We have talked here so many days in trying to clear up the old treaty. I like all you white men, and I like all my red people. You wish to find out my heart, and I show it to you. You white men know the country where there is money in the ground, and I know the country where there is money in it, and I know when a country is poor, and I

know when a ground has no money. That is why we have to think about these different kinds of lands. One of the kind of land is good to grow upon, and for my children to grow upon and live on. You men, (commissioners,) wherever you came from, and also you, (Mr. Brunot,) who came from Washington, I want you to know what I say. That is all I have to say.

The chief here sat down, and said he had no more to say, because what he did say was not correctly interpreted. The record as kept was here read and interpreted to him; and he said it was correct. He then continued: "I do not want to teach you anything about God. White men are wise, and know about all these things. Whatever is true will make you grow. You know just how to make things grow. It is true, wherever there is rich land that is the place where things will grow. We love what we grow from; that is why I wish to show you, good chiefs, (as it were medicine,) how to make laws that are good. That is why I have no bad feeling toward the whites who live all about me here. I thought you were going to take it slow, and after a while we would talk. This is a good country in which we live now." To the priest and Billy McKay: "You know the hearts of the people who have been raised on this land. The whites went along this road (old emigrant road) down below, and you were raised down there and grew up wild, and now you have asked me about this land; and that is why I do not want to say anything. I am going to think slowly. I liked the way in which I grew up in the country. It is the same way with you. You have raised your children outside the reservation, and I would like to raise mine upon it. It is the same way in Washington. It is as if there was a fence around it. It is a good place to raise your children. It is the same way with this reservation—as if there was a fence around it—and it is a good place inside of it to raise our children. I know the country down below, where some of you came from—I mean Mr. Meecham and the others. If you came from down below and came upon the reservation, you are as agents. There has been four of them come; and, Mr. Meecham and Mr. Brunot, we see you have come here; that is why I do not say you are stealing my lands. I heard that by and by there would be some one come here to inquire about our lands. That is why I thought all our people—those who are on the Columbia River—would all be here and show you their hearts. My heart is, that those people on the river ought to be here. The people that are absent we do not want them to leave it to say hereafter, 'I was not there, and did not know what was done.' We want all to listen to what we have to say. If all the people were here to express their minds it would be all right. I think my friend Meecham is here as a friend. He does not wish to hide anything. It is the same with me—I do not wish to hide anything. My heart is this, that the Indians who are not here would not feel right about it. We have a head to think about it and we have to think about it with our heads. If we think with our heads what we say, we will not be ashamed of it hereafter. I want to show you chiefs that the law comes to the people from Washington. That is why you come here and ask all the people what their minds are. I do not know what the hearts of all these people are. I never asked these people to come and stop or work for me. I do not know what these people think about what you have asked them."

UMA-PINE, (Cayuse.) This is how my heart is: Our bodies are dear to us. I believe you think your bodies are dear to you in the same way we value our land. It is dear to us—dear to every one of us. We know every day there is some bargain made. There are a great many things in our hearts; so with you—you have a great many thoughts in your hearts. All that is unpleasant news we are keeping in our hearts. We have different kinds of news to tell, and so have you. All that is in our hearts we want to tell. If you keep all the news in your hearts you will not be contented. There are so many things in our hearts if they all came out you would tire of them. If we think well on both sides we can decide right about it. When we get through thinking we will know more correctly about it. This is my heart. I do not know the hearts of the others, whether they are the same or not.

MR. MEECHAM. We want you to talk all the top off your hearts; then we will get down to business. We do not want to hurry you.

HOM-LE. I do not believe that the President has ended counciling, though we have had a council so long, yet it is not the last time the President will send his messengers; they will come again. He has done well; he has questioned me with a good heart; he has only opened out a little of the law; he has asked our precious bodies, that is what he has asked of us. My friend has sent and asked my heart from a good heart. Although the council has lasted so many days, it seems to me he is only inquiring what my mind is.

MR. MEECHAM. We have heard all you have said. You seem to wait for us to lead your heart. This is a serious thing to do. We have held back for fear we might make a mistake, not because we wanted to hide anything. The President's letter said we must be careful and not have you do anything you would be sorry for. We have been ready four days to show our hearts, when you wish us to. We all know, Indians and white men, that there has been a great deal of talk about this thing. We know that when the treaty was made with Stevens and Palmer this country was given to you. You have not done as well as was expected of you. A few of you have grown very rich, but most of you are no better off than you were when you came here. I mean you are no richer, and most of you are as poor as Smohanlee Indians, and other Indians along the river who have never been on a reservation. We will not stop now to inquire who is to blame and why you have not grown

rich. The fact is the reservation is almost as you found it. Now, the question is, What is best for you to do? Will you decide to stay here, go on with the old treaty, and take your chance with the white men around you? You know how well you get along as it is now. You know if you are happy in your hearts. You know the heart of the white people who want this country. You know whether the white man gives up easily or not when he wants to do anything. We white men see all these things, and we want you to see with your own eyes. The President did not tell us what to propose to you. He did not say he would agree to what we would propose. He did not say he would agree to what you would propose. He did not say for us to buy the land. He said to consult with you about it. Some of you have made up your minds. It may be the same mind you always will have. The men who have made up their minds and spoken it here are rich men. I do not say they have not spoken well. Perhaps I might say the same that you have said were I an Indian. The President has not told us what to say, and some of your people held back their hearts. It leaves us to think for both sides. When we look at one side it seems all right, and that is the side taken by these men here. Then we look at the other side again, and we take everything into account; then we think it would be well for you to look around if you could not find another home where you would be less interfered with by white men. If you can find another home where you think you will be happier and better, that your friends also think would be a good country for you, then we would write to the President, and we would recommend to him to have your country sold, so that it would bring the most money; that the money the reservation would sell for should be laid out to make your new home, or enough of it to make every man a home. We do not know how much money it would be, but it would be more money than you can count. This Palmer and Stevens treaty lasts nine years more. Once in every five years the money grows less that the Government pays you. In nine years it will be all paid, and you people may be just as you are now, for all we know; you may be better or you may be worse off. But we would recommend to the President that if you find a new home, that every man shall have his land surveyed off to himself, and a deed for it, as a white man has; a paper given to him, so that the land can never be taken from him, so that it cannot be sold for your debts, and that each man's land shall belong, not to the tribe, but to his children when he dies. That is the way the white man's lands are. There is another thing we would write to the President about, that you shall be asked to say how your money shall be expended, and who your agent and your employé shall be. This last thing we talked about; it would be like it is now, agents and employés of all kinds. Sometimes we ask for a man, and we do not get him; we do not always get the officer we want anywhere. What we meant by consulting you was just as we talk among ourselves, to know what is best to do. It is not a law, and it never would be a law. It never would be written in the laws. That is the last thing we talked about. I mean this—that you should not be treated like dogs. I know you have hearts, and you have a right to tell your hearts; and when you tell your hearts, if it is good the President adopts; if not, he don't. Mr. Brunot and Mr. Corbett think that kind of a law cannot be made. We might recommend the President to do that way now. What I mean is, we will ask the President to do so. Maybe he will and maybe he will not. Yesterday you said we talked too much at one time. If you want to look into this thing we are ready to go with you. If you wish to try and find a better place, we want to tell you anything we know about it, to go with you and show you we are ready to tell you all we know about this thing from beginning to end. We think this is enough for us to-day. One thing I forgot on the other side. The President proposes to give each man his land if you stay here, just as Palmer and Stevens agreed to.

YOUNG CHIEF. I am an Indian, and you are white people; all the way from where the sun rises to where it sets, you know exactly how you have grown, how you have increased, and all the Indians in the country know how they were brought up. The President in Washington sees how we both have grown up. We want to show him our hearts. I tell you this for the truth, I say I like my country; I tell you the truth. I grew upon this land; I do not lie about it. It is true, the way my property has increased in this country. You know that this is a good rich country. You white men know that it is a good country to make anything grow; that is why I cannot cut this land in half. If I were to cut this in half, how would I grow? I cannot cut my country in pieces, or where would I raise my stock? You know, my friends, we do not try to make slaves of anybody, red men or white men; that is why we cannot compare this good with bad land anywhere outside of the reservation. If I was to compare this good land with bad land outside, I think I would be wrong. It is true we must talk the truth, in that way the Indian would grow up and the white man would grow up, and be good friends with each other. It is as if you were telling me to compare this land with any other. If I was to weigh this land with any other land or any other thing, I think it would outweigh it. It is true. You white men know that anything that is true is good. That is what I have to say. You see where the sun is now; it is too late to talk more.

Council adjourns.

SIXTH DAY, AUGUST 12.

Council opened with prayer by Thomas K. Cree.

DE-CO-RISSE. I don't want what I say written down; I only want to tell you I have

been here at the council so many days. You told us you were going to make this matter about the land all plain to us. I left fifty-seven bundles of oats, sixty rows of corn and pumpkins, and all I had, I left them on the ground to attend this council. They are all destroyed. Two cows with bells on, followed by a band of mixed cattle, with mixed brands on them, came in and destroyed them. I do not tell you this from a bad heart; I only wanted to tell you what has happened.

Mr. MEACHAM. What we have to say to-day we have written down; the commissioners have all seen it. Mr. Davenport will read it, and you (Pambourn) will interpret. We will go slow, and when you want us to stop, to understand better, or to have you ask questions, we will do so.

Mr. Davenport then read as follows:

*Proposition 1.* For you to name a time when you will vote on the following propositions:

*Proposition 2.* To send out a delegation from each tribe to see whether a home can be found for you, with a view to selling the Umatilla reservation on these terms, viz:

*Proposition 3.* The lands of Umatilla to be sold to the highest bidder for cash, in lots not exceeding 320 acres, out of the proceeds of which shall be erected on the said new reservation a house or houses, one saw-mill, one flour-mill, one school-house, one blacksmith-shop, one carpenter-shop, one saddle and harness shop, one commissary's house, one hospital, and such other buildings as may be necessary, and to open a department farm not exceeding 160 acres, together with such farm-buildings as may be required; also, to erect for each family one dwelling-house, to be at least 16 by 24 feet, to contain at least three rooms, and with two outside doors and two windows each; also, to each farmer one set of harness of the value of at least \$25, one steel plow and attachment, one ax, one hoe, one grain-cradle; also, one 5-inch thimble-skein wagon; and land shall be allotted to those who wish on the same terms as were agreed upon in the treaty made with Palmer and Stevens. The improvements of each man or head of family shall be appraised and paid over to him or them individually, and the remainder of the proceeds of the sale of their land shall be invested in Government bonds, and the annual interest be expended, under the direction of the President of the United States, for your benefit.

Mr. MEACHAM. Do you understand this?

Mr. DAVENPORT. To send out a delegation from each tribe to see if a home can be found for you.

Mr. MEACHAM. We have told you that we would not hurry you, but we want you to do something with this proposition. If you are ready to vote to-day, all right; that suits us. We have no right to argue the proposition with you. It is for you to make up your minds, and express them. We advise you to counsel together like friends and brothers on this proposition, without the interference of any person whatever. We talk thus because the President says "Be careful." Are you ready now to vote? We will return in three hours. You can talk it over alone till we return, and you can tell us then whether you are ready to vote, or how you vote. If you do not fully understand the paper, Mr. Cree or Mr. Davenport will read it for you at any time. One reason for adjourning is, we do not want to interfere with you in your consultation. You have sense enough to manage your own council.

YOUNG CHIEF. You need not wait long; come when you get your dinner.

Mr. MEACHAM. When you are ready to vote, send us word.

Adjourned for three hours.

#### AFTERNOON COUNCIL, SIXTH DAY, AUGUST 12.

By request of the Indians, council met at 4 o'clock.

Mr. MEACHAM. We are now ready to hear you.

HOWLISH-WAMPO. You are asking us now as if you were speaking to our hearts. What you have spoken this people have heard. (The reading of the proposition.) All of them understood what you said. You came to ascertain what is our heart, this people who are living here. We are holding on to our lands. This reservation is marked out for us. We see it with our hearts and with our eyes. These people (the whites) who are out here have large herds of stock. They scatter all over the country, and even come upon our reservation. These people who are here (Indians) have large numbers of horses and cattle. They must spread out all over the reservation to try and raise their stock. It is the same with me. I am trying to raise my stock on this reservation. This reservation that we are on, we all hold it with our bodies and with our souls; and right out here are my father and mother, brothers and sisters, and children, all buried, and I am guarding their graves. That is my heart, my friend. This reservation, this small piece of land, we look upon it as our mother, as if she were raising us. You come here to ask me for my land. It is like as if we who are Indians were to be sent away and get lost. I look upon all sides. On the outside of the reservation I see your houses. They are good. They have windows in them. You are bringing up your children well; that is why I say this. You must listen to me. I do not want to part with my land. I want to show you white chiefs that that is what my heart is. I do not want you to make my land smaller. If you do, what would my stock feed upon? What is the reason you white men, who live near the reservation, like my land and want to get it? You must not think so. You are not going to get it. I am telling you this as a

friend. I am not telling it with a bad heart. I want to know, if I was to go away from here, where I could find as good a piece of land as large as this is? My friends, I tell you now, I wish you would not talk too strong about getting my land. I like my land; will not let it go. That is what makes me talk so. I am showing you my heart about this reservation. You have been asking me for my heart. This is my heart.

WENAP-SNOOT. My friends, I want you to open your ears and eyes and listen to what I say, and to keep it. Another day we are, as it were, looking for something that is good; and that is right, because we are looking for what is both straight and true for both you and me. We see very well the way in which our bodies were brought up on both sides. Our red people were brought up here, and some one had to teach them as they grew. I see myself that those who were taught by others grew up well. I believe the man who understands and follows the way in which he was taught grows up well. I learn from the way in which I was brought up, and I am going to have my children taught more, and they will grow up better than I am. That is why I think I am the same as a child taught by my father. When my father and mother died I was left here, and they gave me rules, and gave me this land to live on. They left me to take care of them after they were buried. I was to watch over their graves. That is why I would not like to part with my country and to leave it. What I tell you is that I do not wish to part with my land. I have said I have felt tired working since I came on this reservation. I have been so tired that the sweat has dropped off me on the ground. I am sick, and can't say much more.

WAT-CHE-TE-MANE. I am going to speak now. You chiefs, whites, listen to me. You are my friends. Mr. McEacham, Mr. White, and Mr. Conoyer, the father, is my friend. I want you to listen to what I have to say. Here is the way my heart is. Here in this land my father and mother and children have died. The father (priest) is the only one who straightens out my heart. That is why my heart is this way. I am getting old now, and I want to die where my father and mother and children have died. That is why I do not wish to leave this land and go off to some other land. I see the church there. I am glad to see it, and think I will stay beside it and die by the teaching of the father. I see how I have sweat and worked in trying to get food. I see the flour-mill the Government has promised. I have gotten it. I see my friends. I like all that I have, (the mills and lands.) That is why I cannot go away from here. The President will see the record, and see what we poor old men have said in this council. What the whites have tried to show me I have tried to learn. It is not much, but I have fenced in a small piece of land and tried to raise grain on it. I am showing you my heart. I like my church, my mills, my farm, the graves of my parents and children, and I do not wish to leave my land. That is all my heart, and I show it to you.

PIERRE. I am going to make a short speech. I have only one heart, only one tongue. Although you say "go to another country," my heart is not that way. I do not wish for any money for my land. I am here, and here is where I am going to be. I think all these young men's hearts are like mine. I think a great deal and have but little to say. What I have said will go on paper to Washington. Then they will think over what we Indians have said. That is all I have to say. I will not part with my lands. And if you should come again I will say the same again. I will not part with my lands.

YOUMA-HOWLISH. I heard the talk at the council at Walla-Walla. I heard where the reservation was marked out for us. I heard it with my ears and my heart; and I came here and found this piece of land marked out. I came inside of it; I came here; and we have worked here. That is why my children have been growing here from that time till now, and I have been teaching them that there is so much land marked out for them within the bounds of this reservation. That is why, my friends, I tell you that I love my country, and I do not want to dispose of this reservation. I see my father here within that graveyard, and my children, and I am guarding them. That is why I do not want to take my body away from here. I am getting old, and when I die I want my body to be buried beside them. I will show you, my friends, that much of my heart.

LALLEN. You are my friends. We are not going to look at these papers long at this time. We see three different propositions before us. You must look over these propositions by looking at this paper. We see the propositions that are made. The same one who made the earth to grow makes our body to grow. I wish to be slow in looking over this paper, to find out about this land on which we have grown. I want to understand the words our hearts would bring. We will understand everything plainly. We will both look at it.

DEKOTISAW (Umatilla.) So many days I have listened to my people, and I was glad to listen to Mr. Brunot. He said he would listen to the poor Indian. Here I am, a poor Indian; I am truly called an Indian. This Indian is opening his heart to you. This is how my heart is. By the law this body came into being; by the law your body came into being. The law-makers' laws are all in your heart. The law-makers have the money; that is why my heart is this way. We will not make any laws or talking about the parting of the land, either of us. We hold hard to the books that raise our children. The only way things can be right is to go straight on the earth. Neither of our bodies will be always here. We should not talk different from what is straight law. That is why, for myself and my children, I open my heart to you.

SWITCH. I have not much to say. Hear me well this time. The ground is right by the

law, (the treaty.) Stevens spoke about the ground. From that talk my body grew up. That is why you have come to us naming three countries. You came to hear that good word. That is the way your bodies grew on this earth. That is the way our children take care of this word. From this word both of our bodies are as they are. There is nothing more to be said on this subject.

LALLES. Look at these Indians; take a good look at them. I am a poor Indian. This being takes care of both our hearts. By this being I mean the President. It is only his heart talks on this ground. I am fond of this ground on which we both stand. That is why we have to carry good hearts and say nothing that is bad on this ground. What I said I spoke to your hearts, and we will speak straight. That is the way we will open our hearts, and we will be all right on this ground. That is why I ask you, my friends, for your hearts to be slow.

YOUMA-HOWLISH. I understand very truly what you have been saying about the land. You are talking to all the Indians that are on this ground. Now we question you about what you have said to us about this land. I do not want you to ask me for my country. You have shown me just the same as if it were \$250 in money. I want you to pay this land first, then I will not have anything more to say after you pay this land, because I follow this land.

HOM-I-LI. We have looked upon you for six days with our hearts. The heart is difficult to arrange, as it were. It is hard for the heart to get hold of anything and keep, and I have, as it were, tried all the reservation in my heart and it cannot be loosened, just as we take care of our bodies carefully. My friends, you see your children growing outside the reservation. They are growing well, and I think they ought to grow out there just where they are. That is the reason, my friends, my body is growing. My cattle and stock are running on this reservation, and they need all of it. Some good white men look at us and see our lands and they say this is right—they need all that country for their stock. You that came from Washington, Mr. Meecham and all of you, I want you to know this is my heart. There is Mr. Conoyer; he stands, as it were, in the middle. He takes care of both sides, and the father stands in the middle looking out for both sides, so you can see how I am, as if I had opened my heart for you to see it, and Mr. White has known my heart for many years. So my friends, as I have shown you my heart, that is the way I wish you to look at it. I wish my words to be carried to the President, just as I have opened my heart. I can see that is not the white man who has helped me; I have done all myself—made all the improvements on my own land. I will speak to you, my friends, with a good heart, with love. I hope the President, though he is a long way off, will look at my heart, just as if I had laid it open to him. You, my friend, (Brunot,) see my face; you see how I have been speaking; I want you to present my heart to the President. Mr. Conoyer will report what desires the Indians may have hereafter, and so will Mr. White, and the father, and some time hereafter they will write and let the President know; and you, Mr. Meecham, will be coming here often, and you will find out my heart hereafter. I wish to say I want just the room I have. I intend to build a fence to join Mr. White's farm. I am talking for everything. Here we are to grow our children, our stock and everything. I would be afraid if Mr. Conoyer and the Father were not here to look after me, as I do not know when the whites would come on our reservation, but with them here I feel perfectly safe. I am showing my heart plainly. I look over among the white men; I see some ahead of the others, and I know why it is.

MR. MEACHAM. We have your answer—that was one proposition. The other proposition was, whether you want to have each man's home set apart, under the treaty of Stevens and Palmer. I need not talk about that. Do you want your land set apart to each man, according to the treaty; then each man owns what he has in possession, and what is not set apart is held in common. If any man wants his land surveyed and set apart, let him stand up and say so.

HOM-I-LI. I said I did not want my land divided, and if we changed our mind we could say so. I spoke for all the others, and they don't want to say anything more.

MR. MEACHAM. We have said all that is proper to say about the council. Have you anything more to say about it? The chiefs said they had nothing more to say; if so, we will consider the council at an end. Mr. Brunot has something to say; you will listen well.

#### SPEECH OF MR. BRUNOT.

I want to say two or three things to you before you go away this evening. You know that what I say comes right from my heart, and I want it to go in at your ears, and into your heart, and I want you to keep it there. I have said but little at this council, and I want you to hear what I now say to you. The President is far away, but he has heard from some men at Umatilla one thing, from other men other things. He has heard that some of the white men want the Indians to go away from the reservation that they may come and live on the lands themselves, and from others, that they do not want the Indians to go away. Some told him the Indians wanted to sell their reservation, and others that you did not want to sell it. So he told Congress, and Congress made the law which was read to you. Then the President appointed Mr. Meacham, Mr. White, and Mr. Conoyer to come here and ask

you whether you were willing to sell. He knew they were men who would tell you both sides, and carry your answer back to him. They are men whom the white people trust, and he knew they were your friends. They have come, and given you a week to think of it, and to talk about it, and you have made up your minds, and told these commissioners you would not sell your reservation; that you will stay here. Now, the white man knows the land was made to be cultivated, to raise corn and grain and stock upon. Whenever they see land with nobody living upon it they want to have it, that they may build houses on it, and fence it, and plow the land, raise grain and cattle on it, and get rich. There is a great deal of land there that has nobody living on it. If you want to keep the white man from wanting it after a while you must live on it yourselves. You must plow and fence it and build houses on it, and raise grain and stick to it yourselves, so that your children after you will be as white men, and will be making laws for their children. Some of you are doing well, and the President will be glad to hear it; but he will be sorry to hear that so many of you are Indians still. However, he will hear *Hom-i-li's* words—that after a while the men who have the care of you will write a letter to the President, and tell him what you are doing, whether you are still wild men or whether you are improving this land. I hope that you will never make the President sorry that he allowed you to stay here, and I hope none of your friends will ever regret that they protected you on the reservation. There are a few white men here—I am sorry there are not more to hear what I am going to say to them. The men who, like myself, have marked the past course of events in our country know what has been the usual course in regard to Indian affairs. You know, also, that there have been great changes in the country in regard to many things. I need not go over them. You will recollect that some years ago if a member of Congress, in a district where there was an Indian reservation, got up a bill to sell it the bill was likely to be passed. The question asked was not, "Is it just to the red man?" or, "Is it our duty to protect him?" but it was: "Do we want his lands?" For several years there have been efforts made in some parts of the country to procure the lands of Indians, but lately these efforts have failed. Just as the great hearts of the people have changed on the questions over which we battled so long on both sides of which some of us have stood; just as those questions have been settled forever, so I believe the great heart of the nation will not permit the Indians to be wronged. Now, I am saying this for the reason, I know that there are many persons within reach of this reservation, and other reservations who suppose that the Indians will be removed, and they are waiting for places on them. These men will be told by their candidates for Congress that they will get the Indians removed. If they should ever succeed, and I do not believe they ever will, it will be with the certainty that the Indians will get the full value of their lands, and I believe the man who waits here to get a pre-emption claim on this land will die a poor man still waiting. Now, my friends, I never expect to see you again, (unless we may hope, as I hope to meet you in a better world hereafter,) and in parting I will venture one word of advice. If I lived near this reservation with the idea of ever living on it I would abandon it at once. I would hitch up my team Monday and I would go to where the Pacific Railroad will probably come, or I would settle on some other good place. It is just possible the Indians may have trouble from bad men—much of the trouble that comes to both whites and Indians comes from one cause—whisky. The Indians are sold whisky, or they get it contrary to the law, and they drink it. Another is, the disposition to encroach on the lands. I hope that such trouble may be avoided here. I do not know that there will be any, but I know that the power of the Government will be used to protect the Indians in their rights. (To the Indians:) As Mr. Meacham told you, I did not come here to talk to you about the business of selling your lands, but I came here to see you, and to hear you talk of what is being done on your reservation. I do not want you to go away to-night and not see you again, but I want you all to come to Father Veermeech's church to-morrow morning, and in the afternoon to come here, and we will talk to you about God and things that are good.

THOMAS K. CREE, *Clerk.*

#### APPENDIX A d.

### REPORT ON OREGON AND WASHINGTON TERRITORY.

REPORT OF A VISIT TO THE RESERVATIONS IN OREGON AND WASHINGTON TERRITORIES  
BY COMMISSIONER FELIX R. BRUNOT.

#### *To the Board of Indian Commissioners:*

GENTLEMEN: At a meeting of the board in New York, on the 3d of May last, Messrs. Campbell, Farwell, and Brunot were appointed a committee to visit the Pacific coast to inquire into the management of the Indian reservations in California and Oregon, and Washington Territory; also, to be present at a council to be held on the Umatilla reservation in Eastern Oregon under the joint resolution of Congress of July, 1870.

Messrs. Campbell and Farwell were obliged to be in New York and Washington in con-

nection with their duties on the purchasing committee until some time in June, and subsequently, other pressing engagements detained the first-named gentleman until he deemed the time left of the season insufficient to warrant so long a journey.

Letters from the Secretary of the Interior were received, urging that some member of the board should visit Red Cloud and the Ogallalla Sioux without delay. I accordingly set out on the 1st day of June, taking with me Thomas K. Cree as clerk.

We arrived at Fort Laramie on the 10th, and on the 12th and subsequent days held a council and several private interviews with Red Cloud and the other Sioux chiefs, an account of which was duly forwarded to the Secretary of the Interior. A copy of the report and minutes of the council is attached, to which you are respectfully referred.

It is to be greatly regretted that the design of the Indian Department and of the board, to procure the location of the Red Cloud agency at some point within the limits of the Sioux reservation sufficiently remote from the whites, has been thwarted for the present by the injudicious location of the agency on the bank of the North Platte, about thirty miles from Fort Laramie.

#### CALIFORNIA.

On my arrival at San Francisco, after consultation with Hon. B. C. Whiting, superintendent, I found that I could not visit the Indians in that State and reach Umatilla by the time named for the council. I therefore determined to proceed at once to Oregon, leaving my colleague, Hon. John V. Farwell, to perform the California duties.

#### OREGON AND WASHINGTON.

At Portland, I met Hon. A. B. Meacham, superintendent of Indian affairs, and learned from him that the Umatilla council had been postponed until the 7th day of August. Deciding to occupy the interval in visiting the Nez Percés, the Warm Spring, and the Yakama reservations, I set out for the former. Owing to the sinking of the steamer on Snake River, and the consequent delay, I was obliged to abandon the proposed visit to the Nez Percés; and returning to the Dalles of the Columbia, went to the Warm Spring reservation, seventy-five miles south of that place, in Eastern Oregon, where I arrived on Saturday, July 22.

#### WARM SPRING RESERVATION

is about forty miles square, and as miserable a country as can be found in Oregon. Mountainous, rocky, or sandy, it is covered with sage-brush, and much of it produces no grass. The tillable portion occupied by the Indians consists of about 500 acres, stretched along two small streams, which unite where the agency buildings have been erected, for a length of four or five miles on each. The roads are bad; but little more than pony trails in some places, and hardly passable for wagons. The crops seem to fail from drought or to be destroyed by grasshoppers three years out of five. A party of United States surveyors, in running lines on the reservation, have called attention to another spot called the "Siunmarsh," about fifteen miles from the agency, which is supposed to be fit for cultivation. It is perhaps large enough to make small farms for about fifty families. I visited and examined this land, and have some doubt as to its availability, except for grazing. It appears to be 1,000 or 1,500 feet higher than the land now cultivated, and is probably subjected to deep snows, and late and early frosts; nevertheless the experiment should be tried. The frequent failure of crops has compelled the Indians to resort to their old methods of subsistence, by fishing, hunting, and gathering roots and berries, and greatly retards their advancement in civilization. Their chief fishery is at the Dalles of the Columbia, seventy-five miles distant, where they are subjected to many demoralizing influences from the whites, and live for several months, in their mat-houses, in the utmost filth and seeming degradation.

The reservation was established by the treaty of June 25, 1865, when the tribes, parties to the treaty, were confederated. According to a census reported in 1870, they numbered as follows:

|                   | Males. | Females. |
|-------------------|--------|----------|
| Wascos.....       | 117    | 127      |
| Teninos.....      | 45     | 50       |
| Warm Spring.....  | 112    | 117      |
| Deschutes.....    | 28     | 29       |
| Other tribes..... | 16     | 14       |
| Total.....        |        | 654      |

A census taken in 1862 stated the number to be 1,066. The difference is partly attributable to absenteeism. A considerable number who belong to the treaty have never been settled upon the reservation, and others who have been on it have been induced to leave by evil advice from white men. There are about sixty Indian houses built with lumber and labor fur-

nished by themselves, the employés superintending their erection. They are generally small, but sufficient for the wants of their occupants. Each of them has a small plat of land fenced in and cultivated by its owner. Many of them have good herds of horses and cattle, which are rapidly increasing. Quite a large number are without houses, who still live in matting tents, move from place to place at will, and have adopted none of the dress or habits of civilization. Those who own the houses dress as white men, and attend church and Sunday-school with more or less regularity. A few of them are professing Christians. Only two or three could speak English, and only one, a harness-maker, had been taught to do mechanical work.

The school has been a comparative failure, both as to numbers and results. Some of the children read quite fluently without understanding what they read, and have been instructed somewhat in spelling, arithmetic, geography, and writing. It is at present under the charge of Jacob Thomas, an educated Indian. Arrangements are being made to convert it into an industrial boarding-school for boys and girls, which I believe cannot fail to succeed if fairly managed. The anxiety of the Indians for the education of their children, is shown by the fact that they furnish the lumber and common labor for the additional building; and by their speeches in council. The agency buildings are moderately well suited for their purpose, but need repairs and additions. The subject will be again referred to. The school-house is used as a chapel. The service at which I was present was conducted by Captain John Smith, the agent, and was well attended by the Indians. The number in attendance at the council was not large, owing to the fact that most of the Indians were absent at their fisheries. On these expeditions they take their families with them. The fish are dried or salted on the spot, and packed in barrels sunk in the ground, where they remain until required for use during the winter. Although left in this way for months, on the banks of the river seventy-five miles from their homes, and brought away at intervals, no Indian is ever known to interfere with the stores of another. The Indians present at the council were generally well dressed, and displayed considerable intelligence. Their speeches were sensible. They indicate the causes which operate against the advancement of the tribe, and will be found to be interesting. A full report of the council is herewith submitted.

#### CONCLUSION.

A much smaller number of white men would find it difficult to sustain themselves by cultivating the soil of the Warm Spring reservation, and certainly the Indians never can subsist themselves there without resorting to fishing, hunting, and gathering roots and berries. Of these resources, in addition to their anti-civilizing effect, it must be said that they are rapidly diminishing; and without them the Indians must again become dependent on the Government for food, or become wanderers among the white settlements.

There is an abundance of good tillable land on the Yakama and Umatilla reservations for the Indians of the Warm Spring reservation, and it is believed that the consent of all the parties could be had to their removal. Their removal to these reservations is, therefore, earnestly recommended.

The consent of the Yakama and Umatilla Indians could be obtained, and the respective agents, accompanied by a chief from each tribe, might hold a conference, at the Warm Spring agency, with Captain Smith and his Indians, and devise the best and most economical mode of making the removal, should it be decided on. Should the removal not be accomplished the agency buildings should at once be repaired, the saw-mill should be removed to a suitable place eight miles nearer to the timber, a manual-labor school should be established, and the boarding of the children provided for.

The boundaries of the reservation, about which there is much controversy, should be defined. As the Indians will be unable to subsist without it, their right to fish at the Dalles should be restored to them. It is guaranteed to them in the treaty, but they were induced to relinquish, by a former superintendent, for the sum of \$2,500. They say they did not so understand it. The only access to the fishery is over a piece of ground or rock now claimed by a white man, who charged \$60 for the right of passage for the present season. This should be purchased. Other details will probably be suggested by the agent in his annual report.

While at the agency I examined the accounts, and found some irregularities in the disbursements; but the agent expressed an earnest desire to conform to the regulations of the Department.

A record of the council will be found appended to this report, (see appendix.)

#### YAKAMA RESERVATION.

I left the Warm Spring agency on the morning of the 26th, and arriving at Dalles City on the following evening, found it necessary to remain there a day or two to rest the horses and repair the wagon. Starting on the morning of the 28th I arrived at Simcoe or Yakama agency, sixty-five miles north of Dalles, on the Yakama reservation, in Washington Territory, Saturday evening, July 29.

The Yakama reservation is in extent about fifty by sixty miles. It was set apart by

treaty in 1855, which was ratified in 1859. The agency was established eleven years ago, at which time the Yakamas, and Klikitats, were entirely wild, and considered the braves warriors and best hunters west of the Rocky Mountains. The number belonging to the reservation is estimated at 3,500. The number who make it their home is about 2,000, most of whom have made more or less progress in cultivating the soil. A large portion of them dress and live like white people. They have about one hundred and sixty houses, and about one hundred small barns or stables. They have cut their own logs, hauled them to the mill, and erected their own houses. Their fences have also been made by themselves, of materials which they have gathered and hauled; some few of them are good board-fences. They have under fence about 4,000 acres of land, and over 3,000 acres plowed. The agent aids them in breaking the land, and starting their farms, after which they require but little more than verbal instruction and advice. Those who till the soil are mostly in comfortable circumstances, some of them quite well off. The number of horses is estimated at ten or twelve thousand, and cattle 1,400 head.

About two hundred of the Indians are professing Christians, belonging to the Methodist church. They have taken Christian names, and dress and live as comfortably in their houses as frontier whites. They have two churches, erected by themselves, to suit different neighborhoods, and Sunday service is held in them alternately. There are a few Catholics, and there is a Catholic mission near the reservation. Some of the young men were taught to make harness while in the school; and an Indian apprentice in the smith-shop, it is thought, will be able to take entire charge of it next year. There are two native preachers, members of the Oregon Methodist Conference, who have been educated in the reservation school and who now preach to their race.

The school has been under the direction of Rev. J. H. Wilbur, at first as teacher, and subsequently as agent, for about ten years, and has been very successful. It has been conducted as an industrial boarding-school, the boys being taught to labor, and the girls, while being instructed in the elementary English branches, to sew, and do housework. The insufficient appropriation for the school, although eked out by the labor of the pupils, has necessarily limited the number who could be received, and greatly lessened its usefulness. At the period of my visit the school had not been in operation for some time, but the arrangements were all made for starting it early in August. The appropriation for the support of this school should certainly be increased.

On Sunday we went to the church and found it filled with decently-dressed Indian men, women and children, many of whom had come in wagons and on horseback. After the usual service of singing, reading the scriptures, praying and preaching, by Rev. Wilbur and the two Indian preachers, the meeting was thrown open to all, and all were invited to speak. About thirty men and women gave their religious experience and their difficulties. The meeting continued for three hours, and was deeply solemn and interesting. After its adjournment, the Sunday-school was opened; the teachers being mostly Indians, and some of the white employes. I am assured by the white residents that the character and daily life of these Christian Indians accord in the most striking manner with their profession. Rev. Mr. Wilbur states that the cases of failure among those admitted to the church, or on probation, are not more frequent than among the white congregations of which he has been pastor.

The results upon this reservation, which I have briefly attempted to describe, are due to the ability and Christian zeal of Mr. Wilbur and the policy he has pursued, the latter being identical with the wishes of the President and that recommended in the first report of the board of Indian commissioners. He is a Christian man himself, employs none but Christian married men, who reside with their families at the agency, and whose example enforces the precepts taught. He manages the Indians in "a kindly and benevolent spirit yet with firmness, and without fear."

The buildings of the agency are the best I have seen. They were erected by the War Department some fourteen or fifteen years ago, when the Yakamas and Klikitats required to be kept in subjection by the military. The post was known as Fort Simcoe, and was, after the making of the treaty, turned over to the Department of the Interior. The buildings are generally in good order, but some repairs are needed to keep them so. It is most earnestly recommended that the appropriation for the school should be increased. The tillable land should be surveyed, and a patent given to each family that is cultivating or can be induced to cultivate a farm. The title should be inalienable for at least two or three generations.

The Indians belonging to the treaty, who are not yet on the reservation, should be brought to it, and every effort made to induce them to cultivate the soil.

Leaving Fort Simcoe on the 3d, we arrived at Dalles on the 4th, and in the evening recrossed the Columbia River to meet Colwash and his band. These Indians belong to the Yakama reservation, and are a portion of those who have refused to adopt the habits of the whites, except many of their vices. They were living at their fishery, ten miles distant, on the Columbia, and had come to meet me in response to a message from Agent Wilson. I could only give them advice and urge upon them the necessity of settling on their reservation. I mention an incident here which indicates an unexpected trait in the character of these Indians. Leaving the Indians at the top of the bank at dusk and coming down to the edge of the water, we found a wagon-load of small groceries and other goods scattered

along the shore. The owner, a trader from the interior, leaving them there, crossed the river with us. On being asked if the Indians would not steal them, he replied: "No, sir. If all the white men were on one side, and all the Indians on the other, I would always leave my goods on the Indian's side."

Mr. Wilbur informed me that although the Indians were constantly coming and going, he did not use locks at the agency, and had never lost anything.

The record of the council held on the Yakama reservation is herewith submitted. (See appendix.)

On the 5th I left Dalles City for the Umatilla reservation, where I arrived on the 7th and attended the council, which lasted until the 13th.

A report in regard to the Indians, with the minutes of the council, was transmitted to the Secretary of the Interior under date of 15th November, to which you are respectfully referred. (See report, &c., Appendix P.)

I returned to Portland, after the Umatilla council, with the intention of proceeding at once to Grande Ronde reservation, in Western Oregon, and thence to California; but the receipt of letters and statements in regard to alleged abuses in Washington Territory led me to change the intention and go to Olympia. After my arrival, and on consultation with General T. J. McKenney, the superintendent, it was thought best to employ a small steamer as the only mode by which the agencies on Puget Sound could be visited in a reasonably short time. Pending this arrangement, I visited Victoria.

On the 26th of August I left Seattle on the little steamer Black Diamond, Captain Hill, and, accompanied by General McKenney, we arrived on the evening of the same day at the

#### TULALIP RESERVATION.

By the treaty of Point Elliott, five reservations were set apart, bordering on Puget Sound, viz: the Tulalip, Port Madison, Muckleshoot, Swinomish, and Lummi. The number of Indians belonging to the treaty was from four to five thousand. It has been reduced by death since that time to less than 3,500. Many of them are scattered about the sound, fishing or laboring in the mills, or logging-camps; and it is difficult to get a correct estimate of the number properly belonging to each reservation. There are about 1,000 who probably belong to the Tulalip. The reservation contains 33 sections of land, the most of which is heavily timbered. About 70 acres has been cleared, and a part of it put under cultivation. The expense of clearing the timber-land is very great, and the soil is generally poor. There is a tract of marsh-land called the "Beaver Meadows," said to contain about 1,000 acres, and to be susceptible of being easily drained. The soil of the Beaver Meadows is deep and rich. Under the management of Agent Hale, the predecessor of Captain Hill, and of the present agent, much timber was cut from the reservation, ostensibly to raise money to drain the marsh. It is to be regretted that a small portion of the labor had not been applied to digging the ditches. When the Beaver Meadows shall be drained, it will afford homes, and soil to cultivate, for a number of Indians who now work for others. Nearly all of these Indians are disposed to work. They dress like the whites, and some of them are professing Christians of the Catholic faith.

Across the sound, in sight of Tulalip, is a fishery and brewery, where many of the Indians find sale for their fish, at a small price, getting much of their pay in drink. Of course this, which is but an example of the many temptations and evil influences to which the Indians of the sound are exposed, is demoralizing in the extreme.

The agency buildings for the Indians of this treaty were chiefly erected here, as the central point at which it was supposed in time all the Indians would concentrate. They are in good order and suitable to their purposes.

The present agent is Rev. E. C. Chirouse, of the Catholic church, who has had long experience as a teacher among the Indians.

The most successful feature of the reservation is the school. It is an industrial boarding-school for boys and girls. The boys being now under the care of two assistant teachers, and the girls under three sisters of charity. The buildings are separate, but too small for the purpose. There were twenty-three girls and twenty-four boys in the school at the time of our visit, and an examination of their attainments showed that they were being well instructed in the common English branches of education. The annual cost of the school to the Government is \$5,000. It was established under a contract made by Hon. L. Bogy, Commissioner of Indian Affairs some years ago, with Rev. Mr. Chirouse, in which the latter agreed to board, clothe, and instruct not less than forty-five pupils for the sum named; and he has continued on the same terms by Mr. Bogy's successors. I most cordially recommend the continuance of the appropriation, and an additional sum for enlargement of the buildings.

The next reservation visited was the

#### SWINOMISH,

about thirty-five miles north of Tulalip. It is situated on a channel separating an island from the mainland, and which is passable for small steamers only in high tide. It was intended for the Skaggit and Swinomish tribes, numbering in all about 230. About 130

accept it as their home. There are a few houses on the bank of the slough, but not more than a dozen Indians were there at the time of our visit. The Skaggit have never recognized this as their home.

There is no white employé in charge, and Joseph, the chief, complained that some whites were settled within the limits of the reservation. The lands are salt-marsh chiefly, overflowed in high-tide, and very productive in grass, which is the attraction to the whites. The situation is one at which the Indians are peculiarly exposed to whisky and bad whites. As there is not a sufficient number to warrant the costly machinery of an agency, the success of which would, at any rate, be doubtful, owing to the evil surroundings, I am inclined to agree with the recommendation of the superintendent that the reservation should be sold for the benefit of all interested in the treaty, and the Indians removed to Tulalip and Lummi, where they could be better cared for.

Joseph, the chief, complained that certain white men had encroached upon the reservation, pretending to dispute the line. On being told that the reservation would be protected from trespassers, he said "his heart had been down for a long time," but now, when told that "the Great Father at Washington" would keep their lands for them, "his heart felt strong."

The white settlers alluded to also came to ask if they could not be allowed to remain, and were told by General McKenney that they were trespassers and must remove. This reservation is a peninsula of Perry's Island, and it is important that the line cutting it off from the main part of the island should be defined.

#### THE LUMMI RESERVATION,

which was next visited, is situated at the mouth of the Lummi or Nook-sak River, on Bellingham Bay, its northern boundary being the Gulf of Georgia, and contains one township of land. It seems well suited to its purpose, and has, in addition to much productive tillable soil, a fair proportion of tide-flats suitable for grazing and meadow. It is the home of four tribes, the Lummis, Nook-saks, Sen-a-mish, and Squin-a-mish; in number, according to the last census, 819. They have made commendable progress in civilization under the instruction of Mr. C. C. Finkboner, farmer, the only white employé upon the reservation, and who has been with them for a number of years. They dress as white men, and live in wooden houses, which are scattered over the reservation on their small farms. They have also a village, where they chiefly congregate in the winter. Some of them have been educated in the Tulalip school, in which they have an interest in common with the other Indians of the Point Elliott treaty. They have a neat and commodious church, built by themselves, in which, daily, a short morning and evening service is conducted by the chief, David Crocket. He received his instructions from Father Chirouse, who occasionally visits them. Some fifteen or twenty of the young men came from the Bellingham Bay Coal Company works, where they are employed, to attend the council. I was informed, by the superintendent of the mines, that the Indians are his best laborers.

The Lummi reservation Indians have a considerable stock of horses, cattle, and hogs, and raise a surplus of agricultural products, which they sell. In one year they received \$3,500 for potatoes alone.

Although, owing to the faithfulness of Mr. Finkboner, there has been but little trouble from trespassers on their reservation, it is important that the lines be definitely settled, and also the farms allotted by boundaries to those who cultivate them. The minutes of the council at Lummi will be found herewith. (See Appendix A d, No. 3.) There is no school, physician or medicine, priest or minister, carpenter or blacksmith for these Indians nearer than Tulalip, which is seventy miles distant.

Returning southwardly through Puget Sound to the mouth of Hood's Canal, and up the canal nearly to its south end, we reached the

#### SKOKOMISH RESERVATION.

This was set apart by the treaty of Point-no-Point for two tribes, the S'Klallams and Skokomish, 921 persons in all. The Skokomish generally make their home on the reservation, the others are scattered at various points along Puget's Sound. A band headed by the "Duke of York" has lived at Port Townsend, but at the time of our visit they had been brought by the new agent to the reservation, where they promised to remain.

The reservation is about 400 acres in extent, much of it excellent for cultivation, and part of it covered with good timber. It is all subject to annual overflow, and that portion of it on which the agency buildings are located is covered with water during the high-tides of every winter. The Indians have some houses on the high land adjoining the reservation, in which they reside during the season of high waters. A sufficient quantity of this land should be attached to the reservation. As there are no white settlers, this needed change can be easily effected. The small portion of the tribes who are constant to the reservation raise considerable surplus product. As is the case near every reservation on the sound, there is what western people call a "whisky mill" near this one, which is the cause of much vice and demoralization among the Indians.

The Indians seem to be intelligent and disposed to do right, but they have had much to discourage them, in the character and conduct of those who were set over them. Some of them are carrying on a logging camp, selling the logs to ore of the mills on the sound, and dividing the proceeds as pay for their work. They hire a white man to drive the ox-team, and seem to conduct their business generally, through two of their number, with ability. Their object is to make some money with which to improve farms.

The reservation is in charge of Mr. Edwin Eels, who had but lately been appointed on nomination of the American Home Missionary Society, and who seemed to have an appreciation of his duty to the Government, and his responsibilities in regard to the Indians. I have seen no place where the Christian policy can be adopted with better promise of success.

The school has been heretofore a failure, as nearly all day-schools for Indians have been. There were seven pupils only, but they showed good progress. The agent and teacher are preparing to make it an industrial boarding-school for both girls and boys, and if the building can be enlarged, and a sufficient sum appropriated to subsist and clothe the children, it must be a success. The Indians are anxious to have it so, and to send their children. Upon this reservation, as upon all I visited in Washington Territory, the Indians are anxious to have their boundaries definitely settled, and to have their farms allotted to them in severalty, (see Appendix —.)

I returned to Olympia on the 6th of September, regretting that, for lack of time, I was unable to visit other reservations. Several delegations of Indians met me at Olympia, and their urgent solicitations, added to my own conviction of the importance of such visits, both to the Indians and to the service, increased greatly my regrets.

When at Port Townsend, Colonel Drew, the collector of the district, and Captain McClelland, the commander of the United States revenue-cutter, very kindly offered the vessel to take me to the Neah Bay reservation, but for the reason above named I was obliged reluctantly to decline going. The reservation is at the entrance of the Straits of Juan del Fuca, and the Makah Indians inhabiting it are said to be in some regards the most interesting of any in the Territory. They were under the care of H. A. Webster for seven years. Colonel Samuel Ross, superintendent, in his report of 1869, said, "What has become of the large amount of money appropriated to beneficial objects at this agency since 1861, I am totally unable to state."

The following from the report of Webster's successor, in 1869, seems to account for it: "The former agent had taken possession of a section of country six miles square; nearly all the buildings belonging to the agency are on this land, and not on the reservation proper." He also states that there are but two or three acres of tillable land on the reservation, and urges that the land upon which the buildings are located be taken for the use of the Indians. If these statements are correct the subject should receive immediate attention, and for this reason it is here referred to.

At Olympia a paper was placed in my hands which preferred serious charges against Superintendent McKenney, and was accompanied with a request for an investigation. I had an interview with the witness who was principally relied upon to substantiate the allegations, and with such other persons cognizant of the subject as I could reach in the short time allowed, and also examined the accounts of General McKenney and the papers connected with the subject-matter charged.

I regret that the original charges, with my memoranda of evidences and statements, and the rebutting affidavits furnished by General McKenney, were burned in the Chicago fire. I can only express the opinion derived from them, that General McKenney is not guilty of the acts charged, and is a good officer, who is conscientiously endeavoring to do his duty to the Government and the Indians.

#### GENERAL REMARKS AND SUGGESTIONS.

The condition of the Indians on Puget Sound is vastly better than individual statements and common rumor led me to anticipate. Many of them are industrious, and labor upon their reservations and in the saw-mills, and in other ways for the whites, and are commended by their agents and their employers.

On the other hand, there is a dark side to the picture. Many gain their subsistence by fishing or lounging about the white settlements, and are the most degraded human beings possible. Their women are corrupt, and disease is universally prevalent.

There are white people who have grown comparatively rich from the process of Indian demoralization, and others who have reached the level of the most degraded of the Indians. Near Seattle is a den of infamy known as "the mad-house," where fifteen or twenty Indian women are kept to join in the drunken carousals of its patrons, and it is said there are or have been similar establishments near every town. This case was adduced by a person in proof of the hopelessness of "doing anything for Indians." He did not see that its existence involved the fact of a larger number of still more degraded white men who are its patrons.

The greatest obstacle to the elevation of the Indians and the most potent agent in their degradation and destruction is their passion for intoxicating drinks, and they are more exposed to its influence here than anywhere else. The United States laws against selling

or giving them spirits or wine is evaded by men who make cider or beer the medium by which to convey the poison. The territorial law which included these does not admit Indian testimony. These defects, added to a general unwillingness to do justice to the Indian as against a white man, render it exceedingly difficult to procure the conviction of even the most pronounced offender. The defects in the law may be remedied by changing it. The difficulty arising from prejudice will in time be overcome by the increase of a higher degree of civilization among the whites. An immediate improvement could be made in some quarters by a change in the manner of selecting jurors.

When the jurors are selected by the county sheriffs, the same panel being used by the United States courts, the sheriffs, dependant upon the popular vote for their office, often select the merest ruffians and persons themselves offenders against the laws. If the United States marshal were required to select the jurors, not being dependant on the popular vote for his office, the best class of men in the community would be empaneled, instead of the worst, as is too often the case under the present law.

Another and most serious obstacle in the way of Indian civilization, and especially damaging to the advancement of those who have made some progress toward it, is the fact that they are left entirely without civilized law in regard to the commission of crimes against each other. An Indian may murder his wife, his daughter, or his neighbor, and no punishment can legally be inflicted. If, by any chance, he should be arrested and imprisoned for the crime, the courts would necessarily order his discharge.

At the Tulalip reservation there were two men wearing ball and chain and undergoing the sentence of one year's labor for the crime of murder. They appealed to me against the injustice of the superintendent with great earnestness. They wore the white man's costume and were intelligent-looking Indians. I said, "Well, for what reason does he make you carry this, and work for a year?" "For killing two men," was the reply. "Did you kill them?" "Yes; but they killed my friend before, and I had a right to kill them." They also urged that they had "settled it." Such settlements are usually made by the payment to surviving friends of a horse or a few blankets.

During the year ending September, 1869, there were no less than nine murders committed by the Indians connected with the Tulalip agency. Eight of the murderers were arrested by the agent and punished by a short confinement in the block-house. Most of these crimes have for their immediate cause, intoxicating liquor. When an Indian drinks, his mind becomes inflamed with the remembrance of real or supposed injury, and he proceeds to take the revenge which the savage customs of his tribe, and the decisions of the United States courts teach him is his right. It is believed that *one or two hangings* under sentence, after trial, would entirely put an end to the crime of murder among them. They rarely or never of late years venture to kill a white man.

This monstrous anomaly, for such it seems to be, where the Indians are partially civilized, has arisen from the recognition of the sovereignty of Indian tribes. It should have been provided against by naming in every treaty, a period at which the Indians, a party to it, should become subject to the white man's laws. Its existence in a country of our boasted enlightenment is, to say the least, disgraceful. While it continues to exist, we can hardly wonder that the Indians should lightly value human life, or that whites of a lower degree of intelligence should think the murder of Indians a venial offense.

To attempt the enforcement of our common or statute law, in a tribe of wild Indians, as soon as they are brought into peaceful relations with the Government, is not expedient or even practicable, for the reason that the savages are unable yet to distinguish between such enforcement and acts of war. Such illegal attempts by neighboring white settlers have too often been made, as in the late Camp Grant case, with the inevitable result of a renewal of war. But when Indians have adopted civilized dress, are acquiring civilized habits and modes of subsistence, we owe it to them and to ourselves to teach them the majesty of civilized law and to extend to them its protection.

The superintendents and agents should be required to use every effort of persuasion and argument to induce such Indians to abandon their tribal relations and adopt the white man's law.

An act of Congress should be passed extending the jurisdiction of the courts to crimes committed by Indians against each other upon the reservations or elsewhere.\*

At all the reservations I visited in Washington Territory and Oregon, the Indians expressed an ardent desire for schools to educate their children. In some cases they complained bitterly of the failure of the Government to establish such schools as had been promised to them. The only successful schools to be found are the industrial boarding-schools at Tulalip and at Yakama. The former has been sustained by the appropriation of \$5,000 per annum; the latter has received a much smaller sum, the deficiency being made up from other resources, and from the labor of the pupils in raising food for themselves. It was suspended for a year, and has been again started by means of the fund thus accumulated. It should certainly receive a larger appropriation in the future. Tulalip is in charge of the Catholics, Yakama of the Methodists. Only such schools as these can be successful among the Indians. Day-schools, even when managed by capable and consci-

\* These remarks are not applicable to the civilized tribes of the so called Indian territory who have a code of laws similar to our own.

entious men, a condition which has rarely been found to have existed heretofore, are in every case an admitted failure. The children are, for the most part, too irregular in their attendance to be materially benefited, and in the few instances where a greater degree of regularity is secured, they lose during the interval with their parents what they acquire in school-hours; cleanliness, proper clothing, and reasonable freedom from disease are rendered well-nigh impossible. The day-schools have generally served as a mere pretense, under which friends of agents have received salaries; and, so far as the Indians are concerned, the money has been thrown away. It is hoped that, under the new system of appointments, a more conscientious administration of the agencies will prevail, and that the Government will comply with its treaty stipulations by erecting proper buildings, and establishing schools in which children of both sexes may be taught habits of industry while being educated in the common English branches.

The Indians of North America have nearly as many different languages as there are tribes. Those on the Pacific north of the California line generally speak Chinook, in addition to their own tongue. Chinook is a jargon, consisting of not more than three or four hundred words, drawn from the French, English, Spanish, Indian, and the fancy of the inventor. It was contrived by the Hudson's Bay Company for the convenience of trade. It is easily acquired by the whites, and has been a chief cause in preventing the Indians from learning to speak English. Its use by agents and employés should be objected to, and under no circumstances should it be tolerated in the schools. The Indians have made less advancement in the use of our language than in any other particular. The fault is with those who have had charge of them. One of the best English talkers I saw among them had learned it during a two years' confinement in the penitentiary, where only English was spoken to him. Their deficiency in this particular causes the Indians of Puget Sound and Western Oregon to seem less fitted for the privileges of citizenship and the ballot than they really are. Nevertheless, it is believed they are generally as well fitted for it as are the Mexicans in certain quarters, and many of the negroes in others.

Except at the Yakama agency, under Mr. Wilbur, and in one case of a harness-maker at the Warm Springs reservation, I do not find that the Indians have been encouraged to learn mechanical employments. Wherever there are blacksmiths, wagon-makers, millers, or other skilled laborers employed, they should be required to take one or more Indian apprentices. At one agency visited the refusal of this privilege was one ground of the complaints of the Indians against all the agents they have heretofore had.

Difficulties in regard to the boundaries of the reservation in Washington Territory constantly arise. There should be an appropriation made for authoritative surveys, and, at the same time, for the subdivision and allotment of the farms, which they so much desire. It is much to be regretted that no part of the last year's appropriation for surveys was designated for this purpose.

#### GRANDE RONDE, OREGON.

After returning to Portland, I arrived at the Grande Ronde reservation, forty-five miles southeast of Salem, on the 13th. The reservation extends to the coast, some forty miles, and, with the exception of the valley in which the Indians are located, is unusually mountainous, rocky, and barren, but abounding in game. This valley is at the east side of the reservation, on the head-waters of the Yam Hill River, and is an indentation or basin in the Coast range of mountains five by eight miles in extent. It contains about 2,000 acres of arable land, more than half of which is under cultivation by the Indians.

In 1855 and 1856 a costly and bloody war was being carried on by the Oregon Indians. After their submission a treaty was made by Governor Palmer, by which the Rogue River Indians agreed to go upon a reservation. They were soon after brought to Grande Ronde, and a military post established by General William B. Hazen. At that time the Indians are described as subsisting themselves upon fish, game, roots, berries, grasshoppers, &c., dressing in skins, paint, and blankets, many of them almost naked, and all knowing only the habits of savage life. All on the reservation now live in houses, wear civilized costume, and have adopted many of the habits of the whites. They plant about 800 acres of wheat and oats, from 50 to 100 bushels of potatoes, besides peas, onions, cabbage, and grass. In addition to this work upon their own farms, they furnish a large amount of acceptable labor to the white farmers in Willamette Valley, for which they receive the same wages as whites. They are anxious to learn mechanical employments, and complain that some of them have not been taught in the agency shops. As to their capability, I saw them running an eight-horse threshing-machine, all the work, attendance, and superintendence being done without any white or half-breed aid. As to their "willingness" and ability to "work," I saw them just completing a mill-race about 300 yards long, in some places 8 feet deep, in hard soil, as their voluntary contribution to the new saw-mill. The roads through their valley are much better, and have had more work done upon them, than those through the white settlements on the way to it. One of them made his speech at the council in the English language, and others were capable of doing so. They seem to have a high appreciation of the value of education for their children, and plead earnestly for an industrial boarding-school. They should have it, if only in some degree to make amends for past abuse. The principal men among them have for years been solicitous to have their farms allotted to them in severalty, and this is

only now being done. From their speeches on this and other subjects connected with their interests, it will be seen that they are possessed of much intelligence and good sense. While they contend that they have never been treated justly, or with any care for their true interests, by those who have had charge of them, they say they have been themselves "asleep," and have "just waked up." Rapid as has been their march on the way to civilization, there is reason to believe that, under the new Christian policy, it will be greatly accelerated. They should be induced at once to abandon their tribal relations and adopt simple municipal laws, and be admitted to all the rights of citizenship.

The moral condition of the Grande Ronde Indians does not correspond with their state of advancement in other respects. They have a church, which some of them attend on Sunday morning; but many of them are gamblers, polygamists, believers in sorcery, whisky-drinkers, and adherents to their heathen customs. They do not hesitate occasionally to murder a "Temanamus doctor," who they suppose has bewitched some sick or departed friend. Of such offenses no cognizance is taken by the laws, and the crime of their commission is not theirs, but our own. We tacitly teach them that their barbarous customs are right, by failing to impose upon them the restraints of civilized laws.

The agency buildings are much dilapidated, and should be repaired.

I found among the employés on the reservation but one man who professed to be a Christian, the doctor, and but one white woman on the reservation, his estimable wife. A new agent has since been appointed, and it is hoped that he will have no other than Christian employés and married men.

Leaving Portland on the evening of the 16th to return home, and stopping several days in San Francisco, two days at Cheyenne, and two days at Lawrence, to obtain information in regard to Indian affairs at the several points named, I reached Pittsburgh on the 10th of October.

At Chicago, having stopped over Sunday and to confer with Mr. Farwell, our baggage was burned in the great fire. With the exception of the minutes of the council, all the papers accumulated on the trip, and my private memoranda made at the reservation, were lost.

The minutes of the council are submitted and will be found to be of much interest, showing as they do the Indian's opinion of their past and present condition as stated by themselves.

From the superintendent of Indian affairs in Oregon, Washington, and California, and from all the agents, &c., and employés of the reservations visited, I received every desired facility within their power to give, and many kindnesses. To them and to the commanders of the military districts in which I visited, and to General John E. Smith at Fort Laramie, and other officers of the Army, I desire to express my thanks for their many courtesies and attention.

To Thos. K. Cree, esq., who accompanied me as clerk, I am indebted for the most effective services and aid.

The advantage of such visits, both to the service and to the Indians, can hardly be over-estimated, and they should be frequent rather than exceptional. The absence of some system of inspection, both of superintendencies and agencies, has been a chief defect in the administration of Indian affairs.

I do not believe it possible that the business of the Indian Department can be satisfactorily conducted without the aid of such inspections. The substitution of inspectors for the permanent superintendents would in many cases be an improvement.

I trust that an effective and satisfactory system may be recommended by the board, and meet with the approbation of Congress during the approaching session.

FELIX R. BRUNOT.

PITTSBURGH, November 20, 1871.

---

#### APPENDIX A d, No. 1.

#### WARM SPRING RESERVATION.

MINUTES OF A COUNCIL HELD AT WARM SPRING RESERVATION, OREGON TERRITORY, BY COMMISSIONER FELIX R. BRUNOT.

WARM SPRING AGENCY, July 24, 1871.

This agency, under the charge of Captain John Smith, agent, is located in Oregon, seventy-five miles south of Dalles, on the Columbia River. It is occupied by the Wascoo, Tenino, and Warm Spring tribes of Indians. Left Dalles on Friday, July 21, and reached the agency on Saturday evening. Attended church service Sunday, conducted by the agent, Captain John Smith, Mr. Brunot, Mr. Cree, and others taking part in the meeting. Found the Indians much discouraged on account of the repeated failure of their crops,

owing to the drought. A large number of the Indians regularly on the reservation were away at the Columbia River, procuring their winter supply of fish.

Held a council with the Indians in the school-house to-day, Commissioner Brunot, with Mr. Cree, his secretary, Captain Smith, the agent, and all the employers, together with the chief and most of the Indians who were on the reservation, being present.

On opening the council Captain Smith said: "I told you two or three years ago that there were men coming from the East to talk with you, to pray with you, and to pray for you. They are here now to talk with you, and to give you good advice. They have also come to hear you talk to them; whatever you wish to say they will listen to. I want you to talk to them freely, for they desire to know all your wants; they will now talk with you."

Mr. Brunot was then introduced, and said: "It is right, my friends, when we come together, to talk of things that pertain to our interest, that we ask our Heavenly Father to be with us, and I will now do so." Mr. Brunot then led in prayer, asking God to bless the council, after which he said: "I am glad to meet with so many Indians here from the Warm Spring, Wascoe, and Tenino tribes, but am sorry that there are not more of you here. I want that the chief who is here, and all the rest of the headmen, shall hear with their ears, and understand with their hearts, and tell those who are not here all that is said. There are many white men who think the Indian has no sense, but many more white men think he has good sense, and will learn if he has a chance. I have seen Indians who were just like white men, and some are very high amongst white men. I know the Indians have good sense if they will use it. You have all heard of the President at Washington; he is our great white man; he believes the Indians have sense, and can learn, and he wants to do all the good for them that he can. He has sent men whom he can trust to visit the Indians, and hear what they have to say, and carry back their word to him. I have come here now not so much to talk to you as to hear what you have to say, and carry it back to the President. I have seen some houses and little farms, and things planted in the ground. I am told they belong to the Indians. I am glad to know it, for it shows what we thought of the Indians was right. I am sorry there are not more of these farms, but I hope many more of you will take lands, and have houses on them. When the white man gets his house, and lives in it, with his stock about him, he is always getting things that he needs, and that add to his comforts. Every day he and his wife and family are getting better off; they send their children to school, where they learn to talk and write, and learn about the white man's God. It is hard to teach a very old man new things, but you can teach the children everything. If we love the children, we want to do them good. I want you to have your children taught just as the white man's children are. After a while some of them will be great white chiefs, but they never will be, unless they go to school and learn. I hope every Indian on this reservation will send his children to the school, and I hope more teachers will be sent to you. There are some things the Indian must learn if he would better his condition, he must learn the white man's laws, and live under them. The white man is learning better all the time, so ought the Indian to do. If I had come to the Dalles and sat down on the boards till it was time to eat, and then got up and ate, and sat down again, I would never have gotten here. If you go to the Dalles to catch fish, and only sit down and look at the river, you would never catch any. If the white man wants a wagon, he cannot sit down and look at the wood; he has to make it; so I had to start to get here; so you must work if you would have fish; so you must work if you would have what you want. Captain Smith and those who are here try to show you how to work your farms, and when you send your boys to school, they must also be taught to work, so that they can do all that the white man does. The President expects the Warm Springs, Wascoes, and Teninoes to do these things, and he sent me to see if they are doing them.

"About religion, I will answer what the chief said yesterday. He said, 'I don't know about religion, because they tell so many different things.' When I came here I traveled out a good many miles and came to two roads; I took one of them and it brought me to the top of the Warm Spring Mountain. I saw one road lead one way and the other another way, and many around the hill. I came a little farther, and found all the good roads went one way, and brought me here. What the good white men tell you about religion is like the roads, they all go the one way—all to the one good place; so take one good road and keep in it, and it will bring you out right at last. When I passed over the mountain, if some bad man had come and given me whisky and told me to go over the rock, I would never have gotten here. I could see which was the good road, and knew that whisky was bad, and that if I went on the rocks I should go wrong. So the Indian can see the right road, and we want him to take it. I want you to talk, to tell me anything you wish to say about the agency, or anything else you wish to speak of."

TA-SE-NICK, of the Wascoe tribe. I want to talk to you; you are my brother, and I am glad to see you. We have looked for you a long time, and I have been wishing that some one from the East would come from those who have been trying to do good to the Indian. I had a notion to get up and go myself, but did not know the way, and had no money. I want to tell how we have been used. Everybody has heard you talk, both the whites and Indians. We have a reservation, but do not know the boundary line. Those present who live near the lines can hear you. I feel now as if I was going to see my children grow up

here. All my ancestors were Indians. I cannot be anything else, but my children will grow up and be white men. You say you have seen our houses, but we have no wagons or anything. You see we have no good houses as was promised us. I was told I should have a good house. Build us a school-house, and I will put my children in it, and never see them again if necessary. We talked so when the treaty was made, but I still raise my children in the old way. The people who were put over me teach me worse things than I knew before. Captain Smith tried to get money to buy implements and to put up houses, but he never could get it. Denison, the old agent, gave us very little—a few blankets and a little scarlet cloth. We were glad to get them, but all that we have now we have bought ourselves. The women got shawls and blankets, and scarlet cloth, but they only lasted a few days. How can you expect the children to learn if they go to school in blankets, and if little girls are naked, how can you teach them to knit. They are still like Indians. Your coming is like the rising of the sun, it brings daylight to us. I think now my children will grow up like white people. You can see what we have been promised by the treaty. We have never gotten anything—all that we have we have bought with our own money. We have a mill, but we cannot have good flour. They say it is the stones. It is the same with the saw-mill, they spent our money on it, but cannot make good lumber for houses. Our Great Father may have sent the money to buy the things that were promised us, but it never got here. I am glad you have come here to see us, and to see how poor we are. Nobody else would live on this poor land. If we had harness or leather, or anything that was good, we would take care of it. If I was to see property about my house I would feel like a white man. I go to church, and I would feel that God had sent these things, and I would want to pray to Him who sent them. The Indians at Simcoe are ahead of us, because they have many things that we have not, and they go to church. What you said I have some in my head, and some in my heart, and I will keep it all; it will do me good. I learned a long time ago from the white man what I now know. I stay on the reservation and behave myself. I have much to tell you, but I want others to talk to you.

BILLY CHINOOK. (Was a guide with Frémont's exploring party.) I am glad to see you, and know you have come here to see us poor people. We are very poor, and live in a very poor country. We used to live a long while ago about the Dalles; white people were all about us. We had made no treaty, and all lived together. Word came that men were coming from Washington to make a treaty with us, and buy our country. We have received messages that were said to be from Washington, but we never saw any one from there until now who would tell us the truth, and whose words we might know were from the Great Father. If I had five children, two boys and three girls, and if I left one boy to take care of his sisters, and after awhile I went and found all was not right, I would take him away and send the other boy to see if he could not do better. I knew the President had one of his sons (agents) here; we wished some one would come from him, and we are glad you have come to see that we are taken good care of. We were taken amongst ourselves, and we wondered if our Great Father had not some pity for us. We did not know then if he cared for us, but we know now, or you would not have come to see us. We can see that the white people about here have wagons and houses. They made them themselves; they are men, and some of them are worth much money. I do not question your word, that you came a long way; people about here who are rich do not care to come over and see how the Indian is getting along. Some time ago we had two homes, the whites had one and we had one; we were a different people: we lived each by himself. You can see your people there; we wear different clothes; you tell us, come here to the reservation, and you can wear the same clothes the white men wear. You tell us that we have two different tongues; you say for both to talk the same language. I don't think you said this yourself, that we will all be one people; I think God told you to say this to us. When we send our children to school, and they are taught but little, how can you expect them to be smart, and know everything. If they were well taught, they would grow up and learn everything, and be like white men. How could you expect our children to learn; we would like to please you, and would like to take hold and have them to learn, but we have no money to pay a school-master; but we would like to have our children taught. When we made the treaty, they promised us school-masters and a great many other things, but they forgot them. We never had any of them. If Denison and Logan and Captain Smith had got the money, you would have seen good houses, and children well taught; but they never got money, and nothing has ever been done. They told us, for five years we were to have \$5,000 per year. We never saw a cent of it. I don't say these things that I want the money or expect you to give it to me, I only want you to know how I have been treated. General Palmer made a treaty with us. We then got hats, coats, and blankets; since then we have not seen anything. One time we had a block-house here; it was burned down, and they said \$3,000 worth of goods were in it. We only got annuity goods that amounted to anything for two years. After that if all we got were placed in a pile, it would be only a foot high. We said that was not more than one man's share, and was not worth \$3,000. The agent said "You cut up your \$5,000 some time ago." I have had nothing to say since. You have come here, a long way. It is just as if the President had come himself to see what we are doing. This is the word we want you to carry to the President. We want our children to learn fast, to work and be men like you, and be fit to do business. Captain Smith told us

last year that he had a letter from Washington that said in a year the Indians would be like the white man, that they would learn everything. You see for yourself that we have not got started; we have no one to whip us up; we are like a lazy horse with no one to start him.

**PAINOST,** (Wascoe tribe.) You can see, as we are sitting about here, that half of us are almost naked. You can't expect much from us; we are Indians. We have not sense enough to do much. It is true the President has given us the reservation to live on. We have been waiting a long while to hear from Washington; we want to know when they are going to fix us off like white people. You see all about are little houses, or little ranches; all of them would only make one good farm. We do not have any wagons, plows, or harness that we can use every day as our own. We have nothing. Some of these people may have had the use of these things belonging to the agency more than I have, but I don't think they have. Many of the men know that there is good land out a little way from the agency, but they can't go and live on it; all must stay here to have the use of the plows and harness; that is how it is. We have cut logs, but they rot in the timber; we have nothing to haul them away with. How, then, can we build houses? I suppose they have sent harness, or money that bought it, but we can only use it a couple of days, and others then get it. So we cannot work all the time. You see the poor Indians live here miserably, and you know how it is. There are many people working on the reservation, (carpenters, blacksmiths, &c.,) but we cannot talk plainly to them and ask for what we want; or they will say we bother them. The Government has put us here, that we might live comfortably. We have but poor ranches, and cannot make a living on this poor land. The Government has tried to do something for us, but the ground will not raise anything. So we must go outside and hunt deer on which to live. Then the news goes to the President that the Indians are wandering off their reservations, troubling everybody. If we would live we must go outside, for this land is poor and will not raise anything. You can see we have no hogs, cows, sheep, or cattle on the reservation. We have nothing that the President has sent us. We have neglected nothing that he has given us. The seed he sent would not grow, and we had to go outside for food on which to live. Ever since we have been here we have been growing poorer and poorer. The Government was to give us something, and we would be glad to receive it. You see our saw-mill? We have no lumber; we have no oxen to haul timber, and we cannot pack it on our backs.

**HOAT,** (Warm Spring, or Upper Deschutes band.) All these men have listened to what you have said, and you have told us that you are sent to see how we are getting along. These are the children of the Great Father; he has our hearts on his books. These Indians have been for a long time waiting to hear good news from him. They want the promises of the treaty carried out, and the goods that were promised us. We were to be all one, the white man and the Indian. I heard all you said, and believe it, and it is the same as if the Great Father had said it. I keep it in my heart, just as if you had written it in a book. My people are afraid of Sunday; it is a great day with them; they do no mischief, but try to think of God. If we did not do this we would not expect God to be our friend after we are dead. That is why I try to do right while I am on the earth. I want God, my Father, to be pleased with me, and kind to me, for He made us, and we are His children. I never was taught anything. All I know I have picked up myself. I say nothing about my farm or house. I see what they are. They told me I would have a house, and many things. I will not tell you how I live or how I have been treated, for others have told you all I could say.

**MACK,** (the chief.) These Snake Indians who are here are below me, as I am below a white man. They have as much right to speak as I have; they should be equal with me in privileges. The President said we should be equal. We are talking like civilized people to-day. The Government said if the Indians tried the teaching, some day he would see the benefit of it. Look upon us! I wish I could learn the white man's ways, although I am a red man. I want all these white men to listen to what we say, and they must not teach the Indian that the Government is bad. The President shall never hear of me going back to my old ways. I thought, after I gave up my country, it was all right. I never sold one-half of it; I sold all of it. I know the funds are almost all gone now. You do not say you will give us any more money. I know there is but little more for us. If the President has pity on a sick man, let him have pity on us, and give us something. These Indians are ignorant, and cannot do anything for themselves. If he gives us anything to help us, and to better our condition, I would be very thankful. You have come almost too late to help us. We wish you would come often. If one lays anything out in the weather, it becomes worthless; if they take care of it, it does not become bad so soon. This the Indian has to learn. I am glad to-day that you have come and talked to these people. I did not lie to the Government when I made the treaty, and I would not go back on the white man. If, when you go home, the Government has a mind to give us anything, it will be all right. If you give us anything more than the treaty calls for, it will be very kind. Since Meacham has been superintendent, we received four wagons last year and four this year. I would not ask Captain Smith to give me a wagon to keep. If the superintendent has not given us such things as we ought to have, I would not blame Captain Smith for it. If I could, I would buy a wagon myself. The wagons and plows are here, but there are not enough for all the Indians.

The surveyors are out surveying our country, and we want plows enough to farm our new land. If I want to plow, I could use a plow; if not, somebody else could use it. Captain Smith has always attended to our wants, and bought all the wheat that he had money to buy. We never have had enough of white man's food to eat, and it pulls us back to a savage life. Where we have a fishery, it is not on our ground; the whites are there. These Indians go hunting, and wander about the whites' country. If I could get food anywhere else, I would go and get it, and not roam about the country. The fishery where we made our living is now owned by a white man; a white man said many things about it that were not so. It is not right to starve the Indians; it is better to kill them. Captain Smith saw we had no grain this year, so he rented the fishery for sixty dollars. The man who owned it tried to keep the Indians out of his garden; but they would not steal anything, and it was his fault if they came there; he rented the fishery to them. The Indian is used to fish, and depends on it for good. This is bad land we live on; some of us want to get better land than this.

HOL-O-QUIL-A, (Tenino or Lower Des Chutes band.) I am glad to see you. I have been expecting you for a long while. I am alone; all my people have left me; my friends are dead. They tried to do as the whites. They left me their habits, as far as they knew how, to be like the whites. They told me this reservation was the place that was picked out for me by the treaty. I came here, and expect to stay. I was told some time ago that we would have a flour-mill and saw-mill, and I see them. They told me I would be like the blacksmith and other employés, and would work with them. They told me I was to have cattle and oxen to plow with. Some of these things I have not seen; they did not come here. The people all know how to work; they can cut down trees, but it does no good; they cannot haul them to the mill. I have some cows and oxen. The white man says, take land and go ahead. I am living at home. I cannot say I have a fire in my house; it is out. I cannot have wagons to haul my wood. I think I am almost like a white man. I don't lie asleep; I get up and work. Look at my farm. I try to live like a white man. I am glad to see you. You came from the place where they first tried to make me like a white man. I think the President will now send me some money, or wagons, or something, and my people will then go to work, and try to do something. I work under disadvantages. I have no fanning-mill to fan out my wheat, and must wait for a wind. I wait, and the sweat pours over my face, and the wind blows the chaff from it in my face. Not only me, but my wife and children, are tired out by the disadvantages under which we work; and when you go back you will report how things are.

HOAT. You have come here, but you have only gone up and down this one creek. You see what little farms we have; our land is only good for sage-brush. We have no good land. The Umatilla and Simcoe reservations are different, so at Klamath; and that is why I thought the reservation at Warm Spring ought to be larger. We have no good farming land, only desert; and that is why we cannot raise anything. I cannot raise any crop, and it makes me no better off than the man who will not work. If I had good land, I would try and raise something to live on. You cannot expect me to have a crop; I have no land on which to raise it. People outside the reservation make a great fuss because I must go out to hunt my food; I cannot help it. I used to hunt for game, and get roots and fish, but this is the reservation that is marked out for me to live on. I like to have plenty of food, as white men have. If I am to work give me something to work with, good machines, and good land on which to work.

Mr. BRUNOT. Is there any good land in the Sinemarsh country?

HOAT. Some land there looks good, but we have never tried it; there are some little springs there.

TE-TE-WASHA, (Warm Spring tribe.) I see you to-day, and you see me. All of the people are red men, children of one Father; and we try to do what will please him. He made us and put us in this land, and we grew upon it.

YAU-CHUST, (Wascow tribe.) I have heard all you said to-day. It is much like what they said at the treaty. When I came here to the reservation I did not expect to trouble the agent to teach me. I see people work and I try to imitate them. All you said to-day, I have in my heart. All the people who have been here as agents have treated us very badly. The people who were sent here to teach us to do right tried to take our wives away from us, and lived with them. When the treaty was made they did not tell us they would do this, but they promised to send good men who would teach us right. These people have told you the truth; they are poor and naked. They took me from as good a place when I came here, and have not bettered my condition. You live better than we do, because God has taught you more. You have talked good words to us, and I think if we do right God will do good to us. The people tell you the truth; we work on our farms and raise what we can, but before winter all is eaten up, and we must wander about and hunt food. If I had cattle and hogs I could live on what is here. Were it not for the fish and roots we get we would starve. I get scared when I see how little food we have, so I must take my children to the mountains where I can get game to keep them; I would be glad to have aid. If I could get land big enough and good enough to live on I would make rails and work on it, and make my living. What you said went to my heart; but we cannot raise enough to live on. The President has heard that we are doing well, and that we raise our

own food; but it is not so. We never have done so, and we cannot raise enough to live on. The people told you about wagons; it is an old story; we wanted them long ago. I cannot look you in the face; I am ashamed. White men have carried away our women. What do you think? White men do these things, and say it is right. I have been here seventeen years and am the same as when I came here. I expect the President thinks we are doing well, because he has sent funds for us, but we never used them; were it not for the fish we would have starved to death. The mountains where we used to hunt we still hunt over. I am an old man; I work hard to try and raise my children; so with my farm; I work till I sweat, to make a living for my children; Captain Smith gives us grain to sow, but it is not enough for even one little farm.

Mr. BRUNOT. When the surveyor gets through in the Sinemarsh country, Captain Smith wants those who have no farms to pick out farms there; he thinks it is better. I want to go to-morrow and look at it, and I hope when Captain Smith is ready that any of the Indians who have not farms will pick out farms for themselves. When the white man takes up a farm he makes a fence, builds a house, ploughs his lands, and plants them. When the Indian goes to farm, he has a great many horses; they give him trouble to keep them away from his crops. When he has no farm, and hunts or goes to war, he wants a great many ponies. But when you try to be like white men, what is the use of so many ponies? You only need two or three to ride about. If I were an Indian, and was getting a farm, I would take some of the horses and trade for a cow. I would sell all my horses except just what I had need for, and I would buy cows; they would have calves; and if the wheat crop failed I would have meat to eat. When I got fields planted and ready for harvest, I would sell more ponies and buy a machine; sell what I do not want and buy what I need. When Hol-o-quit-a was talking, and said he had to throw wheat up and wait for the wind, I thought if he had sold a horse that was not of much use, he could buy a wind-machine; is not that so? That is the way the white man gets these things. Remember this, and some day you will remember the white man who told you how the white men get rich.

When the white men had a great war, (you know about it,) some of them wanted to break away and not have the same chief and the same laws. The headmen were Lincoln and Jeff. Davis. Many people were killed, but now we all have the same laws. Sometimes some bands of Indians on the reservation think they ought to break away. It is not right; you must all try and stick together and be like brothers. When we had the great war the Jeff. Davis men had slaves. When we came together and tried to do right they let all the slaves go free; Lincoln said they must. General Grant, the President, found some Indians had slaves. He said, and all white people said, there should be no more slaves anywhere; nothing but dumb animals must be slaves. The President heard there were some slaves among the Indians, taken from the Snakes and Crows, and he appointed men to hunt them up and set them free. If there are any slaves among these Indians the President wants them sent back to their friends, and when he tries to do what is good for the Indians, he expects them to do what is right. There is one thing more I want to speak about. The Great Spirit told the white man he should have but one wife, and all over the land the whites are increasing. Before the Indians learned what the Great Spirit wanted, some of them had more than one wife—some have more than one now. It is not right. If the Indians keep on in their old way, every year they get fewer. There are not so many now as there were five years ago. If they live in their old way, in a few years, there will be no more Indians. We do not want to see that; we want them to increase in numbers, as well as in all that is good. The young men must only have one wife hereafter. When you get one wife and a farm, not too many horses, but cows instead, and wear clothes like the white man, and come to hear about the white man's God, then I think you are starting right, and if I come back again I will expect to see you more like white men. When I say white men, I mean good white men. There are many bad white men. I do not mean for you to be like such. If a man was to come and tell me to throw away my clothes, wear a blanket, and sleep in the dirt, I would know that man did not tell me what is for my good. If a man was to bring me whiskey, and say "drink it," and I knew it would make me like a brute, I would not take it. A great many of these Indians have as good sense as I have; they know what is right. When bad white men tell you bad things, you know it is wrong. Do what is right, and after awhile you will be happy. I will carry what you have told me to the Great Father, and he will be glad to hear that I have seen you, and can tell about you, and he will be glad to hear you are trying to do what is right.

Captain SMITH. I have much to say, but I will not say it now. In a few weeks, when all are done hunting and fishing, I want all the Indians on the reservation to meet here. I am ordered to enroll all the men and women and children, and to give each an American name. These lands are being surveyed, so that we can give each a piece of land, and give it to him in his American name. We are putting up four more wagons. We hope by next spring to give each a set of harness to keep. Each one who goes on a piece of land, when they call for a wagon, shall have it. We cannot give each one a wagon, but I will promise one to each section for so many persons, and they can all use it. If you go to the Sinemarsh country we will go and help you to build houses and break up the land. In a few days we will make out the list for your annuity goods. We will get plows and things you need. Some of you are as well-off as I am, and ought to help yourselves. Those that

are poor we will help. Our friend, Mr. Brunot, has spoken good. I hope you will remember what he has said. You must not think the President is going to set you up. My father did not do so with me; I worked and made all I have; you can do as well if you work for it. You said you wanted an education. The house is here, and I will see that teachers are provided. Our friends will try and get funds for our school, so that we may take your children and board and teach them.

The council here closed, and all the Indians bid Mr. Brunot good-bye. The next day we drove over the Sinemah country, and in doing so saw a large part of the tillable land of the reservation.

THOMAS K. CREE, *Clerk*.

#### APPENDIX A d, No. 2.

#### YAKAMA INDIANS.

MINUTES OF A COUNCIL HELD WITH SIMCOE INDIANS, AT THEIR RESERVATION, WASHINGTON TERRITORY, BY COMMISSIONER FELIX R. BRUNOT.

SIMCOE RESERVATION, WASHINGTON TERRITORY,  
*Monday, July 31, 1871.*

Left Dalles for Simcoe Reservation, Friday, July 28, arriving Saturday evening, July 29. The reservation is situated due north from Dalles about sixty-five miles. Went to religious service Sunday morning; found the church, a neat building erected by the Indians, crowded. Two Indian ministers preached, and some thirty Indians, professing Christians, took part in the meeting. The Kliquit and Yakima tribes are on this reservation. They have a good body of land, and are making good use of it. Some two or three hundred are professing Christians.

On Monday morning a council was held in the church, Commissioner Brunot and Mr. Cree, clerk, Rev. Mr. Wilbur, the agent, most of the employés, the chief, and most of the Indians being present.

On opening the council, Mr. Brunot said: "When good white people meet together, for whatever purpose, they know they can have no success unless God bless them. So we will look to Him, and ask Him to make our hearts right." He then asked Rev. Mr. Wilbur to lead in prayer. After the prayer, Mr. Brunot said: "I suppose you have before this had commissioners to come and see you. Some of these gray-haired men can recollect them; some of them have been at treaties, but this is a different kind of a visit. I will tell you how I happen to be here. The President is a good man, and wants to see the Indians become like good white men; to have school-teachers, farms, cattle, houses, and all things comfortable about them; he wants them to know about God, and to love Him. Most of the Indians are not like you, who are trying to do so. Many are wild; some of your own people are still wild Indians. The President desires to know what is best to do. He wanted commissioners to visit all the Indians and see them on their reservations, and see how they lived, whether they were wild or not, whether they followed the laws of God, or learned what was bad. He wants to know what the agents and employés are doing, and whether they are good or bad men. The President asked some men to go to the reservations and see the Indians, and learn all about them. He asked them to talk to the Indians, and learn from them what they want to tell the President, and to bring their words back to him. I am one of the men whom the President has asked to do this. I have come here to see this reservation, and to see the Indians on it; to hear what you have to say, and to carry your words back to the Great Father in Washington, so that he can know about you the same as if he had been here. The secretary, Mr. Cree, will put your words on paper so that the President will know all that is said here. My heart is glad to come here and find so many getting to be Christian men; and the President will have a good heart when I tell him I have seen the chief and so many of you like white men, and that you are the same Indians who, not long ago, were no better than the wild Indians on the plains. I want you to talk freely, and if there is anything about the reservation or the agents, either the last one or this one, or any of the people on the reservation, that is not as it should be, or if there is anything wrong, do not be afraid to speak out what is in your hearts. There are some who have been at the church meetings, and can talk better than the others. There are some who think they cannot talk; but if you have anything in your heart that you want me to know, I want you to speak out what you wish to say."

ÆNEAS Long ago, Governor Stevens, by his treaty, introduced law into this country. I was a boy. I heard what he said, and kept that law in my heart. To-day I see the commissioner from Washington. I am glad to see him; I never saw a man who talked good words to us before; my heart is glad. Governor Stevens in the treaty said we could go on the reservation and take a piece of land and run a in on it. Not many of my people came here. I came and took land, and raised a good crop for three years. I am pleased to-day

to hear the same good words from you, and I take it into my heart. There are a few of us here to-day; we do not know that we have done anything wrong. The law that the great chief has made we have kept. It is not in my heart to find fault with the agent here. If the commissioner says anything is not right we will change it. I have confidence that what is done is good. There are some white men who say that we will not be permitted to remain on the reservation. I do not feel badly about it. I did not make this land. God made it, and I was placed upon it. All I fear is the passing away from the world. My heart is quiet, and I don't mind what the white men say about our leaving the reservation. The treaty assigned us this land, and we will remain on it. The great chief (commissioner) has come to us, and we are glad to hear his words; they give us courage, and we now know that we will remain here, and our children will die on this reservation. Long ago, the Great Father said, "This is your land, and here you shall remain." White men come and say, we want to put cattle on your land by and by; they say we will pay you for it, and so they will do now. I have my cattle here; occasionally I lose some, or perhaps the drovers take them away. My idea is to let them increase here, and not to lose them. I want to know what you think of other people's cattle being kept here on our land.

MAN-I-WACH. I heard Governor Stevens's law, and recollect it. I was one of them who made the treaty. At that time it was said we were all to be friends, and here I am, a friend of the whites. Governor Stevens was sent by the President, and to-day another great chief is here from Washington. My heart is glad. The President is our father and does not forget his children away out here. I never saw the President; he is far off; but I think of him often; this is my heart.

SHA-WA-NIE, (JAMES.) Long ago I knew nothing; it was as if I had been asleep and just woke up. We often disputed about our chief years ago, but Joe Stuires, our chief, now takes good care of us. Captain Smith came here and turned Joe out, and I wondered who should be our chief. My mind is that Joe Stuires should always be our chief. Some of the Indians say they don't want Joe Stuires to be chief, and they are hunting another man. That is all I have to say to the great chief.

WATCH-CHUM-KEE, (an old man who signed the treaty.) My heart is glad to see the great chief to-day. The President has sent you, and it is as if the President talked himself to us. We want you to instruct us. We have hearts that we cannot express. We can listen, but cannot express what we wish to say. There are on the reservation three persons as it were. Our people have different hearts. It is good that you have come to see this people, looking like your people, and to see how our hearts are. Our hearts are good, and we want to do what is right. Long ago we had foolish hearts, and wanted to go to war, but now all is good. The great chief (President) has sent word to be quiet and friendly, and so we are. Half of us have taken the great chief's advice, and our children are growing here, and we are happy, and our cattle and horses are increasing. We love our land, and we don't want it taken away, and we feel sad when white men talk of taking our land. To-day I tell you our hearts, and you will tell the President for us. All over the land all is peace. Our old men who fought have passed away, and all is good.

GEORGE PAUL. My heart is glad to-day to see the great chief. My heart is warm. It is not all right here. It is as if there were three people; the Catholics, the drummers, (or heathen,) and ourselves. This does not give us good hearts. We do not all agree, and come to get good advice. Half do not come up to receive the instruction that is given. To-day you will see for yourself. We would like all to come up and get good advice. We would like the others to be separated from us, and those that are left would be as one. These young men are like my brothers. We like your words of instruction, and will always keep them in our hearts. On Sabbath I felt my heart was weak. Only the Great God sees all my heart. My heart is glad to-day. Although the great chief (President) is away off, you represent him; you rouse us up. All are happy as we were when Wilbur was returned as agent. It was then as if we had been asleep and woke up. Mr. Wilbur brought good laws, and we keep them; we throw away what is bad. A long time ago, when Lee and Perkins (missionaries) came to the Dalles, the older Indians were like dead; they woke them up, but the old Indians are almost all gone. Mr. Wilbur came here and woke us up as Perkins did the others. We are happy here. White people tell different stories, but we don't get them into our hearts. We are fixed here, and when we do wrong we will lose the reservation, but if we do right we will always be here and will be happy. There are three heads. There are drummers, Catholics, and Mr. Wilbur's people. We don't like it. Our hearts are glad; we want to follow the advice of Mr. Wilbur.

JOHN LUMLEY. Long ago I lived at Fort Vancouver. I did not know anything when I came here. I heard Governor Stevens say good words. He said if we did right, all would be well, and so it is. The great chief (President) sent Mr. Wilbur here, and when he came we knew nothing. All we young men used to do what was bad, and we liked it. We did not get along well. Mr. Wilbur said to throw what was bad away. My heart was like a stone for two summers and two winters; then I took Mr. Wilbur's advice. The President said all the Indians should be good, and I took that advice. Our parents were wicked and knew nothing that was good. Now that we have taken the heart of the whites, my heart is happy. To-day the advice given is good; we do not want to do what is bad. Whatever the great chief (commissioner) says we will do. That is the heart of all the young men.

**GEO. TOPNISH.** I see the great chief; he is a great man. The President has sent you, and you bear his message. My heart is glad to see you to-day. This land (our mother earth) will understand what you say.

**PAN-O-PLÉ-O-PIKE.** I see two chiefs here who came from a great way off. Our Great Father is a great way off, but he sends his children to see us. I am a red man. The ground is here. My father took care of it. Here is where the red man grew on the land. Long ago your brothers came here and talked about this land. It is hard for others to step in and take our country from us. The sun is there and watches over the earth and the Indians that are on it. The sun looks at the earth, and wants to weigh it. (On being interrupted and told the interpreter could not understand him he said :) Smo-haul-er is not my father. Our Father is in Heaven. God gave us hearts. God made all as one, and none are strangers. That is all.

**GEORGE WATERS** (an Indian preacher.) Long ago, when a boy, I lived at Fort Vancouver. I there heard the soldiers were going to take the Indians and bring them up to this agency and teach them, and that they would become like the whites, and not remain always like Indians; that they would gather the boys and girls together and teach them the law of the Lord, and so it has been done. I came here in the spring, and Mr. Wilbur came in the fall. Mr. Wilbur had begun school and at once I went to it. My brothers, I tell you, the old people do not take hold. We take the Advocate (paper) and read it to them, but they don't understand it. I heard the Indians were to be instructed and left on the reservation. We understand the Methodist way of worship. The Catholics make as it were two people; some have not good hearts. These drummers do not understand what is good, and they do what is bad.

**JOE STECK.** I don't know how to talk much and may make a mistake. I know the hearts of the whites; from a boy I have been with them. I am a Kliquitat. I was raised in the Willamette. In time of war we were brought here. I was used by General Wright as a guide. I do not want to say anything, except that my heart is good. I am like my other friends. We think much of the three heads, Catholics, drummers, and our own. Every day we talk about them. My mind is that the great chief ought to know all about it. My heart is glad that the great chief has come. It is as if the President were here and I talked with him. You have taken pity on us and will help us by your coming to this country. The President gives us presents; we don't care much for them, but we want a good man like Mr. Wilbur to remain with us. I am afraid of men who are sent who are not Christians. Many white men about here want to be friends with me. They say Mr. Wilbur is fooling me, not to mind him; such is not my heart. Governor Stevens and General Palmer said when we found good men to stick by them, and I find it is good advice. Two years ago it was as if we had been asleep, and when we woke, had found our good man had gone. We want Mr. Wilbur to be left always with us. Kendall, who was superintendent, turned Mr. Wilbur away, and our hearts were sad. We are contented with our agent and all is well. These common white men say that which hurts me when they say Mr. Wilbur takes our money, but I can see he don't. If you see anything that is wrong tell us.

**TOM.** I don't know anything. Long ago I lived away down the valley. When I came to this country I remained awhile at the Dalles, and heard of the trouble between the whites and Indians. My heart wept, for I thought soon I would be killed. In a little while I heard peace was made, and I was glad. Soon Mr. Wilbur came, and all of us then were like as if we slept. Mr. Wilbur took pity on us and made us make up, and that pleased me. My mind is to keep up this instruction. I want all my people to love Jesus and to do what is right. I know this is the heart of the whites, to do us good. They love Jesus, and want to make friends with us. Long ago they did not like us, but now they make friends with us and I am glad. I know nothing; I am young; but your advice will do us good. My heart is glad to see you. I don't care about cattle and wealth, but I want good words. My heart is pleased to see you, who have come from so far away to see how the Indians live. Many of our people are well off, and I would be glad if all were so.

**KLIQUITAT PETER.** I was a boy and knew nothing. These young men are my brothers; these old men my fathers. Joe Stuire is the best chief. He is always doing something good for young men, and he don't do anything wrong. Our hearts are different. Some say what we do is not right. That is not the heart of God. Our fathers knew nothing; they never took good advice. God knows us. The President watches over us. It is with us as among the whites. Some are good and some bad. We are glad to go where good instruction is given. We want to follow good advice, and it is good that you help us. This is all our minds. We don't want to do anything that is bad. We like Mr. Wilbur, and want him to be here and give us advice. Some time ago Captain Smith came and almost ruined us. Some whites said it was good; but that is not our heart.

**HEZEKIAH.** Long ago I was a boy, and I heard General Palmer and Governor Stevens. They came and told the Indians the words of the Great Father. We received their instruction, and they assigned us these lands. These old men are dead, and a new generation has come up. The young men think it good that this land is ours. We want to follow the instruction from Washington. Some Indians don't want to. The chief at Washington wants to lift up the Indians. Mr. Wilbur instructs the people here, and they follow his

advice. Captain Smith was here and remained awhile. Soon the Indians followed no good advice. Mr. Wilbur came back and it was as if he had gotten us up again from our wild ways, and so you find us.

JOE STUIRE, (the chief.) I was raised among the whites and know many things about them. I never thought I would be chief. I was always a friend of the whites. When they said I should not do wrong I listened to what they said. I try to do right. I don't steal from the whites. My heart was always good to them, and so it is now. I see the great chief who came to us. I heard what he said, and I will keep it in my heart. I will always remember what you say. Some of these young men whom you see—this is not the country of their fathers. The treaty brought them here. The Government wants to give white men's hearts to us, and these young men take advice of the white men. We want to do as white men do. We want to get the Bible into our hearts; we hunger for it. We are glad you come to help us. We want all to follow after the Scriptures. These old men, all they know is the treaty. They say I helped make the treaty, and that is all they know. I wish they would come out of this and do right. If the people were all good, white men would not trouble us. Some of my people are wild and get into trouble with the whites. I am ashamed of them, because they are my people.

THOMAS PEARL, (a preacher.) I am a man and see the great chief who visits us. My heart is glad. I never thought a great man from Washington would come. The President is away off, but sends you to see us. This is not my country. We were not raised here, but about Fort Vancouver. The tribes that belong here do not want the whites to come here, and they always want to make trouble. When a boy, I heard they would make war with the whites. I was at Vancouver. I learned to work. I saw soldiers traveling about. We did not know anything about this country. The commanding officer put the Indians in a fort to keep soldiers from killing us. We remained one year with guards to keep us, and we were safe. The commander then told us this land was assigned to us, and the tribes who belonged here left, and we came here and found an agent. We were strangers and feared to come to this country alone, and we were brought here. We were Indians then, not men as we are now. We were in old times like the old Indians—great fighters. We fought other tribes and people. Soon a missionary came, and we wondered whether he would be a big man. Dr. Lonzedale and Mr. Wilbur came as missionaries. They fixed up a room and hunted children for a school. He found us and said, "Boys, won't you come to school?" I said "Yes." Then the people who had left their country began to come back. They hate us, and say it is not our country. We know the President assigned us this country. We did as the agent said, and we received an education. I am a man. I have a new heart. The old heart we received from our fathers has passed away. We can write, and why should we not be pleased toward the President, for he sent teachers for us, and we are pleased toward him. We want the President to know we are learning. We want Mr. Wilbur to remain. Now I have a license to preach. We have two churches. The great chief sits in one of my pulpits, and I am glad. I want to say a word to you. You see these people. We never could find one to take the place of our agent, Mr. Wilbur. Some, maybe, would want another. They would say they obey the laws of the President, but don't take the advice of the agent. We must obey Mr. Wilbur if we would obey the President. I tell you the feelings of our young men. Mr. Wilbur does not tell me to say so, but it is our heart. We want him to stay, and we want the President to know that he is the man for us.

CHAI-LOT. I am a common man—no chief. Nobody gave me advice to make my heart good. Now I see the great chief who has come to us, and what he has said we take it into our hearts. The great chief has talked good to us, and we want to keep it. You have a heart, and I have one. I take what you say, and I will keep it. Some of the Indians say they never get advice. Now they get it from you. The President wants all to have one mind. Your men and women are my brothers and sisters. I don't say we all have only one mind, but all these young men and women have one mind. Mr. Wilbur understands us all. We want the President to know our hearts.

WAH-TUM-KEE. I have forgotten part of my mind before when I talked. Joe Stuire is like my brother; he talked about the difficulties. I was at the fight just here, Colonel Wright gave us advice at that time. He told us then all the Indians would live here. I kept his words; he said that half way from the Dalles was the line. He said the Kliquitat Indians from below would come here first. The treaty brought us here and nobody can fault us for living here. Only the common people find fault with others coming here. The chiefs don't say anything. I have watched what has been said. Colonel Wright gave us good advice, and I kept it; he said no one could drive cattle into our country; only the Indian cattle could be kept, and soon you will have plenty. One time I was a leading man, but the young men have taken things in hand. I said nothing about the cattle. There are plenty of cattle on our reservation belonging to the whites. We lose cattle, and dare not say anything. That is what I want to say.

SKUCUM, (JOHN.) We look upon Mr. Wilbur as our father. There was a chief came from Vancouver with us; he died; his ears were open to good advice. We were not raised in this country. The President wanted to give us a place to live; he gave us this country. At first we heard nothing good here; we knew the President as father had assigned this

to us; we took his advice and came. Our parents came here, and before they died they told us to listen to good advice from the President, and follow it; this is our heart. The good talk of the great chief is here. The advice he gives is good. We have good houses and plenty of food. Instruction from the President is always good news and we follow his advice.

Mr. BRUNOT. I have heard from many, and I think they have said the hearts of all. Is that so? Some things you have said I will speak about; you said some of the Indians were not here. I want some one to answer why they are not. There are two reasons: one is, there are some who are afraid of good talk; others did not know of our meeting, being too far off. I am sorry all are not here; you must tell the absent what is good, and get them to do what the President wants all to do. One said, the whites say you won't be allowed to stay here always. You can make it sure that you will always live here by cultivating the land and getting others of your tribes to do so. Learn to talk English, and you will be the same as white men, and no one will want you to go anywhere else. Some day some of your children will go to Washington and will help make laws for whites and Indians. If you want that, you must work for it. Mr. Wilbur has taught you many things, but you must learn to do more, and I hope the time will come when your country will all be cultivated. You must send your children to school, and teach them all you know; and when you grow old your children can read and write, and will know what God wants them to do. This is what I want all of you to keep in your hearts, not to be satisfied with things as they are now, but keep trying to do better. The President will some day have the land surveyed, and you will get a paper that will tell that the lands are yours and your children's, and I hope more of the children will have lands marked out for them. You speak of three kinds of people. One kind is the Drummers; what good does their religion do them? They are no better than when they were wild. You know what is right and we want you to do it. There is one other thing I want to say a word about. There are some Indians who have more than one wife; this is bad; it is against the white man's laws, and God's laws, and where the Indians have more than one wife they are dying out.

FRANK. I lived long ago at Simcoe. My heart was, as it were, asleep. I used to hear good talk while I lived here. I was like a good man. Mr. Wilbur gave me good advice and I took it. Now it is like as if I had thrown away good things. I went away; I went among those who did all that was wrong. My heart was sick. Common Indians and common white men do wrong, and I say nothing. I feel as if I had found something and hid it. When I see the white men, they are my friends. I don't steal white men's cattle. I don't want to steal; I want to do well, to farm; but I am away by myself among bad people.

Mr. WILBUR. I know you all, how and where you live, who keep the laws of the President and the laws of God. I want all who have heard what the President's messenger has said to take it into your hearts and keep it there.

After the council three Indians came and said they wanted to talk with the great chief. They belong to the heathen "Drummers" or "Snoolhollers."

WAN-TOOSE (a Snoolholler Indian) said: The commissioner has come to this land. The President has done a good thing in sending him here. We are glad to have you bring the message of the President to us. We are glad you have seen our lands and know our condition. Our land is as dear to us as our flesh and bones. The talk from Washington is good, and what you bring is the same. Our mind is the same. The talk you bring makes us up, and we will keep it. As the sun gives light to the world, so your words give light to our hearts, and as we are pleased to see the sun, so we are glad to see those that come with good hearts to the Indian. When Sunday comes our mind is to make a good heart to God, as you do; when we deem it is only a different way of getting a good heart toward God. When the sun shines it brings vegetation, so the sunlight is good for all and dispels darkness; when we grow up in the light we grow up great men. Our mind is that we ought to live as one, the whites and the Indians.

WEO-NI-TO, (Snoolholler.) This is our land. We have been planted and grown like a tree on the land. As a tree is valuable on the land, so is our being planted here good for the land. First was the earth, then riches was placed in it, then man was placed on it. It is good for man and woman to be together on the earth; a home is given and they are placed in it. We do not know how the earth was made, nor do we say who made it. The earth was peopled and their hearts are good, and my mind is that it is as it ought to be. The world was peopled by whites and Indians, and they should all grow as one flesh.

Mr. BRUNOT. You have not got it quite right. God was first. He made the earth and all things. He made the whites and Indians; the whites away to the East, the Indians here. God gave the white man the Bible to tell about Him. The white and red men were all bad once. God took pity on them and sent His Son to die, instead of having all the people die. We would have you learn of all this.

Before leaving the agency we visited a large number of the Indians in their homes and found them living very comfortably. There are a large number who are quite well off, and almost all seemed contented and happy.

THOS. K. CREE,  
Secretary.

## APPENDIX A d, No. 3.

## TULALIP RESERVATION.

MINUTES OF A COUNCIL HELD AT THE TULALIP RESERVATION, WASHINGTON TERRITORY,  
BY COMMISSIONER FELIX H. BRUNOT.

COUNCIL AT TULALIP RESERVATION,  
*Washington Territory, August 28, 1871.*

Tulalip Reservation is situated on a beautiful bay of the same name running into the mainland from Possession Inlet, an arm of Puget Sound. There is but little of the land at present under cultivation, as it is of a very poor quality; but an extensive beaver marsh, if drained, would provide all those desiring it with good homes. The reservation is well wooded, and many of the Indians are engaged in logging, some on their own and others on reservation account. The Indians are well dressed and industrious, and some of them speak English. The boarding-school, in which are forty-seven boys and girls, is in a very good condition.

*August 28.*—A council was held with the Indians of this reservation at 10 a. m., meeting in front of the trading-house. There were present Hon. F. R. Brunot, chairman of the board of Indian commissioners, and his secretary; General S. J. McKinney, superintendent of Indian affairs for Washington Territory; Father Chirouse, superintendent; Napoleon, the chief, and all the minor chiefs and young men; the employés, and a large number of the men and women of the tribe. Before the council opened, Napoleon, the chief, reminded them that he was the only one left of the old men who took part in the treaty with Governor Stevens; all the others had passed away.

On opening the council Mr. Brunot said: My friends, many of us were at church yesterday, because it was God's holy day, and we went to worship Him. It is our duty to serve Him on all days. He knows we are dependent on Him for all we have. When the white men meet for good counsel we ask God to keep us and bless us in what we do and say. I will ask Mr. Cree to pray to God. Mr. Cree then led in prayer, all devoutly standing.

Mr. BRUNOT. I heard an Indian say that the white man has two religions. In one way it looks so; but if you understand you will see that it is only one. We all believe in the same God and the same Lord Jesus; and we all believe that we are to be saved by Him. If you all want to go to Seattle, some would go around one side of the island, some would go by the other side, you would all meet there, and you would know that some had only taken a little different way in which to go. We are all going to the same God and the same heaven, and if in earnest we will all meet there at last. But if an Indian started to Seattle and he turned in at Muckleshoot, or some other place where he got drink, we would know he had not gone the right way. So a white man or Indian may say he is trying to go to heaven; but if he drinks whisky, has two or three wives, and is bad, he will never get there. My friends, the President at Washington hears a great many things about the Indians on the sound. He wants to know exactly about them from some one straight from them who has seen them. He sent me here. I did not come to make any treaty. There will be no more treaties; the last one was made by Governor Stevens. I have come that I might see what reservation they laid out for you. I have come to see if in all these years since the reservation was laid out, you have done anything to improve the lands on it; what improvement has been made in you, and to see whether you will be able to take care of yourselves when the time of the treaty is up; to see, if you have not done right in the past, whether you want to do so now; and I want to hear what words you have to say. I want to tell you that more than half the years of the treaty are gone. Look back at what is gone. When the treaty was made there were many Indians around the sound; there were many old men, young men, and children. There are not near so many now as there were then. When that treaty was made there were not many white men; now they are much more numerous, and yet the white men are only just beginning to come. Before the treaty is up there will be a hundred white men where there is one now. Why do the Indians die out and white men increase? Is it not because the whites and the Indians live differently? You young men and women here can see the difference. Do you want the Indians to be all gone in a few years? I think not. The President does not want them to be destroyed. The great white chiefs in the cities do not want it. It is only bad men who want your land, who wish you to be destroyed. Now I want to know if you Indians will help the bad whites who want you to die out, or the President who wants you to increase? If you want your race not to die out, you must live like good white men. I am glad to see so many of you are trying; but still, when I see so many who are not trying, I feel sorry. You think now you have not been helped as much as you ought to have been. Some of the agents sent by the Great Father in times past have not done right. You think some things have been promised that you did not get; that is so, and I know it is wrong.

The President thinks those things that are bad in the past he cannot help; but he wants to help you if you will do right in the future. I want to see all of you make up your minds hereafter as to what is right, and to try and get all the other Indians to do right. You never

can get far ahead unless you try. You cannot spend your money for whisky and at the same time get a house with it. You cannot gamble and get rich; white men cannot do it any more than Indians. Instead of spending your money for what is bad, use it to buy a cow, or a horse, or sheep, or pigs, or something that will increase, and after a while will make you rich, or will help you build and furnish a house. Suppose this reservation belonged to me, what do you think I would do with it? If I had nothing else but a blanket and a pair of pants, a shovel, and an ax—if I had these, and nothing else, I would soon be richer than the President. I would go somewhere and work a week or two, and get a little money and buy something to eat, with it. Then I would take my blanket, ax, and shovel, and I would go to the Beaver Meadow Swamp and begin digging a ditch. As long as my provision lasted I would dig at it. Then I would go and earn more, and I would keep on digging till the marsh was drained, and when it was drained I would cut the hay, and soon be as rich as the President. I could do that if I had nobody to help me. You have this reservation; there is plenty of good land; you have strong arms and good brains; you know what is right, and I want to know why you do not go to work at this? Is it not good? Can you not do it? I know you can. I want you to put your heads together and agree to go to work at this ditch. Father Chirouse will help you, and you can make money out of it. I could tell you many things you could do for your good, but it would take all day. I know you can think it out yourselves. You can help each other, for the reservation belongs to all of you, and in this way you can all get rich. I will not talk any more now, but I want you to say what you wish me to know. You need not be afraid of anybody, but speak right out. I have been talking for the President and all the chiefs at Washington. If all the chiefs came here from Washington and talked, we would be kept all week; so if all you men talk, each for himself, it would keep me too long. I want you to select two or three to talk for all the rest, and I will listen to what they have to say. You must not talk about little things, but what concerns all of you, and I will have it put on paper, and the President can read it; he does not want any little talk, or bad talk.

**GENERAL MCKINNEY.** I want to say a few words. I did not come here to make a speech, but I came to hear what Mr. Brunot had to say. I am glad to hear all he has said; you all know it is like what I have said to you. I want all to speak freely and not to be afraid, and lest some will be afraid to say what you want, Father Chirouse and I will walk while you talk.

**FATHER CHIROUSE.** Be free and speak what you wish.

**CHARLEY (LITTLE.)** I understand you, and am glad to hear your advice about working our lands. We have no tools to work with. If I split rails I would have to pack them on my shoulders. We never have had any ditching tools. I will promise to go and work my lands. I came here to see one of the employés and asked for a scythe. He let me have one; in two days I returned it, and the employé got mad at me. Since then I never asked for any tools. I feel happy and glad, and thank you for the advice you gave us, and I will act on it.

**NAPOLÉON,** the chief, came forward with much dignity and laid before Mr. Brunot a bunch of split sticks, saying with great earnestness: These represent the number of my people killed by the whites during the past year, all Indian chiefs, fifteen of them, and yet nothing has been done by the Government to punish these wicked white men who killed my people. These fifteen men were not white men, but were Indians, whom the whites have killed. They killed them by selling them whisky. We always receive and keep good advice. I do not speak of these fifteen men killed because of a bad heart, but I want you to know what kind of people live about us. Governor Stevens, at the treaty, gave me a head chief's paper. I have always kept it. Governor Stevens has done what he promised. The agents and superintendent, after they came, did not do right. Stevens and Simmons did what they promised. The whites now scare all the Indians, and we look now wondering when all the Indians will be killed. We are glad to see you, and our hearts will be up. The poor Indians are scared now by the bad whites, and your coming has made our hearts strong. We never saw any man as agent on the reservation who had pity on the Indians; they all frightened them. As soon as the new agent comes on the reservation the Indians go away; they wander all over the country, get whisky, and are killed. When some of our agents who are gone were here there were many Indians on the reservation. The agents brought whisky on the reservation, and drank it; the Indians thought it must be good, and now they drink it. That is what killed the Indians, and we feel sad; that is what I want to tell you; that is what makes the Indians leave the reservation. There is no farm, because there are no Indians to make it. You come here and don't see any farming. The Indians are scared and feel afraid. The whites say, "You will all be killed soon," and the Indians don't care to work the land. I think you will give us advice that is good. Mr. Garfield, before he went to Washington, gave us good advice. I keep it in my heart.

**PETER.** I will tell you the truth, and you will hear me. Twelve years ago the treaty was made. I know how the Indians have grown, and what the agents have done. All the young Indians wait, for they have been promising many things to us. We wait till the agent does as he promises; till he fixes our houses and lands. Some of the boys talk English and have sense. When we got a new agent he never did right; they always did wrong. They never help the Indians, and never do what the President wants them to do.

The President sent agents to help the Indians. Some of the young men hear the good whites say good words, and they wait for the agents to keep that. The agents say, "In twenty years your money will all be paid," and we wait for that. Every agent has done wrong. I know all of them. I hear what you say; but I never say anything to the superintendent. They all say, "No money comes from Washington." I am glad to see you: you are a good man and will hear me. If I am well, I will take some money and go to Washington, and tell the President how things are done. McKinney (the superintendent) has gone to the woods. He knows something is bad. When he came before all the Indians were glad to see him; he came from Washington; the Indians heard what he said. McKinney was talking in the wrong way. When he talked it seemed as if a big wind blew all the Indians away. There were many Indians on this reservation; all looked at McKinney and thought he would do right; he don't do anything. Since he came almost all the Indians have been killed. The Indians have been scared by the agent; they leave their houses; the agents see the empty houses and break them down, and take them. The Indians built the houses themselves. The carpenter was here, but he did not build them; all is true that I tell you. We hope the President will help us. All the young Indians want to live as white people; they are not lazy. They see the Indian agent; he works for himself and never helps the Indian. If you get time I will take you about the bay, and I will show you what the Government has given the Indian. I cannot tell you many stories from the beginning; the sun would go down before I finished. My head is flat, but I know what has been done here. O, sir, you will be my messenger to the President. Tell him there are many old Indians with white hair; they cannot see you; some are blind. They lay on the reservation; they lay on the ground; they have nothing to cover themselves. We feel sorry for them. We heard, when the treaty was made, that when an old man or woman got poor the Government would keep them. When we know this we ought not to have to keep them; it is the agent's place to do so. These old men and women cannot work; let the Government help them. All these old people ought to be kept by the Government. God gave them the land and they sold it to the Government. I tell you this for them. You must hear me, good sir; it is good. I would say the same to McKinney. All thought he would help us, but he did nothing for us. He helps the school, that is all; that is all Father Chirouse does; he is only the schoolmaster. He sent Peter to Olympia to see McKinney. McKinney built the big church on the mission. Another agent, Mr. Howe, sawed us lumber for our houses. We built the houses ourselves; we spent all our money to build them. There is an Indian there who did not know how to work; he was trying to build a house with his own money; the whites took it for an ox-house at the log-camp. We want the Government to give us cows or pigs, or something that is of use, and to give blankets to the old men. I am not asking money of the President for the agent, but for the Indian. I will be glad to see the Government help the old people. My father was Napoleon's brother; that is why I say take pity on them.

MR. BRUNOT. It would take four months to go to Washington in a canoe; if I go by boats and railroads it would take two weeks, and I have much to do and little time in which to do it. I must go to two more reservations before I start home, so I have little time to spend here. I am going to stay here just half an hour longer, then I must go. Whoever talks must know I can only give half an hour here.

CLUM SHELTON. I will talk and you must listen. I will tell you how our agents have done. We are almost all gone. Our agents always do wrong when they come to Tulalip. The President promises much and the Indians agree to the treaty. They agree to help us; we never have seen any money come for our land; you commissioners from Washington, look at that blanket; [throwing a blanket contemptuously on the ground;] I got it from the Government. Is that what bought our land? Is that money? We got these. The agent keeps the best. The Government promises good goods, such as white men get. This blanket is new, but it looks old. Is that the money for our land? When the goods come, there are none to give the old Indians. We had some cattle. The agent said they belonged to the Indians; when we want to use the oxen, they never let the Indians have them. We are poor and miserable on this reservation. Tell the Great Father what we are; tell him to give us what we want. I am old; I want to see something before I die to make the young people happy. We are very poor and miserable on this reservation.

WILLIAM. God is my Heavenly Father, you are my father from Washington. If you look at our houses you will see they are very poor. I tell you we are very poor; see the tools we work with; [exhibiting a stone hammer, and other Indian tools;] it is with these we have to build our houses; we use a stone for a hammer. We are almost all dead, but we are glad to see you. One of our employers treats us like dogs; he uses us like slaves. I tell you the truth, he struck an Indian on the face, and the blood gushed out. You tell us to talk freely, and I do so. The whites cheat us, and some of our agents cheat us. I speak to you; I talk in the presence of the God who made us. I talk to you as my father. I am glad to see you; I came from one of these tribes. I have no land now. I am a poor old man. God made me; the whites took our land. Here is my country below this reservation; near it is Tulalip. I want a paper to keep any white men away when they come. They scare the old men and want to kill us.

HALLUM. Did you come from Washington? I don't believe you, for many said they

came from there before. They promise to tell the President our wants, but soon they forget it. In a little while they forget and take their words and throw them away: so these men who came before said. They say we will take the Indians' words to Washington. They wrote what the Indian said, and said the words would go to Washington; maybe when half way to Washington they throw the paper away. O sir! we are cheated here, and maybe they cheat the Government too. When the President sends men, the Indians listen, but they do not bring the President's words to them. We will try it again. We think you are a good man. We see you write our words down, and we think you will take them to Washington. You must not take the words of the whites when they talk about the Indians. When a man comes from Washington, the whites advise him before the Indians talk to him. We will try again. We feel sorry Father Chirouse and McKenney are gone and do not hear what we say. They seem mad and do not want to see the Indians. Here we are talking, and we tell the truth. When they come back they will say the Indians are liars; [he here produced an old hoe, saw, and drawing-knife:] I received these tools from Lincoln; I keep them and use them when I want to work. Now see these, and you will see what the white men tell the President when they say the Indians live like the whites and get plenty of tools. Agents say to the Indians no money comes from Washington; they always say, "If the money comes we will help you." We ask something from Washington because we sold our land, and were promised these things for it. When the white people come as agents or superintendents they get rich. When the President sends a poor white man as agent, he says you must go to the Indians and work with them. The President sends the money, but the Indians never get a cent of it. We do not know where the money goes; perhaps it is drowned on the way. All these tribes receive no money from the President. We cannot say anything else; this is true. Listen to what we say, and take it to the President, and write back to us from Washington. You see these old Indians; they cannot go to school—they are too old. I was sorry when Father Chirouse went to the woods. I am not a priest; I am an Indian, not a white man. There are some Catholics belong to the mission. There is another kind of Indians who don't pray to God; McKenney and father Chirouse talk to these Indians and tell them to believe in God, and say we must live like white men. Father Chirouse talks to the Indians who are not Catholics; they don't know what to do, and it scares them away; some of the Indians think they must not do what they have been accustomed to do in their Indian ways, so they go away. There are only a few Indian homes here, they are scattered everywhere. If you will do what is right all the Indians will settle on this reservation. We would like to talk with you, but we cannot; it would take two or three days.

MR. BRUNOT. I am sorry I cannot wait to hear all you have to say. I am glad some have talked, and what you have said I will take to Washington. But the President has many people to think about, and there are many Indians, too; there are more than fifty reservations. The President has to leave the care of many things to other people. I know he wants you to do well, and he wants to send people here who will do right. He has been told by many people that Father Chirouse is a good man, and will do what is right, and he has appointed him to the agency. He has not been agent long, and some of you may think you do not like him, but it is best to wait awhile and see. He is your agent now, and you must try him. We think he will do what is right as far as he can. You must follow his advice, and do what is best for yourselves. If the President finds there is any one who don't do right, he will send him away; but because one man don't like the agent, it does not prove he is bad. Another thinks him good; which shall the President believe? He cannot tell; but if the large majority are satisfied, the others ought to be. You spoke of one man who some of the Indians think does not use them right. I hope the Indians will find that man is going to do right by them hereafter. I hope there will not be any more trouble, but I tell the Indians and the white men the President will not have men on the reservation who will not do right, if he knows it. He intends to have good men. I told you I would give you half an hour. I gave you that time. The steam is up on the boat, and I must go away, but if you want this man (Johnny English) to talk, hold up your hands, and I will hear him for five minutes.

JOHNNY ENGLISH. All these Indians say one of these men is very bad. We like Father Chirouse very well, because he tries to do what is right; when he begins to work he does one thing at a time. The President wants to get a man for farmer for the Indians, to show them how to plant vegetables. He never did anything about farming; he does something else; he is logging. He did not come for this; he came here to teach the Indians how to farm. We get a blacksmith and a carpenter—they do very well for us. There is a man named Peter—he does very well; he staid a few days and did a great deal. The farmer never does anything on the farm. If an Indian goes slow he takes a club and strikes him. If he wants to stay here and work for us he must do right. The Indians don't want to see their people hurt by the whites. We want a carpenter here to build houses, so that these Indian boys who want to can live like white people. We want cattle and a good piece of land. We want our houses fixed. The agents always say the employés have no time to work for the Indians. The houses are built for the employés, not for the Indians. We never had a carpenter to help us.

MR. BRUNOT. I want all who say as he does about the farmer to stand up. [All stood up

except a few of the older men.] I must go. What you have said I have in my heart. You say the Indians have been waiting for many things. Suppose instead of waiting you had been working? It would have been better. I want all to go ahead and do what is right, and not to wait; that you will find will be for the best. Good-by.

Before leaving, an appeal was made to Commissioner Brunot in behalf of two Indians confined with ball and chain, and sentenced to twelve months' hard labor each, for committing a murder, of which they acknowledged their guilt.

Mr. Brunot said that God's law and the white man's law was, that when one killed another the murderer must be hung; that no money would buy his release, and that he hoped the same would soon be the Indian law, but that now it was permitted to punish an Indian with from one to five years' imprisonment; that instead of trying to get them away from punishment they should be anxious to have them punished, and thus prevent the Indians killing each other. Some of the Indians having expressed a fear that Spithill, the farmer, would injure them for what they had said in council, Father Chirouse assured them that he would protect them. At 1 o'clock we left the reservation, the Indians all gathering at the landing to say good-by.

THOS. K. CREE, *Clerk.*

#### APPENDIX A d, No. 4.

#### LUMMI RESERVATION.

MINUTES OF A COUNCIL HELD AT LUMMI RESERVATION, WASHINGTON TERRITORY, BY COMMISSIONER FELIX R. BRUNOT.

#### LUMMI RESERVATION, WASHINGTON TERRITORY,

*August 29, 1871.*

Lummi is one of three reservations under the treaty of Tualip. It is situated just above Bellingham Bay. The Indians all live in houses, are industrious, and most of them are engaged in farming. They have a church, but no school-house, and no employé except the farmer. Visited the house of the farmer and inspected the farm, cattle, &c., and attended a service in the chapel, conducted by the chief, David Crockett.

Held a council with the Indians in front of the chapel; Mr. Brunot, Mr. Cree, General McKenney, Mr. Finkboner, the farmer, the chief, and most of the Indians on the reservation being present.

Before opening the council General McKenney said: Mr. Brunot comes from Washington, at the request of the President, to talk with all the Indians of Washington Territory, and he wishes to have the minds of the Indians as to what they want. He will carry their words to the President.

Mr. BRUNOT. When I come here, and find Indians praying to God, it makes my heart glad. I wish all the Indians would pray. It is well to pray morning and evening as you do, and the President and all your friends will be glad to hear that you pray twice a day. All good men pray to God, and He hears all who pray to Him. Some have a priest pray to God, as Father Chirouse does; others pray to God every man for himself. God hears us all. It is not two kinds of religion, but it is as two roads that both go the same way; and if we love God, all will come to Heaven. I will ask God to bless us, and cause all that is said and done here to be good. Mr. Brunot then led in prayer, after which he said:

The President hears many things from this reservation about the Indians, and about the white men. He hears some things that are bad, some that are good. Sometimes that the Indians do badly, and sometimes that white men on all the reservations do badly, and he don't know what to think. The President asked some men to visit all the reservations, talk to the Indians, and hear what they have to say, and put it down on paper, and take it to Washington; it will be the same as if he heard it with his own ears. The President sends advice to the Indians, he knows what is good for them, and what he wants them to do, and when I see them I am to tell them what to do. I have seen the Warm Spring, Umatilla, and many other Indians; and now I have come to see you. I am glad to see that some of you are trying to do well, but I find that many others are not doing as well as they ought to. I heard only a few days ago that some Indians near here were drunk. I heard there was an Indian who belongs to your tribe who gave them the whisky. That is one of the things I will be sorry to take to the President. I find instead of the Indians all being on the reservation and owning houses and farms, many are wandering around; that is bad. I find some do well for a little while, and then for awhile wander about and spend their money. If there is a little child among the white people, and you give it anything that is nice, it will waste it; in a little while it learns better, it grows up and begins to work, and takes care of everything. When it grows to be a man he gets a piece of land and works on it; builds a house, plows one field, after awhile another field; buys a cow and pigs, and they grow while he sleeps; after awhile he becomes a great chief. Some Indians are children all

the time—never grow big; everything goes away from them; that is bad. Indians will never do well until they quit that; they must act like good white men. You see some bad white men who lie and steal, and cheat the Indians, drink whisky, and are always bad. It is the same way with the Indian; if he does so, he is always bad. You have been told this before, and you know it yourselves; I hope you will do right. There are men who would like to have your lands; they will always want them; they will say, "The Indians do no good with them." You don't want to lose your lands. I want you and your children to have them. I say that the Indians can be just as good as white men if they will. You can have houses and work like the whites, but unless you do it the bad white men will have the advantage. You help them instead of aiding your friends who want you to keep your reservation. When Governor Stevens made the treaty, and gave you this reservation, there were a large number of Indians, but many of them are dead and gone; there are but few left; it is because you have remained wild Indians so long. You don't want to decrease in number; you want to increase. I think you are beginning now, and if you do right you will become as numerous as you were when the treaty was made; but if you do as many are doing—wander about, drink whisky, and spend your money—when the treaty runs out the reservation will be here with but few Indians on it. I want to see you do right. There are two or three things some Indians do that are very bad. You should have but one wife, and must quit gambling. Nobody makes any money gambling. I never knew a man get rich gambling; it is all bad.

The CHIEF said: So I have always told them, have almost talked myself into my grave, but they won't hear me.

MR. BRUNOT. You know it is good when I tell you some of the tribes have a foolish habit of flattening the head. I hope there will be no more of it. God made man in His own image, He did not intend us to spoil our heads. There is another thing called "temamamus" or sorcery; it is foolish and bad. I might talk more, but I want to hear what you have to say. If you have anything you wish to say, you can speak it.

DAVID CROCKETT (the chief) said he had nothing to ask for himself; that all he wanted was to live here so that when he died he would go to Heaven; but his men wanted to talk, and he hoped they could meet to-morrow morning.

It was decided to meet at 10 a. m. to-morrow.

## SECOND DAY.

Council met at 10 a. m.

The opening prayer was made by Mr. Cree, followed by David Crockett, all the Indians responding.

MR. BRUNOT. I talked to you yesterday evening. I think all the Indians who are here know that what I said was good. The same things they have heard before, and I think they are trying to do right. I regret that the rest of your people are not here. I wanted to see all of you, and I wanted to hear what all had to say. It will be put on paper, so that it may be taken to Washington. I want you to talk sense—no foolish talk. I don't know what the President will say about it, but we will know that after awhile.

DAVID CROCKETT. I want to talk to my chief to-day. Some time ago I intended not to say much when the chief from Washington came, but I have changed my mind, and am now ready to talk. I have talked to my people till my voice is gone. I want to talk to you fully to-day. I do not see things now as I used to. My eyes were as it were blinded. All I wish is to talk to God, and when I die go to Heaven. I know what Governor Stevens said when the treaty was made; half the Indians put a wrong construction on it, and it fooled them. Governor Stevens gave us to understand that we were to have the half of all this country, and the whites the other half. We thought the reservation took in both sides of the river, but the surveyor changed the boundary from what we thought it was. I want you to assist us in defining the boundary line of the reservation, so that the whites and others will know just where it is, and there may never be any trouble about it. My people are increasing in number, and we want much land for them, and we want the line so fixed that the whites will not encroach on us, and our children may inherit the land. I don't want bad Indians on the reservation among my people. I want all my people to be good, and set their children a good example, that they may be good after us, and their children after them. I want my people to be like white men, have cattle and horses, and imitate the good whites. This is my wish, and I wish you to receive what I say into good hearts. I would like all the Indians influenced to become good, and I would like you to help make them so. I want now to talk on another subject; about what we have received on the reservation. When Governor Stevens came here and issued the first annuities to the Indians, he told them there was not much this time, but next time they might expect more. When Mr. Howe was agent he gave us a good many things. Mr. Shaw also gave us our annuities when he was agent. I feel sorry that Mr. Waterman, the former superintendent, died; he was kind to the Indians; he furnished lumber for the buildings on the reservation, of which we are proud; also the cattle that the Government gave us, and two horses and a wagon; also plows, oxen, and yokes. We feel thankful for what Mr. Waterman gave us. It seemed that we got all that belonged to us. Since that time we have received but little, and we thought we were to receive no

more. A great many of the things we received are becoming old and worn out; the wagon is old and not fit for much service; it is the same with the plows and tools, all of which we received several years ago, and they are all we have received from Washington. Through Mr. Finkboner we have received all of it. Mr. McKenney is far off from this place, and I have never had an opportunity to tell him, and I want him now to know it. I am not a beggar for things from Washington; all I want is this land secured to my children, and the implements necessary to cultivate it, that my children may cultivate it when I am dead. This is all that is on my mind; that my children may have a home after I am dead. I am proud that the great chief from Washington is here, and that I can hear you talk. It is not the case with all the Indians. We are proud to see you and hear you. My patience is almost worn out as well as the farmer's patience; so many will not hear what is said to them. It is my desire that all the Indians should become good. If all the Indians become good, they will not die off from drinking whisky, and disease. That is all I have to say now; if you have anything more to say we will be glad to hear you.

HENRY, (QUI-E-NA.) I want to talk to the chief from Washington. I am proud to see you here. It looks as if you would help us to become better children. I have been a Christian many years. God gave us this land to cultivate and live on it. I am proud to see you here. It is like as if the President had sent you to help us be good, and to keep the white men from taking our land, as many say they will do. The white people say when the railroad comes the land will be taken from us, and it makes us feel bad. For that reason we are glad to see you. You are the first one who came from the President to see us and help us keep our lands. We have some children at school with Father Chirouse; we want lands for them to live on. Our lands are not very large, and we want them secured. I know what you told the Indians yesterday. When the agents or chiefs talk to me, I always tell the Indians what they say. I heard what you said yesterday, and I hope to retain your counsel. I know that when I work for the whites I do not get high wages, but occasionally I have to go off to get food for myself and my children. If you will help us we are willing to work. I want to tell you my mind freely, because you have just come from the President.

[A map of the reservation was produced, and explained to the commission.]

Mr. BRUNOT. I am glad to hear the Indian men talk as you do. I hope you will act as you talk. The white men believe that God gave all the land for the use of all the people, and that He intends they shall cultivate it, and whenever the white people see that the lands are lying unused, they think God intends them to be cultivated. You see they are coming away from the other ocean, five moons' journey from this one, and they cannot come fast enough in wagons and canoes. They must make the iron road to come on, and, after a while, all along the sound, they will have their farms and towns. Some of the people will say, when the other land is full, "Here is good ground which the Indians do not cultivate; if we had it we would build houses and cultivate it." It is not right for them to want to take the Indian lands. The President and the friends of the Indians say it is not right; yet, when the whites see the land vacant, they say "We want it." Now the President wants you to help him keep the land for you; he wants you to work on it, open farms, and make it like white people's land. If that is done, the white people will know they can never get it. They will see the Indians doing as well as they could themselves, and they will give up the hope of ever getting it. You say, "We would do this, but we must have something to eat." It is a mistake; working gives food. The whites go somewhere and work till they get money with which they buy their land; they then begin to work on it, and the food they need soon grows on it. But the Indian goes to the coal mines, or somewhere, and works for the whites. When he gets his pay he wastes it, or he sits down and eats it up. When it is gone, he goes and works more, and when he gets old he has no more than he had at first. Good white men do not do that; they take care of all they get; it increases until they get rich and have comfortable homes, and can send their children to school. Thus they all become chiefs. I would like to see these young men do the same way. They get good wages for their work, but if they work awhile and then quit just when the man wants them, soon the white man will not have them. I heard a man say, "I like to have the Indians work for me, and pay them, but soon they want to quit and go away off. If they do that way, I must quit hiring them. I must have Chinamen; they will stay." That is bad. We want the Indians to have work. The President intends the Indians to keep this reservation; you need not mind what white men say about it; they cannot take it; but your people must do what the President wants you to do. Sometimes there are disputes about the land; sometimes white men have lands lying together, and they differ about the lines. They have the surveyor run the lines with his instrument, and what he says they agree to, and that settles it. It is the same way about this reservation. The Indians are not certain about the lines; nor are the white men. General McKenney and Mr. Finkboner have been trying to have it surveyed, and I will tell the Commissioner at Washington, and we will try and have the surveyor come and survey it. I think it will be done, and then the Indians and whites must agree to the line. I am going to ask the President to make out lines on the reservation like the township lines. It may be some time before it is done, but then each man, when he builds a house, may build it on his own land, and no one can ever take it from him. After that is done, every man will have his own place, and it will be always his. The rest would belong to all of you, and when a boy grows up and gets married, and goes to work, you could give him a farm.

**THE CHIEF.** That is what we would like.

**MR. BRUNOT.** That is what we think is good, and I am going to ask to have that done. General McKenney has asked that it might be done elsewhere, and I am glad you wish to have it done here.

**CHIEF,** (to General McKenney.) That is my mind; it seems from your talk you are closing the mouth of the bad Indians. There are many Indians outside to lie about what is said and done.

**MR. MCKENNEY.** We are proud to see you. You don't say anything against our religion. You encourage us. That is our mind about General McKenney. I am not able to go to Olympia to see you. Those bad Indians and bad white men talk bad about General McKenney. It is not right, for General McKenney is the friend of good Indians; for that reason I am glad you are here that we may tell you our minds.

**General MCKENNEY.** I am glad to see the chief and his people. I have not seen you for a long time. I always thought good of the Indians on the Lummi reservation. I spoke good of them in my Washington papers. I said they talked daily with God. When I was here a long time ago you had slaves among you. I told you you must give them up, and I learn you have done so, and that there are no slaves. I said you must give up gambling, and I learn the Lummi Indians don't gamble. I told you you must have but one wife, and be married to her, and must take care of your wife and children, and must work as white people do. I saw a few still flatten their heads; I told them that was bad. I am glad to see the children grow up with their heads not flat. I have done all I could to help Father Chirouse. I intend to do all I can to help him. He is building a mill; soon the Lummi Indians can get lumber at it. You have heard these things from me a great many times. Some Indians give up gambling and take to it again. I am sorry to hear this. I am glad to meet you with Mr. Brunot, who comes right from Washington. He wants to take the Indians' words to Washington.

**THE CHIEF.** Our farms are off two or three miles. You must not think this is our only town, and that we have no farms; the land about here overflows, and we cannot cultivate it; if we had tools we would ditch it, and have much good land.

**MR. BRUNOT.** Some of the Indians I have been to see are wild; they don't live on the sound; they live on the plains; they wear leggins and blankets. I want to see them civilized also; I have seen and talked with them, and I think after a while they will do right. If I see them do wrong, and I say, "Go away, I will not have anything to do with you," can I do them any good? So of these bad Indians about you; you don't like them, but if you are kind and say they are not right, you can persuade them, but you cannot drive them to church. If you are kind, after a while they will come. You must coax them to send their children to school, and persuade them one by one to take a farm. Except the bad ones who drink whisky and go to bad places, one by one you will get them to come, all to be like brothers; after a while there will be a great many of you. Try that way. It is time now for us to go, still we will wait if you wish to say anything more.

**DAVID CROCKETT.** For that reason we want the reservation surveyed, that we may bring the Indians from the outside, and that all may have lands, and know what is theirs. I hope you will not be weary with our long talk. We don't see a great chief often, and want to express our minds. There is a white man lives on what we think is our land, and it is the best piece of garden land on this reservation. It is on one corner of it. Governor Stevens and Mr. Simmons told us that this reservation was half a mile below the river. My father and all the old men and I were there and heard it.

**MR. BRUNOT.** The treaty will be taken and the right line run, and whatever the surveyor makes it we must agree to.

**CHIEF.** We don't want, like a pack of dogs, to be always quarreling about a piece of land, but we want it fixed, and then have it settled.

**MR. BRUNOT.** I was at the Simcoe reservation and Warm Spring reservation, and I found one Indian who, when a small boy, was sent to where a man made harness; he learned to make harness, and he has a shop. The Indians come to him now for harness. Also at the blacksmith-shop, and wagon-makers shop, was an Indian who could make horseshoes and wagons. Some of your boys could go where they could learn to make these things, and you would have some one to do your work. As soon as you get farms like white men, you will need many wagons and plows and harness, and you ought to learn how to make them yourselves.

**CHIEF.** When the work is done at Tulalip, can we have a carpenter come and help us?

**General MCKENNEY.** Yes; the carpenter from Tulalip can come and help you.

**CHIEF.** I ought to have a better house to receive my friends when they come; and we want an altar built in the church, and a belfry on it; this work we cannot do ourselves. But two of us have spoken, but we are all of one mind.

During their council they brought their harness and tools to show the kind of material they had to work with, and which were very imperfect.

After the council, in company with the Indians we made a trip up the Nook-Sack River, and then went around to the other side of the reservation and saw some very good farms

## APPENDIX A d, No. 5.

## COUNCIL AT SKOKOMISH.

MINUTES OF A COUNCIL WITH SKOKOMISH INDIANS AT THEIR RESERVATION IN WASHINGTON TERRITORY, BY COMMISSIONER FELIX R. BRUNOT.

SKOKOMISH RESERVATION,  
*Washington Territory, Monday, September 4, 1871.*

This reservation is situated at the head of Hood's Canal. The Indians on it have made considerable progress in the ways of civilization; many of them are engaged in logging.

Mr. Eels, the new agent, has been in charge but a short time.

Spent Sunday—Mr. Brunot conducting a morning service with the employes, and holding an afternoon service with the Indians in the open air.

At 10 o'clock a council was held with the Indians. There were present Commissioner Brunot, T. K. Cree, his secretary, General McKenney, Mr. Eels, the agent, all the employes, and of the Indians, the young chief, Duke of York, General Gaines, and all the Indians on the reservation, old and young. In opening the council Mr. Brunot said: When the white men have a great talk, and all their great men are gathered, they ask God, who made all things, to bless their talk. I am now going to ask God to look upon us and bless us and have pity on us all. Mr. Brunot then led in prayer, after which he said:

You have had commissioners and chiefs from Washington come and talk to you before this. Some of them have told you good things that it would be well for you to remember. About eleven years ago your chiefs made a treaty with Governor Stevens. At the time of the treaty there were more of you than there are now; many of the Indians who were living at the time of that treaty are dead and gone. There were not so many white men then as there are now, but there were a great many more Indians. The white men are increasing in numbers, and will get to be more and more numerous every day. The Indians are becoming few. What is the reason of this? Some good white men are sorry to see the Indians are getting fewer. The President at Washington knows this; and he knows the reason of it. He has heard that some of the white men he sent here did not do right with the Indians, and he has heard that the Indians did not do what they agreed to do when they made the treaty with Governor Stevens. He wanted to know exactly the condition of the Indians; and he sent men to see you, that they might tell you his mind, and might hear you and tell him what you say. It is just the same as if he was looking with his own eyes at you, and whatever you say is to be put down on paper, and it will be the same as if he had heard it with his own ears. I have been to other reservations—to the Indians away beyond the Cascade Mountains. I have heard their talk, and I have talked to them; and now I have come to talk to you and hear what you have to say. I am glad to see you. I have seen some Indians who are different from you; who are very much like white people. They have everything in their houses like white people. Among them I have seen some who stand up like white preachers and tell their people about God; and they are chiefs among white people. How did those Indians get to be so much better off than others? How did some of them have five hundred cattle and hundreds of horses? They did not do it by having "cultus potlaches," nor by practicing "temanamus." They don't gamble nor drink whisky. nor wander all about the country. They have a home—a place to go to. If a man gets away off he always wants to come back to his home where his own family stays. The Indians I am talking about send their children to school. They learn to read and write, and they learn what is in the Bible. The Bible has the words in it that made the white man what he is; and the Indians know that the same words will make the Indians like good white men; and that is why they are sending their children to school where they may learn the same words. They learn there that God made the white man and the Indian like Himself. He made them all out of the same ground. They learned there that it is not right for man who was made like God to make himself different. When God made us this way it is not right for us to change our heads and make them a different shape. You ought not to take the little children who can't help themselves and flatten their heads. We men would not have our heads flattened, so we should not take the children and flatten theirs. God does not mean for us to do so. Some of you men have flat heads. You can't help it. I am sorry; and I tell you so that you will not do it to your children. That is one of the things I want you to quit. There are many things Indians do that white people don't do. There is one thing the treaty said, and it was signed by the "Duke of York" and others that are here. I see in it they did not want these people to drink whisky. They put in that treaty the words, that whoever would drink whisky should not get their annuities or have the benefits of the reservation. Although that was in the treaty, I fear many of the Indians do drink whisky; and I know bad white men give it and sell it to you. Suppose I come here and I want to get your money and blankets, and I hand you something, and say take this. Suppose you give me your money, and you open your hand and you have nothing. Do you think you would let me do that again? You would not let me deceive you that way twice. Suppose I come and say I will give you this; I put it in your mouth; it is poison and makes you sick. You would not let me fool you that way again. Suppose a man gives you whisky

for your money; it makes you sick and crazy; your money is gone; you have nothing in your pocket, nothing on your back; you get no cattle or horses—nothing for it. Will you let the man fool you so again? Here is the Duke of York; he signed the treaty. Did he keep it? I fear not. He is a chief. He can look back and see and know when he did wrong. So all of you know when you do wrong. I want you all to do right. I want you to see that whisky does you harm. I want you to quit drinking it. That is one of the things the President wanted me to tell you. He has sent a new agent and new men with him. He has sent men who don't drink or gamble or steal from the Indians; who will help the Indians; have them get houses and gardens, and everything about them comfortable; will try and get the children into schools. They will do this because the President wants them to do it. Some men don't want you to reform. They want you to drink whisky, because then, they can get all you have. Which will you help, your friends or your enemies? The President wants you to hear these men who are here now. There is much I want to say; but I want to hear your words. I want you to tell me anything you want to say. It will be put on paper and carried to the President.

General McKENNEY. I am glad to see the Duke of York and his men here, and those from Port Gamble. I hope they will come to this reservation and stay there. I am glad to come here with Mr. Brunot. He came from the President. He sent him to see all the Indians, and he wants to get your minds. Mr. Cree will put your words on paper, and Mr. Brunot will take it to Washington. I am glad Mr. Brunot has come. He talked as I have always talked. I always told you it was wrong to drink. I have punished the Indians who bought whisky. I told you it was wrong to gamble. I have told you it was right to dress like white people; to work and save your money, and to take care of the old people. I am sorry many Indians leave the old people to starve. The Indian who would do so, is worse than the wild beast. I told you it was wrong to flatten the heads of children. It makes them ugly. It kills many, and even if it don't they don't have as much sense as they would otherwise have. I am glad you have no slaves, and glad very few have more than one wife; it is wrong to have more, and you must be married to the one you have; you must get clothing for her, and she must stay at home and take care of the children. I am glad you have a new agent. He talks to God every day. I hope the Indians will come every Sunday and hear him. I will help him all I can. You are now getting logs and selling them; soon you will get money. I hope you will build good houses like white people. When an Indian wants a piece of land, Mr. Eels will give it to him, and no other Indian can take it. I want to speak of Temanamus and Temanamus doctors. They are like thieves. They take your money, and do you no good. You have a good doctor on this reservation, and he will attend on you without charge.

Mr. BRUNOT. I spoke of what the Indians had done that was wrong. I did not say so much about what the white men had promised to do that they had not done; but that is past. There are many of you whom I know, and have heard all about. Here is the Duke of York, who has come from Port Townsend, and has brought his people. He now thinks drinking whisky is bad; he wants to send his children to school, and wants to do what is right. I like a man who is trying to do right, and I want to shake hands with him. (The Duke then came up, and shook hands with Mr. Brunot.)

FRANK. I am the only one who was at the treaty at Point-n-Point. I heard what Governor Stevens said, and I thought it good. I am like a white man, and think as the white man does. Governor Stevens said all the Indians would grow up, and the President would make them good. He told them all the Indians would become as white men; that all their children would learn to read and write. I was glad to hear it. Governor Stevens told them, I will go out and have the land surveyed, and it will be yours and your children's forever. I thought that very good. He said a doctor, and carpenter, and farmer would come. The chiefs thought that was all good; they thought the President was doing a kindness. I never spoke my mind to any one; I talk to you because you come from Washington. All the agents talk differently. You talk as Governor Stevens did. I hear what you say. Every agent who comes here, I don't know them. I thought all Governor Stevens said was very good. Perhaps the President thinks all the Indians are good, as they were to be under the treaty. But they are not; they are Indians still. I think there was plenty of money sent by the President, but I think much did not come here. Perhaps it gets scattered; really think it does not come. When it comes, it is in calico, but I know there is more sent than gets here. Every agent gets rich that comes here. Mr. Hale, the superintendent, got rich off of our money. He bought a steamboat with it. If all your white men knew how poor the Indian is, your hearts would ache, but they feel better when they see you. They tell their complaints, and they will go to the President. All the Indians are glad that you came. These old Indians never came before, but they come to hear you.

SPAR, (the young chief.) When I came here I was young, and did not know much. I was here when the reservation was opened, and know what was done. When the agents came they never taught us anything; never said, go and fix your places. All they think of is to steal, to sell the reservation cattle and the reservation hay; to sell the fruit, and get all they can; to go and log, and sell them. That is all every agent has done. They never advised us what to do, never helped us. After I had seen all this I was sorry. Did the President send men for this; to come and get what money they could out of the reservation and their

pay? I know the Indians lose all their cattle; when they get the money, where does it go? When I ask about it they say they will punish me. I thought the President did not send them for that. I got very poor and wanted to borrow the reservation team. You know what I have done. They refused me the use of the cattle. Then Billy said, "Let us get cattle of our own." We bought them with our money. We got two yoke of oxen. One of my friends got me one yoke. I worked all summer and paid for the cattle. Our agent had all the benefit of the reservation. He drove us from our places, took the barn and all our hay, and we all lost our horses for want of feed. Captain Kelly was the agent. Mr. King sold our cattle, and he logged first. Captain Kelly logged; he sold all the things we had bought with our own money. Mr. King was the only one who helped us; since that we have not had one to help us. I do not know where the reservation is. I want to know, and I want you to mark out a place for me. Every agent tells us different things, and it has always been so. My place is changed by every one. We want to know how far the reservation extends; we want you to tell us.

JOHN, (the interpreter.) Mr. King and Captain Kelly both had cattle of their own. They kept them with the reservation cattle, and drove them away and the reservation cattle with them.

BIG JOHN, (chief.) My heart is sorry all the time; it cries every day. All the Indian country feels sad. When we heard what Governor Stevens said we were ignorant; at the time we thought all he said was good for the Indians. Governor Stevens asked, "Where do you want a reservation?" and we selected this. He told us when we came on the reservation all would be well. Every new agent talked different from Governor Stevens, and each new one different from those before him. We all thought the white men were doing wrong to us, and seeing that, all went wrong. I felt sad. Now, that you have come, you talk as Governor Stevens did. I heard it, and the Indians felt glad when they heard it; they thought our money would come straight, and we hope we won't be cheated any more, because you give us the President's words. We are on the reservation, and wish to do as the President says. We heard the President would punish us. We think the President is good to the Indians. We want to know now where the reservation is. I want to know where my place is; I want to be like a white man; I know God sees us, and knows what poor creatures we are. It is all the fault of the agents. If the President had sent you before, we would have been like white men long ago. The agents do wrong to us and keep us Indians. If we had heard your words sooner, we would have been like white men, and I am glad to hear your words now. We want to know about the orchard, and the cattle, and hay and timber; and we hope the agent will do right, and that hereafter we can take what timber we want. Really all Governor Stevens said was good. We do not know much about Mr. Eels; he has only been here a short time. I don't know how he will do; perhaps he will be as you said. Perhaps all I want I will get through Mr. Eels. I will feel much better because I have heard your words. You can have all our children; still I don't want them all, as the boys are in the school; their feet get cracked; they are like the slaves we used to have. We want them to study every day, and don't want them to do wrong. If they study they will learn.

DUKE WILLIAM. I am glad to see you. All our folks are very poor. Our planting grounds and logs and apples and hay are taken from us, and I felt sad, and I wanted to go and see the President. I know I will not live long. I asked the Indians to give me the money and I would go and see the President. I would have gone if you had not come here. Did the President send men here as agents to log and get all the benefits? That is what I wanted to go and ask the President.

SPAR, (the young chief.) You say you are from Washington. If you had come later you would have missed me. I don't know much; none of us do. We are ignorant. I am glad to see you. You come to make the Indians all good. There are many bad whites who say this reservation is not ours; but I think the President does not think so. The whites like to look at our place. I think now I will be buried here. We want to find out the boundaries of our reservation. We are not content until we know where it is. The Duke of York has many people. Where will he put them? We want to know.

DUKE OF YORK, (a friend of the white man; saved many lives in the Indian war.) I don't think of anything but you. I am very glad to see you here to-day. You came here from Washington. I have come here to be a new man, different from what I have been. To-day I change and become a new man. I get the President's words to-day. I want the President to have these words and be glad. From this time I think you have made me and my people good. There are no bad white men here. There are no bad white men to abuse us and give us whisky, so we will change. I want a good white man's house, like the school-house. I have left Port Townsend, my home, and ought to have a good house. I want to be good. After my tribe sees we are taken good care of the rest of them will come. Even the lowest Indians, when they hear me and my children are white men, will come. I believe in God and have a good heart. And I have a good heart to the white men. Half the white men are bad; they give the Indians whisky. I want a place where there are plenty of clams. I want a place for all my tribe. General McKenney knows where I want my place. I want from Atkins Creek up. I know all Governor Stevens said. I put what I hear in my heart, like a white man. Governor Stevens made this reservation for us. That

is why I never refused to come. Mr. King made three houses for me. Governor Stevens said this reservation was for us. I want my house on it. I want the agent to help me. I want trees and everything to plant. I want all I can work with in winter. Why should I buy my own tools when the President sends them out? I have received no benefit from what the President sent; have gotten none of the things promised in the treaty. All that I have the officers give me. If it was not for them I would have no good clothes. These are presents from them. I have nothing good given me, as Governor Stevens said. Governor Stevens promised different things every year for twenty years. Every year we would get more and more. All this I don't see. I have not got much from the treaty—a blanket or two at a time. My people don't like this; they know the President sends more than we get. Governor Stevens said at the close of the treaty we would get rifles and shot-guns. Perhaps what Governor Stevens said was not true. Governor Stevens promised us a schooner. From this day I have heard some of the words Governor Stevens said. Hereafter, I want you white men to find me work, so that I can earn something. I will work on my place. This reservation belongs to me as much as to any other Indian, so I will work. I want you to remember what I say. I want tools to work with. What will become of us if we have nothing to work with? My people work where they have been. All these young men, if they don't get work will become poor. If they work they will be contented, and all will be well. We look upon you as the President, and don't want you to refuse the things we need. My heart is right to-day. When I want to log I want you to lend me cattle and what I need. I take my turn, and want to get the benefit of the reservation as the other Indians have done. I have not earned anything where I have been.

MR. BRUNOT. I am sorry I have not time to hear more of you talk. I think those who have talked have talked for all. If they have, I want you to stand up. (Almost all stood up.)

CHARLEY, (Port Gamble Indian.) I grew up on this place. My father lived here. All the land my father owned I got nothing for. If I had good sense as other men have I would rule over this place. I would not listen to the Duke of York. He did not like this place. To-day I am glad to see you. I want to know about the reservation. There are many S'Klallams. It will take a large place for them. I am satisfied with Atkins Creek, where the Duke of York said the Indians all are.

BILLY. When we became poor, I asked Spar (the chief) to let us work. We were working at Siebeck and made money. Mr. King (the agent) advised me to come here and bring my father and mother. I came here, and spent all my money for food. We became very poor. Mr. King took the timber from us. Captain Kelly came and did the same. We asked if the President wanted us to log with Spar. We think the Government sends money we don't get. When the money comes it does not all get here. We know the money comes to buy all the Indian country on the sound. What little goods we get are not worth the country we sold. When I see a white man's claim I asked the price; he says \$3,000 or \$1,000. Why does the Government send so little to buy our big country? Plenty of money is sent, but it does not get here. My father, a gray-haired old man, told me that Governor Stevens said we would be like white men; but I don't see it. The Indians are very poor. The reservation is like ourselves; we don't know just where it is. When we find where the reservation is we will take our axes and make it good. You are from Washington; tell us where the lines of this reservation are.

BIG JOHN, (sub-chief.) You come to get the Indians' hearts. You ought to take time. You are the great chief, and we want you to hear us. When we talked before, it was put down, and they said it would go to Washington. We do not know what became of it. We don't think the President saw it; we think it don't go far from here. I am a poor man; you are making all these young men and women happy. I thought, when a boy, that we would get all the money that was promised. White men don't give things away; they sell them. They don't take a shirt or blanket for lands; they get gold and silver. The Indians don't get money for their country. If blankets and clothes are sent the Indians want good ones sent. I want to know where these worthless things we get come from. Do they come from Washington? I think they come from a little way off. The blankets and shoes and shirts last only a week. We want to know about these things. How many years will the treaty last? We want you to tell us.

MR. BRUNOT. The bounds of the reservation you ask for. If a white man has a claim he has a surveyor come and survey it, and mark the boundaries. He does not know until the surveyor comes. I will tell at Washington what you say about marking out your reservation. I hope a man will be engaged to mark it out. The President and Indian Commissioner have much to do, and many people to think about. He can't do everything at once. I do not know how soon he will have this done, but I think he will have it done as soon as he can. I think he will mark it out in pieces, so that every Indian who will work can have a piece for himself, and no Indian or white man can take it from him, and his children can have it after he dies.

The difference between the Indian and the white man is this: Did you ever see anybody give a white man a horse and cattle? How does he get them? He goes to work. There is something comes to the Indian every year; but there is not enough to do everything for them. They must help themselves. If an Indian won't work there is no use to give him a piece of land. If he sits down and does nothing, and won't become like a white man, we

cannot help him much. About the logs, there is one thing I want to explain: These logs belong to all the Indians on the reservation. It is wrong for the agent to take the logs, unless he spends the money received for them for you. Some of you are logging, some are not. Those who work get their share. I hope all will work and get the good of it. About the treaty: It was made twelve years ago. It was to remain twenty years. It has eight years to run. The first five years the Indians were to get \$6,000 in annuities. Every five years to get less. Now it is \$2,400. That was to be given as the President thought best for the Indians. The President sent all the \$6,000—all that belongs to the Indians—and you say "it was lost by the way." If I was to get certain things each year I would keep them. Some Indians traded them off. You got many things you forget about, but I hope you will keep what you get after this. The President is sorry you did not get what you ought to have gotten. I hope what is coming you will get. In eight years the treaty will be done. In the last five years all the Indians will get will be what \$1,600 will buy. It is not much for so many, but when that is done you will not get any more. There will be no more agents, farmers, and teachers. You must get those things yourselves. You must work while the treaty lasts, so that you will be like white men when it is done. About the school: You must send your children, and they must stay at school. They must learn to work, as well as to read and write and spell. They must work in the garden, and help to raise something to eat. John said that the goods that were sent were not good. The goods did not come from Washington. The money came from there and the superintendent had to buy the goods. They got cheated, and the Indians got bad goods. I hope when goods come again they will be better, and that the Indians will take care of them. I want you to work and buy what you want. I will take what you say to Washington. I do not know what the President will say about it, but I hope he will send a man to mark out your reservation. I know he will hear what the Duke of York said, and what the others said. Many white men say it is not worth while to listen to what you say; some Indians are so. If I thought all Indians were that way, would I come and talk to you? When the President hears what you promise to do, I want him to believe it; I am going to believe it. But when I find afterward that some are no better, I will be sorry. I will hear about you, and I hope I will hear that you have farms and houses, and are helping Mr. Eels to keep you. My heart is glad to see so many dressed like white men, and the friends of Indians will be glad when I tell them at Washington. About wives: I hope you will remember it is only good to have one wife, and I hope Mr. Eels will get a clergyman, and you will come and be married in the white man's way. The Duke of York was promised a house if he came. There are three buildings up for him at Enati. I will find out more about it. General McKenney has asked at Washington that you have that land. I will ask the same.

**DUKE OF YORK.** General McKenney knows about those houses; they are small. I want a big house, like theirs. I ought to have a house with a fireplace in it like a white man's. The council here adjourned.

THOS. K. CREE, *Clerk.*

---

#### APPENDIX A d, No. 27.

#### MINUTES OF A COUNCIL WITH GRANDE RONDE INDIANS AT THEIR RESERVATION, OREGON, BY COMMISSIONER FELIX R. BRUNOT.

GRANDE RONDE RESERVATION, OREGON, *September 14, 1871.*

This reservation is situated near the celebrated Willamette Valley, is a fair piece of land, and in a good state of cultivation. There is not a wigwam on the reservation. Every Indian lives in a comfortable house. All, men and women, dress as the whites, and are generally dressed with neatness and care. Many speak English, and almost all are engaged in farming. They are just about completing a mill-race, all the labor on which was done by the Indians, without any pay, and all the expense incurred was with their consent deducted from their annuity money. The funds for the employment of most of the employés had been exhausted, and the Indians evinced a great anxiety that an opportunity should be given them to acquire a knowledge of the trades.

A council was held at the agency buildings with the Indians of this reservation at 2 p. m. to-day. There were in attendance Hon. Felix R. Brunot and his clerk, T. K. Cree; Hon. A. B. Meacham, superintendent of Indian affairs for Oregon; Rev. Mr. Parrish, of Salem, and most of the Indians on the reservation.

Mr. Meacham opened the council by saying: We begin a new kind of talking to Indians to-day. Mr. Brunot comes from Washington. He is a good man and believes God sees and hears him, and he always asks God to bless him when he talks.

Mr. BRUNOT. When the white men have a council they always pray before beginning it. The Indians must be taught the same, or they will not know that it is right. He then asked Rev. Mr. Parrish to lead in prayer.

Mr. BRUNOT. Mr. Meacham has told you I came from Washington. I will tell you

why I came. The President is interested in all classes of all his people, and wants to know how all of them are getting along. He hears many things about you, and he sent me to hear what you have to say, and to carry your words back to him. I am glad to find here, not Indians with paint and blankets, but men like white men, living in houses, with fields of grain about them, and working like white men. If I had not heard to the contrary from others I would think that in everything you were like white men. Some things I hear make me sorry. Among some of the Indians there is much whisky-drinking. When I see that I know they are poor and miserable, and their children must either starve or beg. Some places the Indians are gamblers. Where whites or Indians are gamblers they can never amount to anything. There is one thing I want you to take into your hearts. The white man thinks unless land is cultivated it is a waste of the soil. They think if the Indians don't cultivate it the whites ought to have the land. The way to get rid of them is to cultivate it yourselves. Mr. Meacham is arranging to give each man his own place. You are getting the saw-mill so that you will have plenty of lumber to build houses, and I hope every one of you will get a good house before the treaty runs out. When I go to Washington I will tell the white people what kind of Indians I saw. I will tell them of your fields and houses, and of your roads, that are better than the white man's roads. I will tell that I saw Indians running a threshing-machine, and I will tell them that in three years from now the Indians will have given up the habits that are keeping them back. They will send their children to school. That you have learned that temanimus is bad, and that you are going to quit it. That you are going to do steady work as the white man does. That you will quit gambling and drinking. That you will take the white man's laws instead of the Indian laws, and then you can vote, and some day some of your children will be sent to Washington to make laws. You have had many agents here. I don't know any of them. Some may have been bad, but it is not the President's fault. He means to send good men, and I think you will have a good man. I do not know who it will be, but whoever it is I want you to try him and do your part. You must listen to his advice. I might talk till the sun goes down and tell you something good, but I want to hear your words and carry them to Washington.

MR. MEACHAM. You have heard me often. You know my heart. I told Mr. Brunot you were not Indians, but men. I want you to talk like men.

PETER CONNOYER. I have not much to say. For four or five years I have wanted my lands surveyed. It is now being done, and I want to settle down on it and live and die on it. Our saw-mill is almost done. Now we want a grist-mill. We need it, and we ought to have perhaps \$10,000 to build it. I want Mr. Brunot to know when he sees us dressed up that we bought the clothes ourselves. We get no blankets. We ought to have some, for the Indians who are poor. We need harness and we need teams. It takes money to buy them. I hope my people will all take lands. They get from forty to one hundred acres each family. The treaty was to give each man twenty-five acres. We need cradles, scythes, and forks, and it will take money to buy all these. It will take \$30,000 to buy all of them. Gambling—I don't know what the Indians will say about it. I don't gamble myself, and don't believe in it. About religion—I am a Catholic; so are all my family. All the children are Catholics. We want the sisters to come and teach the girls. The boys, I don't care whether the Catholics or Protestants have them. The priest lives here. He does not get any pay. He teaches us to pray night and morning. We must teach the little girls. I am getting old, but I am easily led astray; I may go to a race, but a little, but I don't want my children to learn it. It is bad. I ought not to do it myself. We get off the side of the road, where no good men see us, and we gamble, but when a good man comes along we are ashamed of it. So it is with the white man when he does what he knows is wrong. We go to a temanimus doctor, and do many things that we ought not, but we do not teach our children these things. Our lands we want to get as soon as possible. We need a carpenter, blacksmith, and miller, so that our children can learn.

(Peter spoke in English, though a full-blooded Indian.)

JOE HUTCHINGS. (Speaks English fluently, but talked in Chinook.) I am glad to see Mr. Brunot. We are not wild Indians; we are like white people. We cultivate our own farms; we work like white people. The treaty is gone. I think I am a good man. Meacham is a good man. He told us Mr. Brunot would come. I have my land. In a short time I will be like a white man. My children will be like white men. The Indians made a treaty before they came here. Then there were no half-breeds among us. When I was wild like an Indian they said they would make a good white man of me, and I made up my mind to be like a white man. Five years ago many were Indians; now they are white men. They promised to show me how to plow, but the agents came and did not teach me. When Meacham came we looked for him to do right. Mr. Meacham promised a school-house for our children to go to school. I have seen the agents here for sixteen years: they have taught us nothing. You see our houses; we worked outside and made money and bought them. When the treaty was made many things were promised us. We never got any of them. That is wrong. The superintendent here now knows what is needed. I won't ask for a horse or cow, or anything; he knows what is needed. Suppose one town had only one set of harness, how would they get along? Our people go outside and get horses, and they get harness, and plow with them. There were oxen and cows here,

but I don't know what has become of them. You see these chiefs, (Indians;) they know all about these things. If we did not work we would be very poor. Mr. Meacham said there was no money for a saw-mill or a flour-mill, so we agreed to help the work, and have done so. I think I am a good Indian. I am a chief. Mr. Brunot said good words to us. We ought to work. We need the grist-mill now. When we first made the treaty it was not said whether a priest would teach us or somebody else. I know what was promised us. I was promised eighty acres of land, others less. If we had had a good agent we would have been better off. The agents wanted only the money; they did not want to help the Indian. The blankets and shoes and goods for Indians—the house was full of them. I did not know who got them; perhaps a rat tyee (rat chief) got them; but I am an Indian, and think it all right. Outside belongs to the whites. Indians sold it, but I never saw the money. If I had it I would buy plows and wagons. Some of my people are in the penitentiary. I don't know why they were put in. I want to know what they did to put them there.

**BILLY WILLIAMSON.** I think it is good for Mr. Brunot to come. This summer we see things as we never did before. Since Mr. Meecham came this summer our eyes have been opened. Our saw-mill is almost done, and we expect to have a grist-mill soon. Mr. Brunot comes from Washington, and I want to know whether what I said before, and that now, was put on paper—did my words go to Washington? Then the Indians were all separated; now they are all here. If you go to see their homes you will find many things they made themselves. They learned it from the whites outside. The men on the reservation did not learn us. When the treaty was made we were very poor. For fifteen years we have been talking about what was needed. Do they know it at Washington? Some white men say we will only get twenty acres. Where I came from I had not only twenty acres, but a hundred. Everybody knows we are poor. I had a cow and a yoke of oxen long ago; that is all I have now. I don't want to lie to God. I don't think I am a very good man. I may tell a lie; I am an Indian. I speak the truth. I don't drink. I don't do as Indians did in old times. I have quit that. We can't do everything in a day. If we get our land we need cows and horses and plows and wagons. Then we won't go outside; we will stay here. There are a few half-breeds here. I think nothing about that; they have families here. I want to know if money was sent here for us. Now we are like white men. You know about God; so do these Indians. I speak no bad words. White men and Indians are all alike. Some Indians here have been shot and whipped by white men for nothing. Two of our people are in Salem penitentiary. We want to get them out; they did nothing. White men gave them whisky and got them drunk, and now they get them into the penitentiary.

**SOLOMON RIGGS.** I am glad to see Mr. Brunot here. I want him to take my words to the President. I am going to speak true. It has been promised that our land should be surveyed; I am glad to see it is done. We are promised a saw-mill; I see it too; I am glad of it; I want lumber. When I get my land it is mine, and while I live I will stay on it. Three or four years ago I was like as if I had been asleep; now I am awake. Agents five or six years ago never said to raise anything. When Mr. Meacham came he said we must raise grain as the whites do, and all of the Indians have done so. Now we want a grist-mill. There are plenty of old people about me; they are poor; I am young and can take my wheat outside. Many old people ask me to talk about the mill for them. Some agents here have made us poor. We can't help the old people. We need plows and harness, and when we have them we will be like white people, and will make our living the same way. You have promised to take care of the Indians as a man does of his children. Now we can take care of ourselves. I will be very glad to have a school. We want our children to go to it; that is where they learn sense. Mr. Brunot's father sent him to school, and now he is a man; so we want to send our children to school, and they will learn.

**JOE HUTCHINGS.** (a fine-looking, well-dressed man, wore a white shirt, buck gauntlets, and spoke English well; a very intelligent, sensible man). The people have hid in their hearts the truth about the half-breeds. They have been employed about the mills and shops. We want our children to learn and be employed instead of the half-breeds and whites. We don't want the half-breeds here to interfere with us. They are getting the good things instead of the Indian; they are getting cows and horses. I don't know where they came from or who gave them to them. We want a white man in the mill, and we want our Indian boys taken there, and kept there until they learn, and they will be able after a while to run it themselves. As at the mills, so at the blacksmith-shop. A white man works at the wagon-shop, and a young Indian works with him. They will learn, and soon they can make wagons themselves. The Indians will soon learn themselves and can do without the white men.

**SAMSON.** (an old Indian who spoke in English.) How long will it be before the Indians learn it? They are jealous of the half-breeds. The boys will go and stay a while and then run away. It is too late now; the half-breeds stay and learn the trades, and are now employed.

**JOE HUTCHINGS.** If a white man and an Indian were put in the mill, the Indian will soon learn and the white man can be done away with, and the Indian will run the mill. If the Indians work in the mill like white men, they ought to be paid like white men. Mr. Meacham says by and by the Indian will learn; they will never learn; we want them em-

played now. The white man said long ago the Indians ought to learn. I know the Indians have not learned. But now we have waked up and want to begin. If Mr. Meacham says these things will be done to-morrow, always to-morrow, they will never be done. I want it done to-day. Mr. Meacham says we have no money, but a blacksmith ought to be put in the shop, and the Indian taught, and so in all of the shops. If the old men had been taught in the schools, they would have known these things. Now we want our boys taught. You employ the doctor; I am glad of it; if you did not, and we got sick, we would die; but the doctor comes and we get strong and able to work.

JACOB-ADAM-CHOIT. I am glad to see Mr. Brunot. Our mills got bad and we said so to Meacham, and he told us we would have a mill, but we must work. We did work and soon it will be done, and we will get lumber; and we will have a flour-mill, he said, and now we need it. We need a blacksmith; a white man to teach the Indian, and the white man can quit helping us. Our boys will get like white men. And we want a school-house. We are to-day as if we knew nothing. I am like my father, I can't read and write. Men say I am a white man, but I am only a little like a white man. Some time ago we said we were poor; we want to know if the President sent money here. I never saw any. Did the President send these culter (bad) blankets, worth about three dollars? And this culter (bad) calico? I don't want such poor things. I see how many acres a white man has. I don't want to sell my land to the whites. I want money for my land. I want a good coat and pants, a good house. In a year I want to have money in my hands. I don't want these worthless things. White men would say they were cheated out of their lands, if you did so by them. If you send good blankets, plows, wagons, I would take that. We all want wagons and horses. The Government never gave us any of them. We went out and worked for them. Agents have never done right by us. They took our money away from us. The past year I saw nothing. Now I want to get something. You owe it to us. Long ago we did not wear pants. You want to see us like whites, so you must give us these things.

JOHN COUCHEY. What did the chief come for? I now know he came to see the people. I now want to talk to the chief. We want the things given to us that were promised long ago. We are no more in want of a saw-mill, we have it. Long ago we were promised things, they did not come; but now we are set upon a grist-mill. We want the mill so that our people can get bread. The chief said long ago we should have lands, and now we will get them. And we want word carried to the President that our hearts are glad for this. Besides the land, we need horses, plows, and harness. Long ago we gave our land to the whites, and now they own the land. All that we received for the land in the past is gone. Now we will receive our land. Your talk is good, and what we say is from our hearts. I have never received a wagon, or plow, or harness. Some of the others have; that is why I tell of them. Our land outside we never received anything for. So all the old people talk. All the land which has been bought has been bought with a small amount; my land was as large as all the lands about here; it is as if I had given them away for nothing. In the past I have asked for the things that were promised, but they never came. You talk different to-day from what the white chief talked before.

TOM SHASTA. Some time ago (Miepay) you came and talked to us, and told us good things. Now, Mr. Brunot has come a long way; it is good. The Indian wants to be good, and he likes the whites. Long ago I had no coat, pants, or hat. Papers came from the States and said we will be like the whites. Now I am getting old. I understand what you say. You are getting tired talking to the Indians. We want them all to be good. On most of the reservations the Indians are not like the whites. The whites are all over the country. They make money, and plenty of it, everywhere. The Indian gets poorer every day. If you want us to be like whites, give us what we need. We have received many things, but not what we need. All we got is gone, and we don't know anything. We have learned a little. All are good, and we know what we need. We understand better what you want of us. You see all have hats. Our women are dressed like the whites, and they all want things like whites. In the shops there are no Indians who understand how to make wagons. No Indian can run the mill. We want a white blacksmith and a miller. We can't be like white men without somebody to learn us. After a while we want a school; but these things we must have now. The Indians never asked for them before; the whites said for them to have them, and now we want them. Our lands are surveyed. You must take care of us like you would of children. When you get a school the children will learn to read. You must tell the Indian what is true. You would be ashamed if the Indians could write the truth to Washington themselves. When the money and things arrive here they go into the storehouse and the Indian never sees them. So with all the agents. They never give us what is sent for us. If the agent tells us what is good we will keep it in our hearts. Plenty of money has come here; we don't know how much.

TOM CURL. All these chiefs have not fathers. If a man is good or bad, so he will talk. A long time ago I understood what was told me. When the treaty was made we understood it. Then I was young; now I am old. It would take ten days to tell all I know. If you would get these Indians all right you must stay and see to them. Some of the Indians are good; some are bad. I have not seen what was promised us. At one time we got shoes, hats, tobacco, and everything, and we expected they would always come. We

were promised food for the poor, and we thought it would be so. All that was told us then I throw away. You see us here. It looks all right; but you should go to the poor men's houses, and see what they need. All do not work. Some are poor, sick, and old. I am glad you came. You ought to stay always. All that was promised us in the papers you might as well destroy. Some new folks ought to come and get new papers, and we would believe them. The first thing ought to have been the grist-mill; the saw-mill last. We need the mills to keep the poor from getting hungry and sick. Everybody has not money to buy food. When the mill is done we ought to have wheat put into it and ground, and given to the poor until they die, and then they quit wanting it. The old folks don't care about the school; only the children need it. The old folks need only food to keep them from dying. We need a blacksmith, carpenter, and miller, and then we will be like the whites. There is too much work for one blacksmith. We ought to have three or four in different places. It is nothing to me. I may die to-day or to-morrow. I am talking for others. Every man ought to have a plow and harness like the whites. If a wagon comes to the shop here it has to wait two or three days before it is fixed. If a white man has a wagon broken he takes it and has it fixed at once. One mill and one saw-mill is enough. Those that don't know how to plow should go to work and learn. Some get a bushel and a half to sow; some get two bushels; others three bushels. That is why the Indians go away. When they want oxen to plow they can't get them. When they want potatoes to plant they can't get them. The chiefs get them. They are not the only ones who sold their lands. The bad men have fathers, and all like to get something as well as the chiefs. We ought all to be treated alike. If a bad man comes, let him have things. If a good man sees a bad man packing off things he thinks that bad. I never got anything for my lands. The whites get rich on our lands that we sold. When the whites came to this country they had no shoes. They ate cammas just as we did; and now these same men treat the Indians like dogs and rats. If we had not whites in this country we would live as we did then. Their hogs and cattle eat the Indians' food. We want to get good blankets, not paper blankets. I do not know what our boots are made of. If we hit anything they break in pieces. We did not want sugar and coffee and such things. When I got big I saw whisky. They told me to smell it. It made me sick. They told me to drink it; that it was good. I drank it. I know whites and Indians both drink it; it kills them. I think you ought to quit making whisky, and wine, and beer. The whites say, "Why do you drink whisky?" We don't make it; the whites make it, and give it to us, and they say they will put us in jail for drinking it. Whenever they have war, whisky is sent, and they drink it, and it makes them brave. When they are cold the white man says it makes them warm. When I have a bottle of whisky, and a man says he is cold, I give him a drink. Everybody knows the Indian don't make it. If I had a handfull of money, and went outside, the white man would take the whole of it, and go and get a bottle of whisky for four bits and give it to me. White men taught me to drink.

HENRY KILKE, (Molally.) Long ago the chief said we would buy your lands. The calico and other things, they said, we give you. We want to know about our lands. I have a wagon; I bought it. My house I got the same way. My clothes I bought; the Government never gave me any of them. I got harness, and oxen, and a plow, some time ago. I guess that was all I got for my lands. Now we want to know what we will get for our lands. We need a grist-mill, harness and horses, and plows and wagons, and that is all we want.

LOUIS NIP-PE-SUCK. We are glad to see you here from Washington. If we had a superintendent like Meacham we would have done much better. We are always glad to see him come. We know his heart. We wish Mr. Brunot could go around and see the houses; I don't say to stay a couple of months, but to stop a day or two. You see all these Indians are not wild. They have clothes like whites. Some time ago some of the Indians had flat heads. The whites said it was bad, and they quit. The superintendent before got here at night and left in the morning; never said anything to us. We understand what Mr. Meacham tells us. You hear what has been said. You may take these words, or may be not. We sent our words east before, but they never went. Mr. Meacham promised us a mill. We have it. He said our lands should be surveyed, and it has been done. We need a grist-mill. Everybody has not a team to go away off to mill. You say we do not plow deep. We have not enough horses to plow deep. Some men have good horses, plow deep, and get good crops. You may think what we say is not true, but I think it is true. If we had had a good superintendent we would be all right. Some of our people are poor. That is why we talk about plows and wagons. Strong men can work and get them, but all cannot. Since I have been here I think I have not done anything wrong. Everybody knows I am a chief. I think I am a good man and speak the truth. I have helped the Indians. I have asked the agent to help them. What have I done wrong? They have just gotten their eyes open. Long ago I told them to put a boy in the blacksmith-shop, and carpenter and tin-shop. None of them wanted to learn. One went into the tin-shop and learned; then he learned blacksmithing; then to be a carpenter. Joe also learned to be a blacksmith; now he is a carpenter. Now they cannot afford to have so much work done. Now the land is surveyed, who had it done? I talked to the agent and had it done. Some of the Indians say it was bad. I wanted to give each a home to stay on. If it was not surveyed outside

somebody would jump the claim. So they would here. I think I helped the Government and helped the Indians. The horse Crawford gave me; it is nothing; it was lame; I don't care for it. Palmer, who was superintendent, was a good man. I had a good farm outside, at Umpqua. I had sixty head of cattle. I lost them all helping the Indians. I did not want to come here.

Mr. BRUNOT. Some of you men want six blacksmith-shops and three wagon-maker shops; some want a great many plows, clothes, and other things. If I had all the plows in the country, and all the blacksmith-shops in the country, I do not think I would give you so many, and this is the reason: If I wanted an Indian to be as the best white man in the country, would I set him on the fence, and bring him food, and clothes, and a bed? If I did that, he would never be able to do anything for himself. I want you to get things as white men do. You must work and get them yourselves. I do not promise you anything. My heart is for you to get everything you ought to have from Washington, but I don't promise you anything, for I am not the President. I will carry your words to him, and tell him you are trying to do right. The treaty is almost over. I hope you will get all that is coming to you, but you must make the most of it. It is not yet too late to learn some thing. If you have no place here to teach them, Mr. Meacham can fix it so that your boys can go to town and learn. Some one said they only got a little wheat to sow. How does the white man do? He saves as much of his crop as he needs for seed. I will take your words to the President, and he will be glad to hear that you are men.

Mr. MEACHAM. I am proud of you; you are not savages, but men. Sometimes the Government is slow, but it will do right in the end. The land is surveyed; every man shall get his land. All will be right. The saw-mill is almost done. You have made it yourselves. No white man owns any of it; it is yours. I asked you if you wanted a mill; you said yes; and so the money sent for blankets and calicoes goes to pay for your mill. Mr. Rhinehart says in ten days the saw-mill will be done. Now, if you take the stones of the flour-mill, build a little house beside the saw-mill, and move the grist-mill stones into it, use the same wheel, it will take but little money and little time. But it will take more money from your blankets and calico. I want to know what you want.

Mr. Brunot then spoke to them on polygamy, care for the old people, and other subjects tending to their welfare; after which Rev. Mr. Parrish talked to them in Chinook, contrasting their present social condition and appearance with the time when he first came among them; when they wore no clothes and ate grasshoppers, and pounded sunflower seeds.

All the Indians then shook hands with and bade good-bye to Mr. Brunot and the gentlemen who accompanied him.

THOMAS R. CREE,  
*Clerk.*

#### APPENDIX A c.

#### REPORT OF INVESTIGATION OF ALLEGED CLAIMS AGAINST THE UNITED STATES IN CALIFORNIA, AND VISITS TO HOOPA AND ROUND VALLEY RESERVATIONS, CALIFORNIA, BY COMMISSIONER J. V. FARWELL.

Hon. FELIX R. BRUNOT:

SIR: I have the honor to report herewith the results of my recent visit to California in the interests of the Indian service. Before leaving home under your directions to report at San Francisco, I received a request from the Commissioner of Indian Affairs to investigate a large number of old claims against the Department, under several different superintendents, (see appendix,) amounting in the aggregate to \$373,133 02.

Immediately upon my arrival in San Francisco I caused the following notice to be inserted in the principal newspapers of that city:

#### "NOTICE.

"SAN FRANCISCO, July 20, 1871.

"All persons having claims against the Government arising out of contracts made with duly authorized agents of the Indian Department, in the State of California, are hereby notified to present all evidences of such indebtedness, by mail or otherwise, to the undersigned, at the office of the Superintendent of Indian Affairs, 224 Kearney street, San Francisco, on or before the 5th day of August next.

"FELIX R. BRUNOT,  
"JOHN V. FARWELL,  
"Special Indian Commissioners."

This was published daily until August 5, 1871.

As the result of this notice only two letters were received, representing two of the two hundred and sixty-seven claims included in the schedules, and these simply stating that the claims had been in Washington for a long time.

While at Round Valley and Hoopa Valley reservations, where a large number of the claims were made, diligent inquiry was made concerning them, of the oldest settlers upon said reservations, the result of which was that less than fifty of the number making claims were known to said settlers. A Mr. Rufus Herrick was the only claimant that presented himself, and, from information derived from reliable sources, I am satisfied that his claim and that of his wife are just and should be paid. The reason he has no vouchers, as stated by himself, arose from a difficulty with the superintendent, which was the cause of his dismissal without any evidences of the service performed by him on the reservation.

From the information I could gather, my convictions were very strong that nearly all of these claims are either fraudulent or have been paid. At all events, none of the owners seemed anxious to establish their validity through the channels of your committee. The largest of these claims date back to 1852, and are notorious, in the section where they originated, as gross frauds. Some of the small ones, mostly made from 1855 to 1865, may be just, and payment has been delayed because of their insignificance.

Under your instructions, received on my arrival in San Francisco, I proceeded to visit the Hoopa and Round Valley reservations, in company with Superintendent B. C. Whiting, (who rendered me valuable assistance in obtaining information,) and an escort of Army officers who were visiting those reservations in the discharge of their military duties. Through the courtesy of General Ord, I was provided with every facility for gaining information through the officers in command at those two reservations.

At Hoopa Valley I found the remnants of several tribes, numbering, in all, about 600. In September, 1870, there were 649. They were actively engaged in harvesting wheat, with two of McCormick's reapers—some fifty men and women in one field.

There are, on this reservation, 1,100 acres under fence, 450 of which are cultivated. This year the product has been 6,000 bushels of wheat, 160 tons of hay, 1,000 bushels of apples, and 250 bushels of peaches.

There is a saw-mill on the reservation capable of sawing 1,200 feet of boards per day, and a flouring-mill of the capacity of ten barrels per day. The saw-mill should be moved to a different site, and an appropriation made for that purpose of at least \$1,000.

I found the agent, D. H. Lowry, to be a firm friend of the Indians, having nine employes under him, most of whom had their families with them.

The school here has made very little progress, in fact had only just been organized, and much difficulty was experienced in getting the children to attend.

The condition of these Indians indicates that while they have become accustomed to work and dress like white people, (with the exceptions of a few very old men who were entirely naked,) they have become fearfully demoralized by their contact with the white race. (See report of the physician to the reservation, Appendix A b, No. 29.) I am satisfied that the immediate presence of the soldiers is a curse to the Indians, and no less so to the soldiers. The Government provides a physician for the Indians and one for the soldiers, and, upon inquiry, I found that the principal business of each was treating venereal diseases. The officer in command avers that it is an impossibility to prevent this state of things. Whisky is allowed to be sold freely to the soldiers by the post traders. I scarcely knew which to pity most, the soldiers or the Indians under such regulations.

The small number of Indians gathered here and their peaceable disposition seems to me to warrant a recommendation that the soldiers should be removed so far away that no intercourse could be had, except by order and invitation of the agent to quell disturbances that he cannot manage, should any arise; and that no trader should be allowed on the reservation, except by consent of the agent in charge.

There has never been a survey of this reservation, and the consequence is that some squatters have taken claims in the valley, and more will be likely to do so, much to the injury of the service, unless lines are drawn and made public, making the reservation a reality instead of being one only in name. The valley proper is about five miles long, and a half to one and a half miles wide, with, say, 1,500 acres of tillable land in it.

There are several hundred cattle belonging to the reservation, which are herded in the mountains adjoining. If this reservation was extended to the mouth of the Klamath River, taking in the Klamath Indians, and was made permanent by a law of Congress. It would have a very beneficial effect upon the Indians in the efforts of the Government to civilize them. They seem to think that they have no permanent home, and the incentives to make farms and other improvements are all taken away by this conviction forced upon their minds by the many changes that have been made in their location.

The Klamath Indians have no agent, though they exceed in number all the Indians in California who are gathered upon reservations.

If the present humane policy is to be continued, one of the first requisites of success in it seems to me to be the speedy settlement of all Indians upon permanent reservations, and to assure those already upon reservations that they will not be removed under any circumstances. (See Appendix A b, No. 29, for statements of Mr. Knight, an old settler in California, who was introduced to me by Superintendent Whiting, at Eureka, on our way to Hoopa Valley.)

## ROUND VALLEY RESERVATION.

After completing my observations at Hoopa Valley, a six days' ride over grand mountain ranges, camping out at night, brought us to Round Valley reservation.

I found the agent, Rev. Hugh Gibson, an earnest Christian, and apparently the right man in the right place. There are about seven hundred Indians on this reservation, and their moral condition is but the counterpart of the Hoopa Valley Indians. Harvesting was completed, and they were engaged in threshing wheat.

This is a beautiful valley, surrounded by high mountains, most of which are fine grazing lands.

This reservation, like Hoopa, has never been surveyed. The land is fertile, and, all things considered, it is one of the most desirable locations for an Indian reservation for Northern California that could have been chosen. But here, as elsewhere, the want of a fixed policy in dealing with Indians, and the presence of a sufficient number of soldiers to make a foothold for a few traders, settlers, and camp-followers, has inevitably fixed the status of these Indians as doomed to perpetual trials and persecutions unless the strong arm of the Government shall interpose to define the boundaries of the reservation and protect it from invasion.

There are at present about one hundred settlers in the valley, all of them squatters, knowing when they came that it was set aside for Indian occupancy, but the fact that no survey has been made has emboldened some of them to take up claims inside the reservation fences under the swamp-land act. I rode over these swamp lands, and should consider them as valuable for cultivation as any in the valley. One large farm of 2,500 acres is claimed by a former superintendent, and I was informed that the work of fencing, &c., was all done by Indians. Timber-claims and cattle-ranges have been taken by these settlers, upon the mountains, until the reservation cattle have been driven from their accustomed places for feeding, and are shot at sight when found upon a range taken up by a white settler. On some of the timber-claims thus made the claimants threaten to shoot any Indians sent there by the agent to get timber for fencing or houses.

About ten years ago there was an Indian massacre on this reservation, in which the settlers played the role of Indians. From the best information I could get it seemed to me as though the design was to frighten the Indians to leave the reservation permanently. A story was started among them that they would be murdered if they did not leave.

Some twenty or thirty of the settlers took all arms and ammunition from the Indians, even to their bows and arrows, and soon after that fell upon them in the night, in their wigwams, and killed over twenty of them in cold blood.

From these facts it can be very easily seen that the incentives to work and make homes for themselves are all taken away.

The coming of our party was the occasion of great uneasiness among the Indians. One of the chiefs said to me that the "Great Father sent so many captains to them, and moved them so often that he had no heart left."

The school here is in a flourishing condition under the charge of the agent's wife, who is very successful in interesting not only the children but a large number of adults.

The school is held under some trees. The money expended for a school-house by a former agent exemplifies the Scriptures, "They love darkness rather than light, because their deeds are evil." The school-house was built without a window in it, and was used for a warehouse.

A school-house and a hospital are necessary to enable the agent to make progress in improving the condition of these Indians.

My attention was called to some fine blooded stock, put upon the reservation at great expense. I was informed that former superintendents had placed thirteen hundred head of cattle upon the reservation, and ten blooded bulls. In four years the cattle numbered only two hundred.

Nothing but the most inexcusable negligence can account for the necessity of the Government appropriating of one dollar for the subsistence of the Indians and soldiers upon this reservation.

## MISSION INDIANS.

The superintendent called my attention to the Mission Indians of Southern California, and the difficulties that had arisen there between them and the settlers, and desired me to make a tour of inspection among them. Not having sufficient time at my command to do this and visit Northern California, I sent Mr. James N. Eby, a clerk detailed by the Indian Department, to assist in investigating the old claims referred to in another part of this report. His report is attached herewith, and marked A b, No. 30.

It will be seen from his report that lands were ceded to these Indians by the Mexican government before the United States had acquired title to Lower California.

From the character and habits of the Mission Indians my opinion is that they should be made citizens, and have a right to a homestead of eighty acres each, under some regulation that will give them protection against being dispossessed of their homes again.

In closing this report I desire to say that the superintendent of California Indians, B. C. Whiting, esq., agrees with me that the Government is at fault for the bad condition of In-

dian affairs in that State. Citizens of the United States on the Pacific coast, as well as east of the Rocky Mountains, entertain the idea, and practice it most fearfully, that Indians have no rights that they are bound to respect. The Government must, in some way, work a radical change in this theory, and compel white men to respect the rights of red men as well as black ones. One step in this direction can be made by subjecting them to United States laws when it is practicable, and provide some way for civilized Indians to become citizens when they desire to, without isolating themselves from their tribes, where their influence could be utilized to induce others to follow them.

Some mark of honor should be given to all such individual cases as an inducement to all to adopt the habits of white men. As touching this, I append herewith a letter from the Rev. Thos. S. Williamson, an old missionary among the Indians, marked A b, No. 31.

In this Christian nation there should be moral strength enough to compel, at least, the exercise of strict justice as between these heathen wards of the Government and her own citizens.

The relations of agents to superintendents in their duties, as the work is now organized, have suggested to my mind that much good would result to the service if the agent was made responsible directly to the Commissioner of Indian Affairs, and the superintendent's duties were so changed as to make him an *inspector*, acting under special directions from the Commissioner, by and with the advice of the board of special Indian commissioners. In that case no one of these inspectors or superintendents should be permanently employed in any one locality.

In the making of purchases for the Indian Department in California, the superintendent advertises for bids for all articles required. I was there at the opening of the bids. In dry-goods only two firms sent in samples. The qualities and prices were, in the main, quite as favorable as eastern purchases. The qualities of goods at Hoopa and Round Valleys were very far from that standard. The prices paid were not known to the agent. Some of the articles were so poor that the poorest Indian would not take them. It is essential that everything the Government furnishes should be the most *serviceable* of its kind, as a matter of economy, and therefore I would recommend, where it is practicable, that purchases be made of well-known manufacturers, and that superintendents be relieved entirely from this duty. I cannot see why the Government should not make a contract by the year with the manufacturer of any kind of goods needed, to be delivered at the lowest cash price on date of the order.

An inspector would then *know* the quality of goods he *should find* at any agency he should visit.

Very respectfully, your obedient servant,

JOHN V. FARWELL.

#### APPENDIX A c, No. 23.

##### HOOPA VALLEY INDIAN RESERVATION, CALIFORNIA, July 20, 1871.

SIR: Pursuant to your instructions, I have the honor to submit the following report on the physical and sanitary condition of the Indians on this reservation.

Hoopa Valley is situated in the northern part of this State, and is one of the most healthful localities on the Pacific coast. It is seven miles in length by an average of two miles in breadth. The Indians live in rancherias or villages scattered along the banks of the Trinity River the entire length of the valley. Each of these rancherias is designated by a particular name, and they are entirely separate and distinct from each other, and, in some instances, hold no intercourse. Feuds that have existed for generations between them still prevail; but within the last few years there has been a manifest disposition on the part of the more intelligent ones to effect a more amicable adjustment of their difficulties. The custom of killing each other for some trivial offense has become obsolete with the Hoopa Indians, but is still practiced by the Klamaths, a powerful tribe outside of the reservation, about forty miles distant.

A large number of those on the reservation are becoming aroused to a realizing sense of their degradation, and frequently express desires for an improvement in their condition. To use their own expression, they want to live "all same's white man." In their efforts in this direction, they receive the hearty support of the superintendent and the agent, who encourage and assist them to the full extent of their authority.

The sanitary condition of the Indians is miserable, though gradually improving. At least seventy-five per cent. are afflicted with some sort of malady. If we could have better facilities for treating them, I am confident that this percentage would be greatly reduced—nearly to the standard of the whites. Many of the older ones still adhere to their ancient customs, and persist in employing their own doctors to treat their disorders. Their method of treatment is quite too disgusting to describe here. They are afflicted with one disease in particular that baffles the skill of their most experienced medicine-men, and as this is a modern innovation, and introduced by their more civilized white brother, they very naturally expect

the "white man's doctor" has the requisite means and knowledge to cure them, and unanimously concede to him the privilege.

The prevailing diseases are venereal, scrofula, and rheumatism. About fifty per cent. of the whole number have venereal in some form. This terrible disorder was introduced by the early settlers, and owes its perpetuation, in a large degree, to the presence of the military. One of the rancherias is very contiguous to the post, and, until recently, the soldiers have been allowed to mingle freely with the squaws, and practice their venery to their own gratification. This state of things not being countenanced by the present agent, their visits are made in the night or by stealth. It is impossible to break it up completely without the co-operation of the commanding officer at the post.

Scrofula prevails extensively, consequently many die of consumption. This, in my opinion, is caused by their manner of living, and their imperfect mode of preparing their food, which is primitive in the extreme.

Rheumatism, third in importance, ought and would be very rare in this climate, were it not for a barbarous custom that still prevails among them. I refer to their "tarco," or sweat-house, from which they emerge dripping with perspiration, and instantly plunge into the cold river, at all seasons of the year.

Their main dependence for food, exclusive of that furnished by Government, is salmon, acorns, berries, deer, grouse, and other game. Though not so plentiful as in former times, yet, with the flour, beef, potatoes, &c., issued from time to time, they manage to have plenty, and, if they could be instructed in cookery, would live as well as their white neighbors.

On the whole, they are comparatively happy and contented, though they are conscious that their race is about run, and in a few years more there will be no more Indians.

Very respectfully, yours,

L. FORCE,  
*Physician on Reservation.*

Hon. J. V. FARWELL.

---

#### APPENDIX A c, No. 29.

##### EUREKA, HUMBOLDT COUNTY, CALIFORNIA, August 1, 1871.

MY DEAR SIR: In accordance with your expressed desire, this communication is addressed to you, and through you, as I hope, to the board of commissioners of which you are a member. It may be that I shall seem tedious. It is very probable that much of what I may say has occurred to yourself, or been suggested by others. I do not flatter myself that I am the only one who takes this view of Indian affairs, but my attention has been so feelingly directed to this subject, and I am so powerfully impressed with the necessity of a radical change in the policy pursued, that I am constrained to enlarge, at the risk of some impatience.

Many times my neighbors, in disgust at the reports from the reservation, have desired me to assail the agents in the public prints, but I have forbore to do so thus far, feeling that my acquaintance with the subject would not justify an attack on any person, and did not enable me to suggest any remedy for the evils complained of.

Within the past twelve months, however, circumstances have introduced me to the agent, employes, and Indians on the Hoopa Valley reservation, and afforded me such facilities for observation that I feel competent to offer my views even to your honorable board.

About April or May, 1870, I visited the valley at the request of a New York correspondent of mine, on a tour of inspection. On being informed of my mission, the agent, Captain —, received me very courteously, and gave me every facility for acquiring information. My stay, however, was but for a few days. About August, 1870, the agent sent for me to assist him with his returns, and to see the property turned over to the new agent, daily expected. I remained on the reservation nearly six months, mingling with all parties, more especially with the Indians, and studying the state of affairs.

I found the Indians thoughtful, docile, and apparently eager to enter into any project for their good, if they could only believe that it would be carried out in good faith, but utterly wanting in confidence in the agent, the Government, the reservation, or the white man. They said every promise to them had been broken; they had been cooped up in this valley, away from their natural resources, with just a little flour to eat, enough to stay the stomach, but not enough to give energy or enterprise; had been treated like children by the agent; had no control over their own affairs, and knew not, from day to day, what new humor the agent might take. They said they had no assurance of anything; they were made to work, they knew not why; their allowance was made or cut off, they could not tell what for; their women prostituted themselves to the soldiers and officers from sheer necessity; and that lethargy, starvation, and disease were thinning their numbers, and leading them down to the grave.

I found, in fact, that the reservation was a rehash of a negro plantation. The agent, an absolute dictator, restrained by no law and no compact known to the Indians. His em-

ployés were the overseers. They were treated with contempt by the military agent, indeed scarcely more respected than the Indians themselves; and, in turn, they spurned the Indians and crushed them into the earth. I found no man on the reservation but the agent and the doctor. The rest were abject slaves of an absolutism. They were held at the same distance as the rank and file of the Army are by the commissioned officers. This had been the policy from the start, and the agent was not the man to change it. I must say of him, however, that he was temperate, and, so far as I could see, closely attentive to the interests of the reservation. For some reason or other, he had so close a grip on the public stores, so far as the Indians and employés were concerned, that he very well earned the cant name of "Old Stingy." He lived at ease, maintained the unbending dignity of an autocrat, was pretty well satisfied that nothing more could be done for the Indian but to ease his way to the grave, and, after being notified of his removal, he seemed to take no further thought but to get through his time.

During my stay the superintendent visited the valley. He staid but a few days. We had drinking and feasting during this time, but no grave attention to Indian affairs; no extended investigation of what had been done or should be done. The *status quo* was accepted as the *ne plus ultra* of Indian policy. He, too, appears to think that annihilation is the consummation of Indian management. I do not think such men can do the Indians any good. He who does not think the Indian a human being, having rights, and entitled to treatment above that of a child or slave, and capable of civilization, has no business in the Indian Department. His presence is an obstruction; his manners are repulsive to Indians, and inspire them with no love or respect for the white man, his Government, his religion, or his civilization.

If the reservation was a plantation, the Indians were the most degraded of slaves. I found them poor, miserable, vicious, degraded, dirty, naked, diseased, and ill-fed. They had no motive to action. Man, woman, and child, without reference to age, sex, or condition, received the same five pounds of flour per week, and almost nothing more. They attended every Munday to get this, making a day's work of it for most of them. The oldest men, or stout, middle-aged fathers of families, were spoken to just as children or slaves. They know no law but the will of the agent; no effort has been made to teach them any, and, where it does not conflict with this dictation, they follow the old forms of life—polygamy, buying and selling of women, and compounding crime with money *ad libitum*. The tribal system, with all its absurd domination and duty, is still retained. The Indian woman has no charge of her own person or virtue, but her father, brother, chief, or nearest male relative may sell her for a moment or for life.

I was impressed that really nothing had been done by any agent, or even attempted, to wean these people from savage life to civilization, but only to subject them to plantation slavery. I was informed by many that stores had been sold away from the reservation, by the agents, to enrich themselves, and that in large quantities. I am well satisfied that the Government bounty has not been fairly bestowed on the Indians. But as to any default coming to my own knowledge, I can only make the following statement:

During the last two quarters of 1870 the Government is charged with over a thousand pounds of beef weekly, besides the consumption of two or three hundred pounds of pork weekly. I saw the beef received from Chapman & Co., the contractors, and frequently saw it weighed, but what became of it I never could divine. The Indians were allowed no beef, only the employés, those at work, a few sick, and now and then a stranger, or as a special favor by the agent. The employés were seven to ten; the working Indians never over forty, often less than twenty, sometimes none: sick, three or four; strangers and specialties, very rare. And all complained continually of being pinched. What became of the beef and pork? I asked the man who kept the meat-house, a private soldier from Camp Gaston, a creature of the agent captain, and he did not like to tell; it might hurt the agent.

At the flouring-mill a book was kept in which was entered the flour made daily. I saw this book frequently, and noticed entries of Indian flour and superfine flour made each day. The superfine was mostly as much as the Indian. I do not know what became of it; I never saw it given to the Indians. I never saw any account of sales.

During my stay nearly everything was so done by the agent, I mean as to distributing flour, beef, clothing, and stores of all kinds, that no one but himself could know just how it was done, or what quantity was given. The men who sign the abstracts in the returns do so by command merely, knowing really nothing about the quantities expressed. But, as I said before, they are mere underlings, and any refusal on their part to sign would be met with indignation and incur discharge. There are some few items which must be excepted, and of which they have knowledge.

During my sojourn at the reservation the Indians received, generally, five pounds of flour weekly, if they came for it, but a few times it was reduced to three; why, I know not. Nothing further was given except to those who worked, and as to those, only food. I suggested payment as the inducement to labor, and the captain adopted the plan, and fixed the wages to be fifty cents per diem in Indian goods. I think this works well. I suggested many other devices for Indian improvement, but he said his time was nearly up and he would run his time on the old plan. I visited many of their poor, miserable homes, in

which they lay in the warm sand by a little fire, and the agent sometimes gave blankets and clothing at my suggestion. But beyond what is here enumerated, I know of no further benefit to the Indian from the Government's bounty. I do not think the whole worth \$150 weekly, at Hoopa prices.

This is a small item compared to the wages of prostitution received by the women. There have been in the valley all the time from one to two hundred soldiers, and I think at least half of their pay goes in that way. There have been about ten employés, averaging \$60 per month each, and I believe half of this went the same way. The commissioned officers made large outlays in the same direction. This, taken altogether, more than doubled the Government bounty. Its effect on the Indians has been terrible. Half-breed children, disease, loss of self-respect, are only a part of the evils. It has dethroned the chief, set aside the influence of the father, husband, and head of family, and brought to the front, in all things, the good-looking and profligate young women. They flaunt round in gaudy finery, while their elders are naked or clothed in rags.

My deduction from these facts presents itself to my mind about thus: If it be true that the Indian cannot be civilized, if it is our object merely to ease his way to the grave, and hasten it a little, too, Hoopa has been a success. It needs no remodeling. It is almost perfection. The huddling together in one place; the sameness of the meager diet; the abject submission to the agent; the entire want of mental effort or purpose; the heretofore enforced labor; the prostitution of the women; the utter stand-still, morally and socially, are conditions most favorable to such a result. Open massacre, however, would be cheaper to the Government, more humane to the Indians, and less demoralizing to the whites.

But I do not look upon this as the object of the Government. On the contrary, recent events have changed our attitude and disposition toward the colored races. The negro has become a man and a brother; why not the Indian? Slavery, with its harsh theory of a white man's government, promised nothing but annihilation or abject obedience to the dark races in our land. But this has passed away. The negro will enter into our population of the future, and mingle with the proudest blood in the country. Why not the Indians of this section make one of the elements of our people?

Can it be done, and how? I most assuredly believe that it can. The reason of our want of success lies in our treatment and not in their nature. In their uncultured state, to subject them at once to the snares and pitfalls of civilization, and contact with its worst characters, is to doom them to destruction. To attempt to educate them to literature and religion, and habits of refinement, is to induce imbecility and uselessness. They must do as all other people have done, learn first to subsist by their own labor. The first lesson is how to produce abundance of food, their clothing and shelter. And when they have full stomachs and comfortable firesides, you may give them books. Make abundance, and civilization follows. Reduce our poor whites to starvation, and they want no book-learning. Hungry Indian children will rather catch grasshoppers than learn A B C.

The agent at Hoopa must believe that the Indian is a man and a brother; can be made a worthy member of society; has rights which should be respected, and act upon this thought daily. The plantation system should be given up; enforced labor should be forbidden. Let the big farms be carried on, however, until gradually superseded. The old tribal arrangement, with its common property, domination of chiefs, and duties of inferiors, should be gradually rooted out by the kind interposition of better plans. All marriages should be legalized, and thus sanctity recognized and aided by a simple code of laws. Prostitution should be discouraged, as also polygamy. Every husband and father should be instructed in his rights and duties, and aided in maintaining them, and providing for his family. A cottage home should be provided for each family as soon as possible, with garden, &c., and encouragement and aid given to those who readily accept such life. They should be made to know that under certain conditions these homes will be theirs forever, not subject to the will of the agent, but to a law which they understand, and he must obey. As these homes were built up, the big farms would disappear, and whenever the homes are made self-supporting, the work of the reservation is done. While the present system reaches no end, either it must go on forever, or the Indians must all die, for there is no effort to make them self-supporting.

While this cottage system is being inaugurated, efforts should be made to induce the Indian to think and act like a white man; in short, to make him an independent and not a dependent being. A simple code of laws might be framed, and Indian judges and jurors sit on their own affairs. Every occasion of strife among them would thus be made a means of informing their minds, and lead them gradually to accept our laws and ideas. The agent might still control everything under these laws. But absolutism must cease. It teaches servility and meanness, while manly energy and intelligence are what is wanted. As the plantation never would have fitted the negro for a freeman, so the reservation can never prepare the Indian for self-support in a civilized community. Many of their old customs should be gradually done away. Wife-buying and selling, and polygamy, and the practice of compounding crime, even murder, with money, have never been touched, but should be swept away. Every female should be taught that her chastity is in her own keeping—that she belongs to herself. Even this simple lesson has not been taught. I should not be arbitrary in these matters, but temper the wind to the shorn lamb, yet making the lamb know

which way it blew for its future guidance. Every cottage should be visited at least once a month, and the inmates instructed, encouraged, and aided. Just so quick as an Indian had a place worth taxing, the assessor should be called upon to enroll his name as a citizen and a voter, and the reservation leave him to his fate, to shift for himself as other poor people do. There are many that would speedily take care of themselves.

The reservation has, in fact, degraded the Hoopa Indians, and they know it, and their Indian neighbors know it. The Klamath River Indians, who have had no help from the Government, are better fed and clothed, and more cleanly and manly to-day than the Hoopas on the reservation, and would more easily be made good, self-supporting citizens. They despise the Hoopas, and do not want a reservation. They say that they would rather work out their own salvation than have an agent to dictate to them. His dictation would do them more harm than the Government bounty would do them good.

But their condition is precarious, on account of their utter want of rights, and the recognition of them by the white settlers. They are very numerous, perhaps three thousand. They have some good fishing-places, garden-spots, and grazing-lands, which furnish their main subsistence, but white men are gradually settling on these favorite spots, and in a few years will leave the native nothing but the barren mountain-tops, with the usual concomitant of war and massacre.

On my explaining this to some of the Klamath chiefs, they replied, "Yes; we understand you; you talk right. Suppose we don't make house, and fence, and home. By-and-by white man come and take all, and then Indian must steal, and white man will kill him. But suppose I do make house, and field, and white man come and take it all, what can I do?" I tried to explain that they had rights, and white men could not do that. But they replied, "Well, that may be, if you would come and live among us, and tell us how to do all these things, and talk to the white men for us; but they do not mind us." It is but too true.

There should be an agent at once for the Klamath Indians. He should be a philanthropist of ability and experience. His chief duty should be to advise and instruct them, and intervene in their behalf in all disputes with the whites. There should be no plantation, as at Hoopa. Let them rely on themselves for food, &c., always, but whenever they will build a house and make fields and gardens, help them to tools, seeds, stock, &c. They should also be entitled to a certain portion of land in their own country under certain conditions. A school might be set up in time, but to produce food is the first desideratum.

My plan, then, is the self-supporting family cottage, with instruction in white man's laws and usages, instead of the plantation with its dictation and slavery, and old Indian traditions.

I have the honor to be, yours, respectfully,

H. L. KNIGHT,  
*Attorney-at-Law.*

J. V. FARWELL, Esq.,  
*San Francisco.*

#### APPENDIX A c, No. 30.

*Report of James N. Eby esq., on the Mission Indians of Lower California.*

SAN FRANCISCO, August 5, 1871.

SIR: In compliance with your verbal directions, I have the honor to report that I visited Los Angeles, and made inquiry into the matter of Indian titles to lands in the southern part of California, the past and present condition and treatment of the Mission Indians, and noted the results of my investigation, as follows:

The Indians had title to their lands. I am assured by Don Juan Foster, a resident of thirty-five years' standing in California, that he saw and read documents, issued under authority of the Mexican government prior to American occupation, reserving lands about various missions for Indian uses and purposes. Colonel Kewen, a reliable and intelligent lawyer, sustains Mr. Foster's statement, so far as he can know from traditional sources. Others equally responsible confirm these impressions and statements, and it is suggested that a search of Spanish records in San Francisco would reveal indisputable testimony on this point.

Formerly, the Indians referred to were cared for and controlled by the San Franciscan Fathers, a Roman Catholic association, and under them reduced to a system of peonage. They worked on farms and vineyards, had plenty to eat, but little to cover their nakedness, the climate being even and mild. Afterward, various changes in the Mexican government, and the final occupation of the country by the United States, scattered the Fathers, and the Indians were left to their own resources, being employed as much as the comparatively small demand for labor would allow.

At this date they are without an agent, and dispersed over the country, many laboring for stock-raisers, farmers, and viniculturists. Without any one to watch over them, they are fast becoming drunkards and nuisances. They seem to be easily persuaded to any industrial pursuit by an efficient and intelligent manager. I observed in my wandering, in the vicinity

of the town of Los Angeles, that around vineyards in the suburbs the Indians were frequently to be observed lying dead drunk by the wayside, or stupidly and stolidly recovering from the effects of strong liquors.

Throughout the extent of country lately under the management of Agent Tansey, the Indians are fast becoming worthless, and the influence of bad white men among them is tending to their speedy ruin, morally and physically. Disease is becoming too prevalent among them, and delay in procuring reservations and responsible men to care for them will end in extinction.

On the whole, I am of the opinion that all the Mission Indians, including the San Diego, San Luis, and Coahuilla Indians, may, in two or three years, be made self-supporting, at a cost of not more than \$50,000 per annum, which amount would include cost of fencing, breaking land, agricultural implements, seed, &c.

The Coahuillas number about 3,000, the San Luis 600, and the San Diegos 1,500. At San Pasqual there are 3,000 acres of arable land, besides mountain land; timber only sufficient for fire-wood. Houses might be built of adobe and roofed with shingles at small cost. The mountain land would serve for grazing.

As but little land is needed for grape-growing and other tropical fruits, this reservation might answer for the San Diegos; water plenty.

At La Pala there are 1,200 acres arable land; timber, large and plenty; water, plenty. On both San Pasqual and La Pala are some settlers. These would have to be bought out. As they have had two dry years, it could, I think, be done at little expense to the Government.

The San Diegos and San Luis are industrious, if properly managed, and accustomed to labor on vineyards, and in raising grain, for which services they receive slight compensation, and this generally expended for liquors.

For the Coahuillas a reservation is proposed, situated twenty-five miles northeast of Temecula; abundant land in mountain valleys, with water and timber sufficient for all purposes.

All these localities are off the main routes of travel, and within reach of an agent to be stationed at San Pasqual as a central point.

Don Juan Foster states that the Coahuillas will not affiliate with the other Indians referred to; otherwise, it would, in my opinion, be best to locate all of these Indians on one reservation, if sufficient arable land could be found in one locality. He is positive that the Coahuillas will work and become independent, if they, as well as the others, are protected from the encroachments and evil practices of depraved whites; and this opinion as to their habits of industry is sustained by nearly all whom I consulted in regard to Indian matters. There is a general conclusion that the reservation system is the best, and that no whites, except those authorized by the Government, should be allowed to locate near the Indians. The latter have acquired strong appetites for stimulants, and nothing but exclusive separation from whisky-sellers will restore them to self-respect and economy.

General Banning proposes a reservation on some sea island, from which the Indians could not escape, and where they might be prevented from the purchase of strong drink. It is doubtful, however, if this could be done, except at a great cost, even if such islands could be found where water and timber would be plenty. I mention it simply to give every view that may be offered concerning the settlement of Indians on reservations.

Others, again, desire that the Indians be "let alone," declaring that they get along well enough as at present situated. This is a truthful remark, if "well enough" be simply a state of existence which brings about very cheap labor, for which the wages are bad wines and fire-water.

I beg leave to add that I have been strongly impressed with the necessity of caring for and assisting these Indians to a nearer approach to manhood; and I am more willingly persuaded because I think these Indians are quiet and peaceable, and may readily be induced to better their condition, at small cost to the Government, and, in course of time, become good men and citizens, owning property of all kinds—stock cattle, vineyards, orange groves, &c. The old influence of the Catholic fathers is still observable among them, and I have no doubt that, without subjecting them to the degradation of their old lives, they may be made to settle down and live like any other occupants of the soil.

In the brief time for preparing this report, it has been impossible for me to treat the subject in detail. I have, therefore, stated concisely as possible what facts were presented before me, with the inferences and suggestions naturally following. In arriving at facts and opinions, I sought for the responsible and intelligent men of the community, without regard to politics or religion. On one point there was a general conclusion—as to the proper person to carry out any plans that might be suggested by your commission; he should be a man well acquainted with these Indians, capable, moral, judicious, and honest.

In regard to claims which originated under O. M. Wozencraft, while I was unable to discover any possible and tangible evidence, there was but one opinion, and that denounced as frauds any attempts to obtain money for supplies alleged to have been furnished the Indian Department during his term of office, and which have never been paid for. -

Very respectfully, your obedient servant,

JAMES N. EBY.

Hon. JOHN V. FARWELL,  
*Commissioner.*

## APPENDIX A c, No. 31.

ST. PETER, MINNESOTA, June 2, 1871.

DEAR SIR: I hasten to comply with your request to reduce to writing and send you my views as to civilizing the aborigines of our country. From a residence of thirty-six years among them and careful consideration, I know that this subject is not understood by Congress, nor by the officers of our Government having the power and inclination to improve their condition.

The views and actions of our Government in reference to the Indians have, from the first, been guided by men who are strongly interested pecuniarily to keep them savages; and hence, the large sums of money annually appropriated to improve their condition are expended with little benefit to them or ourselves.

There are two grand impediments to the civilization of the Indians of our country.

The first arises from their religion. Heathen Indians say, "We were not made to work as civilized men do, but for warriors and hunters, and if we should engage in agricultural or mechanical labors we would soon die. The gods we worship would speedily destroy us." Many of our people will say this is mere pretense, only an excuse for laziness. I have seen abundant evidence that very many (I suppose a large majority of the heathen aborigines of our country) sincerely believe it. This false idea cannot be removed by argument. It can and ought to be by instruction in Christianity, and affords a powerful argument for Christian missions among them. Our Government has no right to interfere in religious belief, and so cannot legislate against this directly, but it may in this case, as in others, indirectly weaken or destroy such erroneous belief as are sapping the foundations of civil society.

The other impediment to the civilization of the red men is in security of both person and property among them. The wisest of men says, "he that laboreth, laboreth for himself, craveth it of him." You and your fellow commissioners, being working men, need not be told that the hope of enjoying the fruit of their labors is the grand incentive to industry among white men and black men; but perhaps you are not aware that there is absolutely nothing on which a red man may hang such a hope. His gun or bow may be broken, his horse killed or violently taken away, or his tent cut to pieces, or cabin burned over his head, or himself, wife and children murdered in broad daylight, in the presence of hundreds of competent witnesses, and he can have no redress whatever. It is not, and never was thought to be, any part of the business of Indian chiefs or braves to punish thieves, robbers, or murderers. Judges of the United States courts, when such cases have been brought before them, have decided they have no right to interfere where one Indian has injured another.

The chairman of the Judiciary Committee of the United States Senate, (Patterson,) in a long and very able report, printed by authority of the last Congress, shows very clearly that the Indians never have been subjected to our laws, and endeavors to show that they ought not to be. To prove the latter, he uses the arguments always used by men who are interested in keeping them savages, and doubtless sincerely believes it an unjust interference with their rights and injurious to them. But in this he is mistaken, as might be clearly proven. The Indians have suffered much from injuries inflicted by white men, but more than ten times as much from injuries inflicted by each other. Our Government has wronged them when, through fraud or terror, they have got them to assent to treaties which they justly believed to be injurious to their own people, and then, by the appointment of incompetent and unprincipled agents, defrauding them of a large part of what was promised them for their hunting-grounds; but the greatest injury of our Government to them is keeping them in circumstances in which it is impossible for them to provide for themselves. This is the condition of all heathen Indians who have sold their hunting-grounds, and it must continue to be so till they are subjected to our laws. It is also, to a great extent, the case with those who have embraced Christianity. Such labor in cultivating the earth to some extent, but not with that steady industry which they would evince if they had the same assurance of getting the fruit of their labors which white men have.

Many will tell you that the Indians are unwilling to be subjected to our laws, and that any attempt to so subject them would bring on war with them. This is false. The Dakotas, when they sold their hunting-grounds in Minnesota, sold the best part of the State, stipulated expressly that they should have protection of persons and property like civilized men, and if our Government had, in accordance with this provision of the treaty, punished the heathen Dakotas who robbed and murdered their own people for working like civilized men, those heathen Sioux would not have, in 1862, massacred several hundred whites and brought untold miseries on themselves and people, and caused our Government to expend many millions of dollars in fighting them.

In the British possessions to the north of us the Indians are all held subject to the common law of England, and there has not been an Indian war for nearly a century. The hostility between the white and red men of our country is chiefly owing to the fact that the latter are, in our country, everywhere outlaws. If we would strike from our statutes the

words "*except Indians not taxed*," and punish them for their crimes against each other, just as we do with Irishmen and Germans, they would very rarely molest us—would soon be able to provide for themselves, as other men do. I do not believe that they or any other heathen people can be properly civilized, so as to become good citizens of a republic like ours, without being instructed in Christianity; for the Gospel is the great instrument of civilization. But subjecting them to our laws would greatly facilitate bringing them under the influence of the Gospel, and, at the same time, by restraining thieves and robbers, make it possible for heathen Indians to live as herdsmen or farmers, which it is not now possible for them to do, because, as they violate the religion of their people, it is considered honorable and right to rob or murder them.

Two years ago I visited most of the camps, and five of the United States agencies for the Dakotas or Sioux, on the Missouri River. The Santees are chiefly Christians, trying to get a living by agriculture, to aid them in which our Government has furnished them one or two hundred horses, and they have also purchased a number. Shortly before my visit, heathen Indians had come to the neighborhood and stolen nearly all those horses. At each of the agencies some land had been plowed and seed-corn furnished, and some efforts made by the agent or employés to induce them to cultivate it.

Among the Yanktons the women have been in the habit of raising some corn for many years, and some of them had a prospect of a good crop. The men evinced little interest in the matter. Some of them said it was worse than useless, for if they raised corn, in winter they would have to eat corn and nothing else; but if they raised no corn, their grandfather (the President of the United States) would feed them on bread and meat.

I might write much more on this subject, but suppose I have written enough to convince you and your fellow-commissioners that subjecting the aborigines of our country to our laws will be advantageous both to them and ourselves. But, though the legislation required to accomplish this is simple, it is not easy to obtain it.

May God, our Saviour, guide and bless every one of you, so that you may be instruments of great good to the poor Indians, is the prayer of your servant,

THOS. S. WILLIAMSON.

Hon. J. V. FARWELL.

#### APPENDIX A g.

#### REPORT OF THE EXECUTIVE COMMITTEE OF THE BOARD OF INDIAN COMMISSIONERS.

##### *To the board of Indian commissioners :*

GENTLEMEN: Your executive committee, appointed March 16, 1871, respectfully report that the act of Congress approved March 3, 1871, requires the board to audit all the accounts of the Indian Bureau in the following words: "That hereafter no payments shall be made by any officer of the United States to contractors for goods or supplies of any sort furnished to the Indians, or for the transportation thereof, or for any buildings or machinery erected or placed on their reservations under or by virtue of any contract entered into with the Interior Department or any branch thereof, on the receipts or certificates of the Indian agents or superintendents for such supplies, goods, transportation, buildings, or machinery, beyond 50 per cent. of the amount due, until the accounts and vouchers shall have been submitted to the executive committee of the board of commissioners appointed by the President of the United States, and organized under the provision of the fourth section of the act of April 10, 1869, and the third section of the act of July 15, 1870, for examination, revision, and approval; and it shall be the duty of said board of commissioners, without unnecessary delay, to forward said accounts and vouchers so submitted to them, to the Secretary of the Interior, with the reasons for their approval or disapproval of the same in whole or in part attached thereto; and said Secretary shall have power to sustain, set aside, or modify the action of said board, and cause payment to be made or withheld as he may determine." This act was supplementary to the act approved July 15, 1870, which says: "And it shall be the duty of said commissioners to supervise all expenditures of money appropriated for the benefit of Indians of the United States."

Soon after our appointment, the question arose in the office of the Second Auditor of the United States Treasury as to what "class or classes of claims should have the approval of your executive committee," to which we replied that, "in our opinion, all bills of any and every class for moneys paid for the benefit of the Indians should have the approval of the executive committee;" which opinion, having been referred to the honorable Secretary of the Interior by the Auditor, was affirmed by him, and is now the rule of the Department.

From March 23, 1871, to December 5, 1871, your committee have examined 1,136 vouchers, including cash accounts of superintendents and agents, representing a cash disbursement of

\$5,240,729 60, being vouchers for Indian goods, annuities, services, &c., amounting to \$3,410,759 34, and cash accounts of superintendents and agents amounting to \$1,829,170 26.

Of these there were rejected as follows:

|                                                                       |             |
|-----------------------------------------------------------------------|-------------|
| 10 for exorbitant prices, amounting to .....                          | \$82,786 29 |
| 2 for being purchased without consulting the board, amounting to..... | 2,232 82    |
| 7 Erie and Pacific Dispatch, amounting to.....                        | 15,917 09   |
| 21 Northwest Transportation Company, amounting to .....               | 52,170 80   |
| Total rejected.....                                                   | 153,166 20  |

These two last were rejected, first, in the case of the Erie and Pacific Dispatch, because the accounts had been incurred contrary to the award of the board of Indian commissioners, in the presence of the Indian commissioner, which award was made to the lowest bidder after receiving written proposals from three of the principal competing companies, and afterward given to the Erie Railroad without consulting the board of Indian commissioners, or allowing competition from the other companies; and, second, in that of the Northwest Transportation Company, because said contract was let contrary to the recommendation of the board of Indian commissioners, that the United States Army Quartermaster's contract should be used wherever available, and for other places contracts should be made after sufficient advertisement.

Your committee often find it very difficult to locate the agency for which goods are purchased, on the place where the purchase is made, owing to a want of completeness in the form of voucher used in payment, and they would respectfully suggest that the rule of the Department which requires that the "object and necessity, date and place of purchase, shall be stated in every case," should be more rigidly enforced.

During the absence of Commissioner Bishop in Europe, and Commissioner Colyer in Arizona, Commissioners Tobey and Lang were appointed and acted on the executive committee.

Very respectfully, &c.,

GEORGE. H. STUART, *Chairman.*  
NATHAN BISHOP.  
VINCENT COLYER.

#### APPENDIX A c.

##### REPORT OF COMMISSIONER JOHN D. LANG.

##### *Removal of the Cherokees from North Carolina and East Tennessee to the Indian Territory.*

VASSARBOROUGH, Twelfthmonth 6th, 1871.

ESTEEMED FRIEND: Permit me to report that during thy absence in Oregon I was requested to take special charge of the removal of a band of Eastern Cherokees, then in readiness and awaiting transportation at Loudon, Tennessee, to join, by invitation, their brethren, the Western Cherokees; an efficient assistant was assigned me in the person of D. C. Cox, clerk in the Department of the Interior. This band, about one hundred and thirty in number, came in from the mountains of North Carolina and Tennessee, having been dispossessed of all their lands and property fraudulently, which will appear more fully hereafter by their plea and written statement addressed to our board. We left Washington about the 28th of Ninthmonth, (September,) and found this company located in a valley near Loudon Railroad Station in a destitute and suffering condition. We held a council with them all—men, women, and children; we read to them a kind letter from the President, which cheered and encouraged them; we gave them such advice as appeared necessary. The day of departure was agreed on, and they accordingly got ready, and we set off on the day specified. Provisions for their subsistence on the journey were furnished by the War Department, as had been the case for their support of several months previous. Secretary Delano furnished funds, and we expended about \$1,000 economically for clothing, shoes, &c., for men, women, and children. He also furnished "rations for subsistence," enough to support them for a short time after their arrival at their new homes. We continued our journey, in good passenger cars, day and night, until we arrived at Chouteau Station, about the center of the Cherokee nation. Here they camped on a very fertile prairie, adjoining a fine belt of timber abounding with small game, deer, wild turkeys, &c., and near the Neosho River, which contains fish in abundance, all of which was pleasing to the Indians. A much larger number were left behind in Tennessee and North Carolina, not being prepared to remove; but a delegation of fifteen came from them on foot, some sixty and others one hundred and fifty miles, to inform us of their intention to follow their brethren as soon as they could get ready. An arrangement was made with the railroad

managers to take them as they came, and to convey them in the same manner, in good passenger cars, and to the same station as those we accompanied personally. I may say, respecting the above journey, that all went on quietly and peaceably—no trouble and no disorder, and with no guards but my friend Cox and myself. Upon our arrival we sent a messenger and letter also to the governor, agent, and head men of the nation, inviting them to come and take charge of our company. Some few came before we left, and others were expected, who would give such information and advice as they needed.

Duties requiring our return to Washington early, we parted with the Indians in good feeling, and they expressed gratitude for their comfortable journey and for our kind attention.

This remnant of the Cherokee tribe, by reliable accounts, rendered valuable assistance in the infancy of our Government, and have occupied lands in North Carolina and Tennessee upward of a century, and have received little or no care (by way of education or otherwise) from any body of white people, and now to be deprived of and forced off from their lands, and deprived of money due them, appears hard to them. They allege that their lands were sold by Government agents, who used the money to pay their private debts, their bondsmen and others connected with them as pretended claim agents, without the consent of the Indians, and against their protest, which they will show on a fair investigation of this fraudulent transaction. It appears to be the Quapaw payment (witnessed last year) over again; the same parties concerned in that are alleged by the Indians to be concerned in this case of theirs now pending in a suit brought by the Attorney General for restitution.

The Cherokee name has long been familiar to our nation, their grievances and wrongs have claimed the sympathy of all the good and virtuous, and I hope this poor remnant will share largely in the good fruits of the present policy and peace and good will. I wish to curtail this report as much as possible, expecting reports from other members of the board will require much space: continued ill-health in my family, and being very much worn from constant engagement by day, and much night-travel, has prevented my reporting earlier.

With esteem and kind regard, thy friend, respectfully,

J. D. LANG.

F. R. BRUNOT.

#### APPENDIX A A.

##### REPORT OF COMMITTEE ON PURCHASES.

Hon. FELIX R. BRUNOT,  
*Chairman Board of Indian Commissioners.*

SIR: Your committee, who were charged with the important duty of aiding the Government in the purchase of goods and supplies, respectfully report that during the year they have given their advice and assistance whenever they were asked by the Indian Bureau.

On the 27th April your committee superintended the opening of bids for annuity goods. These had been advertised for in accordance with the plan recommended by us, and fully explained in our last report. A suitable warehouse had been secured in New York for the delivery, inspection, and shipment of the goods, under Government lock and key, and had been kept open for several days previous for the reception of the samples which accompanied each bid.

At the hour named for opening the bids there was a large attendance of the representative merchants of New York and other cities. The proposals were opened by the honorable Commissioner of Indian Affairs, who proceeded to read the same in the presence of the bidders, two representatives of the honorable Secretary of the Interior, your committee, and some other members of our board.

For several successive days we were closely occupied in examining the samples and aiding the Commissioner in making the awards to the lowest bidder according to quality. The total number of bidders was ninety-two, and the awards were as follows:

|                           |                   |
|---------------------------|-------------------|
| Blankets and cloths ..... | \$157,588 70      |
| Dry goods .....           | 183,793 31        |
| Clothing .....            | 34,675 90         |
| Hats and shoes .....      | 9,701 65          |
| Hardware .....            | 25,368 96         |
| Tobacco .....             | 33,434 50         |
| <b>Total .....</b>        | <b>444,563 02</b> |

The feeling that there was to be fair and open competition, led merchants and manufacturers to offer their goods at, and even below, the lowest market price, which enabled the Government to secure goods of excellent quality at extremely low prices.

On the 3d of May, at the same place, and in the same manner, sealed proposals for subsistence supplies were opened in the presence of one hundred and forty bidders, coming from many of the leading cities and towns both east and west.

After spending considerable time in examining the bids and samples furnished, the awards were made strictly with a view to the real wants of the Indians and the interests of the Government, and were as follows:

|                        |                   |
|------------------------|-------------------|
| Beef, on the hoof..... | \$125,630 35      |
| Bacon.....             | 142,248 60        |
| Sugar.....             | 89,476 25         |
| Flour.....             | 258,177 95        |
| Coffee.....            | 69,855 00         |
| Soap.....              | 5,721 37          |
| Salt.....              | 1,040 25          |
| Tobacco.....           | 28,600 00         |
| <b>Total .....</b>     | <b>720,749 77</b> |

Your committee again met on the 15th of June, at the office of the Indian Bureau in Washington, where bids for beef and flour were opened in the same manner. The number of bidders was ninety, and the awards were as follows:

|                       |                   |
|-----------------------|-------------------|
| Beef on the hoof..... | \$589,366 50      |
| Flour.....            | 29,050 00         |
| <b>Total .....</b>    | <b>618,416 50</b> |

All these purchases, aggregating the sum of \$1,783,729 29, were at prices averaging much below what had been paid before our board began to exercise its supervision, and enabling the Indian Bureau to furnish a larger and better supply to the several tribes. The price paid for beef on the hoof was 1.99½ to 2.97 cents per pound, while previous to the supervision of your committee the price paid was from 3 to 6½ cents per pound, or an average of 4.39 cents per pound against 2.60 cents per pound.

The following is a comparison of the result, as compared with the previous year:

|                                                       |                   |
|-------------------------------------------------------|-------------------|
| 1870:                                                 |                   |
| 12,669,790 pounds beef, average cost 4.39 cents ..... | \$556,850 70      |
| 1871:                                                 |                   |
| 27,441,750 pounds beef, average cost 2.60 cents ..... | 714,996 85        |
| 27,441,750 pounds beef, at 4.39 cents, would be ..... | \$1,204,692 82    |
| 27,441,750 pounds beef, at 2.60 cents, would be ..... | 714,996 85        |
| <b>Saving in favor of 1871 .....</b>                  | <b>489,695 97</b> |

While it is true that a portion of this difference may be due to a decline of prices the present year, yet it is believed that it is chiefly due to the confidence which the board were able to inspire in the minds of contractors that the business would receive their personal attention, and the awards be honestly made to the lowest responsible bidders. A number of the bids were made at prices ranging even higher than the preceding year.

Besides supervising these public awards, your committee have aided, from time to time, as called upon, in making purchases in the open market to meet emergencies. The last and the largest of these purchases were made last month, and amounted to \$24,098 64.

It is due to the late honorable Commissioner of Indian Affairs to say that he generally manifested, as regards the matters intrusted to your committee, a desire to carry out our recommendations. Our surprise was, therefore, the greater to find him entirely ignoring our action in the important matter of transportation, which forms one of the most serious causes of outlay in connection with the question of Indian goods and supplies, and has been the source of great abuses when controlled by unworthy parties.

On the 4th day of May last, in order to determine the relative cost of several heavy articles, such as flour, coffee, sugar, &c., for which bids were tendered by both eastern and western merchants, we asked the New York Central, the Erie, and the Pennsylvania railroad companies to specify the lowest rates at which they would carry any or all of the articles named in the advertisements. As the terms offered by the Pennsylvania Railroad Company were found to be much the lowest, your committee put on record

their recommendation giving the freight to this line. We learned, some three weeks later, that the goods and supplies were being forwarded by the Erie Railroad Company, and ascertained, on inquiry from the Department, that the managers of that line had, subsequently and privately, put in a lower bid than that upon which the award had been made, and much lower than their own first bid. We found the Commissioner had accepted this without giving any of the other companies any opportunity of further competition, and without the knowledge or advice of your committee.

The abuses incident to transportation of Indian goods led the board in their first report to recommend that the supplies and goods should, if possible, be transported by the Army Quartermaster's Department, so far as it relates to western transportation. Subsequent experience confirmed the board in this opinion. At a meeting of the board in New York in April last, the Commissioner submitted to the board for advice a proposition of Durfee and Peck to transport the Indian goods on the Missouri River. The proposal was found on examination to be two cents lower than the Quartermaster's contract, which had been already made after a lawful advertisement for proposals. If this contract, allotted lawfully to the lowest responsible bidder, was understood by the bidders, as it was expressed in the contract, to cover the transportation for the Indian Department, then it was manifestly improper to receive and consider any proposition of a disappointed bidder after the allotment had been made and the terms known. Such was the proposal of Durfee and Peck, following a shade lower all the prices of the contract.

If, on the other hand, the Indian goods and supplies were not definitely understood to be covered by the contract, then the only proper course for the Commissioner of Indian Affairs was to advertise for proposals, according to law, and give the contract to the lowest responsible bidder.

In this view of the case, submitted for their advice, the board unanimously recommended that the Indian goods and supplies should be carried on the Missouri River under the Quartermaster's contract, or if not, that proposals should be invited by advertisement, and the transportation awarded to the lowest bidder.

\*Taking our stand on the recognized principle of morality, we entered our protest against that method of obtaining and awarding contracts—a method which clearly implies that, after a fair opportunity to bid has been offered to several competing parties, and the prices made known, one of them may be permitted subsequently and privately to underbid all other competitors. Such a course evidently must be destructive of all fair and honorable competition.

With further modifications in the form of advertising, as suggested by our experience, and which may yet be made, your committee are more than ever convinced that all "Indian rings" can be broken up, and that the wards of the nation, who have been so long the victims of greedy and designing men, ought and must be treated in a manner worthy of the highest moral obligations of a Christian government.

That it has been and still is the sincere purpose of our Government to fulfill such obligations we trust has been evident in the history of the past year.

Respectfully submitted by the committee.

GEO. H. STUART, *Chairman*.  
JOHN V. FARWELL,  
ROBERT CAMPBELL.  
WILLIAM E. DODGE.

PHILADELPHIA, December 6, 1871.

#### CONFERENCE WITH MISSIONARY SOCIETIES.

The board of Indian commissioners met at the Arlington House, Washington, D. C., on Thursday, January 11, 1872, at 11 o'clock a. m.

Present: Commissioners Felix R. Brunot, Pittsburgh; Robert Campbell, St. Louis; Nathan Bishop, New York; William E. Dodge, New York; John V. Farwell, Chicago; George H. Stuart, Edward S. Tobey, John D. Lang, N. J. Turney, and Vincent Colyer.

The meeting was called to order by Mr. Brunot, president of the board. The following-named gentlemen were present: Hon. Columbus Delano, Secretary of the Interior; B. R. Cowan, Assistant Secretary of the Interior; Hon. F. A. Walker, Commissioner of Indian Affairs; Revs. S. B. Treat, D. D., secretary A. B. C. F. M.; John C. Lowrie, D. D., secretary Presbyterian board; W. L. Harris, D. D., Methodist board; Jay L. Backus, D. D., Baptist Home Missions; George Whipple, D. D., American Missionary Society; J. M. Ferris, D. D., Reformed Church; H. Dyer, D. D., Hon. William Welsh, Senator Stevenson, of Kentucky, Benjamin Stark, Ohio, John A. Kink, New York, Rev. T. U. Dudley, Colonel E. C. Kemble, secretary Episcopal Indian commission, Dr. William Nicholson, Kansas, Francis T. King, Baltimore, Benjamin Tatham, New York, Orthodox Friends; Samuel Townsend, Samuel M. Janney, Thomas Y. Canby,

B. Rush Roberts, Richard T. Bently, Hicksite Friends; Anson M. Powell, New York; William P. Ross, C. N. Vann, W. P. Adair, W. A. Phillips, Cherokee delegation; Samuel Chicote, chief, and S. W. Perryman, Pleasant Porter, John K. Moore, D. N. McIntosh, F. S. Lyon, agent, Creek nation; P. P. Pitchlyn, S. B. Jackson, Choctaws; A. G. Long, Chickasaw; Hon. Amasa J. Walker, Massachusetts.

Invitations were sent to Rev. Father De Smet, Roman Catholic, St. Louis, Missouri, and to the Secretary of the Unitarian Society, Boston, Massachusetts, but their absence in Europe prevented their attendance.

Mr. BRUNOT. We propose to ask Dr. Treat to open our meeting with prayer.

Prayer was offered by Dr. Treat.

Mr. BRUNOT. The board of Indian commissioners, in looking over the extensive field, which is coextensive with the limits of our country—the field in which the Indians are found—find that they have been unable to visit all portions of the field or to get information direct by personal observation from many parts of it, and have felt a desire to know what was being done by the Christian societies who were asked to co-operate with us and with the Government in the work of endeavoring to civilize and christianize the Indians. We felt, too, that if the officials of these societies could, from time to time, come together and meet with us and give us their experience in their efforts in the Indian country, and each receive each other's suggestions, informing us in reference to the difficulties they encounter, &c., much could be done for the advancement of the object which is so dear to all of us, I presume, who are here; that is, doing justice, as becomes a Christian nation, to the people for whose care God has placed upon us the entire responsibility. With that view we have invited you to come here to-day, and, as the most practical mode of accomplishing something by the meeting, it is proposed to ask the representatives of the Christian societies who are here to inform us of their views, their experience, and their success, and also to give us their opinions as to what is necessary for the more efficient carrying on of the work in which we are all engaged. I will, therefore, ask Mr. King, who is the representative of one of the societies of Friends, to make such a statement to the meeting in reference to the doings of that society, as he may deem proper.

Mr. KING. In view of this meeting, our executive committee requested the attendance of Dr. Nicholson, who is the agent of our committee, and whose whole time is given to the supervision of the work. He is here, and can state the facts so much better and more correctly and interestingly to the meeting than I, that I beg leave to ask him to represent us.

Mr. BRUNOT. We will be glad to hear from Dr. Nicholson. I would suggest—the gentleman will pardon me—that a statement as to the location of the reservations and agencies under the charge of your body, the progress they have made, the number of Indians, &c., would be gratifying information to many who are present, and probably would be desirable information to all. Our board has these facts, but perhaps not all who are now present are in possession of them.

#### ORTHODOX FRIENDS.

Mr. NICHOLSON. The field in which our society is engaged is the central superintendency, embracing the Indian tribes within the State of Kansas and the Indian Territory. The entire number of Indians in this superintendency is about twenty thousand, not including the Cherokees, Creeks, Choctaws, Chickasaws, and Seminoles, who are mostly self-supporting and manage their own business; their agents report to the Commissioner of Indian Affairs, and not through the superintendent, although the last-named officer presides at the meetings of the general council in the Indian Territory. The Indians under the charge of the superintendent are divided into different tribes and bands, and their condition is various. Some of them are, to a very large extent, civilized, and some are wild, roving Indians, that come into their agencies only for the purpose of securing their rations, and remain a very short time. The Kiowas, Apaches, Cheyennes, and Arapahoes are, to some extent, civilized, though but slightly so. There are in Kansas three distinct agencies, and the Indians embraced therein are looking forward to a movement into the Indian Territory as soon as some arrangement can be made for the disposition of their lands in Kansas and the purchase of new homes in the Territory. Schools are in operation among the Indians in Kansas and the Indian Territory, varying in the number and progress of pupils, depending upon the varying circumstances of the tribes. When a school is opened it is for the purpose of imparting to the pupils a knowledge of Christianity, as well as of the ordinary rudiments of education, it being considered that simply instructing them in the ordinary elements of learning would avail but little unless they are led to a higher life than that to which they have been accustomed in their wild condition. Success has attended the efforts of the society in this direction. It cannot be expected, taking into consideration their past condition, the length of time they have been in a state of barbarism and subject to the animal passions, that they will at once show that complete reformation in habits which is expected but not always found among the whites. The encouragement, however, is

very great to persevere in a work of this sort, and it is believed that the efforts will be blessed if continued. The society is endeavoring to encourage a tendency, which is being manifested among the leading men in these tribes, to settle down on homes of their own, its endeavors being materially aided by means of funds placed in the hands of the Secretary of the Interior by Congress. Some of the leading chiefs of wild tribes have settled down, and are now engaged in following the ways of the white man, planting corn, &c., and express themselves much gratified with the experiment. As an instance, the case of Big Mouth, one of the most noted warriors of the Arapahoes, may be taken. He avoids any reference to his former life, and looks forward to the time when he can settle down and live as a Christian man should live. The Cheyennes and Arapahoes, tribes that some years ago gave the Government considerable trouble, frequently murdering and robbing white settlers, have, for the last two years, been exceedingly quiet, with the exception of some of their young men who have gone off and joined the Kiowas in raiding into Texas. They remain quietly on their reservation, their children attend school, and the leading men of the tribe manifest a disposition to remain peaceable. Despite the predictions of the military, and others who were supposed to know, that there would certainly be a war with these Indians, through the blessings of an overruling Providence, and through the efforts made by the President of the United States, the board of Indian commissioners, and the religious denominations co-operating with them, the tribes have been peaceable and quiet, and in a condition of transition toward a better life.

Among the Kiowas the old habit of raiding into Texas prevails to some extent, occasioned by causes entirely beyond the control of the society at present. These Indians were driven out of Texas and away from their homes (where they were engaged in stock-raising and doing well) by filibusters who wanted their lands, and they now raid into Texas, stealing horses and mules, as they say they have a right to some rent for their land. They are greatly demoralized by Mexican traders, who come to them with contraband goods—ammunition, fire-arms, and whisky, and sell to the Indians in exchange for the mules, horses, and cattle they have stolen. The Mexicans have a hatred for the Texans, and they encourage the Indians in their depredations. For the past few months, however, the tribe has been peaceable. Three of their chiefs, who confessed to the agent that they had been engaged in a murderous raid into Texas, were arrested and sent to Texas for trial. One of them was killed on the way, while attempting to take the life of his guard. The others were tried and sentenced to be executed, but upon the recommendation of prominent citizens of Texas, together with the indorsement of General Sherman, the sentence was commuted to imprisonment for life. The men who now have control of the Kiowas are disposed to be quiet, and say they have no disposition to give the Government any further trouble; and it is thought by Superintendent Hoag, who has charge of these Indians, that it would be a wise measure for some of the chiefs of this tribe, be, as the Cheyenne and Arapaho were, invited to Washington, to confer with the President and Secretary of the Interior and board of Indian commissioners, in relation to their affairs. It is probable that some of the members of these tribes do now go out on these raids, but they are those who never subject themselves to the control of the Government, who never come in for any rations, and who are perfectly independent of the Government. If there have been any depredations by the Kiowas since the arrest of their chiefs, it has been only by individuals who have gone out and joined these wandering bands of Comanches.

The conjunction of the military post at Fort Sill with the agency at the same place is a very unfortunate combination. The Indians come into the agency—sometimes single bands, frequently more—to obtain their rations, and are thus brought in contact with the troops. All who are familiar with intercourse of soldiers and Indians know something of the terribly demoralizing influence which the former exerts over the latter. It is a subject for serious consideration as to how the two can be supported. The Government has gone to great expense in establishing fortifications there, and it is not likely that the War Department would be willing to remove them. And yet, to a man who is not a military man, it seems to be a very unsuitable point for a military post. The object of the presence of soldiers is to prevent the Indians from raiding into Texas, and yet the fort is thirty miles from the boundary line, north of it. The soldiers are without power to interfere with Indians on their reservations, and, consequently, the military are of no use if they remain where they are. The removal of the agency to some other point would be attended with heavy expense, the Government having already erected agency buildings, school-houses, &c. But it is believed that if the Indians could be moved further north, and thus not only be separated from the military but taken away from the Texas border, great good would result.

The question of securing the Indian Territory to the Indians exclusively is one of great importance. White men have gone into that Territory during the last twelve months. The military have been ordered to remove them, but have not yet done so. If the Territory is opened to settlement by the whites, the policy of congregating the Indians there with a view to their civilization will prove futile. The class of white men that precede true civilization are worse than Indians, being land-grabbers, who

desire to gain possession of the land to sell it to those who will become the early settlers of the country. They will corrupt and demoralize the Indians in every way, and their fate is certainly sealed whenever this class of white men are turned loose upon them. It is expected that there will be an effort made this winter to induce Congress to make the Indian Territory one of the Territories of the United States, thus throwing the land open to settlement by whites. Whatever is done should be carefully watched by the friends of the Indian, and it should be their endeavor to have this territory reserved exclusively as the home of the red man, and thus enable him to be removed from contact with whites. This branch of the society has an executive committee of two members from each of its yearly meetings. These yearly meetings are distributed all over the country, the members meeting at least twice in the year for conference. One of these meetings was held at the office of the superintendent of Indian affairs at Lawrence, Kansas, to enable the members to become thoroughly familiar with the workings of the system. There are various committees that have charge of special missions connected with the Indian work. There is also a general agent who gives his whole time for the purpose of keeping the society thoroughly posted in regard to the condition of affairs at all the agencies, and who makes inquiry into the fitness of those who fill any station in the Indian service; so that, as far as possible, good men may be secured.

Mr. BRUNOT. In speaking of the Arapahoes and Cheyennes, did I understand you to say that some of the grown-up Indians were cultivating the soil?

Dr. NICHOLSON. Yes, sir; I so stated. Big Mouth, the Cheyenne chief, who led the charge when Colonel Elliott was killed, and who now owns the horse that Colonel Elliott once owned—of course he was fighting in defense of his home—has settled down, and preparing to have a crop the next season.

Mr. BRUNOT. They work themselves, some of them?

Mr. NICHOLSON. Yes, sir. And one of their leading men planted corn last season.

Mr. BRUNOT. That is a very important point, for it has been the general impression that it was impossible to do anything with the grown-up Indians. My experience during the past summer has satisfied me that that was a mistake, and that they would work under proper influences. We will be glad to hear from the other branch of the Society of Friends.

#### HICKSITE FRIENDS.

Mr. JANNEY. I returned about three months ago from Nebraska, where I was superintendent of Indian affairs, having held that office two years and four months. The northern superintendency, of which I had charge, is composed of seven tribes: the Santee Sioux, the Winnebagoes, the Omahas, the Pawnees, the Ottos and Missourias, the Iowas, and the Sacs and Foxes of Missouri. The Santee Sioux number about a thousand and are the most advanced in civilization, they having been for a considerable time under the care of the missionaries of the Episcopal Church and the American Board of Missions, the Presbyterian and Congregationalist. They have schools, and a large number of the children attend them, being taught both English and their own language. A very small portion of the tribe, so far as I could discover, speak or write the English language, but a large number speak and write their own, and are able to hold correspondence with those who are in Minnesota and Wisconsin. They dress like white people. Our society has an agent there, appointed by the Government, and since we have had charge there, we have built a saw-mill and flouring-mill, and the lands have been allotted in severalty to the Indians by the Government. A very large proportion of the men will work, especially for wages, and many of them are beginning to cultivate their own land. During the last year they built, with the assistance of the agent, eighty log-cabins for themselves on their allotments. They were furnished by the agent with doors, windows, nails, &c., &c., and will probably move into these cabins in the spring. The Winnebagoes number 1,400. They, like the Santees, have renounced hunting, but the Government issues rations to them—beef and flour. Their lands have been divided into severalty, but they have not yet received their patents. Many of them are industrious and very willing to work; the men now doing the work that was formerly done by the women. Most of them dress like white people. They have three schools, which are well attended. They have a Sabbath-school, and meetings for Divine worship are held there occasionally. An industrial school is much needed, and we have applied to the Government for it. The Omahas live on the adjoining reservation to the Winnebagoes, and number about one thousand. When I took charge there was only one school, but we now have three, all well attended. During the winter before last these Winnebagoes hauled two thousand saw-logs to the mill, managed by themselves, without any wages, in order to build cabins and houses for their use, and last winter they cut a good many more. These saw-logs have been converted into lumber. The work of building houses has been arrested on account of want of funds, but we hope that will be remedied. Some of these Indians dress like white people, but a large portion still wear the blanket from want of funds to provide themselves with other garments. They have gone on

the hunt this winter, and suffered greatly from cold. The Pawnees live upward of one hundred miles from the city of Omaha, their reservation being near the Northern Pacific Railroad. They number about twenty-four hundred. A large proportion of them are still blanket-Indians, living in mud lodges. Some of them are advancing in civilization through the agency of an industrial school; this, however, accommodates only about seventy scholars, and is, therefore, limited. A day-school is in operation, and has about fifty scholars. Their lands have not been allotted yet, and they do not seem to be prepared for that by reason of the encroachments of the Sioux, with whom they have been at war for years. An effort was made to negotiate a treaty between these tribes, but failed. White settlements are, however, being made around their reservation, and I hope that will keep out the Sioux and enable the Pawnees to pursue their intention of farming. Many of them are willing to work, and request that a small portion of land may be given them. Heretofore they have cut down trees for their ponies to feed upon the boughs, but now, for the first time, they have provided hay. The manual-labor school is a great blessing to the tribe, but is capable of accommodating only a small number of pupils.

The Ottos and Missourias number about 450. When I went out there first they had no schools; they did not work, and depended for their support upon the small annuity allowed them by the Government. Now they have a flourishing school. They are taking up farms on the prairie, cutting and hauling logs, and converting them into lumber; doing it all themselves. I consider them in an improving state.

The Iowas number about 250. They are much improved since we went there. They were very much addicted to intemperance, but have now a temperance society in operation among themselves, and keep the pledge remarkably well. The most of them dress like white people. They have a good school and orphan asylum.

The Sacs and Foxes are in a more unsatisfactory condition than any of the others. They have dwindled down to about 80, and many of them are intemperate. They receive the largest annuity (per capita) of any Indians in the superintendency, and yet they have the fewest comforts. I suppose they will be removed to the Indian Territory, to which they are not averse. I consider it essential to the progress and civilization of the Indians that they retain their reservation, be protected in their rights, and properly cared for by the Government. If this is done, they will become civilized, I have no doubt, in less than a generation, which is as fast as could be expected.

The whole number of Indians in the superintendency is between six and seven thousand. During the last year they have increased two thousand. I wish to say a few words relative to the civilization of the Indians. In the first place, secure them a permanent home; give them land of their own; assist them in building houses; deal fairly, kindly, and decidedly with them; and I would recommend that as many intelligent, virtuous women as can be induced to go among them should be sent there. I have always thought that if our agents and employes were married men, the influence of their wives and daughters would be beneficial to the Indians. The Indian women are less advanced in civilization than the men. They are shy and timid, and will have but little to say to any except women, and consequently the presence of white women among them will be of immense advantage. If you can commence the work of civilization among the women, the civilization of the whole tribe will rapidly follow. A sufficient number of schools should be established to accommodate all the children of each tribe between the years of six and twelve. When they have made some progress in the English, (I should teach them nothing but English,) then transfer them to an industrial boarding-school. The boys should be put to work, as they are in the industrial school in the Pawnee agency, where they will be able to learn farming, &c. The girls should be instructed in house-keeping, sewing, &c. Sabbath-schools should be provided, and religious meetings should be held among them as often as possible. I will remark that during the past two years nearly all the children going to school, with the exception of the Santee Sioux, have been clothed with material sent by friends of our denomination. They have also sent supplies to the sick and infirm, amounting in all to about \$21,000. I believe if this policy is pursued, in a few years there will be no more trouble with these Indians, and that others, seeing that they are progressing in civilization, will follow their example.

Mr. TATHAM. You speak of the allotments in severalty; is there any permanent title; how long are they guaranteed the use of the farm?

Mr. JANNEY. The Omahas, for instance, receive 160 acres for each head of a family, and 40 acres to each individual, and they have received certificates—a kind of possessory title—which secures the land to them and their heirs, but does not allow them to alienate or transfer their title to any white person. They can sell only to members of their own tribe, and to the Government.

Mr. BRUNOT. We have the honorable Secretary of the Interior, and General Walker, the new Commissioner of Indian Affairs, present. If the Secretary has something to say to the meeting we shall be glad to hear him.

[The Secretary declined to make any remarks.]

## MISSIONS OF THE "AMERICAN BOARD."

Mr. BRUNOT. Mr. Treat, who is the secretary of the American Board of Commissioners for Foreign Missions, is present, and we shall be pleased to hear from him.

Mr. TREAT. We have now but one agency under our control, and have had that but a short time. I have nothing to say in regard to it. Our work among the Choctaws commenced in 1835 and 1836, and we have kept it up until the present time. We fully believe that the Indians can be reached by Christian civilization, and have the most abundant proofs of it in the history of our mission. We have been in this work for fifty-five years among the Choctaws and Cherokees, and tribes farther north, and the evidence is conclusive that the Indians can be reached and made civilized men. I cannot fully agree with the gentleman who has just spoken (Mr. Janney) in regard to the Indian language. I would not exclude the English, for it has been found to be of advantage in teaching the Indian his own language, but we must reach the adults through their own tongue; and, above all, it is necessary in reading the scriptures and Christian books. Our experience, extending not only through many tribes of Indians, but in many parts of the world, has induced us to attach very great importance to this vernacular teaching. We began our work among the Santee Sioux when they were in Minnesota. We have six native preachers and teachers connected with our commission; we have four licensed preachers, and these we find to be useful and efficient laborers in the work; we have in our service between five and six thousand laborers, and we have expended about a million and a quarter of dollars in addition to what we have received from the Government, exclusive of what we have expended for boarding-schools. Mr. Chairman, there is one fact I would like briefly to mention. About two years ago an experiment was made by a portion of the Santee Sioux, who separated from their own people and went out to become white men, as they termed it. They gave up all their tribal advantages, their annuities, and everything, and went out to the Big Sioux to plant themselves there as a colony. They were very poor, and found it difficult to get money enough to secure their titles, and yet they have worked on faithfully and diligently. One of the first things they did was to form a church of one hundred members. They have now a native pastor. This shows very clearly what the Indian can do.

Mr. BRUNOT. I understand you that they have left their own land and gone and purchased and paid for their land?

Mr. TREAT. I do not know how much they have paid for the land.

Mr. BRUNOT. They have settled as white settlers?

Mr. TREAT. Yes, sir.

Mr. BACHUS. I understood the gentleman (Mr. Treat) to say that during fifty years his organization had expended over a million of dollars?

Mr. TREAT. Yes, sir.

Mr. BACHUS. I would be glad to know in what particular direction that amount has been expended. That is at the rate of \$20,000 per annum, a large sum.

Mr. TREAT. I can answer the gentleman if time is allowed me.

Mr. BRUNOT. I presume there will be no objection.

Mr. TREAT. We commenced our work among the Cherokees in January, 1817, who were at that time in Tennessee, in the vicinity of Missionary Ridge. On account of troubles that arose the tribe was transferred across the river, with great loss to themselves, and also retarding, very materially, our work among them. In 1818 we commenced among the Choctaws and established a flourishing mission among them. We have been among various other tribes. Those were the large missions, the expenses being at times quite large. We have been among the Senecas a long time. We have been among the Choctaws since 1835-'36. I took pains to ascertain the amount, and I am not mistaken. It was over a million of dollars.

Mr. BRUNOT. It has been suggested to me several times that the Presbyterian Church had been at work for many years among the Indians and had not succeeded in civilizing them. One remark of the secretary (Mr. Treat) shows why they have not succeeded. Whenever a mission had secured a foothold among the Indians, somebody wanted their land, and they had to go, and the work had to be done over again. And it has always been this way until the present state of affairs. It illustrates one great point which we ought to make, and which our board ought to make—that it is the duty of our Government to protect the Indians on the land which it has given them, and to which they had the prior right, and which right was acknowledged by the Government and confirmed by the treaties. We should insist on the Government maintaining for them this right. The fact that a million of dollars has been expended, and the object for which it was expended has been defeated by the very means which the Government has undertaken for the purpose of civilization, is a very important one. We will now hear from Dr. Ferris, of the Reformed Church.

## REFORMED CHURCH MISSIONS.

Mr. FERRIS. I have come here more to listen than to talk. This is an entirely new work for us. We have two agencies, and as it has only been four or five months

since our agents reached the field of their labors, we have done, as yet, very little. The first trouble we met with was to secure the services of suitable men as agents, for the pay which is allowed them by the Government. We made application to men that we thought would be the right men for the positions, but they declined on the ground of inadequate compensation. We have had a feeling among us that I might as well express, and that is that these agencies have paid heretofore by cheating, and we trust now to carry them on without cheating. We have an agency among the Pimas and Maricopas, upon the Gila River. Schools have been established, and the agent reports that the Indians are cultivating the land, manufacturing to some extent, and are disposed to accept civilization. They wish instruction, and we hope to send out a missionary and teachers to assist the agent in the work. He is quite well contented, and is able to live on his salary from the fact that the teacher employed there is his wife, and that helps him out. We have sent out supplies of all kinds, from a melodeon down to a primer, and articles of different kinds for the Indians. Besides that, we have an agency among the Apaches. The agent reports from six to seven hundred Indians; and others that have come in will make the number eight or nine hundred. There are some other Indians, about four hundred, on the other side of the Colorado River, who wish to unite with the Indians of this agency. The agent is a man of rare ability and character. I judge, from one of his letters, that he is the only white man there. He says, "Send out some one to join me to keep me from barbarism."

Mr. BRUNOT. You are going to send somebody out?

Mr. FERRIS. Yes, sir; we hope to send some one out in the spring. The agent reached his post in September last. We understand that others of the Apaches have been settled upon reservations, and there has been some intimation to us that we might, perhaps, be requested to take charge of them. We are disposed to do what we can. The Indians are represented to us as cultivating the land and disposed to settle down and accept civilization. The Pimas and Maricopas are civilized to some extent, and are cultivating the land and manufacturing to some extent.

Mr. BRUNOT. It is proper to say to the gentleman who has just spoken, that the new reservations of the Apaches in Arizona are proposed by the Secretary of the Interior to be placed under the care of the Reformed Church, and no doubt there will be considerable preparation necessary, and a demand made upon the efforts of your society to carry on that work.

Mr. FERRIS. Well, sir, we are a little church, and have a pretty large mission in heathen lands, but we will try to do all we can.

#### BAPTIST MISSIONS.

Mr. BRUNOT. We will be glad to hear from Dr. Bachus, of the Baptist denomination.

Mr. BACKUS. In 1817 our people commenced with the Pottawatomie Indians, in Michigan. Afterward, we went to Kansas and continued the work there until 1868, I believe. In 1818 we commenced with the Cherokees, then in North Carolina. When the Government moved them from that State the same missionary went with them. The mission is very prosperous. Our communicants are numbered by thousands. Our laborers by scores. Several places of worship were burned during the war. We now have about fifty schools. Our society commenced with the Creeks, in 1823. They were then in Alabama. I think it was in 1832 that they went to the Indian Territory, our representative going with them and continuing the work. We have twenty-four ardent missionaries working there now as helpers. In 1826 we commenced our work with the Choctaws, then in Kentucky. They passed into the Indian Territory, and our missionary went with them. In 1828 we commenced with the Chippewas, of Lake Superior, erected a building at an expense of two or three thousand dollars, and continued the work until it was broken up by the removal of the Indians. In 1830-'31 we commenced with the Shawnees. In 1833 with the Delawares. We continued with them more or less until they were removed south. In 1833 we commenced our mission with the Ottawas. We continued it down through a long period. The Ottawa mission was remarkably blessed, a large per cent. of the population becoming communicants in the church. In 1833 we commenced with the Omahas instead of the Ottawas. I confound the one with the other. In 1834 we commenced with the Kickapoos. I could speak of schools and missions, &c. I will say I believe what Dr. Treat has said. I think I can show that our people have spent more than a million dollars in these Indian missions. We have now five agencies; the Cherokee, the Creek, in the Indian Territory, the Pi-Utes, in the eastern and northern part of Nevada, the Walker River, in the southern and western part of Nevada, the northwestern Shoshones in Central Utah. Our agent with the Cherokees is J. B. Jones. He is perhaps the best Cherokee scholar that lives.

The Creek agent has been with the tribe for a long time, and is present here, and I hope he may be heard from. Our present agent with the Pi-Utes is Charles F. Powell. The first man obtained for the position died soon after arriving on the ground.

At the Walker River agency, C. A. Bateman is the agent. At the Central Utah agency George W. Dodge is the agent. We have been very much embarrassed, as my brother has

said, in finding a man suitable to fill the position of agent, and I feel the need of a satisfactory man, especially in this Nevada agency. I spared no pains to obtain one, and by personal efforts, and encouragement of additional support from our society, if necessary, I secured George W. Dodge. We have applied to many men in whom we have confidence, but, as my brother has stated, the salary was not sufficient to encourage them to come. They were men who would not steal and speculate, and consequently would not accept the position. We have assistant associates with the agencies; we have nine of them in the Indian Territory to whom we are paying some three thousand dollars per annum, more or less. We have instructed these agents that they were officers of the Government, that their first duty was to the Government, and that they were in every possible way to sustain it, and commend it to the Indians.

#### METHODIST MISSIONS.

Mr. BRUNOT. Dr. Harris, who represents the Methodist Church here, will be good enough to make a statement to the meeting.

Dr. HARRIS. Mr. Chairman, I represent a society here, to-day, that began its work among the Indians in 1814, commencing among the Wyandotte Indians, at Sandusky, in the State of Ohio. From that day to this there has been no time that the Methodist Church has not had men among the Indians, and we have met with great success in transacting our missionary work. We have always taken a very deep interest in the Christianization of the Indians. We have now some nine or ten missionaries, and we had at the last report about twelve hundred communicants among the Indians. In regard to these agencies, it so turned out in the allotment of agencies that there was no agency allotted to us in which we had a missionary at all, and our society hesitated for a while to enter into this plan, feeling that they were not prepared to take upon themselves any more missionary work, at present, of that class. In our intercourse with the Department of the Interior, and the Indian Bureau, we did not understand that the relation we were to sustain to the Government, in this matter, involved the placing or establishment of schools, &c. We understood that we became responsible to the Government in the nomination of agents for the agencies assigned to us, and we endeavored to nominate good men to take charge of them, who would be true to the Government and true to the Indians, and who would not live by stealing. Whether we have succeeded in this I am not informed. We had two agencies.

We had in the first place four agencies, three of which were in Oregon, but one of them, by mutual arrangement between the Interior Department and our society, has been surrendered and transferred to the Roman Catholic Church for the reason that they had a mission and we had not. I speak of the Grande Ronde agency. We have the Siletz Warm Springs and the Klamath agencies, the latter having been recently assigned to us. The agency at Fort Hall was assigned to us, and we nominated an agent, but from certain representations made to us we surrendered it, with the understanding that it should be transferred to another denomination. It has been ascertained, however, that the parties were mistaken in the representations that they made; that the facts were not as they supposed them to be, and the Department of the Interior has restored the agency to us, and our agent, who was there, will go back. We have an agency at Yakama which, I understood, was visited by the president of this meeting during last year. We have a very earnest and faithful man there, as we believe, who is a good friend to the Indians at heart, and who spends a great deal of his time working for them. He has acquired their language so as to speak it fluently.

In the State of Michigan an agency has been assigned to our church. Mr. ———, who had been for a long time among the Indians, and spoke their language and enjoyed their confidence, was appointed agent, but he died before entering upon the duties of his position. We then nominated Mr. Smith, who had been in the Indian office in Detroit for several administrations, and was very familiar with the Indians in the State. He was lost in a steamboat accident upon Lake Huron. We have recently recommended for appointment a gentleman by the name of George W. Betts, who was at one time a missionary for our church among the Indians in the upper peninsula of Michigan. He is not connected with the ministry. We have five separate missions in the State of Michigan, and three or four of them are served by Indian pastors. I shall be very glad to furnish the commission the information asked for just as soon as I can secure it by correspondence. The information of the details of this school and missionary work in these various agencies is not in our office in New York, because they are directed by the local authorities of the church there.

#### CONGREGATIONAL MISSIONS.

Mr. BRUNOT. I would be pleased to hear from the Rev. Mr. Whipple, of the American Missionary Association.

Mr. WHIPPLE. There were assigned to the American Missionary Association four agencies in Minnesota, Wisconsin, and Washington Territory. The three agencies

that were assigned to us in Minnesota and Wisconsin have no superintendent, and therefore the American Missionary Association took special pains to secure men of more than ordinary ability and experience to fill the office of agents. We were not able to secure agents on the salary which the Government gives. In order to do so it was necessary that the association should add to their salaries to the amount of some thousands of dollars; and it seems to me the Government will always find great difficulty in getting men because of the meagerness of the compensation.

In regard to the progress of the work, I think I can say that our agents and laborers there find all the success they can reasonably expect. In the first place, upon their arrival there it was a season of the year when it was most unfavorable to the cultivation of the soil. Then the Government required their services in the investigation of certain frauds which had existed against the Government and against the Indians, in which they were able to render material assistance. In regard to the Indians at the White Earth reservation, where there is an Episcopal mission, under a native minister, nothing can be said except that which is encouraging. Their native minister is a good one. They all dress in citizens dress, and act as well as citizens generally. They have undertaken the cultivation of the soil, it being but recently that they have had an opportunity of doing anything of the kind; probably one hundred and fifty acres of ground are under cultivation by the different Indian farmers, from three to five acres each. Twenty-five Indian houses have been built; the agent has built a large school-house, which will be conducted on the plan of a boarding-school, and the indications were, when I was there, that the house would be filled. I took with me a letter from Bishop Whipple; it was read to the Indians. They said that they accepted me as their representative in the payment that was about being made to them, and which I went there to attend, as I brought with me a letter from the best friend they knew of; and in relation to the school-house, they said, "We know now that something is being done with the money." In the little experiment made there at White Earth, there is every reason to believe that if ordinary inducements to labor are given to these Indians, they will in a short time become as industrious a community as any you will find in the Northwest. There is one agency among the Chippewas of Superior, and one among the Menomonees. I think there is in Wisconsin a small agency, and a similar band in Washington Territory. Very little has been done there for the education of the Indians, for the reason that the band was a small one, and were so scattered, and their habits have been so roaming that the school has been only a limited one. I would say here something with regard to the need of work on the White Earth reservation. It is necessary that increased expenditures for school purposes should be made, and buildings should be so enlarged and increased in number as to furnish twice the accommodations they now do. There are thirty-six townships of the most excellent land set apart for the Indians. I think the question of Indian civilization fairly settled, and the plan has all the elements of success, if we can have increased facilities in the way of money and labor in assisting the work of the missionaries who are at present among the tribes. I think that the paper sent us by Mr. Colyer makes some inquiry of what the agents most complain. So far as our agents are concerned, they complain mostly of the difficulties that arise from contact with the whites. In the first place, they need more stringent laws to enable them to prevent the introduction of whisky into the Indian country. I do not know that they complain of anything else so far as the Government is concerned. They feel that the Government has responded to all their demands, and they are greatly encouraged; they believe that the effort will prove a success, and we shall be able to civilize the Indians. Mr. Chairman, will you permit me to make one remark? I listened with much interest to the remarks that have been made in relation to teaching the English language to Indian children. It seems to me that there is no substantial difference of opinion between the gentlemen who have spoken on the subject. Where there is an Indian literature I would not hesitate to teach it, and to teach them in their native language; but where we have got to create an Indian literature, and especially where they have no Christian literature, I would, under existing circumstances, teach them the English language. At the formation of the Government an attempt was made to keep the Indians a distinct race; in fact they were really a sort of foreign nation in the midst of our own territory, and then it was essential that they should have a language of their own, but now they have got to be surrounded more or less with an American and English population. I want to introduce them into our Government as citizens, and it is therefore necessary that we should teach them our language, that they may in time speak it.

Mr. BRUNOT. I think the gentleman does not differ from those who have previously spoken in reference to the teaching of the English language; the only difference is that some of them find it, or think they find it, better to teach them through the English language, and their efforts are defeated in the teaching of that language.

#### EPISCOPAL MISSIONS.

Rev. Dr. Dyer, Senator Stevenson, and Mr. Welsh represent the Episcopal Society. I should be glad to hear from Dr. Dyer such views and statements as he may feel prepared to make.

Mr. DYER. To save time, I hope Mr. Welsh will undertake to make a report for our society, as he is more familiar with the subject than I.

Mr. WELSH. The work to which my attention has been specially called, is that which was commenced quite a number of years ago among the Indians. Three years since we had the supervision of three agencies; a little more than one year ago we had the supervision of seven. Two years since, the wild Indians of the Sioux or Dakota nation in the region of Devil's Lake and those in the vicinity of Lake Traverse were almost in a starving condition. Many of them were committing acts of the most savage cruelty. Dr. Daniels was the agent at Lake Traverse. The agency at Devil's Lake is now in charge of the Roman Catholic Church. At Devil's Lake the change has been marvelous. Men who a short time ago, comparatively speaking, were committing acts of the most savage cruelty, are now settled on the reservation, and some of them have developed into skillful farmers. The Christian policy pursued toward the Indians by the agents have been eminently judicious. They have shown the Indians how to work, and in no case have they given them help unless the Indians were willing to work, and consequently they are nearly all industrious people. They dress in citizens' clothes. Those who three years ago were engaged in scalping and committing other acts of violence and outrage are now industrious. The agent testified to me that his worst Indians are now as skillful and industrious as any they have on the reservation. I agree with gentlemen here as to the beneficial results of inducing women to go among the Indians. I persuaded the mother of one of our agents to go among them. She has been there but a little while; she has gone into their houses, taught them knitting and sewing, and how to make their own garments, so that they now need only the material. These are the Poncas. Their schools are in a prosperous condition and the Indians are advancing on the road to civilization. The women have commenced a mothers' meeting, and on Sunday they attend religious worship. There is a teacher there, a very excellent man, from Lawrence, and he co-operates with our agent and with the missionary in the work. The other agencies are the Sioux or Dakota, except one given to the church among the Cheyennes. Of that I have no knowledge. Dr. Dyer has a letter on the subject and can have it read. The mission, to which our brother of the Society of Friends referred, among the Santee Sioux, is one we have had for eleven years. They lived in log-houses when I was there last—this time last year. They have been very much embarrassed because implements of agriculture have not been furnished them and lands have not been given to them in severalty, and that caused the breaking up of the band that was referred to by Dr. Treat. One of the chiefs with his whole band determined they would be men. To do this they had to give up all their rights to property in the tribe, their annuities—in fact, they left the tribe without a farthing to commence on. By hard work and perseverance they have succeeded. The rest of the tribe—the Santee Sioux—are to a great extent Christian men and women. They are industrious and respectable people. The head chief was, at one time, the fiercest of the tribe, but now I do not know a more sagacious man among all the tribes that have come under my notice. The tribe next to this that we have the appointment of an agent, is one where the Presbyterians have a man. We have a man with them, and I shall speak only of our operations. The mission has three houses, a church, and a school-house. On each end of the reservation there is a church with a mission-house. The Indians have assisted in the building of houses, doing the rough work. The change for the better among these Indians has been marvelous. Instead of being lazy, and compelling the women to do their work, they are industrious and are opening farms, building houses, and going on with the work of civilization very rapidly. The lands have been surveyed, but have not yet been given to the Indians in severalty. Three of the chiefs have been baptized; they are men I know very well, who are industrious and are leading the entire band to civilization. This tribe of Yankton Sioux are now progressing very rapidly, and with the aid of the Government they will continue to improve, beyond all question. There is a difficulty that has existed, and one for which we have not, as yet, found a remedy—that of feeding the Indians indiscriminately, whether they were idle or industrious. The Sioux above this tribe are not thoroughly located yet, but they are progressing toward civilization, and have been behaving in a very proper manner. The next agency on the same side of the river is the Upper Missouri, or Crow Creek. The Indians I have seen there are very quiet, respectable people, engaged in agricultural pursuits, and long for schools.

I was up to the mouth of the Cheyenne River. There the Indians seemed very anxious to have schools also. Beyond this there is a very large band living. They come in to see and watch what advantage there is to be obtained by this civilization, and seem very deeply impressed. If we can give them lands in severalty, and agricultural implements and cattle to stock their farms, I have no doubt they would all come in, for the Indians realize the importance of this matter of civilization. Beyond these is a band of Indians we must treat with before the Northern Pacific Railroad gets there. They have a great abhorrence for a surveyor. I asked some of them to let us go out and survey the land. They said they had seen men doing that kind of business along

the railroad, and they had never done them any good. The other agency is that of Spotted Tail. When it was located at Whetstone we had a very large school there, in which the children learned rapidly. That is characteristic of the Indian children. They are very quick to learn. The other agency is that of Red Cloud's Indians, who are a roving people. Red Cloud said plainly that, so long as the Government supplied him and his people with food, he did not care much about schools or missionaries. A very intelligent man has gone among them. As the Commissioner of Indian Affairs has recently been there, I hope he will say a word or two upon the subject.

I will refer to one point of great interest; that is the use of their own language among the Indians. Some of us had the same idea that they should teach them nothing but English, but those who were the strongest advocates, now think it best to teach them their own language first, and they will afterward acquire the English much easier. Theirs is a phonetic language, and a smart boy will learn it in three or four weeks; and we have found it far better to instruct them in their own language, and also to teach them English as fast as we can. It will be very difficult, if not impossible, to spiritually benefit the Indians, unless you instruct them in their own tongue. We have four Indian teachers. We have a number of ladies of cultivation who have gone out to instruct the Indians at the Yankton agency. We have three with the Santee Indians, two with the Poncas, and another who has just left here during the last few weeks. There is everything to encourage us. The Episcopal Church has raised a committee to co-operate with the Government in the work. We have appointed a special committee, with Senator Stevenson as chairman, to watch over the interests of the Indians committed to our charge, guard their titles to land, &c. The body to which I belong is thoroughly aroused, and during the last two years has spent a large amount of money in the work. They are anxious to do everything they can.

## PRESBYTERIAN MISSIONS.

MR. BRUNOT. The Rev. Dr. John C. Lowrie, of the Presbyterian denomination, will be heard from.

DR. LOWRIE. I am very glad, Mr. Chairman, to be a listener, and I do not intend to take very much time in the remarks which I will make. I would say at the outset that our present views of the work of this board and of our church have been very much modified by the past experiences of our branch of the church in the missionary field. I am very glad that the honorable Secretary of the Interior is present. We all read with great interest his report this year, in which he recognized the idea of centering all the Indian tribes in the Indian Territory. For years I have thought this should be brought about. It would facilitate the spreading of the Gospel by the different missionaries among the tribes, and they would advance rapidly toward civilization, soon being able to stand side by side with the whites. The object of the missionaries is to give them the Gospel, and civilization will follow as the result. This has been verified in a small mission of ours in Michigan, on Grand Traverse Bay. It was then almost inaccessible. We sent a missionary there; an educated gentleman. He went there, accompanied by his wife, and they have been there from that day to within a few months. The work has been accomplished, and they have now left. The Indians were in as miserable a condition as any tribe you can find, living in wigwams, their wives cultivating little patches of corn, &c. Now they are scattered out on farms, are respected by the white people; they gave up their tribal relations, &c., and are now in a most prosperous condition. There is a very interesting volume, published in 1838, in London, containing evidence taken before a committee of the British Parliament in relation to certain Indians. It is a valuable book, showing that the true way of reaching these people is through the Gospel itself. The Gospel first, then civilization. The order should not be reversed. This doctrine, is ground upon which we should all stand. My observation of this work has convinced me of the truth of it. The church with which I am connected has always taken a lively interest in Indian missions. When some of the Indians who are now living in the Indian Territory were residing in the Carolinas, we had missionaries among them. A large majority of our laborers have been sent among these people, and the amount of money expended for them has run up to many hundred thousands, perhaps millions. The church has two boards of missions—the foreign and home. Thirty years ago this work was placed in the hands of the board of foreign missions, where it remains to this day. We did not ask for any of the agencies. In fact it was considered doubtful if the plan did not involve the uniting the church and State, and some were disposed to remain at arms length. But the more closely we examined the subject the more we became convinced of its feasibility. It was perhaps a little unfortunate at the outset that the agencies were not tendered to the denominations whose representatives were on the ground. It would have been better if the agent had been of the same view as the man already on the ground. The following is a list of the agencies finally assigned to us: (See Appendix, page 180.) Ten in all were tendered to us. Some difficulty was experienced in securing agents, and we finally published a notice calling for agents, stating the amount of salary

and other information concerning the subject. In response to this we received applications from all parts of the country accompanied by recommendations as to the fitness of the applicants of the very highest order. We considered the salary sufficient. It would be a small compensation, but would enable them to live; and we felt that the agents should be actuated by a higher motive than the mere question of salary. So far as we know, the men we have nominated for appointment are respected in the Department, and are, I believe, highly competent. They are, with one exception, professed Christians. In regard to the agencies, our friends in New Mexico and Arizona write to us that they found it extremely difficult to do anything in the way of education. In some cases the Indians are not on reservations, but are roving about, and it is impossible to carry out any plan among them. The necessity for their being put upon reservations is very great. The Navajoes are now in a position to require buildings, and yet they cannot be furnished for want of funds. I know it is the purpose of the Department to obtain these funds, but it has not as yet succeeded in doing so. Until these buildings are provided it is impossible for the missionary boards to go on and put up those buildings. In the first place they have not the funds; in the next place they have not the land. I, for one, have no desire to see missionary boards owning a foot of land, but the Government should let them have and retain the use as long as they are engaged in the work. We are making some progress in the civilization of the Indians. Cochise, a chief whose name has been associated with many acts of violence and bloodshed, has been induced to come on to a reservation, and will visit Washington in response to the persuasions of one of the agents, who was appointed upon our recommendation. By winning the confidence of Cochise, he has been induced to give up his roving life and become a friend to the whites. Among the Navajoes and other tribes we have started schools—among the Senecas, the Lake Superior Chippewas, the Creeks, (where we have no agent.) In all of these missions there are day and boarding schools. The condition of the Nez Percés is very remarkable, and the encouragement is marked. The old missionary, Mr. Spaulding, has gone back and been received with open arms. In the education of the Indians I think both the English and Indian tongue should be taught. If possible, teach them in their own tongue, but not exclusively. You have greater access to the mind of a people through their own tongue than through a foreign one. I heartily concur in all that has been said in regard to the beneficial influence exerted by Christian women over the Indians. In regard to this question of compensation of agents, I think if you make these places a temptation, if you give such salaries as will induce men to go out into this Indian country, you may not get as good men as you can on a less support. It gives me great satisfaction to be able to meet my friends of different denominations and talk over these questions, for I am in perfect sympathy with them. I am very much impressed with the idea that the Indians are now in a very critical period of their history. It is clear to my mind that the Indians' cause cannot remain much longer as it is. They must go on reservations and they must be compelled to stay there, or a conflict between them and the white people is inevitable, and then the Indian is sure to go to the wall. They must go on reservations where they will receive the protection of the Government, and where they will receive Christian teaching. If the Government will hold on to this policy for the poor Indians, and if the Christian people will only come forward and furnish the right sort of men, we shall see their men capable citizens. Some of the Indians are present, one in particular, who I invited some years ago to visit me at my house. I was very much pleased with him at the time, as were some friends who were present. I hope we may hear from him now.

Mr. BRUNOT. There are some gentlemen here, representatives of the Cherokees, Creeks, and, I believe, the Choctaws, and Chickasaws, and it is designed to call upon them for some remarks. General Walker, I learn, cannot be present with us this evening, and we would like very much to listen to any remarks he may think proper.

General Walker asked to be excused.

On motion of Mr. Stuart it was resolved that when the meeting adjourn it be to meet at half-past 7 o'clock this evening.

Mr. ANSON M. POWELL. Last October and November I took a trip to the Pacific coast, and what I saw and heard there in relation to this great question enables me to regard every word I have heard here this morning concerning the hopeful condition of this experiment as literally true. Especially do I concur with what has been said in regard to the presence of women among the Indians. The Government should send them there and pay them for their services. The benefit it would be to the Indians would more than equal the expenditure. One single company of soldiers sent out on an excursion costs more than it would to maintain a dozen women among the Indians a year. The presence of the troops among the Indians is, as you all know, very demoralizing. I had no conception of the diseased condition of the Indians until I went among them, and this I regard as the greatest obstacle in the way of their civilization. On the Pawnee reservation there is a school under the charge of a capable Christian woman, and one of the conditions of the children entering the school is that before coming into the house he shall go to the wash-dish and put himself in order; and not only the children do that but also the men who have been attracted to the school.

This shows what the presence of a Christian woman will do. In regard to these certificates of allotment of lands to Indians, I think, if it is possible, the Government should give them some better title and secure them more firmly in the homes that they have been led to believe belonged to them. Especially should this be done in view of the many railroad interests to be found in the West. The Indians do not seem to be apprehensive, but their friends are, and there is certainly cause for serious concerns. The whites are antagonistic to the present policy of Indian civilization and to all who have charge of it. I followed Mr. Colyer through some portions of the West this fall, and if I had not known him personally I should have become strongly prejudiced against him from the manner in which he was abused by the people. There is great danger that, if the Indians are not firmly secured in the possession of their homes, but are liable to be moved from time to time, the work which has been done by those at present engaged in the good cause will have to be done over again. The board of Indian commissioners should endeavor to accelerate the civilizing and Christianizing influence among the whites, and thus secure their co-operation with those who go among the Indians. There is a feeling of intense bitterness and hatred felt toward the Indians, such as I had no idea of, and if this board can do anything to improve and modify that feeling among the people they should do so. I can say amen, heartily amen, to what has been said about suppression of the whisky traffic, and if there can be more stringent legislation upon the subject it would be desirable. I forbear, however, to dwell, simply saying that going out to observe somewhat as to the result of the experiment I returned with two distinct impressions. One was that the experiment was a very large undertaking, larger than I had apprehended until I saw something of it; and second, that large as it is, and attended with so many difficulties, it is in an encouraging state of progress.

Mr. BRUNOT. It is, perhaps, natural that there should exist a feeling on the part of the whites against the Indians and their friends, such as has been described by the gentleman, and to some extent allowance should be made for it. I do not think it is indulged in so much by the real settlers, but that it is simply the expression of that restless element which has temporarily gathered in the frontier towns and along the Pacific Railroad during its construction. In Wyoming we were told that we would not get home before the Indians would be murdering and robbing the settlers, but there has been no complaint as yet.

The conference then adjourned to meet at the same place at half-past 7 in the evening.

#### EVENING SESSION.

ARLINGTON HOUSE, *January 11, 1872.*

##### Commissioner BRUNOT in the chair

By invitation, Hon. William P. Ross, of the Cherokee delegation, addressed the conference. Referring to the early history of the Cherokees, he said there was as much interest in the Indian question during the administration of General Jackson as at the present time. Some of the ablest statesmen and jurists in the country took part in the discussion. The most aggressive measures were resorted to by States interested in the removal of the Indians to accomplish that object. Missionaries were imprisoned as felons without cause, and their lands were parceled out by lottery. The decisions of the Supreme Court were in favor of the Indians but availed nothing, as the President failed to enforce them. The Indians were driven from their country at the point of the bayonet, and removed to their present homes in the Indian Territory with the most solemn guarantees for their protection in the future.

The Cherokees numbered something like 18,000 souls, including, in round numbers, about 400 whites, 900 Delawares, 700 Shawnees, and 1,500 freedmen, adopted citizens and incorporated into the nation with the rights and privileges of native-born citizens, and who are living to-day in peace and harmony and steadily improving in their condition. They have a regularly organized elective government, with executive, legislative, and judicial departments. Their government is supported by the interest derived from investments in United States registered bonds amounting to nearly \$2,000,000; one-half of that is applied to defray the ordinary expenses of government; three-fourths of the other half to the support of schools, and the remaining fourth to the support of orphan children. They have now sixty free schools scattered over their country, and have just authorized the establishment of an industrial school for the orphans; appropriating \$10,000 and two miles square of land for its support, besides the regular fund. They have a commodious brick capitol of comely proportions and suitable accommodations for the sessions of the two houses of their national councils and their supreme court, including offices for their executive, treasurer, superintendent of public schools, auditor of accounts, &c. The denominations among the Cherokees are Baptists, Methodists, Presbyterians, and Moravians, and a large proportion of the adult population belong to one or another of these churches—the greater proportion to the two first named. Their schools are taught in English, and a newspaper, ably edited

by a member of the nation, Mr. W. P. Boudinot, is published weekly in the English and Cherokee languages. If let alone, he did not think that their most earnest friends would have cause to complain of their future development. So far, all complaints about their condition came not from them—they were anxious to be protected in their homes and institutions—but from interested parties beyond their country. He fully indorsed the remarks of previous speakers about the allowing of the Indians to remain peaceably upon their present reservations, particularly in the Indian Territory, which should be as sacredly preserved as it had been solemnly pledged by all departments of the Government for the exclusive homes of the Indians as long as "grass grew or water run." The influences at work to "open" this last home of the race are powerful, representing great and diversified interests. White men all around them want their lands, and railroad companies want it with their contingent land-grants covering from 8,000,000 to 10,000,000 of acres of the choicest portions of the Territory. Politicians want it, to appease their constituents at home and open up a new field for place and preferment. It is said we have too much land. This is a mistake, when the now overrated character of the country shall be fully estimated, and the Indians from Kansas and elsewhere, who must find new homes, shall be brought into the Territory. But even if such were the case, what more right has any man to say that I and my children shall have only so much of that which is our own, than he has to parcel out, upon the same principle, the lands, money, houses, and possessions of the citizens of your cities and States? The constant agitation of the Indian question is most injurious in its effects upon the Indians, and would demoralize any people. How can you expect them to build substantial houses, mills, and farms, plant orchards, and make comfortable homes, when they have no assurance that they will not soon be driven from them without so much as adequate compensation?

The question of a territorial government now deeply interests us. "The Ocmulgee Constitution," adopted at a general council of the Territory in 1870, and which was framed for a purely Indian organization with limited powers and within the purview of their treaties, has failed to be put into operation in consequence of amendments proposed in bills before Congress, and which entirely change its character and made it simply a territorial government of the United States. Those amendments placed the appointment of all its executive and judicial officers in the hands of the Executive, and deprived them of any voice in electing those to rule over them; a change to which whites would not consent. With every confidence in President Grant, they could not foresee the character of men who might succeed him in the executive chair and change entirely his policy of justice and humanity, already productive of purifying and happy results. If let alone, the civilized tribes were destined to exert a wide influence over their wild brethren of the plains. They met many of them in council last April, established peace with them, advised peace toward the whites and invited them to visit them at their homes and to adopt their habits of civilization. Since then there have been no serious disturbance and no bloody raids, by any of the Indians then represented, into Texas. The party guilty of the Fort Richardson massacre were not at the council, but were then on the war-path, as alleged, against the Ute Indians. He was most hopeful for the future of even those Indians.

SAMUEL CHICOTE, principal chief of the Creek Nation, was invited to address the conference. The chief spoke, through an interpreter, D. N. McIntosh, in brief as follows:

I am glad to meet with the gentlemen of the peace commission, the honorable Secretary of the Interior, and the officers of the missionary societies present. I believe that you are here to do the work your Heavenly Father has given you to do. I have listened with great gratification to your reports of the progress of Christianizing and civilizing the Indians. Our people once occupied the country east of the Mississippi. While there the missionaries came to us and taught us the law of one common Father to all men from the law of God. They were sowers sowing the good seed which was afterward to spring up an hundredfold among them in their new homes in the Indian country. It was to them the fountain of all knowledge, and shed light upon their people which has since spread all over their land. They began to learn to cultivate the soil, raise stock, and follow in the path of the white man. For this progress they are indebted to the Methodists, Baptists, Presbyterians, Moravians, and Episcopalians, and they still pray earnestly that these religious bodies will continue their efforts among them, and that the Creeks may still further advance in Christianity and the arts of civilization. If he had planted a field and saw it growing prosperously he should feel that it deserved his careful attention until the grain had ripened and the harvest was gathered. Particularly do they desire that their children shall be educated in the English language. The old people should have translations read to them.

The Creeks have thirty-two neighborhood schools, and two manual-labor schools, filled with pupils. Soon after the late war closed, the Methodist manual-labor school took fire and was destroyed. The Creek council appropriated \$10,000 to rebuild it. When completed there were eighty scholars admitted, and over fifty additional applicants rejected for want of room.

We have heard that bills to organize a territorial government for our country are being pressed upon Congress, and it alarms our people. If they are passed and become a law, it will let into our country a large class of bad white men with whom our people, under the present laws, cannot cope. Under the treaty of 1832, their land was divided up into severalty for heads of families. As the Creeks were many of them not sufficiently advanced to retain possession of this land, white men would swindle them out of their land. It would be like placing an uneducated boy in college to place these people in the midst of crafty, designing, and educated white men, with all the law on their side. His people would regard such a territorial government as a great judgment sent to afflict his people. When a child is about to be hurt he runs to his father or mother. So with his people; they fear trouble, so they send him and his colleagues to see the Great Father. We have great confidence in the several religious societies whose officers are present, because they have been our firm friends in times past, and they have confidence in the President when he selects such men as he now sees present to council with him in his care for the Indians. I believe it was God who put it into the heart of the President to select such men, as I understand from the book of God he sometimes selects special instruments for his own great purposes.

Governor PYCHLYN, late chief of the Choctaws. I am unwell, but glad to speak a few words in regard to missions. There are two subjects before us, the religious and the political; the first we love, the second we dread. Mr. Kingsbury, our first missionary, came with the Bible, and said it was the word of life. The Choctaws received him with open arms. He established manual-labor schools. We were in our original Indianism. We organized temperance societies, and had a liquor law. The first liquor law of our country was established among the Choctaws by themselves. We had then a code of written laws, in 1826. In 1828 we had a great revival, amidst great rejoicing. Old warriors, fighting men, joined the church. In 1829 the State of Mississippi passed a law forbidding any Indian to exercise his functions as an officer of the Government. Cruelty and oppression from the whites came upon them in the days of Jackson. Our people wanted to fight. There were no commissioners then. The Secretary of War, General Eaton, came down there. Whisky was poured out by barrels, to corrupt our people. They forced us out of our homes. We went to our new homes in the Indian Territory, not to hunt buffalo, but to build churches, schools, &c. The missionaries went with us; we loved them. We prospered—had cattle, sheep, and corn-fields. Then the war came, and down we went. The missionary boards deserted us, and darkness surrounded us; but now we are reviving again. I was there last summer. I heard the same old Gospel again. One native Choctaw man, a blacksmith, preached the Gospel and had five hundred converts. He worked at his trade in the day, and preached in the evening; sometimes he preached day and night. He got no pay for preaching. The Bible has saved us with its precious Gospel. It is the politicians who ruin us. I shall always remember with gratitude the "American Board" and the "Presbyterian Board;" they saved me.

Rev. S. B. Treat said the first law passed by the Choctaw nation, after it crossed the Mississippi, was a liquor law similar to that which the State of Maine afterwards received so much credit for.

At the earnest invitation of the chairman, the Hon. Columbus Delano, Secretary of the Interior, occupied the undivided attention of the conference in a careful and deeply interesting statement of his views upon the present condition of Indian affairs. As there was no reporter present to give a phonographic report of the address, the brief taken by the secretary of the board is withheld from publication at the request of Mr. Delano.

The conference then adjourned to 10 o'clock to-morrow morning.

#### MORNING SESSION.

JANUARY 12, 1872.

Commissioner Brunot in the chair:

Mr. BRUNOT. We shall be glad to hear from Mr. King, of the society of Orthodox Friends.

Mr. KING. The branch of the society which we represent has various committees appointed to take charge of this missionary work among the Indians. One of them has charge of all legislation that is desired in the prosecution and advancement of our work. We have also a committee on finance, and one to take into consideration the applications of teachers, mechanics, and farmers. It being impossible for all the members of the executive committee, that is charged especially with the work among the Indians, to visit the various agencies under our control, and report as to their condition and progress, one of the members was delegated to perform that duty. He spends part of his time in Washington, and part of it in the Indian Territory. Dr. Nicholson, the member designated, who is with us here, has been very careful to study up everything relating to Indian legislation, laws, treaties, and everything connected with the interests of the Indians. It is proposed to establish a yearly meeting within

the State of Kansas, who will, undoubtedly, render valuable service in our work. This subject has created the liveliest interest among our people throughout the land, and quite a number of our young men are coming forward and offering their services. Our church has not been very active heretofore in this line, but always more or less so. Within the last few years, as I have said, there has been an evident increase of interest, and we believe it has proved to be a blessing to our church in its general religious welfare.

Mr. JANNEY. We find that this Indian work in our religious body has had a very good effect upon the society itself. Indian aid societies have been formed and in various ways we can see the beneficial result of the efforts in this direction upon the vitality of the body.

Mr. BRUNOT. Dr. Dyer, I believe, is not here this morning. The Episcopal society has two missionary organizations; one, I understand, that has charge of this particular work. Will Mr. Welsh favor us with a statement in regard to it?

Mr. WELSH. The work, in connection with the Government, was commenced last October a year. We had the same horror of church and state that Dr. Lowrie has spoken of, but when the President of the United States, through the Secretary of the Interior, pressed upon the body the nomination of agents, and informed us that the politicians had nominated men of very objectionable character and would undertake to get them through, the church was dragged into it. The work was first in charge of the two organizations to which the chairman has referred. They were composed of churchmen and laymen. There was not at first much interest manifested in this work of Indian missions, but the more they became engaged in it the more they realized the importance of it. They had representatives in Washington a great part of the time, procuring legislation, who found great readiness on the part of Congress to listen to them, and to take into consideration their suggestions. In one instance one of the committees of Congress allowed the representative of the Episcopal Church to take part in the discussion, thereby showing the interest felt by the members in the matter. A commission was organized, under the authority of the church, to watch over the interests of the Indians here in Washington. Colonel E. C. Kemble is giving his whole time to it, visiting the Indian reservations during the summer and returning to Washington in the winter. That commission also appointed a committee from among its own members, with Senator Stevenson as chairman, to watch the legislation, and it is hoped that the other societies will organize in the same manner, that there may be a general co-operation in this matter. In view of the already extensive railroad interests in the West, it is impossible to make any headway unless the interests of the Indians are carefully guarded. An Indian peace association has been formed in Philadelphia, that furnish clothing, books, &c. They also induce ladies to go among the Indians. These ladies first receive a course of training in connection with a school for missionary women, and then go out and unite their efforts with those of the agents in the work. There is no difficulty now in getting the very best men to act as agents.

Mr. BRUNOT. I hope we will hear from gentlemen on this subject their views without special invitation.

Mr. HARRIS. I have taken a great interest in this matter, and also in the plans of the different denominations to carry on their work by special organization. It would be very difficult for our church to create a separate board for this purpose, and we think it would be unnecessary. The supervision of this work is in the hands of the board having charge of domestic missions. Soon after the assignment of agencies to us we were asked to nominate several agents within the State of California. These agencies were not first formally placed under our charge, nor in fact that of any other denomination that I know of, but our annual conference in California when they met appointed a committee of their own body to take charge, so far as it could, of the interests of the Indians in that State, and they agreed upon a list of agents for certain agencies in that conference, and agreed also to ask the President to appoint the persons recommended by them. Their report and recommendations were approved by the annual conference, but our board declined to indorse this action on the ground that the agencies had not been assigned to us. Mr. Sargent, who was a Representative in Congress, took that list and went to Commissioner Parker, and he, through the Secretary of the Interior, sent it to us, with the request that if we approved it to say so; and if not, to nominate such persons as we saw proper. That is the way the California agencies came under our control. We can go no further than we have gone, except that I intend to get definite information in relation to the Indian schools, &c. We have not yet established schools at our own expense, nor have we built churches.

Remarks were made by Commissioner Brunot, Dr. Lowrie, Dr. Harris, Mr. Powell, and Mr. Welsh.

At noon the meeting adjourned, to give the use of the hall to the invited guests present to continue the conference, the board to meet again at the call of the chairman.

VINCENT COLYER,  
Secretary.

## GENERAL MEETING OF FRIENDS OF THE INDIAN.

At a convention of the representatives of various religious denominations, who are engaged in the work of Christian civilization among the Indians of the United States, held in Washington, D. C., January 12, 1872,

On motion of W. Welsh, Dr. Harris was called to the chair.

On motion of J. V. Farwell, Dr. W. Nicholson was chosen secretary.

The chair called on Hon. F. R. Brunot for an account of his observations during his recent tour of inspection among the tribes west of the Rocky Mountains.

Mr. Stuart made explanations of the relation of the board of Indian commissioners both to the Government and to the different religious denominations.

Mr. Powell expressed a belief that there is a powerful and increasing public sentiment in support of the President's Indian policy; and at the same time he knew that there is an increasingly powerful combination of interests, having for its purpose the overthrow of this policy. He spoke by authority, not captiously, but in earnest desire to arouse the friends of the Indians to action, in order both to influence public sentiment and to direct legislation.

Mr. Bentley moved a committee on resolutions, to consist of five members, to be appointed by the chair, which motion was adopted.

Mr. Tatham presented resolutions, which were referred. He prefaced their presentation with remarks upon the influence of organized effort in removing evils, as lately exhibited in New York, for instance. One great difficulty in this Indian work is the ignorance of the people at large upon the real condition of affairs. We must give them light. Set before them the effects of maladministration, and arouse them to the importance of Christian reform, and to produce this result the different religious denominations must unite their efforts.

Ex-Superintendent S. M. Janney offered a resolution, which was referred.

The chair announced Messrs. Tatham, Janney, Lowry, John A. King, and Whipple, as committee on resolutions. Hon. William A. Phillips then addressed the meeting.

## REMARKS OF HON. WILLIAM A. PHILLIPS, OF KANSAS.

MR. CHAIRMAN: I felt under obligation to the board for the kind invitation to be present, and intended to listen rather than to speak. I listened with great pleasure to the reports of the representatives of the religious bodies who have the Indian work in charge, gratified that all the reports indicated marked improvement, the deep interest of the parties in the work, and gave clear indications of a great and good reform in Indian management. I was also pleased to see that on many vital points of the vexed Indian problem the commissioners appear to have been rapidly acquiring what I would call a good Indian education. Among these was the deep interest taken in the education of Indian females. I remember of asking John Ross, the distinguished governor of the Cherokee nation for forty years, what he considered the salient causes of the superior civilization of the Cherokees. Among other things he said:

"Formerly they used to educate the males only. A few Indian men would be educated and go back and marry the uneducated women of their tribe. In many cases they would seem to sink to the old level. They might exhibit their culture when called on in some special cases; often there seemed to be a total relapse; in most of cases it left few fruits. Then we tried to educate the women, and when we did we made the first permanent and substantial progress."

I can corroborate the testimony of that distinguished gentleman, to whom more than to any other man the Cherokees are indebted for their advancement. During the war, whenever I entered the house of a woman educated at the Cherokee female seminary, I found refinement and culture. I also found flowers on the mantel-piece, books and other evidences of taste and thought in the house, and could see in the dress and in the faces of the children the fruits of the mother's civilization.

I will offer you but a few thoughts on points which have been partially overlooked. Something has been said about the continual difficulties which seem to exist between Indians and settlers, and the constant distracting questions about Indian reserves. Now, there never ought to be a particle of difficulty of this kind. A few simple and just rules would forever end these troubles. I remember conversing with Senator Henderson, then chairman of the Senate Indian committee, about a measure for the "relief" of certain intruders on an Indian reserve in Kansas. He said, "I suppose, Phillips, there is so much clamor about this that we will have to do something for the relief of these settlers; but hereafter I will never cast a vote to relieve or sustain intruders on Indian lands." I remarked, "How much stronger, Senator, will you be in the position you propose assuming, when you have created another precedent of that kind?"

The truth is that this encouragement to lawlessness is to blame for the whole matter. It is a premium to those who trample United States laws under foot. And why are squatters continually seeking to encroach on Indian lands? To-day there are

thousands of people on the borders of the Indian Territory, in Missouri, Arkansas, Texas, and Kansas, looking over the line, and seeking the opportunity to subvert the Government Indian policy and enter lawfully or lawlessly. Why do they not settle on the millions of acres of unoccupied land in Kansas, Texas, Nebraska, and all the Territories of the West? I will tell you the whole story in a nut-shell. The Indian lands, sold and patented to them by the Government more than thirty years ago, have a greater market value. It is simply land speculation. Some of these lands are worth from five to twenty dollars an acre, and there is a wicked and perverse desire that the Government should seize and confiscate it, or take it for a low nominal price, and let these white people take the advanced price and thus make money by what is simply robbery. The remedy for all this is very plain. In the first place enforce the laws; never wink at or encourage their violation. Let intruders on Indian reserves know beforehand that they will have no indulgences, and that their lawless acts will not be connived at. Whenever it may be necessary to reduce reserves or to sell Indian lands, let it be done only with the consent of the owners, and then let it be faithfully sold for them for its full and fair price in the market of the world. Do this honestly and there will be forever an end of this trouble.

Something has been said about the "Indian policy" of the Government. I honor the spirit and purpose of the Government in placing Indian management in the hands of this commission, and of the religious bodies in the country. Still, it cannot with propriety be called a policy; a policy may grow out of it. On you, gentlemen, rests the burden of that work. What has been called the "Indian policy" of the Government has been varied, checkered, and unsatisfactory in the history of the colonies and of the republic, beginning with the times more than two hundred years ago, when a handful of weak settlers were glad to make a treaty under the most solemn guarantees, with the powerful tribes of the country, to get possession of limited portions of the soil, and running on through many vicissitudes, until the head of that department of this great Government which has charge of Indian affairs announced last night that the title of the aborigines, which runs further back than human record, who were placed on it in the providence of God, and which is the most ancient and honorable title known to man, is merely a possessory or occupancy right, and that the actual title vests in the European populations.

Few people fully comprehend the actual condition of the Indians as a distinct people. We are told, for instance, that Mexico makes no Indian treaties. This latter is not strictly correct, but for the general appearance of its correctness, it is proper to say that it arises from a different social condition. In the early settlement of this country, the French and Spaniards freely intermarried with the Indians. Their social systems became fused. Not so the English colonies. Juarez, an Indian half-breed, is president of Mexico. In this country, with a few exceptional cases, the Indian race were kept as a distinct people. Amalgamation was not much esteemed. Their land system, the communal, was different from ours. Their morals were founded on other ideas. We looked to, and longed for their extermination. Now, the Indian population is simply a fact in our social economy growing out of this. If there is a wrong, it is our fault. To ignore our bargains with them, is simply to rub out the slate after getting our share of the bargain. They have, indeed, felt the strength of Christian civilization, without feeling its justice, Christianity, or mercy.

And thus I say that our Indian policy is no more a policy than the intercourse laws are a code. The latter constitute a slim bundle of fragments. They only pretend to punish one or two infractions of Indian rights, introducing liquor, for instance. There is neither penalty nor adequate machinery against intruders. To put them out is like two men standing by a pickpocket, one to hold him, while the other pulled his hand out of the victim's pocket as often as he put it in, but unable to punish him. The interests of justice demand adequate punishment for every violation of Indian rights, and that Indian interests and Indian life be not tried by border juries.

Something was said about the embarrassing question of land grants in the Indian Territory to railroad companies. I was pleased to hear the Secretary define the different kinds of title held by Indians. First, land bought by Indians from the United States Government for money or lands elsewhere, and conveyed to them by patent in fee simple, as it has conveyed lands to other men or companies; the land purchased or exchanged in the same way held by treaty obligation, but not patented, and, lastly, land originally held by Indians, and still held by them, their right to which was recognized by the Government. The truth is, where we have guaranteed either of these titles by solemn treaty, we are in no condition to invade or call them in question. If they lack anything of a perfect title, it is our fault, and we cannot legally take advantage of it. Anything else is mere violence. Before the treaties of 1866, certain bills were put through Congress, by which the Government agreed to extinguish the "Indian title" when it could be done "with the consent of the Indians, and not otherwise." Now land held by patent is not "Indian title," and neither is land sold to the Indians by us for a consideration. It would just be as absurd to grant to a railroad company alternate sections for twenty miles wide, on each side of a road from Washington to New York, and equally just to take such land, whether it was worth five or one hundred dollars an acre, for, say a dollar and a quarter an acre, and give it to such a company.

There is no law or equity in this. Government may take land for public purposes, on paying its proper value for it. It cannot seize from one to give to another. There is no legal point here we need fear.

But more, the treaties made after these acts of Congress recognized no such grant. These were solemnly ratified, and are supreme law. We do not believe that even an Indian reserve could be violated under such circumstances.

But further, have we an Indian policy? Is it the purpose to keep the Indian Territory for Indians? Is the experiment of Indian civilization really to be honestly tried there? At the present moment we are moving tribe after tribe of semi-civilized and barbarous Indians there, on the pretext of trying the experiment. Shall we, then, give great grants of the land of these people to railroad companies, and be compelled to circumvent and destroy our whole policy in order that they may find purchasers for it? At first these companies thundered against the Indians for raising a Chinese wall to stop railroads and the march of civilization. They demanded a route to the Gulf, on the plea that the interests of commerce required it. Right of way for their roads was granted them by the Indians by treaty. Now they demand land to pay for the building of their roads, on the plea that their legitimate business could not have got them built.

I want the commission to look this matter square in the face. Is there to be a belt forty or fifty miles wide, each way through the Territory, filled by white people, who will have grog-shops all the way along? Under what law are these people to live? Not under Indian law? Shall there be a lawless belt, or shall we be forced to destroy the Indian governments and Indian civilization; to revolutionize our so-called Indian policy, and blast it, in its very inception, in order that great corporations may make money through our bad faith out of lands that neither belong to them nor the United States?

It is sixteen years since I went to Kansas. Then the different tribes had funds and reserves, including the best lands of the State, guaranteed to them. Under various pretexts of civilization, they were induced either to sectionize, or in some way to admit white settlers. Behold the result. To take away the fragments of these people before they are utterly destroyed, the Government is making haste to remove them to the Indian Territory, and now, before they are all in their new home, are we to be in haste to repeat the same wretched experiment?

A word about a territorial government for the Indian Territory. It is no doubt desirable, as soon as it can honestly and really be done, to consolidate these different nationalities. The job, however, is a far greater one than most people anticipate. I had companies or regiments from most of these people in my command during the war, and from ten to twenty thousand refugees of all kinds around my camp. I think I know something of them. Their degrees of civilization widely differ from the Cherokee, with their complete legislative, executive, and judicial system, to the Osages, and still wilder Comanches, who have little government of any kind, and none but their wild tribal one; of voting and judicial matters they have no experience. Even in a council or legislature, each speech and bill, or motion, would have to be interpreted into twenty or thirty languages. I think they can be educated to the highest standard, but it will take effort and time. To destroy the good governments already there for such an experiment would be disastrous. It should be a work, and a great work—not an arbitrary act. Who is urging this measure? The Indians themselves protest against it. It is pressed by the railroad companies, who wish to take their lands, and by the squatters, who are hungry to jump upon them.

In closing, I would entreat you to give these matters your profound attention. Great issues hang upon them. Mistakes we cannot afford to make. It is my opinion, and I submit these three points to your judgment: First, to maintain the integrity of their possessions, and that their lands shall never be taken but with their consent, and only for their full value to them. Secondly, that no territorial government shall be forced on them, or introduced, or permitted until they are prepared for it, and that it shall only be a government of their own people; and, lastly, that we make every honorable effort to Christianize and civilize but never arbitrarily change their condition, until they shall really have been prepared for the change; that we will not permit our wish, that they be civilized like us, to run away with our judgment; that their consent be obtained, and that they be encouraged to make necessary changes, rather than driven into them, well knowing that the latter will surely fail and only make them vagabonds and outcasts in our midst.

The convention then took a recess of forty minutes to allow the committee on resolutions to retire and report.

After recess,

The committee on resolutions reported the following, which, being separately considered, were unanimously adopted:

#### RESOLUTIONS.

*Resolved*, 1st. That this convention heartily approves the humane policy of the Government toward the Indians, and we earnestly recommend that they be secured in possession of their lands, and be protected from encroachments.

2d. That this convention has listened with deep interest and gratification to the reports of benevolent work among the Indians during the past year. These reports prove that our Indian population are not only capable of elevation to a high standard of civilization and Christianity, but that many of them desire to realize the advantages and consolations they insure; that the progress of the Indians in these respects during the past year have been far beyond our expectations. They also show that serious obstacles in the way of this grand consummation consist in the evil example and influence by which, in many cases, they are surrounded, and by the insatiable cupidity and avarice to which they are subjected; that official documents show that hundreds of millions of dollars have been expended within the last fifty years in wars against them, which might have been avoided, and that there is no just reason for withholding from these native inhabitants of our land the protection and privileges of law extended to all other people. Therefore, we invite all our fellow-citizens, without distinction, to unite with us in all proper measures to secure to the Indians all the guarantees of justice and right which we claim for ourselves.

3d. That this convention again recommend to the benevolent organizations here represented, to consider the expediency of forming Indian committees or associations, to awaken and foster an intelligent and deep interest in the civilization of the Indian.

4th. That this convention favors the widest possible circulation of the information given at these meetings.

Francis T. King offered the following resolution, which was unanimously adopted:

*Resolved*, That the convention heartily appreciates the services of the board of Indian commissioners, and extends to them our sympathy, encouragement, and co-operation in their self-sacrificing and arduous work of supervision and reform in the Indian service.

Dr. Ferris offered the following resolution, which was unanimously adopted:

*Resolved*, That the board of Indian commissioners be requested to endeavor to make arrangements with the Government for permission to Indian agents, teachers, and physicians at their respective agencies to purchase subsistence stores at the same rates as those paid by officers of the Army.

Upon motion, the convention then adjourned *sine die*.

W. L. HARRIS, Chairman.

W. NICHOLSON, Secretary.

#### REPORT OF THE EPISCOPAL INDIAN MISSIONS.

PHILADELPHIA, January 8, 1872.

Hon. FELIX R. BRUNOT, Chairman:

At the request of your secretary I send a brief account of the Indian missions of the Episcopal Church, by which you will perceive that the two missionary organizations have united in forming an Indian commission, which comprises fifty clergymen and laymen. In addition to the executive committee, a committee has been raised to supervise the legislation on Indian affairs, and to protect the rights of the Indian with Congress and before the courts when necessary.

The house of bishops and the house of clerical and lay deputies took decisive action promotive of Indian civilization. I will briefly reply to the printed questions to Episcopal missionary societies.

The Episcopal Church has the care of seven agencies, five of them in Dakota Territory to Sioux Indians and Poncas, one to Sioux in Wyoming Territory, and one to Shoshones and Bannacks in Idaho.

The names of agents in Dakota are: Dr. Holmes, at Yankton agency; Dr. Livingston, at Crow Creek and Lower Brulé sub-agency; Mr. Kones, at Cheyenne agency, on the Missouri; Mr. Risley, at Spotted Tail's Upper Brulé, at the head of White Earth River; Dr. Daniels, at Red Cloud's agency, in Wyoming Territory; Mr. Irwin, agent of the Shoshones and Bannacks, in Idaho.

There are five principal schools, with branches; three of them are on the Yankton reservation, one on the Ponca reservation, and the oldest and chief school is on the Santee reservation in Nebraska, where the agent is a member of the Society of Friends. All are day schools, with from 300 to 500 scholars, and in several of the missions a few Indians are taken into the families, and some are sent to distant schools for thorough education. If the various religious bodies will undertake the education of the Indian at their own expense, it will double the efficiency of their missions, hasten the work of Indian civilization, and save the Government an outlay of money fully four times as great as it will cost the religious bodies to whom the supervision of the civilization is intrusted. This matter is so important that it will be well for the board of Indian commissioners to consider it carefully, and to impress it upon Christian people if they deem it as important as we do. Our missionary associations understood the value of education, and also of medical relief in foreign lands, and surely it is even still more important in dealing with our home heathen, who are driven from their hunting-grounds by Christian civilization.

The Episcopal Church has sent out twelve teachers; six of them being men and six women, besides eight or ten Indian teachers, five of whom are ministers.

The Rev. G. A. Goodnough is with the Oneidas; the Rev. S. D. Hinman with the Santee Sioux; the Rev. I. W. Cook, with Mr. Robinson and Mr. Brooke, is on the Yankton reservation; and the Rev. I. Owen Dorsey on the Ponca reservation; Mrs. Hinman and Miss Leigh and Sister Anna, are with the Santees; Miss West and Sister Elizabeth are with the Yanktons; and Mrs. Steaforth with the Poncas.

Books, pictures, clothing, and some implements of husbandry and medicines, have been sent by the Episcopal Church, which has spent about \$50,000 in the last two years in erecting buildings and maintaining its mission schools. The Indian commission asks for \$50,000 to carry forward its work during the year 1872.

Encouragement and protection must be given to industrious Indians, and lands should be furnished them in severalty, with a title inalienable, except by an act of Congress. Instead of feeding them in idleness, they should be furnished with jacks, brood-cattle, and goats, as Indians soon became herdsmen, although they are slow in learning to draw all their subsistence from the soil. Ready-made clothing should not be sent for women, as they can soon be taught to make their own garments, and even to manufacture men's clothing, after they have reached a certain point in civilization. As Indians are wards of the Government, the Commissary Department should be directed to encourage them, by purchasing their products, and the War Department should further co-operate by resisting the lawless frontiersmen, who, in defiance of law, furnish Indians with whisky and incite them to plunder. If the Government will turn its attention to checking the white violations of law, the religious bodies can tame and control the Indians. The progress in civilization by Indians under control of the Episcopal Church has been marvelously rapid, as the appliances have as yet been very imperfect. When agents are properly compensated and remain long enough to acquire the language, or when the leaders of the Indian tribes learn to speak English, many of the existing difficulties to Indian civilization will be removed. The interpreter rarely has the confidence of either agent or Indian, and, being poorly paid, is rarely honest.

Yours, respectfully,

WILLIAM WELSH.

#### INDIAN MISSIONS OF THE AMERICAN BOARD.

MISSIONARY HOUSE, BOSTON, *January 9, 1872.*

DEAR SIR: In reply to your questions of January 6, I beg leave to say that we have but one agency in our charge. It is located on the Coteau des Prairies, and is called the Sisseton agency, with two or three aliases. The name of the agent is Moses N. Adams. There is but one school on the reservation, supported by the board, the design of which is to train up men and women who can preach and teach in the language of the Dakotas. (We have a similar school at the Santee agency.) It is our endeavor, in all our missions, to throw the burden of the common schools upon the native communities. How many such schools there are on the Coteau at this time I am not able to say.

The number of scholars registered in the training-school on the Coteau last year was nearly one hundred, but the attendance was irregular. The number at the Santee agency was one hundred and fifteen. No suggestions to make. Our agent has but just reached his post. We have sent to the Coteau Mr. Wyllys K. Morris and his wife, both of whom have taught. (The school has been in operation but little more than a year.) We pay them a salary, and they obtain their own supplies, books, &c. No collections have been made especially for this object. No suggestions to make.

I have seen no reason to doubt the general line of policy marked out in the resolutions passed at the last meeting of the Indian commissioners. I should favor, in ordinary cases, the building of school-houses by the societies. This I understand to be the opinion of Mr. Welsh.

Very respectfully, your obedient servant,

S. B. TREAT,  
*Secretary of the A. B. C. F. M.*

VINCENT COLYER, Esq., *Washington.*

## REPORT OF BAPTIST INDIAN MISSION.

Question. Number of agencies under charge of your society?—Answer. Six.

Question. Where located?—Answer. Two in Indian Territory, three in Nevada, and one in Utah and Nevada, viz: 1. Cherokee, J. B. Jones, agent; 2. Creeks, T. A. Lyon, agent; 3. Pi-Utes, Major C. F. Powell, agent; 4. Walker River, C. A. Bateman, agent; 5. Pyramid Lake, Samuel H. Flaught; 6. The one in Utah and Nevada, George W. Dodge.

Question. Has your society any teachers on the reservation? If so, how many?—Answer. Eleven assistant teachers or missionaries.

Question. Male or female?—Answer. Male.

Question. What are their names?—Answer. George Swinner, Frank Howard, Mundy Durant, John Kernal, John Brown, Uysada, T. R. Ferguson, William Lenty, Guy Jameson, Thomas Green, and H. H. Cutter.

Have there been any collections taken up in your churches for this special purpose?—Answer. Only in connection with other objects of the society.

The special agency at Pyramid was abolished September 7, 1871, and is now in charge of Agent C. A. Bateman, of Walker River.

Very respectfully, your obedient servant,

JAY L. BACKUS,  
*Secretary.*

VINCENT COLYER.

## REPORT OF INDIAN MISSIONS FROM ORTHODOX FRIENDS.

Question. Number of agencies under charge of our society?—Answer. Ten.

Question. Where located?—Answer. In Kansas and Indian Territory.

Question. Name of agents.—Answer. Central superintendency: 1. Lawrie Tatum, Kiowa and Comanche agency; 2. Brinton Darlington, Cheyenne and Arapaho agency; 3. Jonathan Richards, Wichita agency; 4. John Hadly, Sac and Fox agency; 5. Isaac Gibson, Osage agency; 6. Mahlon Stubbs, Kansas, or Kaw agency; 7. Joel H. Morris, Pottawatomie agency; 8. Hiram W. Jones, Quapaw agency; 9. John D. Miles, Kickapoo agency; 10. Reuben L. Roberts, Shawnee agency. Superintendent, Enoch Hoag, Lawrence, Kansas.

Question. How many schools on the reservation?—Answer. Four boarding, 125 pupils; four day, 115 pupils. Also two recently opened, from which no statistics yet received.

Question. What do the agents complain of most?—Answer. Trespass of whites on reservations, and sale of liquor to Indians; both contrary to law. Also, at remote agencies, delay in receipt of goods, and poor quality of flour received through past summer and autumn.

Question. Has your society sent out any teachers to the reservation; if so, how many?—Answer. Eleven.

Question. Male or female?—Answer. Seven male, and four females.

Question. Have you been able to send them supplies of any kind, books or clothing?—Answer. Both books and clothing, though books are mostly supplied from Government appropriations. Have also assisted in furnishing boarding-school houses.

Question. Have there been any collections taken up in your churches for this special purpose?—Answer. Five thousand dollars assessed in each of the last two years upon the several yearly meetings of Friends, for the use of associated executive committee, and considerable additional amount raised in neighborhoods for aid of special missions.

Question. During your experience of the past year, have you seen any reason to doubt the wisdom of the general line of policy marked out in the resolutions passed at our last general meeting in this city, January 13, 1871? (See report of the board of Indian commission for 1870, page 110.)—Answer. No.

Question. Give any other information or make such suggestions as may seem to you of value to the Indian service.—Answer. The work of Christian civilization within the central superintendency is supervised by the "associated executive committee of Friends (Orthodox) on Indian affairs." Dr. Wm. Nicholson, general agent, Lawrence, Kansas.

JOHN B. GARRETT,  
*Clerk and Correspondent.*

First month 10, 1872.

SANDY SPRING, MARYLAND,

*Firstmonth 10, 1872.*

DEAR FRIEND: Thy favor of the 4th instant was received last evening. In the present state of the weather, the roads, and my health, I do not feel able to undertake a ride of eighteen miles by private conveyance, and shall therefore be deprived of the pleasure of meeting with the Indian commission and other friends of the Indians to-morrow, as kindly invited to do by thee.

My friends and neighbors, B. Ruth Roberts, who is now secretary of the Indian commission of Baltimore yearly meeting of Friends, and Richard F. Bently, a member of our Indian commission, will probably attend. Both of them have their hearts warmly enlisted in the Indians' favor. I have made out, to the best of my ability, answers to the questions proposed in the printed circular, which I hope to be able to forward to thee by the friends above named, with ardent desires for the successful accomplishment of the objects of your meeting, and my kindest respects to the members individually.

I remain thy sincere friend,

BENJ'N HALLOWELL.

#### ANSWERS.

There are six agencies under our branch of the Society of Friends. They are located in the eastern portion of the State of Nebraska, and constitute what is called the northern superintendency. Four of the reservations border on the Missouri River. Of the other two, one is about seventy-five miles, the other about one hundred miles west of that river. Thomas Lightfoot is agent of the Great Nemaha agency; Albert L. Green agent of the Otoes and Missourias; Jacob M. Troth agent of the Pawnees; Dr. Edward Painter agent of the Omahas; Howard White agent of the Winnebagoes; Joseph Webster agent of the Santee Sioux.

At the Great Nemaha agency there is one day-school and industrial home for orphans. At the Otoe agency there is one day-school. At the Pawnee agency there is an industrial boarding-school with about 70 pupils of both sexes, and a day-school with about 50 of both sexes. At the Omaha agency there are three day-schools. At the Winnebago agency, three day-schools. At the Santee agency there are two mission schools. The number of scholars not known, except as given above for the Pawnees. They should all be taught to speak, read, and write the English language.

Agents complain of want of funds for schools, and to enable them to put on the improvements of their allotments, so that the Indians may support themselves. The agents all agree that there should be at least one industrial boarding-school on each reservation, to which to advance the meritorious scholars, as they are prepared therefor in the day-schools.

Seven Friends at least have gone out as teachers to the Indians—Mary B. Lightfoot for the Nemahas; Sally C. Ely and Lizzie R. Walton for the Otoes and Missourias; Phebe Sutton for the Pawnees; Theodore Gillingham and wife for the Omahas, and Sidney Averill for the Winnebagoes.

The Friends have sent out various supplies, as books, maps, slates, &c., clothes for children, and for sick, aged, and infirm persons; medicines, dried fruit, and other suitable things for the sick; scissors, needles, thimbles, &c., for the girls, with dresses ready cut out to be made up, and material for more, so as to invite them to industry.

Collections have not been taken up in our meetings, but appropriations have been made from their treasuries, and sums of money and articles of clothing and other needful things have been donated by individual members, in 1869 and 1870, amounting in all to over \$21,000. The amount for the year just past has not been ascertained.

It is very desirable and strongly to be recommended that the Indians in this superintendency may have some reliable guarantee, that the improvements they make on their allotments shall be permanently theirs to enjoy where they now are, undisturbed, as long as they desire to hold them.

BENJ'N HALLOWELL.

VINCENT COLYER,

*Secretary Board Indian Commission.*

#### BOARD OF FOREIGN MISSIONS OF THE PRESBYTERIAN CHURCH,

*Mission House, 23 Center Street, New York, January 16, 1872.*

DEAR SIR: Your favor of the 6th instant was duly received, containing inquiries concerning the Indian agencies, for which nominations were made to the appointment of agents by this board of missions. I reply to these inquiries with pleasure, so far as practicable.

1. The agents appointed upon the nomination of the board are as follows: Mr. Theophilus Griffith, Choctaw agency; Henry Breiner, M. D., Seminole agency; Mr. Charles F. Roedel, Cimarron agency, New Mexico; Mr. James H. Miller, Navajo agency, New Mexico and Arizona; Mr. Andrew J. Curtis, Mescalero Apache agency, New Mexico; Mr. Williamson D. Crothers, Moqui agency, Arizona; Mr. Orlando F. Piper, Southern Apache agency, New Mexico; Mr. John J. Critchlow, Uintah Valley agency, Utah; Mr.

John S. Armstrong, Abiquiu agency New Mexico; Mr. John B. Monteith, Lapwai agency, Idaho.

2. In general, the annual report of the board will be sent to you, containing detailed information in reply to most of the questions in your circular. The report for the year ending last May 1, you have already received; the report for the year ending next May 1, will be forwarded to you as soon as published. It will contain fuller information on some points than we now possess. But I may note a few things here. (1.) The work of education, &c., in the Choctaw agency, is in the hands of the Southern Presbyterian Board. There are schools, but the returns of scholars are not known here. (2.) Our board has schools among the Senecas, Lake Superior Chippewas, and Creeks, all under agents not nominated by it. See returns of scholars in the last annual report above referred to, except in the case of the Lake Superior Chippewas, where two more teachers have been sent out, a day-school of about thirty scholars has been kept for some months, and a boarding-school of six girls and eleven boys has been conducted for the last two months, the number of scholars to be increased soon to twenty-five. (3.) In the tribes for which agents were nominated, a day-school has been kept among the Navajoes, and a small boarding-school of six boys has been recently opened; both of those schools, it is hoped, will soon be enlarged. A boarding-school of six boys and as many girls has been formed among the Seminoles. Returns have not yet been received of the schools among the Nez Percés; two gentlemen and their wives have been sent to these Indians, whose duties will lead them to act as teachers no less than as missionaries. In the Uintah Valley, Abiquiu, Cimarron, Mescalero Apache, Southern Apache, and Moqui agencies, little progress can yet be reported in the work of education. Some of the Indians in these agencies are not yet placed on reservations; all but two of these bands are in a somewhat unsettled state, and in all these agencies suitable buildings for school purposes have not yet been provided. In several cases the agents themselves, perhaps in all cases, have given instruction to the Indians and their children, to some extent. All the agents have the education of the Indians much at heart.

3. Several causes have led to delay in carrying the plans of the board into full effect: the distance of the New Mexico, Arizona, and Utah Indians from the States, and the difficulty and great expense of reaching them; the fact that almost everything had to be begun without previous preparation; the serious sacrifices and privations to be endured by families who may be called to go out to teach these tribes; but, nevertheless, the board is confident that the benevolent people on whom it relies for support will enable it to use vigorous and successful efforts for the benefit of these Indians.

4. Nothing has occurred to weaken the faith of the board in the humane policy of the Government toward the Indians, understanding by this policy its seeking to preserve peace with these tribes, to place them on reservations, to deal justly by them, to place upright men over them as agents, to promote their education and training in the ways of civilized life; the results of such policy will surely be good. I may add that I am confident of being sustained by the board and by all our Christian people, when I express the opinion that the board of Indian commissioners, and the Indian agents appointed on the nomination of responsible and benevolent associations, are two things full of good to the Indians. The action and influence of these gentlemen, in their several posts of duty, will go far to correct the great evils of the past, and to secure to the Indians, in time to come, the benefits of religion and education, and thereby of the best civilization. Our Government and our nation *will go on* in this policy toward the Indians, and our churches will continue to seek their highest good. Well, therefore, may we expect to see great changes for the better.

Yours, very truly,

JOHN C. LOWRIE, *Secretary.*

Mr. VINCENT COLYER, *Secretary, &c.*

VINCENT COLYER, *Secretary.*

## B.

KICKAPOO INDIAN AGENCY,  
*Muscotah, Kansas, Seventhmonth 13th, 1871.*ENOCH HOAG, *Superintendent, Lawrence, Kansas :*

Agreeable to instructions contained in Department letter, bearing date "March 4, 1871," a delegation of chiefs and headmen of the Kickapoo tribe of Indians within this agency were selected, who, in company with myself, left Muscotah on the 11th of Fourthmonth last, and proceeded to Fort Duncan, Texas, by way of rail to Baxter Springs, Kansas; thence by stage to Sherman, Texas; thence by private conveyance to Fort Richardson, Jack County, Texas; thence by the military from one post to the next in order, until we reached Fort Duncan, on the Rio Grande, where we arrived Fifthmonth 24th, 1871. Here we learned,

from Colonel Z. R. Bliss, post commander, that the exile Kickapoos were camped or quartered near Santa Rosa, Mexico, distant about fifty leagues from Fort Duncan, and, in order to get an interview with them, it would be necessary to proceed to their camps, and perhaps to Santa Rosa.

On the 27th of Fifthmonth, in company with Colonel Bliss and W. Schuchardt, United States consul, Piedras Negras, and others, we set out for Santa Rosa, by way of one small camp of Kickapoos near the town of San Juan de Allendo. Here we were kindly received by Cheeno, the head chief of the band. All of them seemed much delighted to receive a visit from their friends from the north. While in this camp we learned that two Mexican spies, or *secret messengers*, had been dispatched from Pietras Negras, immediately on our arrival at Fort Duncan, to all the Kickapoo camps, and also to the Mexican authorities at Santa Rosa, and other places, in order that every advantage might be taken by them to keep the Indians on Mexican soil. Cheeno proffered his own services as guide to Santa Rosa, which we accepted, and we proceeded on our way and arrived at Santa Rosa on the 30th of Fifthmonth. Here we were met by about one hundred Kickapoos, who had been previously notified of our coming. We were kindly received by the Indians, and they seemed perfectly delighted to meet our delegation, and to get intelligence from the north, and to give us information relative to themselves. From those present we learned that several squads of their people were out on the "chase," including Wah-pah-ka, one of the principal chiefs. We at once dispatched messengers, at our expense, to notify all absentees of our arrival, and desire to meet them in council. Wah-pah-ka, with his band, did not get in until the 13th of Sixthmonth. In the mean time, however, we were comfortably quartered in a house which we hired for the purpose of entertaining our Kickapoo brethren when they came to see us, and we were visited by most of the tribe during our three weeks' sojourn in Santa Rosa.

We made use of every opportunity to present to them our friendly mission and the advantage they would derive from the acceptance of the kind offer made by the Great Father at Washington. Quite a number of them, particularly the squaws, expressed a positive determination to go back with us. It was very evident to us that the Mexicans saw the necessity of going to work at once, or the majority of the Kickapoos would leave them.

The local influences at Santa Rosa were then turned upon us secretly, and every means was made use of to buy up the chiefs and headmen. In addition to the local influences, adverse to our mission, I have to report that we were not the only Indian commissioners in Santa Rosa at this time. It appears that some three years ago, Wah-pah-ka, in company with other Kickapoos, visited some of the Mexican officials south, and asked for and succeeded in getting an appropriation from the General Government of \$10,000, to be expended in agricultural implements, oxen, subsistence, &c., which was furnished to the governor of the State of Coahuila, where it has remained until during the past winter or spring, when there was an "Indian supply commissioner" appointed, and \$5,000 of the above appropriation placed in his hands, and directed to proceed to Santa Rosa and purchase cattle, implements, &c., for them, and deliver to said Indians. Of course, we were not fully posted as to the extent or nature of the instructions given our opponent. Yet it seemed very strange to us that it should so happen that this commissioner should be in Santa Rosa issuing these supplies just at the time we were there, and it is equally as miraculous that the governor of Coahuila should discover these \$10,000 lying in the Treasury vaults just at the time

when he must have known that our Government had made an appropriation, and was taking steps to effect the removal of Kickapoos from Mexican soil. The people of Santa Rosa, both native and American citizens, treated us very kindly, and at the same time were free to acknowledge that they were decidedly opposed to the removal of Kickapoos, giving for their reason the assertion that the city of Santa Rosa and the whole community around would be invaded at once by Mescalero Apaches, Lipans, and other marauding bands of Indians; that the Kickapoos were their only defense; and not only this, but that the Kickapoo labor and the Kickapoo trade was a matter of no mean importance to them.

The Mexican commissioner had reached Santa Rosa about one week in advance of our party, and had been issuing some cattle and corn; I do not know the exact amount. On the day following our arrival there he delivered to them fifty-two head of cattle, which were driven by our door, we think, to assure us that they were in good earnest, and acting in good faith towards the Indians. A few days later he delivered a lot of cattle (I did not get the exact number) to Cheeno's band; Cheeno himself receiving for his share two yoke of oxen, one "caretta," and some corn-meal, and "trinkets." By this time it was very evident that the Mexicans had "bargained" with Cheeno and some others, and that a division was already inaugurated in the tribe for and against going north, (not against us as individuals.) Those opposed to going were headed by Ny-mo-sho-na, the oldest chief in the nation, though not the most influential, and those who were in favor of going, or at least of giving the subject a favorable consideration, were headed by Wab-pah-ka, a very influential chief, and we learned through our chiefs, who spent most of their time in their camps, that the feeling was getting quite bitter among them and sharp words had been exchanged.

As soon as Wab-pah-ka returned to camp we at once dispatched a messenger to notify all the tribe that we were in readiness to meet them to deliver to them officially our message. In this the Mexicans sought to defeat us, and prevailed upon some of the chiefs and headmen to demand that the council should be held in the court-house in Santa Rosa, and under the auspices of the alcalde and his deputies. Of course we objected, and told the Indians we would meet them under a tree in their camp, or anywhere but in the presence or under the Mexican influence. On the 15th of Sixthmonth the Kickapoos assembled at the court-room in council, in the presence of the alcalde and others, whereupon the alcalde sent a messenger to us with these words: "The alcalde wishes to see you and your chiefs at the court-room." Whereupon I returned the following message: "I have no instructions from my Government bringing me in public communication with the authorities of any foreign nation. My mission is to the Kickapoos only." The alcalde sent another messenger at once, who stated that his first deputy was not authorized to deliver any such message; that the Kickapoos had asked him for the use of the house to hold a council with us; and that he did not send for us to come into his presence; but that it was the Indians that wished to meet us, and that we were perfectly welcome to the use of the room to council with them at our own pleasure, but that the Indians had expressed a desire for him to be present to hear what we had to say. Believing, as we did, that this was our only opportunity to meet all the chiefs of both parties, and with the assurance from the alcalde that we should have perfect freedom to speak as we wished, the invitation of the chiefs was accepted, and we were soon in the presence of the Kickapoos and the officials of

**Santa Rosa.** And although we had talked with all of them privately at our rooms, and they all fully understood our mission, yet we made a public statement of the wish of our Government in their behalf; after which, the chiefs asked many questions about their proposed home, some of which I was not authorized to answer. The Mexicans sought to make them dissatisfied by misinterpretations and evil representations, which were accepted as truth by those opposed to going, and, as a matter of course, brought the two opposing elements into open conflict, and for a few moments the war-cloud hung pretty heavy over us. Had it not been for the pacific influence of Cheeno on the one side and Wah-pah-ka on the other, we might have enjoyed (?) a small battle. An adjournment was now proposed, with an agreement to meet at 4 p. m. the same day. At the time appointed, a few of us convened, but most of the Indians were too drunk to put in an appearance. The Mexican commissioner had issued cash to them at the adjournment of the first council to buy rations, and most of them had concluded to invest the whole amount of their share in whisky, and the result was no council that evening. On that evening we had quite an extensive talk with Wah-pah-ka and others, who favored us in leaving Mexico. He did not like the idea of taking his people up to an unknown reservation without some assurance that the land was good and where it was to be located, and how much was to be given them, and who their neighbors were to be, and some other questions that I was not authorized to answer. He seems anxious to get away from Mexico, but wishes to know what he is going to get before starting his people. He proposes to select thirty of his leading men and secretly withdraw from Mexico, and proceed with them west of Forts Clark, Concho, Griffin, &c., to Kansas, "on his own hook," and when there to be joined by the agent and some of the tribe there, and then proceed to the Indian Territory and look at the land proposed for their future home, and if found satisfactory, then he thinks he can succeed in bringing at least three-fourths of the Kickapoos to such reservation.

He also has it in view to consult with his brother, Ke-ah-quark, a chief in the tribe there, with regard to uniting the two branches of the tribe in the Indian Territory. I assured Wah-pah-ka that I could not give him and his party any surety for safety in passing through to Kansas, nor could I give him any assurance that the Department at Washington would recognize him after he was through. He said it was no use to go into council the next morning and get into another quarrel, and he believed the best policy would be to go in and make a "bunkum" speech in order to keep peace, and then lay his plans secretly for all future movements. Every effort was brought to bear upon him that evening by the citizens of Santa Rosa to buy him over in opposition to our side, and we believe that he accepted presents and money favors to change his position. In fact, his party said they were going to get all they could from the Mexican commissioner while we were there, for, as soon as we were gone, they could expect nothing more. On the following day (16th) we were again convened in council, and all was peace. Quite a number of speeches were made by the Indians, all of them thanking us for our kind visit, but declining to accept of our mission, and asked to be let alone in peace, where they now are, at the same time pleading poverty and a desire to be taken care of by one of the great fathers represented there.

Quite a number of the squaws had come from their camps, distant about seven leagues from Santa Rosa, already packed on their ponies for the trip north, and seemed quite disappointed that their leader

(Wah-pah-ka) had decided not to move just then; and yet the decision of their chief is law unto them. In the event that Wah-pah-ka should succeed in getting the larger portion of the Kickapoos to leave Mexico, will the Department receive them and furnish them transportation? We believe that we did all that was in our power to accomplish the object of our mission; and in the event that the Kickapoos remain in Mexico the Mexican government ought to be held responsible for all the depredations committed on the frontier of Texas, for we verily believe that our success would have been easy had it not been for the very tangible and substantial interference brought to bear upon these Indians while we were with them, and the assurance that these favors were to be continued. The Indians were very clamorous to tell us of the ill treatment they have received at the hands of the Mexicans, and yet they suffered a small bribe of money to influence them against the acceptance of our proposition. We shall expect Wah-pah-ka during this month. Will the Department take any further action in the matter?

I am, very respectfully, thy friend,

JNO. D. MILES,  
*United States Indian Agent.*

B 1.

HEADQUARTERS DEPARTMENT OF TEXAS,  
(TEXAS AND LOUISIANA,)  
*San Antonio, Texas, July 27, 1871.*

SIR:       \*       \*       \*       \*       \*       \*       \*

I have just returned from an official visit to Forts Clark and Duncan and the adjacent Rio Grande frontier. The people in that section of country are fully informed as to the conduct of the Mexican officials in preventing the return of the Kickapoos to United States territory. They have been retained in Mexico by bribes of money and goods, as set forth in the report of Agent Miles.

The depredations on live stock, referred to in my annual report of 1870, and in previous papers, continue unabated. The marauders with their stolen stock have been, time and again, traced to the Rio Grande, and I am reliably informed that parties in pursuit can often see from the north side of the river their stock in possession of other parties, collected in convenient droves on the south side.

This gradual but heavy loss of property is very discouraging to the people. They are becoming restless, not to say desperate; and seeing the apparent determination of the Mexican officials to retain the Kickapoo Indians in Mexico as a cloak for the evil deeds of the Mexican people, they talk now quite freely of organizing themselves into armed bands and crossing into Mexico to recover their stolen property.

This feeling is universal on the frontier since the recent developments with regard to the removal of the Kickapoo Indians. The ranch-men live from ten to thirty miles apart, and incursions from the south side of the Rio Grande in small parties cannot be prevented by a reasonable force in Texas, unaided by any force, civil or military, from the Mexican side.

It is believed that these depredations can be effectually and perma-

nently stopped by pursuing marauding bands into Mexico, with troops, accompanied by the owners of the stock and the records of the brands.

I am, sir, your obedient servant,

J. J. REYNOLDS,

*Col. Third U. S. Cavalry, B't. Maj. Gen. U. S. A., Commanding.*

The ADJUTANT GENERAL UNITED STATES ARMY,  
*Washington, D. C.*

---

C.

REPORT OF W. R. IRWIN AND O. S. WITHERELL, INVESTIGATION OF ACTION  
OF WYANDOTTE GUARDIANS.

WYANDOTTE, KANSAS, *July 14, 1871.*

SIR: The commission appointed under the provisions of the sixth section of the act of Congress approved July 5, 1862, (Statutes at Large, vol. 12, pages 529 and 530,) and the act of March 3, 1871, to effect settlements with persons appointed by Wyandotte and Shawnee councils to receive money due to incompetent and orphan Indians, composed of Walter R. Irwin, detailed from the office of Indian Affairs, and Orlando S. Witherill, of South Bend, Indiana, appointed for the purpose, and Charles G. Barber, detailed from the Department of the Interior to act as secretary, having concluded their duty under their instructions addressed by the Hon. H. R. Clum, Acting Commissioner of Indian Affairs, to said Irwin, under date of the 19th of April, 1871, so far as relates to the persons appointed by the council of the Wyandotte tribe of Indians to receive money due to incompetent and orphan Indians, respectfully submit, in regard to the same, the following report:

The commission commenced work in Wyandotte. Notices or citations were issued to the persons who, by the terms of the law, were required to account, or to their personal or legal representative. These citations set out the law under which the commission was acting, that it appeared from the evidence on file that the person notified had received money and was accountable under the act, or was the representative of said person, and was notified to appear before the commission, on a day named, to account for the money received, and, in case of failure, to pay over the amount unaccounted for.

The parties notified, very generally appeared promptly in response to the citations, usually being accompanied and represented by attorneys, and evidence was taken, as far as practicable, to show the disposition made of the money received by the person appointed by the Indian council. The best testimony available was required, and, in character and manner of presenting, was made to conform, as far as practicable, to the rules of the courts of record of the State and United States. Most of the testimony, being oral, was taken down phonographically, and afterward transcribed by the secretary, Mr. Barber.

When the commission had completed settlements, so far as they were able, in Wyandotte, they proceeded to the Quapaw special Indian agency in the Indian Territory, and continued their labors with the Wyandottes now resident there.

It was found that, owing to the lapse of time, since the money was paid out by the United States and the fact that the parties at the time

supposed their accountability ended with the Indian council, it was difficult to obtain definite testimony in many cases. The Wyandotte council kept a book in which were recorded the settlements made with guardians appointed by the council, but this book the commission were unable to obtain, or to ascertain anything definitely in regard to the same; and, except in some few cases, where parties had retained receipts furnished them by the council, parol testimony was the only evidence that could be obtained in regard to settlements made with said council.

A docket has been kept showing the action taken in each case, names of witnesses, the dates when examined, &c. This docket, together with the testimony taken, arranged, indorsed, and numbered in the cases, is herewith respectfully submitted with the following statement, viz: (the cases are designated with even numbers, from 2 to 84 inclusive, to correspond with pages of docket.)

*No. 2.—Case of Joel Walker, guardian.*

Joel Walker receipted to the United States for \$11,265 50 as guardian for Wyandotte Indians. He is dead. His widow, Mary A. Walker, is living in Wyandotte. Isaiah Walker was the administrator of the estate. Under date of the 9th of May, 1871, a citation was mailed to Mrs. Mary A. Walker, requesting her to appear before the commission on the 18th of that month and render an account of the action of Joel Walker as guardian. On the day named Isaiah Walker appeared and stated that it would be impossible to effect much, if anything, in the way of presenting evidence to the commission before they proceeded to the Indian country; that he would attend to this matter; would represent the interests of Joel Walker, having had a conference with Mary A. Walker, widow of the guardian. He requested a list of the wards of Joel Walker, with the amount paid him in their behalf, which was furnished by the commission.

On the 22d of May he appeared with certain account-books kept by Joel Walker, and, being sworn, testified in regard to the same. These books were small blank-books, kept with ink and pencil, in a confused manner, one of which Mr. Walker stated was a collection-book, and gave an abstract of the amounts due from Wyandotte Indians to Joel Walker, and to Messrs. Walker and Brown. The books were examined, and what purported to be their showing in regard to each ward—where the name of the wards could be found—was taken down in testimony, to which reference is made. The books, according to the explanation of Isaiah Walker, show relative to the indebtedness of Abraham Williams, ward, to Joel Walker, after the money due from the United States to Williams was received at the December payment, 1855, and disbursed, that the amount was \$372 75. One of the books Mr. Walker termed the account and disbursement book of Joel Walker, and he stated that it shows the disbursements in behalf of wards in account with him; that it shows at the December payment, 1855, that Abraham Williams was indebted to different parties to the amount of \$368 69, and of this amount there was due to Joel Walker, the guardian, \$211 16, and of this amount \$154 90 was paid sundry other parties. It does not show that \$283 due to Northrop & Chick was paid.

In reference to Zachariah Longhouse, ward, Mr. Walker explained that the book, that is to say the first book presented, called the collection-book, shows that, at the December payment, 1855, there was due from him (Longhouse) to Joel Walker, \$299, and that he paid himself \$40 out of that payment, and the remainder he disbursed to other par-

ties. He explained that the account and disbursement-book shows due to Joel Walker and other parties, from Daniel Peacock, ward, December, 1855, \$513 64, and that of this amount there was disbursed in December, 1855, \$194 15 to other parties.

Relative to Thomas Van Meter, ward, he explained that the account and disbursement book shows that, December 1855, Joel Walker paid up the amount due the ward, paying the balance to John Warpole, overpaying him \$1.

Relative to Smith Nichols, ward, who, Mr. Walker states, was known in the account book as Smith Bigsinew, and that they were one and the same person, the collection-book shows that the amount due Joel Walker in December, 1855, was \$421 89, and that the book shows a balance due Joel Walker, after the disbursement of the money received in 1855, of \$381 29.

In relation to Blacksheep, ward, the account and disbursement book shows, according to Mr. Walker's explanation, that in December, 1855, Joel Walker expended \$7 92 more than he received from the United States for this ward. Mr. Walker stated, relative to William M. Blacksheep, that he lived here many years ago; that whatever disbursements were made were made at the instance of the council; that the last known of him he was in New Mexico. Mr. Walker explained that the account and disbursement-book shows, relative to George Whitewing, ward, that all the money received by Joel Walker at the December payment, 1855, was disbursed by him (Joel Walker) to parties now in said book, and to said ward. Mr. Walker states, under oath, that the account and collection book shows, in relation to James Whitewing, ward, that in December, 1855, the balance due from him was \$574 99. Mr. Walker states, under oath, that the account and disbursement book shows, in relation to John Warpole, ward, December, 1855, "all paid up." Mr. Walker states, under oath, that the account and disbursement book shows, at the December payment, 1855, the amount paid out for George Coon, ward, was \$200 85.

John Squendechter, ward: Mr. Walker states that the account and disbursement book shows a statement of his (the ward's) debts, and the following final entry: "Cash on hand, \$10."

Boyd Peacock, ward: Mr. Walker states, under oath, that the account and disbursement book shows, in December, 1855, balance due this ward \$20.

John Bigtree, ward: Mr. Walker states, under oath, that the account and disbursement book shows, on the first page of his account, balance due Bigtree of \$8 59, and shows account carried forward of indebtedness of Bigtree, due from his estate, of \$187 87.

Thomas Ma Noncue, ward: Mr. Walker states, under oath, that the account and disbursement book shows a balance overpaid in favor of Joel Walker, guardian, of \$22 55 in December, 1855.

Thomas Hill, ward: Mr. Walker states, under oath, "I settled with Thomas Hill's heirs, Mary and Sarah, and discharged the indebtedness of Joel Walker in full by compromise, about the year 1862, to the best of my recollection as to date."

Daniel Williams, ward: Mr. Walker states, under oath, that the account and disbursement book shows that in December, 1855, there was due from Daniel Williams to guardian, and other parties named, \$157 25.

Jacob Hooper, ward: Mr. Walker states, under oath, that the account and disbursement book shows a statement of indebtedness and payment, with the following final entry: "All paid out."

Sarah Hicks, ward: Mr. Walker states under oath that the account and disbursement book shows balance due in December, 1855, of \$550 72 from this ward.

Mr. Walker stated that the books presented by him contained, to the best of his knowledge and belief, correct statements of indebtedness of the various wards whose names are therein contained, and the payments made in their behalf by Joel Walker up to the close of the year 1855; that the book after that year was lost; that the lost book would show the condition of most of these accounts at the time the book terminated.

Mr. Walker afterward appeared with another book, which, however, was not subsequent in date to those he had already presented and continued the account in detail, of which those first presented give the proof. The book presented by Mr. Walker in the second examination, June 21, 1871, he stated was the ledger of Joel Walker, deceased, and that it shows that Susan Hicks, ward, was indebted to Joel Walker to the amount of \$213 78; that it shows a credit of \$49, leaving a balance of \$164 78; that the ledger shows the items, so far as they are given, to be "merchandise and groceries." This ledger shows an indebtedness from Mary Coonhawk, ward, to Joel Walker of \$10 12, discharged by cash, June 1855. This ledger shows an indebtedness from Mary and Sarah Williams, wards, in 1854-'55, to Joel Walker of \$5 58.

Rebecca Hooper, ward, known on the ledger of Joel Walker as Rebecca Van Meter—Mr. Walker stating that they were one and the same person—is shown to be indebted to Joel Walker to the amount of \$19 08, charged to Joe Bostwick.

Smith Bigsinev, ward, being the same person known as Smith Nichols, the ledger shows to be indebted to Joel Walker in the sum of \$239 31. The collection-book shows balance, from the fall of 1855, from Smith Bigsinev of \$421 89.

These books presented by Mr. Walker were critically examined by the commission, but without explanation would have been unintelligible; and with explanation the commission would deem a majority of the evidence which Mr. Walker claimed that they presented, to be doubtful. The entries are made in pencil and ink both; they are confused; they are often without date; and frequently abstract figures without any written explanation. The books come up apparently to the fall of 1855. Mr. Walker receipted for some money as late as 1857, in the case of Sarah Hicks; the majority of his receipts were for forty-four wards, December, 1855, and forty-three wards, 1856.

Joel Walker, guardian, was a competent business man, and was in business during his guardianship, and probably kept accounts of his transactions as guardian, but so far as they have been exhibited to the commission, as has been stated before, they were very unsatisfactory, and the statements herein set forth (in which the showing of said books are given, with the explanation of Isaiah Walker) are not satisfactory to the commission, who inspected the books at the time they were exhibited and explained.

Mr. Sarrahass testified before the commission, in the Indian Territory, that he had been a member of the Wyandotte council, from time to time, and acted in the capacity of head chief at different times. He don't recollect when he was first a member, but thinks it was some twenty years back; has been a member since the treaty of 1855. He stated that the common custom in electing members of the council at that time was to nominate candidates on a certain day in July, and the election came off about the second Tuesday in August every year; the

chiefs sat with the council and acted with it; the council had a clerk or secretary, who kept a book and took down the transactions of the council; he thinks the council had three books about the size of the record of payments furnished the commission by the Office of Indian Affairs; he does not know where these books are; there have been three books kept since 1855; these three books contained records of different kinds of business, and were kept contemporaneously; in one of these three books the accounts of the guardians were kept. He recollected that Joel Walker was guardian for a great many persons, but does not recollect whether he ever made settlement with the council; Smith Nichols was half-brother to Bigsineu, but neither John Sarrahass or William Johnson remembered to have heard him called Smith Bigsineu; the Wyandotte council met every Tuesday of every week the year around; in the fall of 1855 they met in Wyandotte; they had a council house there; the rule as to who should take charge of the books after each meeting was that the principal chief should take it; if he didn't, the secretary took them in charge.

Susan Hicks stated in reference to Joel Walker, her guardian, that she didn't think he did his duty by her. At one time Walker received money for herself and daughter, Mary Coonhawk, and she went up to him hard-up for provisions and requested him to give her \$5; he told her he could not give her anything; he gave her 50 cents and told her to buy some cake and candy for the girl. She stated that she never received anything from Walker; shortly after that he took his wife and went to Washington, returning the next spring; after he came back she went to him for money but never could get any; he always seemed to go out of her way to prevent her speaking to him. All she ever got from him, according to her statement, was \$1. She thinks her daughter never got anything of any consequence from Walker. In the opinion of the commission the testimony of this witness is to be taken with great allowance.

On the 10th of June instant, John Sarrahass was re-examined by Isaiah Walker, administrator of the estate of Joel Walker, who inquired of him if he thought Mr. Walker made a settlement in the spring of 1856. Sarrahass thought Mr. Walker did make a settlement with the council, but what the result was he was unable to say; they had made a rule, Sarrahass stated in the council, that no guardian had a right to make a settlement with his wards out of doors, but must do so in the presence of the council. Mr. Sarrahass testifies that the opinion among the wards seemed to be unanimous, that Mr. Walker was treating them badly, and they made complaint; they said he was hard on them, and would not give them money, but treated them as slaves; if they went to him for money he would not give them any; this was brought before the council, and they replied that the wards should be glad that they had such a man for guardian as Mr. Walker, as he held their money close and would not let them get hold of it and spend it, and that when they wanted it there it was. The reason why Mr. Walker had so many wards was because he was a man of business and had a great deal of property under his control; he was considered able at any time to pay. Mr. Sarrahass was satisfied that if Mr. Walker were alive he would have settled up this matter; there would be nothing behind at all; everything would be square and done up in an honest way. In reference to the different wards under the different guardians appointed, it seemed to Mr. Sarrahass that some of them, he did not pretend to say all, as long as their guardians had money that they knew of they would not rest; they wanted the money, and must have it; they would not be satisfied until it was gone; they would make threats in order to get it.

Jacob Whitecrow testifies, the first year after the treaty he was at Wyandotte, and frequently at the council, and Mr. Walker was secretary for the council; and it was his opinion that Mr. Walker did settle; he didn't see the settlement, but thinks the same was made, as Walker was there all the time as secretary. As far as the character of Walker was concerned Mr. Whitecrow thinks it was good for integrity and truth among the Wyandottes, with the exception that his wards did complain very much about his acts, but he thinks the way it occurred was that they bothered him until perhaps he was crusty to them. Among the Wyandottes he was considered a man of truth.

William Johnson did not know whether Joel Walker made a settlement on account of his guardianship or not; as far as he was acquainted with his reputation, he was thought to be a man of truth and integrity.

Matthew Mudeatjer testified that the general talk among the Wyandottes was, that Mr. Walker didn't, perhaps, settle with the wards as he should have done, as the council sent for him divers times for the purpose of making settlement, but he refused; that is, he never came and made the settlement; he had been at the council, and always refused to come and make settlement; he (Mr. Walker) was quite intemperate during the last years of his life; was killed by intemperance.

The commission understand Mr. Isaiah Walker to claim to substantially show settlements in all the cases, except as follows, the statement being made by him under oath:

"I acknowledge in the hands of Mr. Walker (Joel Walker) the sum of \$115 50, due to Blacksheep; I also further state that I gave a certificate of indebtedness to Charles B. Garrett, for John Punch, for \$413. Charles B. Garrett was the administrator of the guardian of John Punch, (Henry Garrett,) and I was joint administrator of Joel Walker's estate, and this certificate of indebtedness was signed Isaiah Walker, administrator, acknowledging the indebtedness of the estate in the sum of \$413, for the benefit of John Punch. This was in 1859. The liability of the estate has never been discharged, to my knowledge; \$120 was discharged a short time afterward. I paid Charles B. Garrett \$120, leaving a remainder of \$293."

#### No. 4.—*Case of Joel W. Garrett, guardian.*

Joel W. Garrett receipted to the United States, as guardian for Wyandotte Indians, for \$2,830. The receipts were all November 3, 1857. Joel W. Garrett is dead. Notice was mailed to his widow, now Mrs. Eliza J. Stone, on the 9th of May, 1871, and she was notified to appear on the 19th of that month, on the 17th of May, her husband, Derrick Stone, appeared with his attorney, H. W. Cook; Mr. Cook presented to the commission certain papers purporting to be receipts and vouchers for expenditures by Joel W. Garrett in behalf of his wards.

Mr. Stone testified that Joel W. Garrett died in 1862 or 1863, and that the widow of said Garrett is now the wife of witness; that Mrs. Nancy Garrett, the mother-in-law of Joel W. Garrett, was administratrix, and Charles Glick was her attorney; that when she made her final settlement he got these papers from Charles Glick, Mrs. Garrett's attorney; he understands that these papers came into the hands of Mrs. Garrett, administratrix, and from her hands into those of Charles Glick, attorney.

Charles Glick was examined on the 20th of May, and testified that, upon the settlement of the administration of Mrs. Garrett, he delivered the papers to Mr. Stone, the papers referred to being those handed to the commission by Mr. Stone; they came into the possession of witness

as the attorney of the administratrix of the estate of Joel W. Garrett; he obtained a portion of them from Jonathan Ayres, of Sandusky, Ohio, who is an administrator in Ohio for witness; they came to his hands as the private papers of Joel W. Garrett; he remembers that there were two girls by the name of Elliot; there were three Elliots, Mary, Hannah, and another; he knows that one of the girls lived with Samuel E. Forsyth, out on his farm, and he knows that Garrett did pay Forsyth money on account of the girl's living; don't know the amount; he knows that he collected the money himself, and that Mr. Forsyth gave an order upon Joel Garrett, and that it was paid before Joel Garrett started for Ohio; he did not pay Mr. Glick the money direct, but gave him an order on John Benton for it; he, Glick, made the settlement between Joel Garrett and Forsyth, and the difference, whatever it was, was arranged and settled.

The papers referred to in this evidence are vouchers showing money paid by Joel W. Garrett for his wards. The attorneys for the representative of the deceased guardian, Messrs. Cook & Sharp also put in evidence two abstracts from the probate court of Wyandotte County, showing the allowance or judgment in favor of T. F. Garrett of \$1,006 70, and an allowance of \$23 in favor of M. A. Garrett. These amounts, as shown by the abstract, taken in connection with the vouchers presented, which upon their face show payment of money in behalf of wards by Joel W. Garrett, would show a total payment by said Garrett for the benefit of his wards of \$1,327 42. There are also accounts rendered and other payments made, of which an explanation is reported to be given, amounting in the aggregate to \$346 17; which, if allowed as credits in favor of Garrett, would make his total credit, for disposition of funds for his wards, amount to \$1,673 59. These vouchers have been numbered and lettered, and accompany the papers, being referred to in schedules.

Isaiah Walker testified, being examined by the attorney, Mr. Sharp, and cross-examined by the commission, and presented a book which he stated was the private ledger of Isaiah Walker and Walker & Barker. He stated further that from the time Joel Garrett was appointed guardian for the Elliot family he was in the habit of depositing his money first with witness before Barker became associated with him, and continued to do so as long as they remained in business. Witness paid several sums of money at various times to different parties according to his (Garrett's) order, and sometimes without his order; that they (Walker & Barker) furnished supplies to Forsyth, and witness thinks also to Catharine Whitewing; he thinks his books would show every item that was paid as far as they would go. There is one ledger he (witness) cannot find; the book shows a payment to Forsyth of \$50, payment of October 7, 1857; also an item of merchandise, Jacob Elliot, \$10 30, and a pair of shoes following, making \$12 30.

This testimony goes on through the account in his book, some of which seemed to be identical with those embraced in the schedule before mentioned. Some of the testimony of witness substantiated vouchers presented the commission.

Mrs. Nancy Garrett was examined, and the paper was shown her by the attorney, Mr. Sharp, being an account of indebtedness of Joel Garrett to Nancy for keeping, boarding, and clothing Jacob Elliot, she stating that she recognized the items in the account as goods furnished, and as being assigned to Theodore Garrett.

This testimony identifies the account mentioned in the abstract from the probate court, which has been included in the foregoing statement

of amounts. Some of her testimony also goes to substantiate the payment of money to Forsyth for keeping one of the Elliot children, and shows an acknowledgment of payment made to Solomon Karryhoo, uncle of John Karryhoo, ward of Joel Garrett. Twice, she thinks, she remembers the sum of \$25 being paid to Catharine Whitewing for maintaining Mary Elliot.

Charles H. Van Fossem was sworn, and his testimony substantiated one of the vouchers mentioned in the foregoing account marked J—grave-clothes for one of the wards of Joel Garrett.

A review of the testimony in this case shows nothing definite except what has been hereinbefore set forth. It can be fairly assumed that proof has been made of the disposition, by Joel W. Garrett, of \$1,327 42 for the benefit of his wards, and some proof of amounts beyond this; but if it is assumed that credits should be given for the disposition of \$1,673 59, this would leave a balance of \$1,156 41 unaccounted for. There is some general testimony showing acts of the guardian relative to Karryhoo and the Elliot children, which might indicate an allowance of further credits in favor of guardian, but nothing definite.

Reference is made to the testimony presented herewith, which is quite voluminous.

*No. 6.—Case of John W. Greyeyes, guardian.*

John W. Greyeyes received, according to the pay-rolls filed in the Second Auditor's office, \$2,650 from the United States agent, as guardian for Wyandotte Indian wards. One thousand three hundred and eighty dollars of this amount was received in payment for ten wards, \$138 each, whose names are not given, and \$1,270 for persons whose names are given. It seems, from the names given of wards in the case of this guardianship, that in this, as well as in many other cases, members of the Wyandotte tribe were designated by the council as wards, but were not classed as incompetent or orphan Indians in the report made by the commissioners acting under the provisions of the treaty of 1855, which was approved by the Secretary of the Interior; and that persons classed as competent in that report were frequently designated as wards for guardians appointed by the council, and their money paid by the United States to such guardian.

The commission were unable to see Mr. Greyeyes. He resides on the Wyandotte reserve in the Indian Territory, but when the commission were in that locality he was absent, having been appointed a delegate to attend the council being held at Okmulgee.

The testimony of Irvin P. Long and John Sarrahass was taken relative to his guardianship. It appears from their statement that he failed to properly account for the money received for the family of John Williams, and that the council retained the annuities of Greyeyes until proper settlement should be made; that they took a portion of his annuities and paid the Williams family, and that this money was retained in 1857; that two years later he appeared with Isaiah Walker and presented receipts purporting to account for his liability to other wards, and that these receipts were accepted as satisfactory, and he was discharged as guardian.

Therefore, except the discharge of liability to the family of John Williams, of which there is a general statement of the witness, there is no evidence before the commission that this guardian has properly disbursed the moneys received by him, beyond the evidence of the fact that he produced certain receipts which were accepted by the council.

No. 8.—*Case of Mathew Mudeater, guardian.*

Mathew Mudeater received from the United States, as guardian, \$4,691 50. The only evidence obtained by the commission relative to this guardianship is that of the guardian himself and of Irvin P. Long and John Sarrahass, formerly Wyandottes.

Mathew Mudeater testified that relative to the Cherloe family, who were wards of his, and also to the Coon family, or persons of that name, his guardianship of them passed to the hands of Thomas Pipe, and that he turned over to said Pipe all moneys at that time in his hands. He also states some particulars relative to his guardianship of John White-wing and Jacob Hooper, and, generally, that he has no money in his hands belonging to any of the wards; that he has fully discharged his liability as guardian.

Mr. Mudeater, as is the case with the majority of these guardians, claims to have made settlement in full with the Wyandotte council, but states that it was not customary to take receipts, or if taken, they were left with the council. He states that the books of the council cannot be found. He also makes a statement in regard to the loss of the books of the council, alleging that they were left in the room while the council retired for consultation on one occasion, and when they returned the books could not be found.

Irvin P. Long states that it was the custom for all guardians to come before the council and settle before the payment from the United States was made, and if the settlement was not satisfactory, the guardianship was not continued. In cases where the responsibility of the guardian was doubtful, the money for the wards was retained. He states that he has seen Mudeater make settlements, and that they were satisfactory.

John Sarrahass testified that he knew that Mudeater was guardian for a great many persons, but does not remember what disposition was made of the funds in his hands; he thought him a liberal guardian, and that his settlements before the council were satisfactory; that at such settlements, to the best of his recollection, very little, if any, money was usually left in his hands.

It will be seen that, in this case, the evidence as to disposition of the moneys received is general—nothing specific or definite; and the only testimony as to full accountability or discharge from liability is that of the guardian himself.

No. 10.—*Case of Henry Garrett, guardian.*

Henry Garrett was, it appears, guardian for John Punch, and receipted for two payments. At the first payment the name of the ward is not given in the pay-rolls returned by the agent to the Department; but, from the evidence, it is presumed it was for John Punch, making a total received by Garrett for said ward of \$253 50. Henry Garrett is deceased. His brother, Russell Garrett, appeared and was sworn and examined by his attorney, J. B. Sharp. He presented papers which he stated were found in the possession of the father of witness, who was also father of the deceased guardian, and acted as his administrator.

These papers show a disbursement for said John Punch by the guardian of \$167, and for said Punch, by a person not named, of \$134 83. From the fact that these papers were found in the possession of the father, and also the administrator of the deceased, the presumption would, perhaps, reasonably be that the payments were made for John Punch by the guardian, now deceased.

There is the further testimony of John Sarrahass, taken in the Indian country, that Henry Garrett is dead; that he died in Cincinnati or St. Louis; that he left as his heirs, his father, mother, and brother; his father, Charles, and his mother, Mary, are dead; that his brother Russell is living at present in Wyandotte County, Kansas; witness recollects of said guardian receiving the two first payments under the treaty of 1855 for John Punch; that after Henry Garrett died, Silas Armstrong was appointed guardian for John Punch. Witness remembers of Armstrong coming into the council-room to make settlement, and saying to the council that Charles Garrett, father of Henry, had in his possession money belonging to John Punch—some \$500—and that he never could get anything from him; Garrett would not give it to him. Witness does not know whether Armstrong ever got the money from Garrett or not. Therefore the only positive evidence of disbursement by the guardian for the benefit of his ward in this case is to the amount of \$167.

*No. 12.—Case of John Bearskin, guardian.*

John Bearskin receipted to the United States, as guardian, for \$2,028. Two former members of the Wyandotte council, John Sarrahass and William Johnson, were examined by the commission. John Bearskin, the said guardian, died in 1858, and left as his heirs five children, who are now residing on the Wyandotte reserve in the Indian Territory. There is no evidence that he ever made settlement with the Wyandotte council for his guardianship, nor were the commission able to obtain any evidence in relation to his acts as guardian showing any disbursement made by him for the benefit of his wards.

The heirs are without property, except, perhaps, a small amount of personal effects.

*No. 14.—Case of James Barnett, guardian.*

James Barnett receipted to the United States for \$1,441 50. He is dead. His widow was notified to appear, and did appear before the commission on the 12th May, 1871, and testified that she was aware of the guardianship of her husband, deceased, and that perhaps she had some papers that she could show, and that she would endeavor to find the same. She appeared again subsequently, accompanied by her attorney, Colonel S. A. Cobb, and put in evidence a portion of a book, which she stated was gathered from the effects of her husband, the book being the one kept by her husband in his life-time for the purpose of showing his transactions with persons for whom he was guardian. She stated that, so far as she knew, he always kept the money he received for persons as guardian separately; that he would wrap the money of each ward in a paper and put their name upon it, and keep it in that way until he took it to the council to pay it to them.

Various papers were put in evidence—one marked "A," which is an order in favor of Catharine Young, which witness stated he paid, and that it was the last money and all he had in his hands belonging to said ward. She stated that she saw the money paid on said order.

Statements were made in regard to Milton Karryhoo, James Monture, wards of deceased, and Abraham Williams, and also in regard to other wards named in the list, witness claiming that her deceased husband had discharged his liability in each case.

Colonel Cobb testified that he had examined the papers in the book;

that he found an itemized account of James Monture amounting to \$319 80, as near as he could gather from the figures. In addition to this he found entries, closing July 2, 1857—cash on hand to the credit of Monture, \$4 27, which was after the date that said guardian received any money in behalf of said wards; in the case of Abraham Williams, that the record appears June 21, 1857—Abraham Williams, money cash on hand, \$13 98.

In the case of the widow of James Washington various charges are made, running up to May 26, 1856, as having been expended by the guardian for her, amounting to \$864 50.

In the case of the Milton Karryhoo estate witness found this entry, no date: "Cash on hand, \$16 30."

So far as this evidence goes, it shows by books of the deceased a balance of \$34 55 due to wards which was not expended. As will be seen, this evidence is very general and not such as makes any clear showing in regard to the transactions of the guardian. The book presented was fragmentary leaves of an account-book—only a portion of it—and it is not certain that these give an entire showing. The widow of the guardian is reported to be possessed of some considerable property.

The testimony of John Sarrahass and Matthew Mudeater is that James Barnett, the said guardian, was regarded as a man of truth and honesty, and that he made settlements with the council; but they don't recollect whether the settlements were final.

Sarrahass thinks that Abe Williams, one of his wards, was pronounced competent, and drew the money belonging to him.

They don't know whether Barnett made a final settlement with his wards or fully accounted for the money received by him. His general character as guardian was good.

#### No. 16.—*Case of William Walker, guardian.*

This guardian receipted to the United States for \$2,077. He was absent in Ohio. A citation was mailed to him at Larue, Hardin County, Ohio, but he did not return before the commission completed their labors. Such showing as he may be able to make under oath will be forwarded to the Office of Indian Affairs by Colonel S. A. Cobb.

#### No. 18.—*Case of Silas Armstrong, guardian.*

Silas Armstrong receipted to the United States for \$6,201, money belonging to Indians for whom he was guardian. He is dead. His widow, Zelinda Armstrong, resides near the town of Wyandotte, in Wyandotte County, Kansas. A. B. Bartlett was administrator of the estate in conjunction with Silas Armstrong, jr. He appeared and gave notice that he should file a protest, which he did, on the 22d of May, 1871, against the right or legal power of the United States to compel him to account in the premises, or to compel the legal representative of the said estate to account for and return moneys found to be due said estate on account of money received. As showing settlement, and as evidence of disposition of funds made by the said Armstrong as guardian, abstracts from the probate court of Wyandotte County were filed relative to the following wards, viz: Eliza Punch, paper lettered A; George Coke, paper lettered B; John Punch, paper lettered C; John Warpole, paper lettered D; John and Eliza Bland, (formerly Eliza Armstrong,) paper lettered E; Mary Faber, (formerly Armstrong,) paper lettered F.

The abstract in the case of Eliza Punch, ward, shows a balance in the hands of Silas Armstrong as administrator, May 4, 1863, of \$107 64.

The abstract in the case of George Cooke, ward, shows that Silas Armstrong showed to the satisfaction of the court that his account for money received from the United States for said Coke was all settled by the council, leaving nothing due the estate. John Hicks was the administrator of George Cooke.

The abstract in the case of John Punch, ward, shows that Silas Armstrong acted as guardian under the appointment of the court, and that there was a balance in his hands, as such guardian, at the October term of said court, of \$58 95. The same abstract shows the personal property that passed to the hands of the guardian when appointed by the court, in August, 1863, to be cash to the amount of \$73 70; and afterwards money was received for timber, and expenditures were made that left the balance as stated, \$58 95, at the October term, 1865, which was the last entry made in the records of the court.

In the case of John Warpole, ward, Byron Judd was administrator of the estate, and received at the June term of the probate court, 1863, of Silas Armstrong, \$146, and the record of the court shows a balance in the hands of the administrator, Judd, at the June term, of \$56 35.

In the case of Eliza Bland, ward, formerly Eliza Armstrong, Silas Armstrong, jr., and A. B. Bartlett, administrators of the estate of Silas Armstrong, deceased, it appears that at the April term, 1866, of the probate court, John Bland and his wife Eliza presented a claim for money had and received for their use by Silas Armstrong as guardian for said Eliza, the amount of the claim being \$561 90. Proceedings and evidence were had, and it was ordered by the court that the claim be allowed to the amount of \$246 30, the costs of the suit, amounting to \$10 45, to be paid by the plaintiff. It was assigned to the fifth class of claims against the estate of Silas Armstrong. The same record shows an assignment of said judgment to C. Rawrolle, and payment of the same to said Rawrolle by Bartlett, one of the administrators.

In the case of Mary Faber, ward, formerly Mary Armstrong, the abstract of proceedings at the April term, 1866, of said court, shows that a claim was presented by the said Mary and her husband, Matthias Faber, and that a judgment was rendered by order of the court in their favor for \$290, together with costs amounting to \$8 75. The record also shows an assignment of this judgment to Stockton and Wolcott, and a receipt from Stockton and Wolcott to Bartlett, one of the administrators.

Mr. Charles H. Van Fossen appeared, and was examined by Mr. M. B. Newman, associated with Mr. Bartlett as attorney in the case, and testified as follows: Resided in Wyandotte from 1856 to 1860; was in the dry-goods, grocery, and queensware business, and general merchandise. He recollects selling goods to the wards of Silas Armstrong, deceased; Armstrong told him that all the goods he let them have must be upon orders; they got quite a number of orders. Witness asked Armstrong to what extent he should let them have goods, and Armstrong told him merely to let them have enough to run up to their annuities and not more; if witness let them have more he might perhaps lose it. Whenever they got what was sufficient to cover the amount during the years he was selling goods, Armstrong would not give them any more orders, and then witness would make out the bills separately and present them, and they would be paid; all the wards were alike in this particular—using up everything they could get; every dollar they were entitled to would be gone

by the time the money was paid them. Witness was present at the time the amounts were drawn from the council, and remembers that the settlements with some would tally with the amount of the annuities; that is, the goods bought would generally cover the amount of the annuities. The wards of Silas Armstrong were well provided for; sometimes they bought sugar and coffee and things that they actually needed; he knows of Armstrong furnishing two ponies and one horse; he gave two ponies to Miss Punch. Mr. Armstrong himself settled the bills for each person separately; for example, everything that Zack Longhouse got in each year was made out in detail, footed up, examined, and if found correct the bill was receipted in full and turned over to Mr. Armstrong. Witness executed receipts for all goods furnished; sometimes they run over the amount received by the wards from the United States, which was contrary to orders; remembers of furnishing goods to Eliza Punch, Eliza Armstrong, and Mary Armstrong; thinks they did not run up their accounts to the amount of their annuities; thinks that Zack Longhouse, Eliza Punch, and Margaret Punch exceeded their annuities.

B. F. Bonin appeared with Mr. Newman, attorney, and stated he had dealings and accounts with Armstrong from the spring of 1857 for three or four years following; that these dealings were the subject of book accounts, and he had settled with these books and found the charges to be correct as far as he knew.

Scott Armstrong, son of the deceased, stated that he was acquainted with the books of Silas Armstrong. (Book shown to witness.) He knew that to be his handwriting; it was one of his account-books. The book was also identified by Mr. Bartlett as one of the books of Silas Armstrong, deceased, in testimony given on the 25th June instant.

M. B. Newman and Scott Armstrong testified as to the identity of Mary Faber, who was formerly Mary Armstrong; also Eliza Bland, formerly Eliza Armstrong.

The book presented contained accounts against the various wards, which Mr. Bartlett, administrator, being sworn, stated that he had carefully examined. He found charges in said book as follows: Mary Coonhawk, \$529 57; Mary Armstrong, \$450 69; Eliza Armstrong, \$456 48; John Zane, \$250; Eliza Punch, \$801 85; Zack Longhouse, (this charge not embracing pony,) \$244 05; Mary Punch, (reputed wife of Z. Longhouse,) \$265 10; John Punch, (containing charge for one pony,) \$244 15. With the exception of one item charged to Mary Coonhawk in 1856, and three items charged to Mary Armstrong, and four items to Eliza Armstrong in 1856, the whole of said charges in said book bear date 1857 and subsequently thereto.

Mr. Newman, attorney, filed with the commission papers as follows:

Case of Zack Longhouse:

|                                                        |              |
|--------------------------------------------------------|--------------|
| Receipts signed.....                                   | \$73 09      |
| Papers requiring explanation, accounts stated, &c..... | 16 60        |
| Total .....                                            | <u>89 69</u> |

Case of Mary Punch, reputed wife of Zack Longhouse:

|                                       |               |
|---------------------------------------|---------------|
| Receipts signed.....                  | \$103 44      |
| Papers requiring explanation, &c..... | 5 00          |
| Total .....                           | <u>108 44</u> |

## Case of Eliza Punch :

|                                       |               |
|---------------------------------------|---------------|
| Receipts signed.....                  | \$355 10      |
| Papers requiring explanation, &c..... | 72 00         |
| Total .....                           | <u>427 10</u> |

It is proper to remark that of these papers appearing with receipts, to the amount of \$253 50, and the other papers to the amount of \$52, was disbursed by Silas Armstrong as administrator of the estate of Eliza Punch, deceased, which would leave a balance of \$121 60 disbursed by him as guardian. The land of this ward was sold for payment of debts by Armstrong, as administrator.

## Case of John Punch :

|                                       |               |
|---------------------------------------|---------------|
| Receipts signed.....                  | \$146 65      |
| Papers requiring explanation, &c..... | 49 70         |
| Total .....                           | <u>196 35</u> |

## Case of Margaret Punch ;

|                                          |               |
|------------------------------------------|---------------|
| Receipts signed, (accepted orders) ..... | \$65 00       |
| Papers requiring explanation, &c.....    | 245 53        |
| Total .....                              | <u>310 53</u> |

## Case of Mary Coonhawk :

|                      |         |
|----------------------|---------|
| Receipts signed..... | \$35 00 |
| Account stated ..... | 10 00   |

and also a receipt dated April 11, 1869, signed by said ward, (her mark,) witnessed by W. C. Holmes, now deceased, being a discharge in full from all liability as guardian.

The total amount of charges against wards in the book presented, as stated under oath by Mr. Bartlett, after examination as above referred to, is \$3,241 89. The total amount of expenditures in behalf of wards by said guardian, as per the vouchers above referred to, excluding those disbursements made by Armstrong as administrator for Eliza Punch, and including those made by him while acting as guardian, is \$923 61. It is evident, upon examination, that some of the charges in the book, and some of those embraced in the papers, are duplicates, and that, to some considerable extent, the commission were not able to identify them; and they think it would not be proper—it is not claimed by the attorneys—to add together the amount taken from the book and those embraced in the vouchers.

In the Indian country the testimony of John Sarrahass, William Johnson, Mathew Mudeater, Susan Hicks, Louisa, Susan, and Margaret Zane was taken. The testimony is somewhat extended, and contains very little that is definite. Sarrahass testifies that Armstrong gave satisfaction before the council; also that Longhouse received one pony from Silas Armstrong. Mudeater remembers of Armstrong letting John Punch have two ponies, one worth about \$60 and the other about \$45 or \$50; he took them in place of money that Armstrong had in his hands belonging to Punch.

The testimony shows that Eliza and Mary Armstrong lived with the

guardian, who sent them to school and took pains to have them educated. When they came home, they came to his house. He took charge of them from 1852 or '53 until they were married. The testimony shows that a majority of the wards were those who spent the money as fast as they could obtain it.

Matthew Mudeater states, in regard to John Zane, that after he (John) had gone to California, his brother Isaac claimed that John owed him some \$200 or more, and wanted to get his money. John Zane had two daughters and a mother-in-law, and they also wanted to get hold of the money belonging to Zane. They had quite a quarrel among themselves; so much so, that some of them wrote to John, in California, in reference to it. John wrote back to Silas Armstrong, authorizing him to be his agent and use his money for him. Before this authority came from John, in the mean time some payments were made; but where they were made, witness does not know. He knows that Isaac Zane and the mother-in-law of John Zane used to quarrel at every payment over John's money. Armstrong took it upon himself to pacify them by dividing the money among them. In the mean time the daughters of John Zane and the mother-in-law claimed to have received news of the death of John, and were trying to sell his land; but before they accomplished this they received a letter from John giving Armstrong authority to act as guardian for him.

The testimony of Susan Hicks relative to the guardianship of her daughter, Mary Coonhawk, was, that she brought home some meat and articles of clothing at different times. One time Silas Armstrong gave her \$90 in money, and she bought clothing with it.

Louisa Zane testified in regard to her father John Zane, that he is in California alive; that he was the ward of Silas Armstrong; she does not know that Silas paid any money to John Zane's heirs, or those who would become heirs after his death; witness never received anything; she never got anything from Mr. Armstrong. Jeff. Zane, the brother, and Margaret Zane, the sister, are the children of John Zane.

Susannah Zane, a sister of John Zane, testifies that Silas Armstrong received all the payments for her brother; does not know what he did with the money. Margaret testified that she never received any property or money from Silas Armstrong.

An argument was filed in the case by M. B. Newman in behalf of A. B. Bartlett and Silas Armstrong, jr., administrators of the estate of Silas Armstrong, deceased. In this argument it is claimed:

First. That the wards Peter Solomon, Sarah Solomon, John Warpole, are not on either the incompetent or orphan list under the treaty of 1855, but are citizens, and their rights in the premises are under the exclusive jurisdiction of the local courts.

Second. That the long lapse of time before this investigation was instituted should in equity be held to carry with it the benefits and conclusions of the limitation act, at least so far as to be held *prima facie* evidence of settlement, and require a preponderance of testimony to negative such presumption; further, that if this investigation had been instituted ten years ago, when the parties interested were alive and the circumstances were fresh in their minds, the case would have been different, and a strict account could have been plausibly required. The proofs now collected or attainable leave the matter of guardianship now a matter of conjecture, and the delay of this investigation is the laches of the Government on behalf of the beneficiaries and not of the guardian.

Third. That the well-understood habits of the Indians of the incompetent classes to be continually clamoring for what was due them, and also

being dependent for subsistence exclusively upon their payments, instead of being industrious, and also the fact that little, if anything, has been heard of these claims for the last ten years directly from the actual beneficiaries, is strong presumptive evidence of their claims having been long ago settled.

Fourth. That the peculiarity of the Indian race, competent as well as incompetent, of relying upon their memory instead of account books, in business transactions, taken in connection with the proofs adduced of payment by Armstrong to John Punch and Zack Longhouse, of ponies not charged to them in his account book, strongly corroborates the conclusions of settlement, now incapable of more distinct statement and exactness of proof.

Fifth. That the abstracts from the records of the probate court are the most reliable proofs of settlement of the respective guardians of all claims antecedent thereto, not embraced in said probate transactions, and unless fully impeached should be held conclusive as to such antecedent matters.

Sixth. Under the foregoing propositions, it is claimed that there is no reliable evidence of any amounts remaining due from said guardian in favor of Zack Longhouse and reputed wife, Mary Punch, or John Punch, Mary Coonhawk, George Coke, Eliza Armstrong, or Mary Armstrong.

That the balance of Eliza Punch's estate is fully covered by the amounts subsequently paid out to Margaret Punch, kin of said Eliza Punch, by said Armstrong, as shown by his books; and that of the amount received as guardian of John Zane, \$240 was paid on a debt due to Isaac Zane and \$10 to Hannah, as proven by said Armstrong's books, with strong probability that much more was paid over to the clamoring relatives of said ward. "Hence it is only to said John Zane that we can admit any claims due from the estate of Silas Armstrong as guardian as aforesaid."

If both the amount taken from the books and that contained in the vouchers furnished were allowed as credits in favor of said guardian, there would still be a balance, subtracting from the total amount paid to him, of \$2,035 50 unaccounted for. Some portion of this would be accounted for by the evidence contained in the abstracts from the probate court. None of the evidence is of the character that would probably be required by a court of record, except, perhaps, the receipts and some evidence furnished by the abstracts. Book accounts, when properly established, of course are evidence, but it is doubtful whether this book has been kept in a manner that would make it satisfactory evidence in a court of record. A review of the evidence shows some disposition of funds for the benefit of the wards not embraced in any account-book nor abstract of the court, but it is impossible for the commission to say what amount, in the case of any particular ward, is accounted for. It would seem, however, in the case of John Zane, that there is a considerable amount due, and it is admitted by the attorney that there is liability in that case. The records furnished the commission show that there was paid to Armstrong money belonging to John Zane to the amount of \$569. Payments for seven wards, of \$138 each, was made, without giving the names. If one of these payments was money belonging to John Zane—and it probably was—it would make the aggregate paid to Armstrong, of money belonging to Zane, \$707. The heirs of Silas Armstrong are said to be worth probably \$50,000.

No. 20.—*Case of Chris. Little Chief, guardian.*

Chris. Little Chief was guardian for John and Mary Little Chief, and received money for them to the amount of \$507. Their names do not appear as wards in the first payment, as the names are not given, but from the testimony it is understood that they were his only wards.

John Sarrahass testifies that he knew Little Chief well; he died on the reservation, he thinks, in 1857; John was the son of Chris. Little Chief, and died in the army in 1862. Christopher was a good man, and took proper care of him; thinks he gave his ward John the benefit of the money received from the Government for him; he went dressed well all the time; thinks he had no support from any other source. Mary Little Chief was the daughter of Chris.; she died in the spring of 1870; sometimes she lived with her father, but witness does not know how long; remembers that Chris. Little Chief, in his life-time, used to come before the Wyandotte council and state his transactions as guardian, and he stated to the council that his daughter, when she was at his house, received provision and clothing; when she wanted money he gave it to her; thinks she received the money from her father, or it was spent for her benefit; Little Chief never made a final settlement for John and Mary that he remembers of, but he remembers of Little Chief being before the council and making settlements; his statements made to the council in regard to moneys received by him were satisfactory, from the fact that it was recorded in the book; witness states that if guardians did not do right by their wards, the council took the guardianship away and gave it to some one else. Guardians were required by the council to make settlements once a year.

It appears, therefore, from the evidence in this case, that the wards were the children of the guardian, and received such care and attention as children usually receive from parents, and that the probabilities are that the money received for them was expended for their benefit. Beyond the general testimony, however, referred to above, the commission are unable to obtain any definite evidence.

No. 22.—*Case of Cyrus Garrett, guardian.*

Cyrus Garrett receipted to the United States for two payments, the first and second under the treaty of 1855, amounting to \$253 53. In the case of the first receipt the name of the ward is not given. At the second payment it was for money due Catharine Young, and it is presumed that the first payment was for her also. Guardian is deceased.

Russell Garrett, a brother of the deceased, put in evidence a paper, which is an order of the Wyandotte council on Charles Garrett, the administrator of Cyrus Garrett, deceased, requesting him to pay to Catharine Young \$27 49, being the amount in Cyrus Garrett's hands on settlement with the Wyandotte council while acting as guardian for Catharine Young. This paper, witness states, he found among the papers of his father, deceased; his father's name was Charles Garrett, and he was the administrator of the estate of Cyrus Garrett.

The presumption is, therefore, that this money was paid by Charles Garrett, and that the liability of Cyrus Garrett as guardian was thereby discharged.

John Sarrahass testifies that he was acquainted with Cyrus; that he is dead, and left as his surviving heir his brother Russell; that he is acquainted with Catharine Young; that she is alive and resides on the Wyandotte reserve in the Indian Territory; that he was not aware of Cyrus Garrett being her guardian.

No. 24.—*Case of Jacob Whitecrow, guardian.*

Jacob Whitecrow receipted to the United States for \$707 50, money due John Bigarms. The guardian was examined, and testified that he was guardian for John Bigarms, and received the amount of money stated above, (707 50.) John Bigarms went to California in 1849, and said guardian paid George Clark \$100 as part price of his (the ward's) outfit. John Bigarms was a half-brother of the wife of witness; he also had another half-sister, Eliza Stone, known as Lucinda Standingstone; that upon the supposition that Bigarms was dead, not having heard from him for nineteen years, he (the guardian) divided the money between his wife and her sister. Guardian never accounted to the Wyandotte council for the disposition of said money.

Matthew Mudeater and Irvin P. Long testified that more recent information had been received relative to John Bigarms, but there was no certainty of his being alive; the report when traced was not deemed reliable. John Sarrahass believed him to be alive, but could give no positive information.

In this case there is no evidence relative to the disposition made of the money beyond the statement of the guardian himself, that he paid \$100 to George Clark, and the remainder he divided between the half-sisters of the ward. The general character of the guardian for honesty and integrity is good. He is now living in the Seneca tribe, on the reservation belonging to those Indians, as a member of the tribe. He is possessed of some personal property, and also owns some real estate in Wyandotte County.

No. 26.—*Case of Matthew Barnett, guardian.*

Matthew Barnett receipted to the United States for \$253 50, money due Josiah Scoot Coon. The name of Coon is not given as the ward in the first payment from the United States, but from the evidence it is presumed that the two payments, amounting to the sum before named, were both for this ward.

The evidence in this case by John Sarrahass, former chief and member of the Wyandotte council, is that Coon lived with Barnett while the latter acted as guardian, and was probably clothed and fed by him.

There is no other evidence of his action, or relative to the disposition of the funds received by him for said ward. Barnett died in 1856; he received this money in December, 1855, and April, 1855. The witness does not know that Barnett ever made any settlement with the council for his debt. There are no heirs of guardian, so far as can be ascertained, now living.

No. 28.—*Case of Isaac W. Brown, guardian.*

Isaac W. Brown receipted to the United States for \$594. John Sarrahass testifies that the wards of said guardian are all dead. He also makes some general statements in regard to the action of the guardian, but nothing definite.

Isaac W. Brown appeared before the commission in the Indian Territory, and testified, referring to a memorandum which he stated he had made from a book kept by him showing disbursements made by him in the case of each of his wards. He stated in regard to Joseph Arms, ward, that he was killed at the battle of Wilson's Creek; that he had expended all the money received for this ward except \$8; and that afterwards the ward stayed at his home, and he fed and took care of him, which was worth more than the amount.

In regard to Blacksheep, ward, he stated that he received one payment for him; that the ward was owing some debts, and he paid them, taking receipts; that the receipts were lost during the war; that from his book he could give statement of items expended in behalf of Blacksheep amounting to \$110 58, which would leave a balance of \$2 92 unaccounted for. The witness thinks this balance, \$2 92, would not pay him for his trouble in acting as guardian.

In the case of Daniel Williams, ward, he gave from his memorandum a statement as to the disposition made of money, amounting to more than he received for him.

In the case of Susan Hill, ward, he gave from his memorandum statement as to the disposition made of money, amounting to more than he received for her.

This witness, according to his own showing, has disbursed more money than he received, except in one instance, where he claimed that the balance was due him for services. He also rendered an account for one ward for whom he was not charged by the Government; probably a case where the council had placed money in his hands, the person for whom it was intended being absent. This was the case of William Blacksheep, who was in New Mexico. There is no testimony beyond that given by the witness of his disbursements, but the general impression made upon the commission was that the money was properly disposed of by the guardian.

Isaac Brown is a man now without property, beyond some little personal effects. He is living on the Wyandotte reserve, in the Indian Territory, and is occasionally given to dissipation, as are many of the Indians. He seems, however, to be a man of intelligence, and capable of keeping correct and accurate accounts.

*No. 30.—Case of George I. Clarke, guardian.*

George I. Clarke receipted to the United States for \$2,576 50. He died in 1857 and left three children, Charlotte, Richard, and Mary. Mary, the oldest, is dead. She and her father and mother all died within a period of three weeks. They died in Wyandotte County, Kansas. Richard Clarke is in Wyandotte, and was notified to appear before the commission and make a showing in regard to his father's guardianship, but failed to do so.

The commission examined John Sarrahass, William Johnson, and Matthew Mudeater relative to the guardianship of Clarke, but no testimony was elicited showing his action in that capacity. Richard Clarke, the heir of said deceased, is not possessed of property to any extent.

*No. 32.—Case of H. M. Northrup, guardian.*

H. M. Northrup received from the Government, as guardian for wards the sum of \$4,820.

Under date of May 9, 1871, a notice to appear without delay, addressed to Mr. Northrup, was furnished to A. B. Bartlett, his attorney, in Wyandotte, and mailed to Mr. Northrup, who is residing in New York City. Mr. Bartlett exhibited to the commission a letter from Mr. Northrup in reply, requesting him (Bartlett) to attend to the case for him in conjunction with Mr. J. Q. Watkins, of Kansas City, who was in possession of his (Northrup's) books. At their request a list of the wards, with the amounts paid each, was furnished by the commission on the 17th May, ultimo.

On the 30th May, Mr. J. Q. Watkins, of Kansas City, appeared, accompanied by Mr. A. B. Bartlett, attorney for Mr. Northrup. Mr. Watkins, after having been duly sworn, was examined by Mr. Bartlett and cross-examined by the commission, and testified as follows: That he is engaged in the banking business in Kansas City, and has with him the cash-book of Northrup & Co., the book extending from October 8, 1857. Northrup & Co. were engaged in business as bankers in Kansas City, and he acted in the general capacity of manager, book-keeper, &c.; that he made the entries in the cash-book, and they were made at or about the time they purport to have been made; that he had entire control of the books of the firm of Northrup & Co. Elizabeth Arms was not a ward of Mr. Northrup; she was a competent; he does not know anything in regard to his money. Witness thinks that Charlotte Clarke was a niece of Mr. Northrup; he (witness) became acquainted with her, perhaps, in 1856; she was then living with Mrs. Northrup, and was about twelve or fourteen years old; she lived in the family until 1864; Mr. Northrup treated her as a member of his family, clothing, educating, and furnishing her with all the necessaries of life. There was no account kept for this ward for the reason that she lived in Mr. Northrup's family, and was provided for in the same manner that the other members were; Northrup always furnished her with means to travel, and at her marriage gave her an outfit. Witness states that Mr. Northrup has always been unusually liberal and kind to the entire tribe of Wyandotte Indians, and they felt and expressed a great deal of gratitude; he (Northrup) married into the tribe and obtained their confidence; he was their principal adviser; the Indians came to him when in distress, and witness does not know an instance that Northrup did not give them the desired relief. Unlike the remainder of the Wyandottes, Charlotte Clarke was never allowed to stray, but lived in the family of Mr. Northrup and was always a respectable lady; when she was married Mr. Northrup bought her a farm in Indiana, where she now lives with her husband. October 8, 1857, the guardian account is credited with \$115 50; and November 5, 1857, with \$115 50; there were no credits prior to October 8, 1857; that was the date Northrup & Co. commenced business; the items in the guardian account must have been closed up to 1858; the two credits referred to are credited from that guardian account from memorandum furnished witness by Mr. Northrup in October, 1858; the most of these accounts were transferred to Northrup's individual account; he kept no book account with Charlotte; the entire amount credited as annuity is \$227, all the credits the book shows for Charlotte; that is all the annuity received for her since witness has been keeping the books; the books balance in regard to the debits and credits of Charlotte—\$227. Charlotte's name was on the list to go in the guardian account of H. M. Northrup, furnished to witness, but afterwards transferred to Mr. Northrup's individual account; the dissolution of the partnership took place in 1864.

John H. Standingstone, ward: The book shows his account to stand credited with \$237, and debited with the same amount. The credits consist of, October and November, 1857, \$113 50, and \$10 on the 28th July, 1858; the debits are four items amounting to \$138, cash.

Abraham Arms: It was submitted that Abraham Arms was on the competent list, and to this reply was made that Mr. Northrup had re-ceived to the United States for money for him and was accountable for it.

Mr. Watkins stated that Abraham Arms had a similar account to Charlotte Clarke; he was a member of Mr. Northrup's family, and

treated as one of his own children, being clothed, educated, and fed ; he was quite small when he went to live with Mr. Northrup ; witness thinks he remained with him until 1862 ; witness knows of Northrup paying out money for food, clothing, and other purposes, and for raising said Arms ; Northrup & Co. had no books prior to 1858 ; prior to that time the books were those of Northrup & Chick ; their books were destroyed by fire in 1865 ; Northrup kept his account in the books of Northrup & Chick prior to October 8, 1856 ; witness presented four receipts, amounting to \$73 86, and stated they were all he could find among Northrup's papers ; Northrup was not in the habit of taking receipts when he expended money for wards.

Abraham Williams, ward : Witness states that the guardian account of Northrup is credited for Williams, October, 1857, \$113 50, and October, 1857, \$113 50 ; that these are all the credits for Abraham Williams. On October 9 the account is charged with \$50 for him ; on October 13 the account is charged \$5 for him ; on October 14 the account is charged with \$15 for him ; on October 24 the account is charged with \$20 97 for him ; on October 26 the account is charged with \$91 03 for him ; making \$237, which balances his account.

Sarah J. Washington, ward : The guardian account of Northrup is credited with \$227 for her, and \$257 is charged against her as having been expended by the guardian.

John Bigtree, ward : The guardian account is credited with \$474. Charges are shown amounting to \$474. An order was drawn by the Wyandotte council for \$315, and paid on final settlement to the widow of John Bigtree—paid November 9, 1858. The order was in the handwriting of Isaiah Walker, who was clerk *pro tempore* at that time.

James Menture, ward : The guardian account is credited with \$227 for this ward, and is charged with items amounting to the same sum. The charges, witness states, are in his handwriting ; he can't say that he paid these amounts to this ward, but on being interrogated he presented the vouchers.

Amos Cotter, ward : This ward is credited on the guardian account with \$113 50, and charged, "Paid J. H. Cotter's order for Amos Cotter's annuity, \$113 50." The money was paid on the order of J. H. Cotter, who was a brother of Amos ; witness was satisfied he paid the order, or he would not have made the entry in the book, which is in his handwriting ; witness presented an order from Cotter on Mr. Northrup for the amount of Amos Cotter's annuity, which order stated that the signer, J. H. Cotter, has given his bond to the council as guardian ; Mr. Northrup (according to statement of witness) never received but one payment for Amos Cotter.

Mary S. Williams, ward : Witness stated that on the guardian account Mary S. Williams has a credit of \$227, and the books charge, as having been paid her, \$237.

Sarah Collier, ward : Credit, \$227. She was paid \$227, amount of annuity, as appears by the book shown by the witness. The account of Mary Collier, ward, is the same as that of Sarah, both being kept together. An order was exhibited, drawn in favor of George Steele by Robert Robitaille, clerk Wyandotte council, for two shares for Catharine Brown, and four shares for Mary and Sarah Collier ; order dated October 18, 1857. On the back is a receipt of Northrup for the amount called for in the order.

William and Henry Coon, wards : An order, drawn in favor of widow Sarah Coon, dated November 18, 1857, signed by Robert Robitaille, requesting Northrup to pay to the widow the two last payments be-

longing the children, William and Henry Coon, making both payments four shares, was presented by witness. On the back is a receipt by Silas Armstrong, dated December 5, 1857, receipting to Northrup, guardian, for \$454, the same being four annuity shares belonging to William and Henry Coon.

Eli, Leslie, and William Zane, wards: Witness exhibited an order on Northrup in favor of E. O. Zane for the money due Leslie and William Zane, amounting to \$454, signed by John Sarrahass. On the back is a receipt signed E. O. Zane for the amount of the within order. The order signed Robitaille, above referred to, was substantiated by testimony of said Robitaille.

The remainder of the evidence of witness is of a general character, as to standing of Mr. Northrup with the Wyandotte Indians, and his personal knowledge that these Indians got their money and used it as soon as it was paid by the Government. Mr. Robert Robitaille corroborated Mr. Watkins's statement in regard to the character of Mr. Northrup, that Charlotte Clarke was a relative of Mr. Northrup's wife, and lived in the family; the Arms children were connected with Northrup's family; thinks Northrup raised one of them.

Mr. Northrup testifies, in affidavit executed before a notary public in New York City, and forwarded to the commission through his attorney, that, according to the best of his knowledge, the moneys placed in his hands by the Wyandotte council for the benefit and account of persons (Wyandottes) have been fully accounted for and paid over as directed by the Wyandotte council, or to parties appointed by the courts, or those duly authorized to receive the same, with the exception of Abraham Arms, who had a balance in the hands of affiant unsettled with the council, (some two or three hundred dollars,) for which affiant raised, boarded, clothed, and schooled said ward, paying for his benefit, in all, fully three times the amount of his account. For Charlotte Clarke, affiant is of opinion that he made settlement with the council; she was raised in family of affiant, well provided, &c., for about fifteen years; he sent her to the best of schools, both Protestant and Catholic; spent many times the amount, and at her marriage made her a present of \$1,000. After her marriage, affiant purchased the land allotted to her by the United States, which was applied to the purchase of a very valuable farm, upon which she and her husband now reside, near the city of Lafayette, Indiana, in good circumstances. Affiant states that it was his habit to settle promptly with all persons of the Wyandotte nation, paying over promptly to the proper parties whenever called upon. His accounts and books while in Missouri and Kansas were kept by Mr. J. Q. Watkins. In all his dealings with the Wyandottes he made no charge for services, and believes he has faithfully accounted to them for all moneys.

The books presented by Mr. Watkins, and his evidence, seem to cover nearly all of the payments made by the United States to Mr. Northrup as guardian, and show that he accounted as such guardian for the disposition of the same. In the case of Amos Colter the book shows but one payment, while the record furnished the commission shows that a payment was made to said Northrup on the 27th October, 1857, of \$113 50, money belonging to Amos Colter, ward, and also on 3d November, 1857, the same amount.

*No. 34.—Case of John Colter, guardian.*

John Colter receipted to the United States for \$365. The name of the ward is not given in the first payment of \$138. In the two subse-

quent payments the name given is that of Amos Colter. It is presumed that the first payment was for him.

The testimony of John Sarrahass and William Johnson was taken in the Indian Territory. It appears that John and Amos Colter were brothers, John being the older of the two; about six years difference in their ages. They lived together from 1855 to 1857 in Wyandotte, where John kept a butcher-shop. Sarrahass remembers that John came into the council-room, where the chiefs were assembled for the purpose of settling, and did settle; but he does not remember the amount left; thinks the settlement was satisfactory to the council and the wards; this was about the second payment, he thinks.

William Johnson stated, under oath, that he lived in Wyandotte in 1855 and 1857; was acquainted with John and Amos Colter; they lived together; saw Amos at his brother's house well clothed; Amos died in the winter of 1869 or 1870; John died some time during the rebellion; John joined the Army for three years; he was murdered some time about the expiration of the three years.

This is all the evidence taken by the commission in this case, but from it the inference is drawn that John Colter cared for his brother in the way of clothing and provisions. Beyond this there is no information of the disposition made by him as guardian.

*No. 36.—Case of Mary Cherloe, guardian.*

Mary Cherloe seems to have been known among the Wyandottes as Amelia Cherloe, but there is no question as to her identity as being the guardian in this case, known to the United States as Mary Cherloe. She has been successively married to parties named Burning and Cherloe. Her maiden name was Peacock. She is commonly known now as Amelia Cherloe. She received from the United States \$507, as the guardian of Isaac and Elizabeth Peacock. Isaiah Walker was, at first, the guardian for Isaac Peacock, but afterward Amelia Cherloe alias Mary Cherloe was appointed by the court of Wyandotte County as guardian for this boy.

Testimony is given as to transactions between Isaiah Walker, Matthew Mudeater and Mary Cherloe; all the testimony goes to show that Matthew Mudeater was indebted, in connection with a bridge company, and desired to raise money, and Isaiah Walker loaned him \$300; that the money which Walker loaned belonged to Isaac Peacock, said Walker holding it as his guardian; that after Mary Cherloe alias Amelia Cherloe was appointed guardian by the court of Wyandotte County, settlement was made, and Mudeater executed his note to her, as guardian, for the money belonging to Isaac, which he had borrowed from Isaiah Walker; there were three of these notes for \$100 each; two of them have been paid; one is in the possession of Mary Cherloe, guardian; Mudeater claims that some small payments have been made on it in provisions, &c., but the amount could not be definitely fixed. It appears from the testimony that Mary Cherloe, the guardian, has taken care of and raised this boy Isaac Peacock from the time he was three years old, clothing and providing for him.

In addition to the money received from the United States, as above stated, half of which was for Isaac, Mrs. Cherloe received the proceeds of the sale of the allotment of land of said Isaac under the treaty of 1855. Isaac is the nephew of Mary Cherloe; Mrs. Cherloe testifies that she paid the money received by her as guardian to Elizabeth, and furnished her with clothing, and that she used the money all up

in this way, or nearly all; and she had the care of Elizabeth (her sister) years before this time.

Elizabeth Peacock, the ward, testifies that the first payment was given to her by her guardian, she at first not remembering that Mrs. Cherloe was her guardian. The inference drawn by the commission was that Mary Cherloe had fully accounted to her for the money received for her (Elizabeth.)

The evidence in this case would seem to be that the guardian had satisfactorily accounted for all money received by her, either by paying it out to the parties entitled, or in caring for them. There is still due from Matthew Mudeater the sum of \$100, with interest thereon from February 6, 1864, at 10 per cent., unless Mr. Mudeater is able to prove some of the credits he claims.

Isaac Peacock testified that he received a hog from Mrs. Mudeater worth \$11; that he got half a bushel of corn-meal at two different times; that is all he remembers receiving.

*No. 38.—Case of John Hat, or Tawroomu, guardian.*

John Hat, or Tawroomu, receipted to the United States for \$1,014; \$138 each for four persons, at the first payment, whose names are not given, making \$552, and for four persons, whose names are given, \$115 50 each, at the April payment, 1856.

John Sarrahass testifies that he knew John Hat; that in 1855 or 1856 he lived in Wyandotte, but in the latter part of 1856 he moved down to the Indian Territory; John Hat died some time in December, 1869; he left two daughters as heirs, one named Sarah and one Eliza; they are on the Wyandotte reserve; he had a daughter by a former wife named Margaret Punch; she lives on the Wyandotte reserve; his wife died a year or two before him; knew that Hat was guardian for Jacob Stookey in 1855, at the first payment; thinks the guardianship was changed, John D. Brown becoming guardian for Stookey; Stookey died a number of years ago; does not know whether Hat settled up his guardianship for Stookey when he turned it over or not; is inclined to think not; also knew that Hat was guardian for Moses Peacock, John Spybuck, and Margaret Jonathan; is inclined to think he never settled up his guardianship for these persons; don't know whether he paid them or not; Margaret Punch, if it is the junior, is alive, the other wards are dead; John Hat died without property of any account.

There is, therefore, no evidence of the disposition made of the money in this case that is definite, nor does the commission know of any means by which any further facts can be ascertained.

*No. 40.—Case of John B. Curlyhead, guardian.*

John B. Curlyhead receipted to the United States, as appears by the pay-rolls returned by the agents, for \$707 50. He died in 1859. His ward, Jacob Curlyhead, for whom he appears to have receipted, he being named as the ward for every payment except the first, when the name is not given—and that is presumed to have been for Jacob—was a nephew of John B. Curlyhead, the guardian. He took care of him, furnished him with provisions, &c. This appears from the testimony of John Sarrahass, who thinks this lasted for some three years, 1855-'56 and 1857; he recollects John B. Curlyhead coming before the council and stating what he had done for Jacob; stated what money, &c., he had given; Sarrahass don't recollect amount; when John B. Curlyhead

died he left a daughter, Mary, who is now living at William Johnson's in the Indian Territory.

William Johnson also testified that he knew John B. Curleyhead, and knew of Jacob living with him; he presumed that the guardian furnished Jacob with clothing and board, as he lived at guardian's house and went well dressed, and, being his relative, supposed that he took care of him; don't recollect seeing John B. give Jacob any money, but, at the last payment, recollects John giving Jacob a good horse; Jacob lived with him some three or four years.

John Sarrahass testified that the custom was, at that time, among the Wyandottes, in reference to boy-wards, where they were stout boys, to consider the attending of chores by them as sufficient for their board; but clothing was a separate matter; some, in making their settlements, as near as he (witness) could recollect, brought in an amount of \$30 and upward for a year.

William Johnson states, perhaps the horse was worth \$200; when Jacob lived with John B. he was sufficiently large to do considerable work; he was a good sized boy, but he don't think he ever did much work.

Sarrahass testifies that Jacob never paid for his board by work, and he thinks, according to the prices at that time, board ought to be worth \$2 50 a week in money.

Mary Ketchum testifies that John B. Curlyhead, as far as she recollects, did settle with Jacob, and paid him up; that the last he paid was a gray horse worth \$150; thinks this settlement was made some thirteen years ago.

#### No. 42.—*Case of George Spybuck, guardian.*

George Spybuck receipted to the United States for the sum of \$934 50. John Sarrahass testified that he was acquainted with Spybuck in 1855-'56 and 1857, and that he is now dead; he died in Sandusky, Ohio, perhaps, in November, 1870; moved to Ohio in the fall of 1857; knew of his acting as guardian for Mary Williams and John Spybuck; John was a brother of George; relative to John Spybuck, witness thinks he did not board with guardian; George raised Mary Williams, clothing and boarding her; John Spybuck died some time ago; the heirs of George are his wife and child, who are now living in Ohio; the child, a young woman some seventeen years old; when Spybuck went to Ohio he bought a piece of land, 80 acres; understands that the title to the land is in his wife's name; at the time of his death he was living northeast from Upper Sandusky, not far from the Sandusky River; he had a good farm, orchard, &c.; John Spybuck died in 1855, and the council then acted on the matter to ascertain whether George was the only heir for John; hence the money was paid to George as the legal heir of John. In relation to Mary Williams, as far as he knew about it while Spybuck was guardian for her, he used to come into the council and make settlement with her; she was his niece, and it appeared to be satisfactory to the council; about the time he moved away, however, he had \$300 of Mary's money; he stated so to witness; don't know whether he accounted for that money or not.

The liability of this guardian for the money received from the Government in behalf of John Spybuck would seem to be accounted for on the ground that he was a legal heir. He is doubtless entitled to some credit for clothing, &c., for Mary Williams, whom he raised. It appears

from the testimony that he had, at the time he moved to Ohio, \$300, which the commission did not ascertain whether he ever accounted for.

No. 44.—*Case of George Steele, guardian.*

George Steele receipted to the United States for \$961. He died in 1858. He was guardian for Sarah and Mary Collier, who were half-sisters of his wife. They lived with him until they were married—both being married about the same time.

Sarrahass states that Steele was a relative of his, and he had information from him (Steele) and from Mary and Sarah Collier that he (Steele) went before the council and stated that inasmuch as the girls had got married they were free and at liberty to act for themselves. He gave the money that was in his hands to them.

The commission understands from the evidence that Steele fully accounted for his guardianship to these girls.

William Johnson testifies that Mary and Sarah Collier lived with Steele, and that he boarded and took care of them.

Mary Steele testifies that George was her husband, and that he died, as near as she can remember, in 1857; that he paid the money received for Mary and Sarah Collier for their benefit; they went to school some two years; when they came back from school they came to his (Steele's) house; finally they got married and the money was paid to them; he paid to one \$500, in gold, and to the other \$450; witness states that these things were put on the record in the Wyandotte council; don't remember the time the girls lived at her husband's house, but thinks it was nearly ten years; does not know that the girls had any other property, except what they received from the United States; she knows of no other property except land and money from the Government; her husband furnished them with clothes and money.

The evidence of accountability in this case would seem to be as full and satisfactory as could reasonably be expected when the lapse of years, since the guardianship, and the character of the parties, their want of familiarity with business habits, is taken into consideration.

No. 46.—*Case of Sarah Coon, guardian.*

Sarah Coon receipted to the United States, as guardian for William and Henry Coon, for \$961. These boys were her grandchildren.

Sarrahass testifies that she both clothed and fed them, she raised them, and they lived with her until she died—some time in 1859; he remembered Sarah attending the council and settling with these wards, which settlement appeared to be satisfactory; don't think she made a final settlement before she died.

William Johnson was acquainted with Sarah Coon, and knew of her taking care of these boys, and of their living with her; the wards are both dead.

No. 48.—*Case of Elizabeth Rankin, guardian.*

Elizabeth Rankin receipted to the United States for \$253 50. The name of the ward at the first payment is not given, but at the second payment the name given is that of Jacob B. Hill. The total amount was, no doubt, for Hill as ward. This guardian resides in Canada. A citation was mailed to her at Brantford, Brant County, Province of Ontario, on the 25th of May ultimo, to which a reply was received dated

June 7, 1871. She states that Jacob Hill was living with her always, but she never received any money belonging to him.

John Sarrahass testifies that Elizabeth was guardian for Jacob B. Hill. She raised, clothed, and fed him from the time he was a little child. This fact would seem to be a sufficient accounting for the amount received, as she must necessarily have incurred that amount of expense in raising him. She removed to Canada, Sarrahass thinks, in 1858, but she was here from 1855 until that time.

No. 50.—*Case of John Solomon, guardian.*

John Solomon receipted to the United States for \$1,161 50. Sarrahass testifies that Solomon lives in Wyandotte County, Ohio, about six miles from Upper Sandusky, on the ground purchased by George Spybuck; he moved to Ohio about four years ago; he lived in Wyandotte, Kansas, during 1855, 1856, and 1857; knows of his acting as guardian for Hiram Young and Mary Bigtree; Mary was his own daughter, and married a man named Bigtree; knows that Solomon came several times before the council to settle, and did settle, and there was a remainder in his hands; does not remember of a final settlement; there was always a balance in his hands; thinks all the property he owns at present is his household furniture. Mary Bigtree is dead; Hiram is living on the Wyandotte reserve, in the Indian Territory.

The commission has no further evidence in regard to this guardianship.

No. 52.—*Case of Ethan Bigarms, guardian.*

Ethan Bigarms receipted for the first payment, \$138, no name being given showing who the ward was; and although the commission interrogated persons formerly members of the Wyandotte council, they could find no one who recollected anything about his having received any money. He died in 1858 or 1859, at Wyandotte.

No. 54.—*Case of James Armstrong, guardian.*

James Armstrong receipted to the Government for \$138, as guardian. The name of the ward is not given.

Armstrong appeared, was sworn, and testified that he had not received the money, though he admitted that he received a smaller amount, but stated it did not come from the Government; he received the amount for taking care of the boy; he had cared for the boy some six years; his name was Starr Young.

Sarrahass and Johnson testified that the boy lived with Armstrong. The evidence in this case does not satisfactorily identify the ward. Armstrong does not admit receiving the money from the United States, nor did the other witnesses remember that he was appointed guardian for this boy by the council. It is possible that this one payment was for some absent person, and was paid over to them, (as appears to have been done in some instances,) and the transaction has escaped the memory of the guardian and other parties examined by the commission.

No. 56.—*Case of Ethan A. Long, guardian.*

Ethan A. Long received from the United States \$253 50, as guardian for his brother, William Long, who is named in one payment. For the

other payment no name is given, but it was doubtless for the same ward, William.

The testimony of Sarrahass is, that Long died in 1858; knew of his acting as guardian for William Long; Ethan was eight or nine years older than William.

There is no evidence in regard to the guardianship of Long, further than stated above. William was one of his heirs when he died.

No. 58.—*Case of Isaac Williams, guardian.*

Isaac Williams received from the United States \$253 50. No name is given as ward at the first payment, in December, 1855, but at the second payment, in April, 1856, the name of Thomas H. Williams is given. Probably the first payment was for the same person.

Sarrahass testifies that he was acquainted with this guardian in 1855 and 1856; he lived in Wyandotte, Kansas; was not acquainted with Thomas Hill; remembers that Isaac Williams raised a boy; the boy went by the name of Nicholas Williams; the treaty of 1855 embraced all the Wyandottes, and the commissioners appointed to carry out the stipulations of said treaty in looking over the list ran across this boy and ruled him out, giving as a reason that he was not of Wyandotte blood, because his mother, who was a Wyandotte in part, went among the Delawares and married. He received one payment; (the commission understands by this that the two payments above named, of \$253 50, constituted one payment in the understanding of the witness and other Wyandottes, although they were divided in two parts in paying out.)

Sarrahass thinks this was the boy referred to; does not know whether Isaac Williams accounted for the money or not. Williams took care of the boy; he was quite small when Williams took him; he raised him until he (Williams) died; after the boy was cut off from receiving any further payments, Williams took care of him as before.

William Johnson remembers that Thomas H. Williams, the ward for whom the two payments were made, is the boy raised by Isaac Williams, and that Williams fed and took care of him; he thinks his living with him until he (Williams) died would be a satisfactory accounting for the amount received.

No. 60.—*Case of Isaiah Walker, guardian.*

Isaiah Walker received from the United States, under the name of I. P. Walker, \$276 for wards whose names are not given, and by his name—Isaiah Walker—\$1,820, for wards, the names of whom are given, making a total of \$2,096 received by him as guardian. He appeared in person, and put in evidence papers and books. One paper is a certificate of the Wyandotte council signed by Edwin T. Vedder, clerk, showing a balance in the hands of guardian for Eliza Young, January 19, 1861, of \$38 39, and afterward charges on the margin in pencil, sworn to by the witness, of bacon, flour, and cash, and having paid Clarissa Bigsineu for a woman's saddle, making a total of \$38 10, which would balance his account as guardian for said ward, less 29 cents. He also presented a receipt from the council of the same date for Isaac Peacock, showing a balance in his hands of \$307 76. The testimony taken by the commission in the case of Amelia Cherloe—known to the Department as Mary Cherloe—shows \$300, money received by Isaiah Walker as guardian, for Isaac Peacock, was loaned by him to Mathew Mud-

eater, and that afterward, when Mary Cherloe was appointed guardian by the probate court of Wyandotte of said Isaac Peacock, Mathew Mudeater executed to her his promissory notes—three of them for the sum of \$300—and that two of them have been paid by the said Mudeater, and that one still remains unpaid, except some credits claimed by Mudeater in the way of provisions and clothing furnished to Isaac Peacock.

It is for the proper authorities to say whether under the law this guardian would be permitted to be discharged of his liability by this showing, he having placed the money in the hands of another who became accountable to the guardian appointed by the court for the same.

Mr. Walker, the guardian, also presented account-books kept in the usual manner—single entry—and showed by his ledger the credits and charges of various parties in amounts exceeding those received by him from the Government. For full particulars in regard to this showing reference is made to the testimony on file in the case. It seems that in some cases moneys were placed in the hands of the guardians by the council not taken up on the records of the United States agent as being paid to the guardian, as larger credits on behalf of some of the wards are given on his books than the charges made by the United States. The aggregate of Mr. Walker's account, as shown by his books in his favor for supplies and payments made in behalf of wards, is larger than his liability is charged by the United States as furnished to this commission. His books were proven by witnesses who had settled with him in the usual manner for establishing the authenticity of the same. Mr. Walker swore positively that he had fully accounted for all moneys received by him for the different wards, having been interrogated to that effect in each case.

In one case—that of the ward George Whitewing—it appears that the charge, \$37 39, was made March 29, 1858, as having been paid to Richard Clarke. Richard Clarke appeared and testified that George Whitewing owed him some borrowed money, and he thinks he must have had an order on the store from Sam Rankin when Whitewing was living. To the best of his recollection he received the amount named in that charge.

Mr. B. F. Johnson testified to having made settlement with Mr. Walker, and Walker and Barker, with their books, being the same introduced as evidence before the commission to show settlement with wards, and that he had found them to be correct.

The showing in this case, with the exception of the balance in the case of the ward Eliza Young, and the transaction relative to the money of Isaac Peacock, would seem to account for the money received, except as above stated. The credits of moneys received by said guardian do not always appear to correspond; but an aggregate of greater amounts than those charged to said guardian has been accounted for by the charges on his books and the receipts of the council, if taken as evidence.

#### No. 62.—*Case of John Hicks, guardian.*

John Hicks receipted to the United States, as guardian for wards, for \$2,406. He died about four years ago in Wyandotte County, Kansas.

Irvin P. Long testified that he was a member of the Wyandotte council in 1857 and 1858; thinks 1857 was the first time; states that Susan Hicks was the niece of John; she did not live with him; he paid her the money generally, sometimes bought things for her; has no per-

sonal knowledge of John having made a final settlement with the council; George Coke, one of the wards of Hicks, is dead; Karrie Rodgers is also dead; Adam Young is alive and resides on the Wyandotte reserve; Anthony Hat is dead.

Mudeater remembers that John Hicks used to come before the council and make settlements which appeared to be satisfactory; thinks John used to buy things for Susan from the fact that she used to drink whisky, and it was not best for her to have money about her; he sometimes gave her money; thinks John used to give orders to John Hat and Karrie Rodgers to get things at the store, because when he gave them money they spent it foolishly; John Hicks left but little property when he died.

John Sarrahass remembers that John Hicks came into the council and made settlement with his wards, and all he had done was put down on the book.

Susan Hicks testified that John was her uncle, and thinks he did his duty, and gave her all the money he received for her. He received for her, as appears by the record furnished the commission, \$454.

In this case, as will be noted, there is no direct evidence as to the disposition made of the money or the accountability of the guardian, except in the case of Susan Hicks, and in this case it is by the admission of the ward, who was a niece.

*No. 64.—Case of John D. Brown, guardian.*

John D. Brown received from the Government, according to the record furnished the commission, \$2,270. He appeared before the commission, and testified as to his guardianship, stating that he accounted in the fall of 1857 fully to the Wyandotte council for all the money received by him, and showed to the satisfaction of the council that he had properly paid out the funds; that they gave him a certificate or receipt showing that his account was settled. The receipt was destroyed during the war; he left it in Mudeater's house in a desk locked up, and it was destroyed there; knew of no way by which he could show that he had faithfully paid out all the money received by him except by the testimony of living members of the former Wyandotte council.

He spoke particularly in regard to the case of Amos Peacock; that he had bought some clothing and provisions for him. In the other cases he said he had paid the parties their money. In the case of Stookey, one of the wards, who died and left four grandchildren, he distributed the money among the heirs.

John Sarrahass swore that he did not recollect that Brown ever came into the council for settlement; he recollected that the council sent for him to come and make settlement from time to time, but he never made his appearance while Sarrahass was there.

Mudeater stated that he was not a member of the council at that time, but heard from others that they sent for John D. Brown to come and make settlement, and also heard that he never came. William Johnson was a member of the council and testified that during the time he was a member—one term—he does not remember of seeing John D. Brown ever come before the council and make settlement with his wards.

Mr. Brown is a minister of the gospel at the present time, and his habits are good, but he has at times been very dissipated; the commission are informed, and the impression made by the testimony was, that Brown probably did not make a full and final settlement of his guar-

dianship, but in the absence of the books of the council this fact cannot be ascertained. Brown claims, and states under oath, that he fully accounted before the council for all the moneys received by him as guardian. The book kept by the council showing settlement with guardians, although sought after by the commission, could not be found nor its whereabouts ascertained.

No. 66.—*Case of B. F. Johnson, guardian.*

B. F. Johnson receipted to the United States for \$2,724. He appeared before the commission and testified, introducing books and accounts. He produced vouchers which on the face of them show payment by him as guardian in the case of the Cherloe family to the amount of \$278 12, and receipts and stated accounts which on the face do not show by whom paid, to the amount of \$1,024 38 for the same family; and for Josiah Scott Coon \$756, as having been paid by himself; and an open account stated against him for \$11 30, making a total of open accounts and receipts showing that he had paid as guardian the sum of \$1,321 36. Of this amount only \$285 68 was evidence *prima facie*, the remainder requiring explanation. The books presented by Mr. Johnson were kept in a confused manner, and show nothing definite. He testified that he made a final settlement with the Wyandotte council in April, 1860, and he exhibited a memorandum of that settlement showing funds in his hands due the Cherloes at that time, amounting to \$167 60, and for Josiah Scott Coon \$392 92. He further stated that he paid out in various sums this sum to the parties, and that he kept Scott Coon from that time, after the settlement, until some time in 1865, paying his expenses for him, and that he received no moneys further than those charged to him from the United States. He stated there was no balance in his hands, at the present time, due these wards; that it had all been expended in the way of boarding, clothing, &c. He kept a store during a portion of this time, and the charges were for articles furnished his wards. Mr. Johnson afterward addressed a note to Colonel Cobb (which was furnished to the commission) desiring to correct his testimony, stating that he received \$100 from A. G. Boone in behalf of his wards.

John Sarrahaass testified that he was acquainted with Johnson, and remembers his coming before the council and making settlements with his wards, but thought at all settlements there was a surplus in his hands belonging to his wards.

David Cherloe testified that Johnson was his guardian; can't say whether he was paid all the money, from the fact that he was too small to know about such things; thinks he received nothing personally from Johnson, but don't know what his mother received; remembers of her going to Johnson and stating when she came back that she got a scolding; sometimes she would get something, and sometimes she would not; sometimes she brought clothing that she said she got from Johnson; thinks she occasionally got some provisions.

The only positive testimony in this case as to the disbursement of moneys for the benefit of the wards is to the amount of \$285 68; but including the book accounts and memorandums furnished by Mr. Johnson, there is a showing to the amount of \$1,321 36. This would leave a balance of \$1,402 64 unaccounted for except by the general statement of the guardian himself, that he has disbursed the amount for the benefit of his wards, or had rendered an equivalent.

Mr. Johnson resides in Wyandotte County, and, as the commission is

informed, is possessed of very little property. His post-office address is Muncie. He is at present engaged in farming.

No. 68.—*Case of Robert Robitaille, guardian.*

Robert Robitaille receipted to the United States as guardian for \$2,724. Of this amount \$2,270 was for the children of James Bearskin, and the remainder (\$454) was for Elizabeth Peacock. Mr. Robitaille appeared with his attorney, Colonel S. A. Cobb, and in the case of his guardianship of Elizabeth Peacock he was sworn, and acknowledged an indebtedness of \$594 25. He presented an account, the items therein having been entered at the date of the expenditures, which was for money, for merchandise, and for pony furnished to Elizabeth, and which account amounted to \$571 33, and Mr. Robitaille stated that it was worth six per cent. to disburse this amount for the ward. Six per cent. added to this amount would make \$605 61. The itemized account of Robitaille was read over to Elizabeth, and she remembered a portion of the items and thought the whole to be correct.

Rebecca Hicks made a statement about a horse which was given to Elizabeth Peacock and afterward died, but it does not appear that this horse was charged in the account of Mr. Robitaille.

It appears from the testimony that Mr. Robitaille took out letters of administration from the probate court of Wyandotte County on account of the estate of James Bearskin, and gave his bond as administrator. He states that he did this to take it away from a white man, Doctor Ainsworth, that he did not consider responsible. The courts of the State were exercising control over these matters at that time, and Ainsworth took out letters of administration, and also some other parties. He (Robitaille) was acting as guardian at that time for George and Joseph Bearskin, and took out the letters of administration in order to take control of the business.

He presents in evidence five exhibits, and an argument by his counsel, Messrs. Cobb and Alden. These exhibits are properly executed statements of settlement with the probate court from time to time as administrator of the estate of James Bearskin, deceased, having in charge the heirs of said Bearskin. He shows total receipts in the Bearskin estate from various sources \$4,067 93. The court records show credits in his behalf of \$3,344 15, leaving a balance in his hands, on the 1st of June, 1870, of \$723 78. The accompanying vouchers on file in the court show a settlement on the 23d December, 1870, entitling him to a credit of \$308 50, leaving a balance in his hands at that time of \$418 28. It is submitted by the attorneys for Mr. Robitaille that he should be allowed the legal rate of compensation for disbursement, which is 6 per cent. of the entire estate, which, on the estate of the wards, George and Joseph Bearskin, is \$118 67, which would leave a balance on hand in the possession of Mr. Robitaille of \$296 61. It is also further submitted by the attorneys that the balance shown to be due the wards, Joseph and George Bearskin, may be reasonably assumed to be of that part of the estate not charged against Mr. Robitaille by the United States. The courts of the State have assumed to exercise a control over the affairs of James Bearskin and of his minor heirs.

Upon a portion of the funds of the estate the assumption of control by the courts of Kansas is doubtless legal, and the attorneys attest that it cannot be doubted that it is beneficial to the wards. They further set up that the State courts having assumed control of the affairs, and satisfactory evidence having been adduced by Mr. Robitaille that he

has disbursed more than the amount charged against him on the books of the United States in the faithful guardianship of his wards, he has fully accounted for all funds in his hands under the act creating this commission. And it is further submitted by the attorneys for Mr. Robitaille that the courts of the State having assumed jurisdiction ought not to be disturbed; in short, that the rule of law that courts of concurrent jurisdiction respect the jurisdiction of all others in matters in which they first obtained control should prevail; and reference is made to Abbott's United States court practice, volume 1, page 223.

Mr. Robitaille is evidently a man acquainted with the forms of business; was at one time treasurer of Wyandotte County; has given evidence to the commission that his accounts have been kept in good shape; and in the case of Elizabeth Peacock has rendered an account, (which has been substantially admitted by her,) which, with the 6 per cent. added, that probably not being an unreasonable charge, would make full accounting for the money received by him as guardian for said Elizabeth Peacock.

In the case of the Bearskin family, money receipted for as belonging to James Bearskin, and disbursed for the benefit of his children, the showing of Mr. Robitaille has been full, his papers being statements made from the records of the court, with accompanying vouchers, which show a disbursement for the benefit of the wards of a larger sum of money than the guardian received from the United States, and while there is a small balance in his hands, a portion of the money received by him, in fact a majority of it, is derived from sources other than the United States—from the sale of the estate and personal property of the deceased, James Bearskin, for the administration of which Mr. Robitaille is responsible under his bond to the court of Wyandotte County. Said James Bearskin having been a citizen of the United States, and his property subject to the jurisdiction of said court, it is perhaps not improper to say that Mr. Robitaille has fully accounted for his guardianship, and for all moneys received by him as such guardian, from the United States. The books of Mr. Robitaille, which were used to corroborate his statements in the cases, were sustained by the testimony of Colonel S. A. Cobb and Mr. A. B. Bartlett, who testified to his accuracy as an accountant, and to their acquaintance with his books.

*No. 70.—Case of Michael Frost, guardian.*

Michael Frost receipted to the United States for \$908, as guardian for Baptiste and William B. Bigtown. He died some time in 1863. Sarrahass remembers his coming before the Wyandotte council to make settlement with his wards, and also remembers that there was always a balance left in his hands at every settlement. Baptiste Bigtown was an uncle of Frost. Frost left three daughters as heirs.

Beyond this general statement the commission were unable to obtain any evidence in regard to the case.

*No. 72.—Case of Mary Ann Garrett, guardian.*

Mary Ann Garrett, (now Mary Ann Zane,) residing in the Indian Territory, on the Wyandotte reserve, receipted to the United States in January and April, 1857, for the sum of \$227, as guardian for William Long. She appeared before the commission and stated that William Long was a brother of hers, and when her mother died she took care of him; that she settled up with the chiefs, but had no papers to show

such settlement; that she had expended the money she had received for him.

The ward, William Long, appeared before the commission and testified that his sister, (formerly Mary Ann Garrett, now Zane,) had accounted to him for all money received for him, either paying it to him or disbursing it for his benefit.

*No. 74.—Case of Irvin P. Long, guardian.*

Irvin P. Long receipted to the United States for \$1,362, as guardian for his brother, William Long, for Sarah Hicks, John Squendechter, and money received for the family of John Williams and Thomas Hill.

William Long stated, under oath, that guardian had accounted to him fully for all moneys received by him as guardian.

Irvin P. Long appeared before the commission and stated that at the settlement with the council for his guardianship of Sarah Hicks the last time, he had \$2 50 or \$2 25 in his hands, which he paid a day or two afterward in Wyandotte, and took her receipt for it; that he endeavored to find the receipt but it had been lost or mislaid and could not be found; Sarah Hicks is dead; don't remember exactly when she died, but thinks it was in 1858, 1859, or 1860; that Glick, an attorney in Wyandotte, wrote the receipt for him in Wyandotte; Sarah said to him, "Have you any money?" he said "\$2 50," or whatever the sum was; she said, "I want a pair of shoes," and he paid for them and took a receipt; he received for the family of John Hicks \$454, and paid it to said family immediately after receiving it; that he paid the money received for John Squendechter into the Gibson estate; that Gibson was a brother of Squendechter; that the money he received for Thomas Hill he paid to him; was administrator of the estate; thinks he was dead at that time.

Mr. Long presented receipts for money expended by him in behalf of the estate of John Williams. These receipts are lettered and filed with the testimony to which reference is respectfully made. They amount in the aggregate to \$692 96. He stated in the case of Thomas Hill that he paid each of the boys of Thomas Hill, (Thomas being deceased,) \$113 50, and took their receipts for the same, witnessed by two parties, which receipts he could not find.

He also accounted for the money due Hill, as administrator under the court of Wyandotte County, Kansas. He paid the money to the daughters under the order of the council. Hill had three daughters.

*No. 76.—Case of Lewis Lumpy, guardian.*

Lewis Lumpy receipted to the United States for \$454 as guardian for Terese G. Washington. According to the testimony of Sarahass, Lumpy died in 1860 or 1861, in Wyandotte County, Kansas.

Mudeater testifies that Terese G. Washington got quite old and feeble and unable to take care of herself, and she made an agreement with Lumpy (her nephew) that if he took care of her during her lifetime she would give him her property at her death. He was never called upon for settlement. She died at his house.

It would therefore seem that the liability of the guardian in this case was discharged by his having made such an agreement as the above-mentioned with his ward, and also on account of his being her heir.

No. 78.—*Case of Abelard Guthrie, guardian.*

The record of pay-rolls furnished the commission by the Office of Indian Affairs, shows that Abelard Guthrie receipted to the United States on the 26th of January, 1857, for two payments in behalf of John Bigtree, amounting in the aggregate to \$227, and for two payments for the same person on the 21st April, 1857, amounting also to \$227, making in all \$454 received by him. Mr. Guthrie was duly notified by citation dated May 8, addressed to him at Quindaro, Kansas. He was requested to appear before the commission at Wyandotte, on the 12th May, 1871. He appeared and stated that he had no recollection of having received this money, and under date of May 25 he addressed a letter to the commission in which he acknowledges the receipt of the citation, and states (as he had already done verbally) that he has no recollection, nor does he believe he has ever acted as guardian for any orphan or incompetent Wyandotte Indians. He further states that he is informed that George I. Clarke, a chief of the Wyandotte, brought to his house a bag of money and requested that he (Guthrie) should pay all the debts of Bigtree, deceased, and that he complied with the request. He remembers of turning over some papers and about \$40 in money to Mr. Robert Robitaille in some Wyandotte case, and this is probably the one. He refers to Mr. Robitaille for explanation. He states that the money he received was all disbursed as he was directed to use it, except what he left with Mr. Robitaille.

Mr. Robitaille was interrogated upon the subject, and had no recollection of the matter.

John Sarrahass, formerly a chief and member of the Wyandotte council, testifies that he is acquainted with Guthrie, but does not recollect of his acting as guardian for Bigtree, or of his receiving any money for him.

Mathew Mudeater testifies that he knows nothing about it. He thinks Bigtree died somewhere in 1857, leaving Mrs. John Spicer (formerly Eliza Bigtree) as his heir. Spicer is a Seneca chief.

Sarrahass thinks it possible that Guthrie received the money in the absence of the individual to whom it belonged, this being in accordance with a rule of the council. It was very rare that Guthrie was present at a payment.

No. 80.—*Case of John L. Coon, guardian.*

John L. Coon received from the United States, as guardian for George Whitewing, \$227 in January and April, 1857, in payments of \$113 50 each.

William Coon testifies that he is the son of John L. Coon. His father died about eleven years ago at Sandusky, Ohio; his mother died three years ago this summer. Knows nothing about his father's guardianship of George Whitewing or about his receiving money for him.

John Sarrahass testifies that John L. Coon died in 1860, and left, as his heirs, his wife and four children. His wife is now dead. He recollects of Coon coming at one time before the council for settlement. At the same time the young man, Whitewing, went away. John L. Coon was Whitewing's step-father. As near as he can recollect, Coon settled up nearly all his indebtedness as guardian, but still had some money in his possession belonging to Whitewing. Previous to George Whitewing's departure he lived with his grandfather.

Mr. Mudeater corroborated the statement of Sarrahass.

No. 82.—*Case of Ebenezer O. Zane, guardian.*

Ebenezer O. Zane receipted to the United States for one payment of \$113 50 for Eli Leslie Zane, April 21, 1857, and one payment at the same time for William Zane for same amount, making a total of \$227. He appeared before the commission, and presented vouchers which accompany the testimony. These are *prima facie* evidence of payment by guardian in behalf of Eli Leslie Zane, and are numbered from 1 to 9, inclusive. They amount to \$157 22. The account and vouchers, which are substantiated by the sworn testimony of the guardian, amount to \$212 22, making a total of expenditures to and in behalf of Eli Leslie Zane, by guardian, of \$369 44. Mr. Zane was accompanied by his attorney, Mr. Charles S. Glick, who conducted the examination, each voucher and receipt being taken up in detail, both those which were *prima facie* evidence and those which required explanation upon their face. He was cross-examined by the commission.

In relation to William Zane, receipts for payments made by the guardian in behalf of ward were presented and sworn to in detail. They accompany the testimony, numbered from 1 to 3, inclusive, and amount to \$86 50. Vouchers and stated accounts were also sworn to by said guardian, amounting to \$131 80, making a total expenditure in behalf of this ward of \$218 30. The guardian testifies to boarding William Zane in 1856, and from that year until 1862, without receiving compensation other than that received from the United States. He states that he gave bond to the Wyandotte council as guardian for William and Leslie Zane; that he never accounted to the council; he made application to Mudeater and was told that the council books were lost. The items for which vouchers are presented in the account seem to be for clothes and merchandise, and there is also an item of money sent to pay expenses of the wards while they were in Ohio, where they attended school for a short time. There is an item for supplies furnished as an outfit to go to Pike's Peak, and in the case of William Zane guardian gave him a gold watch and chain, which is not charged in the items.

Sarrhass testifies that he knows Ebenezer O. Zane; recollects his drawing money belonging to other parties, but never knew he was guardian for any one. Mudeater states that Zane was never legally appointed guardian by the council, but drew the money in the absence of his mother, who was in Ohio. It appears from the testimony of J. Q. Watkins, in the case of H. M. Northrop, that \$454 were paid to Ebenezer O. Zane on the 14th December, 1858, on an order of the Wyandotte council, being money due to Leslie and William Zane, wards.

No. 84.—*Case of William Johnson, guardian.*

William Johnson receipted to the United States for \$113 50, for Granville Peacock, September 26, 1859. He appeared and testified that Granville Peacock was, he thinks, dead, in the fall of 1859, perhaps in 1858; did not remember receiving any money, except the last payment; received the money after Peacock's death; did nothing with the money; supposed it would go to the heirs; he has it now; all the heir he knows of is a brother of Peacock, who had a son; supposed that both are living; does not know the boy's name; he is a boy some twelve or thirteen years old; lives in the Seneca country; his mother is married to a Seneca named Jim Bigtail.

On being informed that the law under which the commission were acting directed the Secretary of the Interior to collect all moneys that

had not been paid out to wards, and being asked whether he was ready to pay over the amount in his hands to the commission, he stated he was not prepared to do so. He was again informed that the law directed the money to be collected by the commission, and asked when he would be prepared to pay over the money. He replied that he could not tell when he should be prepared; that he had been under hard circumstances—had been sick all winter and spring. The commission is informed that he is dying with the consumption. He now lives on the Wyandotte reserve, in the Indian Territory, holding his land in common as do the rest of the tribe. He has very little personal property.

The commission have used all means, so far as they thought it would meet with the approbation of the Department, in obtaining testimony to show the disposition made by guardians of the moneys received by them. Some of the parties interested reside in Ohio, some in Canada, and some were in remote localities in the Indian country. But the foregoing is as full and complete a showing as can be obtained, without great expense and consumption of time, the labors of the commission having already been extended to great length, and having involved considerable travel.

All of which is respectfully submitted.

Very respectfully, your obedient servants,

W. R. IRWIN,  
O. S. WITHERILL,  
*Commissioners.*

C. G. BARBER, *Secretary.*

---

C 1.

REPORT OF MESSRS. W. R. IRWIN AND O. S. WITHERILL, SHAWNEE GUARDIANS.

WYANDOTTE, KANSAS, *July 14, 1871.*

SIR: The commission appointed under the provisions of the sixth section of the act of Congress approved July 5, 1862, (Statutes at Large, vol. 12, pp. 529 and 530,) and the act of March 3, 1871, to effect settlements with persons appointed by Wyandotte and Shawnee councils to receive money due to incompetent and orphan Indians, composed of Walter R. Irwin detailed from the Office of Indian Affairs, and Orlando S. Witherill of South Bend, Indiana, appointed for the purpose, and Charles G. Barber, detailed from the Department of the Interior to act as secretary, having concluded their action under their instructions, contained in letter from the Office of Indian Affairs to said Irwin dated April 19, 1871, so far as relates to persons appointed by the council of the Shawnee tribe of Indians to receive money due to incompetent and orphan Indians, respectfully submit, in regard to the same, the following report:

The commission found that nearly all the Shawnees had removed from Kansas to the Cherokee country, in the Indian Territory. After conferring with the agent at Olathe, and obtaining full information in regard to the location of the various parties with whom settlements were to be made, they notified those remaining in Kansas or adjacent in Missouri, and after, as far as practicable, effecting settlements with them, proceeded to the Cherokee country. It was found that the guardianships of the Shawnees had been very systematically conducted,

an account of all moneys paid to such persons having been kept by the clerk of the Shawnee council, and all payments made by said guardians were made to the wards upon orders issued by said council, the order when produced by the guardian and presented to the council being evidence of payment. In a majority of the cases full settlements have been made in this manner as was shown by the books of the council, which were produced, and which appear to have been kept in a business-like and systematic manner.

The testimony taken in these cases is arranged and numbered in even numbers from 100 to 170, inclusive, to correspond with the pages of the docket upon which the cases are placed. Two of these numbers embrace joint guardianships—two persons acting in conjunction.

*No. 100.—Case of Thomas Johnson, guardian.*

Thomas Johnson receipted to the United States for \$1,957 50. The testimony of S. M. Cornatzer, the clerk of the Shawnee council, was taken. He testified that he was fifty-one years of age, and had been employed as clerk of the Shawnee council since the 20th of June, 1856. He stated that a record was kept of the appointment of guardians and money paid to them. He produced the books and showed that a settlement had been made by this guardian in full by his presenting orders drawn upon him by the council—his having possession of the orders being evidence sufficient that he had paid them.

*No. 102.—Case of John Big John, guardian.*

John Big John receipted to the United States for \$90. The testimony of Cornatzer, clerk of the council, shows settlement in full by the presentation of orders drawn upon him by the council on the 22d of August, 1860.

*No. 104.—Case of Jackson Rogers, guardian.*

Jackson Rogers receipted to the United States for \$225. The books of the council, verified by the oath of the clerk, Cornatzer, shows final settlement in full August 21, 1860.

*No. 106.—Case of Lewis McLane, guardian.*

Lewis McLane receipted to the United States for \$90. Cornatzer testified that he had no knowledge of McLane having made settlement. The books show no settlement. McLane is dead. Lewis McLane and one of the wards are living; does not know about Elizabeth Thoksemo. Cornatzer thinks Lewis was a nephew of the guardian; he knows nothing more about the case.

*No. 108.—Case of Cyprian Chouteau, guardian.*

Cyprian Chouteau receipted to the United States for \$3,033 50. He was notified in Kansas City on the 23d May ultimo, by leaving a citation and list of wards with him. He appeared before the commission; was sworn; acknowledges receipt of money from chiefs as charged by the United States; testifies that James and William Francis were half-brothers of his wife, and their money was placed in his hands with instructions to furnish them with such articles as they might need;

they were going to school, part of the time to the Quaker and part of the time to the Methodist missions. He presented in evidence a book which he stated was a book he kept, and according to which James Francis was entitled to \$456, the amount received for him, annuities, &c. He paid him that in full, and also a surplus out of his own money, paying him in all \$481 75; William Francis he paid the full amount, \$456. He also presented receipt of Maria Francis, dated Kansas City, May 22, 1871, for \$10, her share of the annuity. He also presented in evidence a certificate from the chiefs, stating, in substance, that they never heard any complaint from any of the inebriates for whom he had received money, and who were included in the list making up the amount stated in the beginning. This receipt is signed by Graham Rogers, principal chief; Charles Tucker, assistant chief; and Samuel M. Cornatzer, clerk of the council. He also presented a receipt from James Elliott, dated Shawnee, Kansas, May 24, 1871, for \$45, received from guardian.

The commission were satisfied, by conferring with the chiefs and clerk of the council, that Mr. Chouteau has discharged his individual guardianship satisfactorily to the Indians interested.

*No. 110.—Case of Joseph Parks, guardian.*

Joseph Parks receipted to the United States for \$21,873. Samuel M. Cornatzer, the clerk of the council, having in his possession and presenting as evidence the books of the council, testifies that after the death of Parks a settlement was made. Graham Rogers and John Swatzell acted as administrators appointed by the Shawnee council; A. S. Johnson and A. F. Gallup on the part of the estate; and Welles and Samuel M. Cornatzer, assessors. It was found that Parks had in his hands, at the time of his death, due to Shawnee orphans, the sum of \$6,903 84, and this amount was afterward retained by Superintendent Branch out of the Shawnee annuities, as he stated, by order of the Department, and the Shawnees have not been reimbursed yet by the estate of Parks. He left a daughter, who is now living in the Cherokee nation, and two granddaughters, one of whom is now the wife of Swatzell, and the other is the wife of Jos. Kilpatrick. Swatzell lives in Wyandotte County, Kansas, near Westport, Missouri. Parks left at his death valuable lands lying in Johnson County, Kansas.

*No. 112.—Case of P. Fish and Wm. Rogers, guardians.*

P. Fish and William Rogers, acting as joint-guardians, receipted for \$5,409 50. The commission did not obtain any testimony that was definite upon this subject.

*No. 114.—Case of William Donaldson, guardian.*

William Donaldson receipted to the United States for \$3,342 50. The testimony of Graham Rogers and the clerk of the council is that a final settlement was made by the guardian in the usual manner, by the presentation of orders.

*No. 116.—Case of S. M. Cornatzer, guardian.*

S. M. Cornatzer receipted to the United States for \$2,120. He testifies to a full settlement with the exception of \$160, and his testimony

was corroborated by the books of the council and by the testimony of Graham Rogers, chief. On the 3d of July instant, S. M. Cornatzer paid to W. R. Irwin, who receipted for the same, the \$160 above mentioned, which was money in the hands of said guardian belonging to the following persons, viz: Thomas Pierce, \$45; Harriet Pierce, \$45; Peryann Henry, \$45; Ship Tuckless, \$25. Mr. Cornatzer stated under oath that he did not know where these parties lived; never did know them; he was appointed to receive the money, but never knew the wards; received the money July the 6th, 1859; the presumption is, that the wards live among the Black Bob band; he paid an order, in the case of Ship Tuckless, for \$20, to Henry Blackfish, believing it to be Ship Tuckless, and he thinks so still.

No. 118.—*Case of Charles Fish, guardian.*

Charles Fish receipted to the United States for \$632. The testimony of Cornatzer and Graham Rogers is, that this amount was retained from the Shawnee annuities by Superintendent Branch.

No. 120.—*Case of Lewis Dougherty, guardian.*

Lewis Dougherty receipted to the United States for \$135. Cornatzer and Graham Rogers testify that this amount was retained out of the Shawnee annuities by Superintendent Branch.

No. 122.—*Case of Joseph Flint, guardian.*

Joseph Flint receipted to the United States for \$316. Cornatzer testifies that the books showed at the last settlement that Flint was indebted \$45, but afterward Flint appeared, and it was understood by the commission that he had made settlement satisfactory to the Shawnee authorities.

No. 124.—*Case of Blackwolf, guardian.*

Blackwolf receipted to the United States for \$90. The books show a settlement of the account of this guardian in full August 22, 1870.

No. 126.—*Case of David Dougherty, guardian.*

David Dougherty receipted to the United States for \$90. The books of the council, verified by the oath of the clerk, show settlement in full.

No. 128.—*Case of Moses Silverheels, guardian.*

Moses Silverheels receipted to the United States for \$811 50. The books of the council, verified by the clerk, show that this guardian made settlement in full before his death.

No. 130.—*Case of Black Bob, guardian.*

Black Bob receipted to the United States for \$270. The testimony of Graham Rogers and Cornatzer was to the effect that the money due from Black Bob to his wards was retained by Superintendent Branch.

No. 132.—*Case of Coffee, (Greenfeather,) guardian.*

Coffee (Greenfeather) receipted to the United States for \$1,016. It was

shown by the testimony of Graham Rogers and Cornatzer that money, to the amount of the funds in the hands of this guardian, belonging to orphans was retained by Superintendent Branch.

No. 134.—*Case of George Dougherty, guardian.*

George Dougherty receipted to the United States for \$452. The books of the council, verified by the oath of the clerk, show that the guardian made full settlement October 18, 1870.

No. 136.—*Case of C. Chouteau and C. Bluejacket, guardians.*

Cyprian Chouteau and Charles Bluejacket receipted to the United States as joint guardians for \$9,282. The testimony of Mr. Chouteau, and of the chiefs and clerk of the council, and the evidence presented by the books, and also the evidence of Charles Bluejacket, shows that Chouteau made settlement in full for his share of this guardianship, and that there is still due from Bluejacket money belonging to wards, to the amount of \$204. This money was demanded by the commission, but Bluejacket stated that he was not prepared to pay it; thought he would be by the 15th September next. He was directed by the commission to deposit the sum in an United States depository to the credit of the United States, and forward duplicate certificates of deposit to the Office of Indian Affairs. The money in his hands is as follows: \$102 belonging to Stephen Hays; \$102 belonging to John Baptiste, jr. The testimony of the parties named was, that they do not know what became of Stephen Hays. He left Kansas City with some soldiers in 1863; are not certain that he has been heard of since. John Baptiste, jr., is dead.

No. 138.—*Case of Caleb Harvey, guardian.*

Caleb Harvey receipted to the United States for \$113. He is dead. The books of the Shawnee council, verified by the oath of the clerk, show that he made full settlement before his death.

No. 140.—*Case of George Bigknife, guardian.*

George Bigknife receipted to the United States for \$293. The books of the council, verified by the oath of the clerk, show that he made settlement in full August 21, 1860.

No. 142.—*Case of Charles Bluejacket, guardian.*

Charles Bluejacket receipted to the United States, individually, as guardian, for \$1,196. The books of the council, verified by the oath of the clerk, show that he made full settlement on the 29th of May, 1871. He made this settlement in the usual manner, by presenting orders drawn on him by the council in favor of the wards.

No. 144.—*Case of James Tooley, guardian.*

James Tooley receipted to the United States for \$203. The books of the council show a full settlement in this case. Cornatzer stated that when the heirs, James, Margaret, and William sold their father's real estate, Jonathan Gore attended to the matters for them, and left the

money with Frederick Chouteau. It was paid over to the proper parties.

No. 146.—*Case of Charles Tooley, guardian.*

Charles Tooley receipted to the United States for \$—. Cornatzer swears that Charles and James Tooley are the same person, and the statement made in the case of James covers this case.

No. 148.—*Case of Lazarus Flint, guardian.*

Lazarus Flint receipted to the United States for \$45. The books of the council show settlement in full.

No. 150.—*Case of James McLane, guardian.*

James McLane receipted to the United States for \$113. Cornatzer testifies that Mc Lane never made a settlement with the council; nor does he remember that there was even an order called for on him. He is dead; was guardian for his grandchild, Lewis McLane, who lived with him part of the time; he took the boy when he was very small, his mother and father being dead; kept him some six or seven years, until guardian died.

No. 152.—*Case of Pascal Fish, guardian.*

Pascal Fish receipted to the United States for \$226. Cornatzer, clerk of the council, testifies that this amount was retained from the Shawnee annuities by Superintendent Branch at the payment in 1863; Branch stating that he had authority to retain money from the annuities to secure wards in cases where he deemed the guardians unreliable.

No. 154.—*Case of G. W. M. Welles, guardian.*

G. W. M. Welles receipted to the United States for \$316. The testimony of Cornatzer, clerk of the council, corroborated by Graham Rogers and Charles Tucker is, that at the last payment made to the Shawnees, Mr. Branch, superintendent of Indian affairs, payment being made at De Soto in 1863, stated that he was authorized by the Department to examine the accounts of guardians, and those considered by him good might still retain their guardianship; but those who were not good would be deprived of their trust, and he would take the amount of money out of the annuities, the amount that had been placed in their hands for the benefit of wards to indemnify said wards. Welles never made any settlement with the council; he was guardian for his brother and sister; he robbed the safe of the Shawnees and left the country; his whereabouts is unknown.

No. 156.—*Case of Charles Tucker, guardian.*

Charles Tucker receipted to the United States for \$314 50. Cornatzer, clerk of the council, testifies that he settled in full, the last payment being made by him July 1, 1871, of \$185 50, to his ward, Hiram Johnson. Hiram Johnson was also before the commission and testified to the receipt of the amount; also to his having previously received money, making in all the amount paid to Charles Tucker by the United States for him.

No. 158.—*Case of William Rogers, guardian.*

William Rogers receipted to the United States for \$452. The books of the council, verified by the oath of the clerk, show settlement in full October 3, 1859.

No. 160.—*Case of George Francis, guardian.*

George Francis receipted to the United States for \$113. The books of the council show settlement in full August 2, 1860.

No. 162.—*Case of Matthew King, guardian.*

Matthew King receipted to the United States for \$1,191. The testimony of Cornatzer, corroborated by Graham, Rogers, Charles Tucker, and Charles Bluejacket is, that King never settled with the council. The council drew orders on him, some of which were paid and some not. He died about two years ago; left some property; his heirs are Catharine, his wife; James; Catharine, his daughter; Isabella and Frederick; they live some five miles from the residence of Graham Rogers; possess nothing except some personal property; don't know whether they have sold all their real estate or not. Rogers testifies to having urged the council to have him brought before them by force, if necessary, but the council thought it would be too rough to use force.

No. 164.—*Case of Wilson Rogers.*

Wilson Rogers receipted to the United States for \$429. The books of the council show his account to be settled in full. Cornatzer testifies that he was administrator of the estate and settled it up, paying the heirs in the presence of the council; deceased was a cousin of the wife of witness, and the heirs preferred him to settle up the estate; he charged them nothing.

No. 166.—*Case of Joseph Barnett, guardian.*

Joseph Barnett receipted to the United States for \$494. No settlement was ever made by this guardian, but an amount equal to the amount received by him for wards was retained by Superintendent Branch in 1863. Guardian is dead; his brother Cassius stated in the council that he, Cassius, had received all the money from Joseph. Cassius is somewhere on Grand River, Indian Territory. The two daughters of deceased are married, Mary and Louisa. Mary is living, Louisa is dead. Cassius is not worth any property.

No. 168.—*Case of Graham Rogers, guardian.*

Graham Rogers receipted to the United States for \$429. The books of the council show settlement in full.

No. 170.—*Case of Joseph Day, guardian.*

Joseph Day receipted to the United States for \$542. He never made a settlement with the council. An amount equal to the sum placed in his hands for wards was retained by Superintendent Branch, according to the testimony of Cornatzer. It appears in the testimony referred to

in the foregoing that, at the last payment that was made to the Shawnee Indians by the United States, Mr. Branch, the superintendent of Indian affairs, paid the money at De Soto in 1863, and he stated to the Shawnees that he had instructions from Washington and was authorized by the Department to examine the accounts of guardians, and those who were good might still retain their guardianship, but those who were not good the Government would deprive of their trust, and he would take the money out of the payment, which he did, retaining, as appears by the testimony, out of the Shawnee annuities money to the amount of \$10,534 84. This total does not include the amount received by Pascal Fish and William Rogers, joint guardians, in regard to which the commission obtained no definite testimony. If this amount was also retained by Branch it would make the total amount retained by him out of the Shawnee annuities, \$15,936 34. All the money received by the commission from Shawnee guardians was the sum of \$160 received from S. M. Cornatzer, hereinbefore referred to, and a certificate of deposit to the credit of the United States for this amount will be furnished to the Office of Indian Affairs by Mr. Irwin.

All of which is respectfully submitted.

Very respectfully, your obedient servants,

W. R. IRWIN,  
O. S. WITHERILL,  
*Commissioners.*

Hon. ELY S. PARKER,  
*Commissioner of Indian Affairs.*

#### D.

#### REPORT OF THE SPECIAL COMMISSION IN THE MATTER OF CHIPPEWA SCRIP, 1871.

ST. PAUL, MINNESOTA,  
*September 4, 1871.*

SIR: The undersigned, appointed by the Hon. E. S. Parker, late Commissioner of Indian Affairs, by the direction of the honorable Secretary of the Interior, a special commission to investigate the matter of scrip issued under the treaty of the United States with the Chippewas of Lake Superior and the Mississippi, made at La Pointe, Wisconsin, September 30, 1854, and also to ascertain what persons are still beneficiaries under the seventh clause of the second article of said treaty, as also who are beneficiaries under article eight of the treaty made with the Red Lake and Pembina bands of Chippewas, at the Old Crossing of Red Lake River, on the 2d day of April, 1863, and article seven of the supplementary treaty of the 12th of April, 1864, most respectfully report as follows:

That soon after their appointment two of the commissioners, Henry S. Neal and R. F. Crowell, proceeded to Fort Abercrombie, on the Red River, and from thence down that river to Pembina, from Pembina to St. Joseph, thirty miles up the Pembina River, thence back and to White Earth, and across to Leech Lake, where they were joined by E. P. Smith; thence to Crow Wing, St. Cloud, and St. Paul. After remaining some days in St. Paul they proceeded to Bayfield, Wisconsin, with Major S. N. Clark, special commissioner so far as the matters under

investigation affect persons claiming to belong to the Chippewas of Lake Superior.

At the various points named, as also at intermediate points, they made all the investigations in their power, in accordance with their instructions, both as to scrip already issued and as to those who are still entitled to receive the same as beneficiaries under the treaties named; and so far as practicable they saw the parties in person, having early learned that but little reliability could be placed upon the written applications which were filed with them, while that, almost without exception, these persons, though ignorant, are truthful and will not, even to advance their own interests, make false statements in regard to themselves or their families, when fully informed in such a way as to clearly comprehend.

The attention of the commission was called in the outset to the terms of the treaty of 1854, in order to ascertain its intent and also its limitations. The article of the treaty in question reads as follows:

ARTICLE 7. "Each head of a family or single person, over the age of twenty-one (21) years, at the present time, of the mixed-bloods belonging to the Chippewas of Lake Superior, shall be entitled to eighty (80) acres of land, to be selected by them under direction of the President, and which shall be secured to them by patent in the usual form.

The intent of this is evidently in the interest of the half-breeds, relatives of the Indians. We find it was made part of the treaty at the instigation of some of the most intelligent of those mixed-bloods, who hoped that all of their class might be thus induced to abandon their roving lives and settle permanently upon their own farms, and so come directly under the influences of Christianity and civilization. Two clauses in this article require special attention, for on their construction depends the question of the legality of a large amount of scrip already issued, and an amount equally large for which applications are now pending. First, Who belong to the Chippewas of Lake Superior? Second, Who is properly called the head of a family? In the determination of these questions the following considerations are respectfully submitted:

Does the term "Chippewas of Lake Superior" include all those whose ancestors may at any time have resided near that lake, or may have passed over that country in moving westward? Or were the Chippewas of Lake Superior a distinct band from other Chippewas, and known as such and so recognized by the Government of the United States at the date of the treaty?

Your commission believe they were thus distinct, and that they comprised the bands then residing at or near Lake Superior. We are led to this conclusion by several considerations:

First. By the distinct names and locations already given at that time to the different bands of Chippewas. At some period quite remote it is highly probable that the Chippewa Nation was mainly settled along the shores of Lake Superior and on the banks of the Mississippi River. From this region they have been wandering for generations and scattering until now they are divided into five distinct bodies or tribes, some of them separated from each other by the breadth of Wisconsin and Minnesota. They are now known and were so called at the date of the treaty, respectively, "Chippewas of Lake Superior," "Chippewas of the Mississippi," "Chippewas of the Pillager Band," and "Chippewas of the Red Lake and Pembina Bands."

Another ground for the construction given to the treaty by your commissioners is found in the treaty itself, in which the distinction between Chippewas of Lake Superior and Chippewas of the Mississippi

is kept up throughout, and especially in the fourth clause of article 8, in which it is expressly declared who are Chippewas of Lake Superior, as follows:

It is understood that the Indians who are parties to this treaty, except the Chippewas of the Mississippi, shall hereafter be known as Chippewas of Lake Superior, and are specified in the thirteenth article of said treaty as follows: "La Pointe Band," "Ontonagon Band," "L'Anse Band," "Vieux De Sert Band," "Grand Portage Band," "Fond du Lac Band," "Lac Court Oreille Band," "Lac du Flambeau Band," "Bois Forte Band." This declaration in the instrument itself would seem to be sufficient, and would have been so regarded by your commission, except from the entirely different construction which has been given to it by interested parties. A construction which seems to have been at least acquiesced in by the Indian Bureau, and as a consequence of which not less than seven hundred persons, whose parents and ancestors for generations have been separated by hundreds of miles from the Chippewas of Lake Superior without having any tribal relations with the Indians there, have made applications, many of them successfully, for the donation of eighty acres of land on the ground that they are Chippewas of Lake Superior. This fact led your commission to inquire further. They find that other treaties have also recognized the division of the Chippewas into five bodies as above. The distinction between the Chippewas of Lake Superior and the Chippewas of the Mississippi was recognized by the Government as early as 1837, when a treaty was made with the Chippewas of the Mississippi, at Saint Peter, in which the Lake Superior bands were not included, or even consulted. In the fifth article of the treaty made at La Pointe, Wisconsin, October 4, 1842, the same distinction is clearly recognized as then existing between the Chippewas of the Mississippi and the Chippewas of Lake Superior.

A treaty was made February 22, 1855, with the Pillager and Mississippi Chippewas, which provides for the mixed-bloods of those two tribes, while that of October 2, 1863, made at the Old Crossing of the Red Lake River, makes provision for the mixed-bloods of the Red Lake and Pembina bands, so that by these three treaties the mixed-bloods of each of the Chippewa bands were provided for in the clearly-defined manner set forth in each of said treaties; and it is respectfully submitted that it could not have been the intention of the treaty-making powers that the beneficiaries under one treaty should make any claim to the provisions for the mixed-bloods of another band under any other treaty, by reason of remote ancestral blood.

In further proof that it was the intent of this treaty to limit the number of its beneficiaries to those who were residing near Lake Superior, or who were born there and had removed elsewhere, still holding some connection with, and relation to, that band, your commission call attention to the list of mixed-bloods belonging to the Chippewas of Lake Superior, made by their agent in 1855, and which was extended to include all persons entitled to land under this provision of the treaty.

It was generally known among the mixed-bloods that such list was to be prepared, and that on its completion those found entitled would be authorized to select land as provided for. We have abundant reason for believing that great care was exercised in this enrollment, and that, with few exceptions, of persons living at a distance or temporarily absent, this list contained all who were beneficiaries under this provision of said treaty; and we are confirmed in this judgment by the fact that it was held by all parties at that time as complete and final, and so continued to be held, by common consent, for eight years thereafter.

As to the second question, who is the "head of the family?" your commission believe that legal usage has sufficiently defined this term, but the latitude given to it by applicants and their attorneys, and which has had the endorsement by consent, at least, of the Indian Bureau, make it necessary for the commission to declare their opinion and its grounds.

The treaty provides that each head of a family, or single person over twenty-one years of age, at the present time, shall be entitled to eighty acres of land, &c. We hold that in these two clauses, namely, "each head of a family" and "single person over twenty-one years of age," only three classes of persons are designated: First. All male adults, married or unmarried. Second. All female adults not married. Third. All males having families, and females who, unmarried or widowed, have families and are not adults. Hundreds of applicants for this scrip, through their attorneys, have held that where husband and wife were both living, they were each entitled to scrip as the head of a family. Your commission holds to the legal and common usage of recognizing the man as the head of the house. That this construction of the treaty was the one accepted at the time of its ratification is evident from the fact that when the list was being prepared by Agent Gilbert no one claimed the double right for man and wife; and furthermore, that this construction was not called in question for eight years thereafter. Another fact shows how this clause was construed in 1855. There were found at Lake Superior certain white men who were heads of mixed-blood families. In order to give these families the benefit of the treaty, it was necessary that the husband or wife should be enrolled, and it was considered as doing less violence to the treaty to enroll the white husband and father as a mixed-blood, than to call the wife the head of the family. Upon this construction of the intention and limitations of this treaty has your commission proceeded in the work of determining who is now a proper claimant under the treaty, and also what issues of scrip in the past have been properly made; and it is a matter of such grave surprise to us when we find any other construction has been allowed that we are persuaded that these questions, which we have considered as above, can never have been laid, in their connections and proper bearings, before the Department of the Interior for consideration and decision.

Referring to the instructions to investigate the validity of scrip already issued under this treaty, we would invite attention to the following facts: The aforesaid list of the mixed-bloods of the Chippewas of Lake Superior, prepared by Agent Gilbert in 1855, contained two hundred and eighty-two names, and scrip was issued to the claimants in less than one year thereafter. By authority of the Department, this scrip was given directly by Agent Gilbert to the claimant, without the formality of an application, and is that which bears the date of May 10, 1856, and September 8, or 10, 1856.

Your commission believe that these parties were entitled under the treaty, with the possible exception of the "white men" referred to above, who were heads of families of mixed-bloods. A strictly legal construction of the treaty would not have allowed the enrollment of such claim, but on grounds of equity it addresses itself to the favorable consideration of those who pass judgment thereon. That Agent Gilbert himself did not put the claims of those white men upon equality with those of the half-breeds is evident from the fact that he collected from them, or allowed to be collected, a commission of \$25 each before the delivery of the scrip. Persons of this class who refused or were unable to pay this commission did not receive their scrip.

We also find that those of the half-breeds who claimed their scrip received it without paying any commission, and that others who for any reason failed to see Gilbert and demand the scrip which he held in hand for them did not receive it, it not being considered by Gilbert as a part of his official duty to acquaint his wards with the fact that he held property in trust for them. We find that so generally was this by Gilbert considered as final, and a fulfillment of the treaty stipulations in regard to land for the Chippewas of Lake Superior, that for eight years thereafter, from 1856 to 1864, no further claims were made under this treaty.

In 1864 it was discovered that Chippewa scrip would be desirable property; for though on its face it is expressly declared available for the original applicant only, and its transfer forbidden, it became nevertheless an article of trade, and was kept on sale by brokers and at the principal banks of St. Paul.

The discovery seems to have been made at one and the same time by certain parties in St. Paul, and by Luther E. Webb, Indian Agent, at Lake Superior, that the provisions of this treaty were much more extended as to the number and qualifications of its beneficiaries than as yet had been supposed.

This enlargement of the provisions of the treaty was based upon the new construction now given to it. The classes "belonging to the Chippewas" of Lake Superior, "and each head of a family," were made to include only "Chippewa half-breeds" anywhere, on the ground that all Chippewas are related to each other, therefore can be said to belong to the Chippewas of Lake Superior. "Each head of a family" was made to mean both husband and wife of the same family. Why, then, this construction was authorized by the Department of the Interior, your commission has no means of knowing, but it seems impossible that so large an issue of new scrip should have been made, without raising such inquiry as would easily have led to the discovery of the work going on.

This work of obtaining new applicants for scrip, which now assumed, and has since held, the proportions of a regular business, was undertaken almost simultaneously at Lake Superior and St. Paul. Agent Webb had in his employ two mixed-bloods, James Chapman, clerk, and Joseph Gurnoe, interpreter, and one T. J. L. Tyler, nominally employed as a farmer on the reservation—a reckless and dissipated man, and a convenient tool of fraud.

The election of this man Tyler as justice of the peace for the township of Bayfield, Wisconsin, was secured, and he was thus qualified to act his part in this scrip business. Chapman and Gurnoe visited the different bands of Chippewas of Lake Superior, and also the Chippewas of Michigan at Sault de Sainté Marie and Mackinac, and calling upon the mixed-bloods resident or sojourning at these various places, obtained, for a small consideration, their consent to the use of their names in applications for scrip. The names of parties whom they failed to see were taken without permission, and the names of some full-blood Indians are entered upon the list.

The fact that a person had been dead for years made no difference; his name was equally valuable. In proof of this we instance two cases, that of Bela J. Chapman and M. Morringer. Chapman was an enlisted soldier; he was killed at the battle of Gettysburgh, July 4, 1863; his application purported to have been taken in the ordinary way, ———, 1864. Chapman and Gurnoe are identifying witnesses, and certify that this ——— day ——— said Bela J. Chapman appeared before him and subscribed under oath to the facts set forth in the application. For the

facts in the case of M. Morringer we respectfully refer you to the following affidavits :

STATE OF WISCONSIN, *County of Douglas, ss :*

D. George Morrison, being first duly sworn, deposes and says that he was acquainted with Michael Morringer, who, in the year 1862, lived at Fond du Lac, Saint Louis County, Minnesota ; that I had been acquainted with him for eight years prior to that time ; that in the spring or summer of 1862 said Morringer was drowned in the St. Louis River. Said Michael Morringer was a mixed-blood belonging to the Chippewas of Lake Superior, and was forty-five or fifty years of age at the time of his death, and was entitled to scrip under the treaty of September 30, 1854, with the Chippewas of Lake Superior.

Deponent further states that he is a mixed-blood, belonging to the Chippewas of Lake Superior, and that he has never been acquainted with or heard of any other person of the name of Michael Morringer, and believes that the application shown him bearing the name of Michael Morringer, of Fond du Lac, and witnessed by Joseph Gurnoe and John W. Bell, and executed February 4, 1865, before L. E. Webb, Indian Agent, relates to the aforesaid Michael Morringer who was drowned in the year 1862.

D. GEORGE MORRISON.

Sworn to and subscribed before me, this 28th day of July, 1871, at Superior City, Wisconsin.

S. N. CLARK,  
*United States Indian Agent.*

STATE OF WISCONSIN, *Douglas County, ss :*

Vincent Roy, jr., a mixed-blood, belonging to the Chippewas of Lake Superior, being duly sworn, deposes and says that he was acquainted with Michael Morringer, referred to in the above affidavit of D. George Morrison, for about seventeen years prior to the year 1862 ; and further, that having read the above affidavit of D. George Morrison, he states that he is acquainted with the facts as therein set forth, and knows them to be true.

VINCENT ROY, JR.

Sworn to and subscribed before me, this 28th day of July, A. D. 1871, at Superior City, Wisconsin.

S. N. CLARK,  
*United States Indian Agent.*

I hereby certify that I am well acquainted with above affiants, D. George Morrison and Vincent Roy, jr., and that their statements are entitled to full credit and belief.

S. N. CLARK,  
*United States Indian Agent.*

DULUTH, MINNESOTA, July 29, 1871.

In this connection we would also, most respectfully, invite attention to the evidence of Joseph Gurnoe, given before the commission on these applications, and which is embodied in Schedule A, herewith forwarded. In this evidence he states that he protested against signing the applications of certain persons, but that he was constrained to do so because he thought himself obliged to obey the instructions of his employer, and that all which he did sign were signed under instructions from Agent Webb. We instance one case only in this report—referring to said schedule for abundant others—that of Peter Young, whom Gurnoe swore he knew to be a full-blooded Indian. This man being absent from Bayfield at the time we were there making our investigations, we were obliged to procure other evidence than his own statements, and present the affidavits of John Buffalo, an educated chief of the Red Cliff band of Lake Superior Chippewas, (filed herewith and numbered 16, Schedule A,) and is as follows :

John Buffalo, being first duly sworn, says that *Osh-ke-mun-na*, known in English as Peter Young, is well known to this affiant as a full-blooded Indian, without any admixture of white blood ; that when General Luther E. Webb was Indian Agent at Bayfield, he called Peter into his office and induced him to sign an application for scrip under the La Pointe treaty of September 30, 1854 ; that said Peter did not pretend to be of white or black admixture, but of pure Chippewa blood ; that said Webb paid him \$25

for his application; that said Peter has not received any scrip or any further consideration for the same. This adiant was present in Webb's office when said application was signed and said money was paid.

JOHN BUFFALO.

Sworn to and subscribed before me, &c.

S. N. CLARK,  
United States Indian Agent.

It also appears that Mr. Webb furnished Chapman and Gurnoe with the money they expended in this matter, and that, so far as Gurnoe is concerned, all the remuneration he ever received from any one for the services he rendered was the removal by Webb of an incumbrance of about \$250 on his dwelling-house and lot. What Chapman received we are not fully advised. In this manner a large list of names was secured, out of which over two hundred applications were prepared under Webb's directions, upon blanks furnished by him. These were signed by said Chapman and Gurnoe as identifying witnesses, who purport to swear that they knew the applicants, and that they are beneficiaries under the provisions of this treaty. T. J. L. Tyler then signed the *jurat* as justice of the peace, while Agent Webb certified to the character of the witnesses and that they are worthy of credit and belief, he at the same time being fully cognizant of the manner in which the applications had been prepared. In many of these applications there was not a pretense of complying with the provisions of the treaty, there being no averment concerning the status of the applicant whatever, a defect which the most cursory examination by the officers at Washington would not have failed to discover.

Powers of attorney, by each supposed applicant for scrip, and authorizing the receiving and disposing of the same, were executed in blank, in like manner, by Chapman and Gurnoe.

Gurnoe testifies that he cannot remember that any oath was administered by Justice Tyler on any of the applications certified by that person, and he swears positively that no oath was administered to him by Webb on the applications signed in Washington. The applications were forwarded or taken by Webb to Washington, who also retained possession of the powers of attorney, and the scrip was promptly issued and placed in his hands.

In February, 1865, Webb and Gurnoe were together in Washington. Webb had with him a large roll of applications for scrip, which needed other signatures to make them complete. Gurnoe could sign these applications and also witness them, while Webb, *ex officio* having the right to administer oaths within the bounds of his agency; could make it appear that they had been verified by a proper use of the *locus in quo*; but two witnesses were required, and Chapman was at his home in Wisconsin.

At this juncture, John W. Bell, a highly respectable citizen of La Pointe, was in Washington, and it was thought he might be induced to assist in this scheme. Accordingly, he was approached by Gurnoe, and asked to become the second identifying witness, and he was offered an interest in the scrip issued if he would consent to do so. This he refused; but upon examination, believing himself to be acquainted with some of the parties, he witnessed for them. He furthermore states that none of the parties were in Washington at that time, and he does not know of the making of said applications, or of the issuance of scrip thereon. (See his certificate, herewith forwarded, No. 23 A.) The applications thus signed by him number 199, and appear in Schedule A.
